Independent Auditor's Report on Review of Interim Financial Information

To the Shareholders of MMM Capital Public Company Limited

I have reviewed the accompanying consolidated financial information of MMM Capital Public Company Limited and its subsidiaries (the Group), which comprises the consolidated statement of financial position as at 30 September 2026, the related consolidated statements of income and comprehensive income for the three-month and nine-month periods then ended, and the related consolidated statements of changes in shareholders' equity and cash flows for the nine-month period then ended, as well as the condensed notes to the interim consolidated financial statements. I have also reviewed the separate financial information of MMM Capital Public Company Limited for the same periods (collectively "the interim financial information"). Management is responsible for the preparation and presentation of this interim financial information in accordance with Thai Accounting Standard 34 Interim Financial Reporting. My responsibility is to express a conclusion on this interim financial information based on my review.

Scope of Review

I conducted my review in accordance with Thai Standard on Review Engagements 2410, Review of Interim Financial Information Performed by the Independent Auditor of the Entity. A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with the standards as applicable to auditing issued by the Federation of Accounting Professions and consequently does not enable me to obtain assurance that I would become aware of all significant matters that might be identified in an audit. Accordingly, I do not express an audit opinion.

Conclusion

Based on my review, nothing has come to my attention that causes me to believe that the accompanying interim financial information is not prepared, in all material respects, in accordance with Thai Accounting Standard 34 Interim Financial Reporting.

MMM Capital Public Company Limited and its subsidiaries
Condensed notes to interim financial statements
For the three-month and nine-month periods ended 30 September 2026

1. General information

1.1 Corporate information

MMM Capital Public Company Limited ("the Company") is a public company incorporated and domiciled in Thailand. Its parent company is MM Capital Holding Co., Ltd., which was incorporated in Thailand. The Company is principally engaged in providing real estate management services and acting as a real estate sales agent. The registered office of the Company is at No. 89/2, Soi Nathong, Ratchadaphisek Road, Din Daeng, Bangkok.

1.2 Basis for the preparation of interim financial statements

These interim financial statements are prepared in accordance with Thai Accounting Standard No. 34 Interim Financial Reporting, with the Company presenting condensed interim financial statements. The Company has presented the statements of financial position, income, comprehensive income, changes in shareholders' equity, and cash flows in the same format as that used for the annual financial statements and has presented notes to the interim financial statements on a condensed basis.

The interim financial statements are intended to provide information additional to that included in the latest annual financial statements. Accordingly, they focus on new activities, events and circumstances so as not to duplicate information previously reported. These interim financial statements should therefore be read in conjunction with the latest annual financial statements.

The interim financial statements in Thai language are the official statutory financial statements of the Company. The interim financial statements in English language have been translated from the Thai language interim financial statements.

1.3 Basis of consolidation

a) The consolidated financial statements include the financial statements of MMM Capital Public Company Limited ("the Company") and the following subsidiary companies ("the subsidiaries") (collectively as "the Group"):

Subsidiaries directly held by the Company

Company's name	Nature of business	Country of incorporation	Percentage of shareholding	
			30 September 2026	31 December 2025
			(Percent)	(Percent)
MMM Mega Fin Holding Company Limited	Holding company	Thailand	100	-
Deva Link Development Company Limited	Holding company	Thailand	100	-

Indirect subsidiaries held by the Company's subsidiaries

Company's name	Nature of business	Country of incorporation	Percentage of shareholding	
			30 September 2026	31 December 2025
			(Percent)	(Percent)
Subsidiary held by MMM Mega Fin Holding Company Limited				
Housing Assist Capital Company Limited	Provide real estate-backed loans to retail customers with creditworthiness, secured by a mortgage over such real estate	Thailand	100	-
Subsidiaries held by Deva Link Development Company Limited				
Praksa Link Estate Company Limited	Property development	Thailand	100	-
Bangplee Link Estate Company Limited	Property development	Thailand	100	-

b) The Company is deemed to have control over an investee or subsidiaries if it has rights, or is exposed, to variable returns from its involvement with the investee, and it has the ability to direct the activities that affect the amount of its returns.

c) Subsidiaries are fully consolidated, being the date on which the Company obtains control, and continue to be consolidated until the date when such control ceases.

d) The financial statements of the subsidiaries are prepared using the same significant accounting policies as the Company.

e) Material balances and transactions between the Group have been eliminated from the consolidated financial statements.

1.4 The separate financial statements present investments in subsidiaries under the cost method.

1.5 Accounting policies

The interim financial statements are prepared using the same accounting policies and methods of computation as were used for the financial statements for the year ended 31 December 2025. However, in the current period, the Group adopts the following accounting policies for recording its transactions.

Investments in subsidiaries

Investments in subsidiaries are accounted for in the separate financial statements using the cost method.

Loans

The Group recognises interest income from loan on an accrual basis, using the effective interest rate method, over the term of the contract with the calculation based on the gross carrying amounts of receivables. The effective interest rate is the discount rate that estimates future cash flows over the expected life of the financial instrument by considering the discounted or excess of the asset acquisition and fees including costs that are part of the effective interest rate.

For loans that subsequently become credit-impaired, the Group recognises interest income by using the effective interest rate method, based on the net carrying amount of the receivables (gross book value net of allowance for expected credit loss). If the financial assets are not credit-impaired, the subsidiary recognises interest income with the calculation based on initial book value.

The revised financial reporting standards, which are effective for fiscal years beginning on or after 1 January 2026, do not have any significant impact on the Group's financial statements.

In addition, the Federation of Accounting Professions has issued new and revised financial reporting standards which will become effective in the future. The standard involving changes to key principles is summarised below.

TFRS 18 Presentation and Disclosure in Financial Statements

TFRS 18 will become effective for annual reporting periods beginning on or after 1 January 2028 and supersedes TAS 1, Presentation of Financial Statements. The standard introduces new requirements for classifying income and expenses into categories and presenting subtotals in the statement of profit or loss. It also requires disclosures of management-defined performance measures and includes new requirements for the aggregation and disaggregation of financial information.

The management of the Group is currently evaluating the impact of this standard on the financial statements in the year of initial adoption.

2. Related party transactions

During the periods, the Group had significant business transactions with related parties. Such transactions arose in the ordinary course of business and were concluded on commercial terms and bases agreed upon between the Group and those related parties. However, during the current period, there was significant change in the transfer pricing policies of transactions with related parties. The Company provided loan to its subsidiary bearing interest at a rate of 7% per annum.

Summaries of significant business transactions with related parties are as follows:

Deposits under real estate agent agreements

The deposit under real estate agent agreements serves as the principal guarantee for the owner's rights to the property. The Company is obliged to act as an agent for the sale of real estate to sell the real estate in the quantity and within the timeframe stipulated in the agreement. In the event that the Company is unable to find a buyer within the designated timeframe, the property owner has the right to forfeit the aforementioned deposit.

Deposit under real estate agent agreements - portion for property payment settlement

The deposit under real estate agent agreements - portion for property payment settlement serves as the principal guarantee provided to the property owner. The Company is obliged to act as an agent to sell the property in the quantity and within the timeframe stipulated in the agreement. If the Company is unable to secure a buyer within the specified time, the Company is obligated to complete the payment for the property upon the expiration of the agreed period. However, if the Company is unable to make payment by the specified due date, the property owners will issue a written notice requiring the Company to settle the outstanding payment within 30 - 60 days prior to forfeiting such deposits.

The Company has entered into sales management agreements, with purchase guarantees, with real estate companies, under which the Company must complete the sale of the property by the date specified in the agreement. As at 30 September 2026, the Company has no outstanding commitments to purchase the properties if it was unable to find buyers within the stipulated period (31 December 2025: Baht 33 million, payable within three months from the end of the reporting period).

6. Deposits under real estate sales management contracts

Deposits under real estate sales management contracts represent deposits placed for the full value of the real estate with the conditions that the Company holds the right to determine whether the owner of the real estate transfers ownership to the Company, the Company's customers, or any person designated by the Company, within the agreed upon period from the deposit date. However, should this period lapse, the Company is entitled to receive the transfer of ownership of the real estate within 30 days.

12. Earnings per share

Basic earnings per share is calculated by dividing profit for the period attributable to equity holders of the Company (excluding other comprehensive income) by the weighted average number of ordinary shares in issue during the period and the number of ordinary shares is adjusted as if the stock dividend has occurred at the beginning of the earliest period reported. As a result, the earnings per share for the three-month and nine-month periods ended 30 September 2025 were adjusted to give a comparative result.

Diluted earnings per share is calculated by dividing profit for the period attributable to equity holders of the Company (excluding other comprehensive income) by the weighted average number of ordinary shares in issue during the periods plus the weighted average number of ordinary shares which would need to be issued to convert all dilutive potential ordinary shares into ordinary shares. The calculation assumes that the conversion took place either at the beginning of the period or on the date the potential ordinary shares were issued.

The following table sets forth the computation of basic and diluted earnings per share:
