

Overview

NAKIVO Backup & Replication is an all-in-one data protection solution for virtual, physical, cloud, SaaS and NAS environments. A single web-based console covers backup, instant recovery, VM replication, site recovery and anti-ransomware protection with immutable storage — for VMware vSphere, Microsoft Hyper-V, Nutanix AHV, Proxmox VE, physical Windows/Linux servers, Amazon EC2, Microsoft 365 and NAS file shares. Free 24/7 support is included with every subscription license.

Backup	Recovery	Disaster Recovery	Anti-Ransomware
Virtual, physical, cloud, Microsoft 365 and NAS — agentless, incremental, app-aware	Instant VM boot, instant file & object recovery, P2V, bare-metal, cross-platform	VM replication, automated failover, Site Recovery workflows, real-time replication for VMware	Immutable storage, backup malware scan, encryption, 2FA, air-gapped tape
