

# D4

## SECTIONAL VALVE

 **hydro  
control**  
TECHNICAL CATALOGUE

**2<sup>nd</sup> edition D4.05**

---

**Additional information**

*This catalogue shows the product in the most standard configurations.  
Please contact Sales Dpt. for more detailed information or special request.*

**WARNING!**

*All specifications of this catalogue refer to the standard product at this date.  
Walvoil, oriented to a continuous improvement, reserves the right to  
discontinue, modify or revise the specifications, without notice.*

**WALVOIL IS NOT RESPONSIBLE FOR ANY DAMAGE CAUSED BY AN  
INCORRECT USE OF THE PRODUCT.**

### Applications

Numerous integrated valve features in addition to countless configuration options make D4 highly flexible and easily adaptable to the widest applications range. The valve is available with manual, direct electric, hydraulic remote, pneumatic, electrohydraulic and electropneumatic controls. Special versions for LS variable pumps can be realised on request. Suitable for applications including cranes and aerial platforms, compactors, hook and skip loaders, drilling machines, forklifts, wheel loaders, backhoe loaders and excavators max 7 t.

Following features are available on D4 family:

Direct electric control push push type.

Special auxiliary valve for Single acting/Double acting choice (tractor application).

Special inlet with Priority Steer function integrated for LS and CA systems (Fork lift trucks, Telehandler, Loaders).

Special circuit to regulate reduced flow on HPCO connection (Truck mounted cranes, stabilizers circuits).

Special inlet section for parallel valves connection (suitable for forest applications).

Boom Priority function (Wheel loaders)

Potentiometer and microswitch kits and Overcenter spool (Fork lift trucks).

## GENERAL SPECIFICATIONS

## Standard working conditions

Description	Value
Ambient operating temperature range	-40°C / +60°C
Kinematic viscosity range	10 ÷ 300 cSt
Max contamination level	9 (NAS 1638) - 20/18/15 (ISO 4406:1999)
Recommended filtration level	b10 > 75 (ISO 16889:2008)
Internal filter (on electroproportional valves pilot line)	30 µm

All information and diagrams in this catalogue refer to a mineral base oil VG46 at 50°C temperature (32 cSt kinematic viscosity)

## Fluid options

Types of fluid (according to ISO 6743/4) Oil and Solutions	Temperature (°C)		Compatible gasket
	min	max	
Mineral Oil HL, HM (or HLP acc. to DIN 51524)	-25	+80	NBR
Oil in water emulsions HFA	+5	+55	NBR
Water in oil emulsions HFB	+5	+55	NBR
Polyglycol-based aqueous solution HFC	-10	+60	NBR

For special applications and different fluids, please call our Technical Department.

**ORDER EXAMPLE**

D4/1: IR 009 150 A G04 W001A H001 F001A RP G04 01 PA 100 01 PB 120 TJ A G04

**TYPE:**  
**D4** product type  
**/1** working section number

- 1) INLET ARRANGEMENT: (page 10)**  
**IR 009** inlet side and valve type  
**150** setting (bar)  
**A G04** inlet position and available thread type

- 2) WORK SECTION ARRANGEMENT: (page 13)**  
**W001A** spool type  
**H001** spool actuation type  
**F001A** spool return action type  
**RP G04** type and thread section  
**01 PA 100** auxiliary valve (port A)  
**01 PB 120** auxiliary valve (port B)

- 3) OUTLET ARRANGEMENT: (page 35)**  
**TJ** outlet type  
**A G04** outlet position and available thread type

Ordering row 2 must be repeated for every work section

**Standard thread**

The connection ports size is indicated by an ordering code common for all Hydrocontrol products. Following table shows all available connections; for ordering code refer to table on page 44.

Ports	BSP (ISO - 228)	Code	UN-UNF (ISO - 725)	Code
<b>Inlet Port (P)</b>	G 1/2	<b>G04</b>	7/8" - 14 UNF	<b>U04</b>
<b>Ports (A - B)</b>	G 1/2	<b>G04</b>	7/8" - 14 UNF	<b>U04</b>
<b>Outlet (T) - Carry over (HPCO)</b>	G 1/2 - G 3/4	<b>G04 - G05</b>	7/8" - 14 UNF . 1"1/16 - 12 UNF	<b>U04 - U05</b>
<b>Hydraulic Pilot</b>	G 1/4	<b>G02</b>	9/16" - 18 UNF	<b>U02</b>
<b>Pneumatic Pilot</b>	G 1/8	-	NPTF 1/8-27	-

**Tie-rod kit classification (appendix "A")**

Tie rod kit allows the correct assembly of sectional valves. Tie rod's length depends on the number of sections; each valve is assembled with tie rod kits including a tie rod, two nuts and two washers. D4 requires 4 tie-rod kits.

Tie rod kit	Order Code	Lenght (mm)	Clamping Torque (Nm)	Quantity
D4/1	300104001	140		
D4/2	300104002	180		
D4/3	300104003	220		
D4/4	300104004	260		
D4/5	300104005	300		
D4/6	300104006	340		
D4/7	300104007	380	35	4
D4/8	300104008	420		
D4/9	300104009	460		
D4/10	300104010	500		
D4/11	300104011	540		
D4/12	300104012	580		

**Painting**

On request, all Hydrocontrol valves can be delivered painted (RAL 9005 black primer).

**Order example of D4/1 painted:**

D4/1

<b>W016</b>	W016A		

**NOTE:**

- W012, W013, spools need a special machining on the valve body.
- W015, W016, spools need RS type body. Float spool (W012) need special detent kit (F005).
- Regenerative spool (W013) need special return spring kits.
- W001E and W002E spools are available only with Direct electric control (code H036 or H037).
- Different spools are available on request.

Plaese contact our Sales department for more information.

Spool actuation classification for manual control

code	description	dimensions	configuration
H001	Protected lever		
H002	Protected lever rotated 180°		
H004	Control without lever		
H015	Protected vertical safety lever		
H016	Protected vertical safety lever rotated 180°		
H017	Protected horizontal safety lever		
H018	Protected horizontal safety lever rotated 180°		

Spool actuation classification for Hydraulic control

code	description	dimensions	configuration
H005	Hydraulic actuation with side ports <small>leave out the spool return action code</small> BSP ports = G 1/4 UNF ports = 9/16-18 UNF		
H025	Hydraulic actuation with upper ports <small>leave out the spool return action code</small> BSP ports = G 1/4 UNF ports = 9/16-18 UNF		

### Hydraulic pilot control curve

The diagram shows the spool stroke as a function of the pressure operating.

### Direct electrical control classification

code	description	dimensions	configuration
<b>H036</b> <small>leave out the spool return action code</small>	Direct electric control 12 Vdc (45W - 3,75 A)		
<b>H037</b> <small>leave out the spool return action code</small>	Direct electric control 24 Vdc (45W - 1,88 A)		

Type	D4	
Rated voltage	12 VDC	24 VDC
Rated current	3,75 A	1,88 A
Rated power	45 W	
Permitted working voltage	±10% Nominal	
Max ambient temperature	+40°C	
Max oil temperature	+80°C	
Operation time	S1 (100%)	
Protection degree	IP65	
Insulation degree	H	
Standard connector	DIN 43650	
Spool stroke	2,8 + 2,8 mm	

The H036 and H037 direct electric controls come as two kits each including a: coil, spring, solenoid and adapter. **The direct electric controls use a type E special spool.** The D4 control valve body is the standard type normally used for manual controls. The ON-OFF Electric Control kit includes a manually operated emergency push-button.

### Operating limit curve

Data detected after voltage decrease equal to 28% of the rated value (conditions occurring with coil under stabilization temperature conditions with rated voltage reduced by 10%).

Joystick control classification

The configuration of joystick control interests always two working sections with relative four ports:

**A1 – B1 – A2 – B2.**

For convention:

- section 1 is the first invested from the flow of the oil: it depends from the right or left inlet of the control valve
- Port A = spool action side
- Port B = spool return action side

The position of the fulcrum is identified by a code and stands in four configurations as shown in the following table:

Fulcrum Inlet side	FULCRUM 1 <sup>st</sup> section	FULCRUM 2 <sup>nd</sup> section
RIGHT INLET	<p><b>H009</b></p> <p>Right side inlet fulcrum on 1<sup>st</sup> section (compulsory code for second section: H120)</p> <p>Joystick control: 320604018</p>	<p><b>H010</b></p> <p>Right side inlet fulcrum on 2<sup>nd</sup> section (compulsory code for first section: H120)</p> <p>Joystick control: 320604017</p>
	<p><b>H011</b></p> <p>Left side inlet fulcrum on 1<sup>st</sup> section (compulsory code for second section: H120)</p> <p>Joystick control: 320604017</p>	<p><b>H012</b></p> <p>Left side inlet fulcrum on 2<sup>nd</sup> section (compulsory code for first section: H120)</p> <p>Joystick control: 320604018</p>
LEFT INLET		

The second section concerned the configuration of the joystick control is always identified with code H120. Lever has to be ordered separately.

**Spool return action classification - Springs load values**

Spool return kits have three different spring types; following the codes depending on spring loads.

Spring type			
Type - Code	A (standard spring)	B (soft spring)	C (heavy spring)

<b>F023A</b>	Proportional Pneumatic control rotated 180°			
<b>F135A</b>	Pneumatic control ON - OFF			
<b>F136A</b>	Pneumatic control ON - OFF rotated 180°			
<b>F126A</b>	Proportional Pneumatic control		Proportional control with port NPTF: 1/8-27	
<b>F127A</b>	Proportional Pneumatic control rotated 180°			

The diagram shows the spool stroke as a function of the pneumatic pressure operating.

**Electropneumatic control classification**

code	description	dimensions	configuration
<b>F0620</b>	3 positions electropneumatic control ON-OFF (12 vdc) 7 W - 0,58 A		
<b>F0630</b>	3 positions electropneumatic control ON-OFF (24 vdc) 7 W - 0,29 A		

Minimum  
working  
pressure  
5 bar

**Control tie rod assembly**

The length of the control tie rod, will change depending on the section numbers; in this way it will be easy to install in the right way the sections and avoid any misassembly. Each kit is composed by 1 tie rod and 2 plugs.

**NOTE:** the control tie rod kit has always to be ordered separately.

**Order code for control tie rod (BSP):**

- 320104012** = control tie rod /1
- 320104013** = control tie rod /2
- 320104014** = control tie rod /3
- 320104015** = control tie rod /4
- 320104016** = control tie rod /5
- 320104017** = control tie rod /6
- 320104018** = control tie rod /7
- 320104019** = control tie rod /8

**Order code for control tie rod (UNF):**

- 320104035** = control tie rod /1
- 320104036** = control tie rod /2
- 320104037** = control tie rod /3
- 320104038** = control tie rod /4
- 320104039** = control tie rod /5
- 320104040** = control tie rod /6
- 320104041** = control tie rod /7
- 320104042** = control tie rod /8

**Load limit classification**

code	description	schema	dimensions	configuration
<b>F024A</b> <b>F024C</b>	Load limit in A and B			
<b>F025A</b> <b>F025C</b>	Load limit in A and B rotated 180°			
<b>F026A</b> <b>F026C</b>	Load limit in A			
<b>F027A</b> <b>F027C</b>	Load limit in A rotated 180°			
<b>F028A</b> <b>F028C</b>	Load limit in B			
<b>F029A</b> <b>F029C</b>	Load limit in B rotated 180°			

**NOTE:** on request is available the load limit with dual control; for more informations please contact our Commercial Dept.

Electrical load limit classification

Spool position sensor			
Power supply	Contacts capacity	Protection degree	temperature range
12 vdc	3 A	IP 65	da -25°C a +90°C
24 vdc	1,5 A		

Operational diagram

**CONTROL in A e B** = connect PIN 1 - 4 and 2 - 3  
**CONTROL in A** = connect PIN2 - 3  
**CONTROL in B** = connect PIN 1 - 4

Wiring diagram

In case of inductive loads it is advisable to connect the terminals of the workport (solenoid) to a 200 VDC - 3A diode.

code	description	dimensions	configuration
<b>F0360</b>	Electrical load limit (normally closed contacts)		
<b>F0370</b>	Electrical load limit rotated 180° (normally closed contacts)		
<b>F0450</b>	Electrical load limit (normally open contacts)		
<b>F0460</b>	Electrical load limit rotated 180° (normally open contacts)		

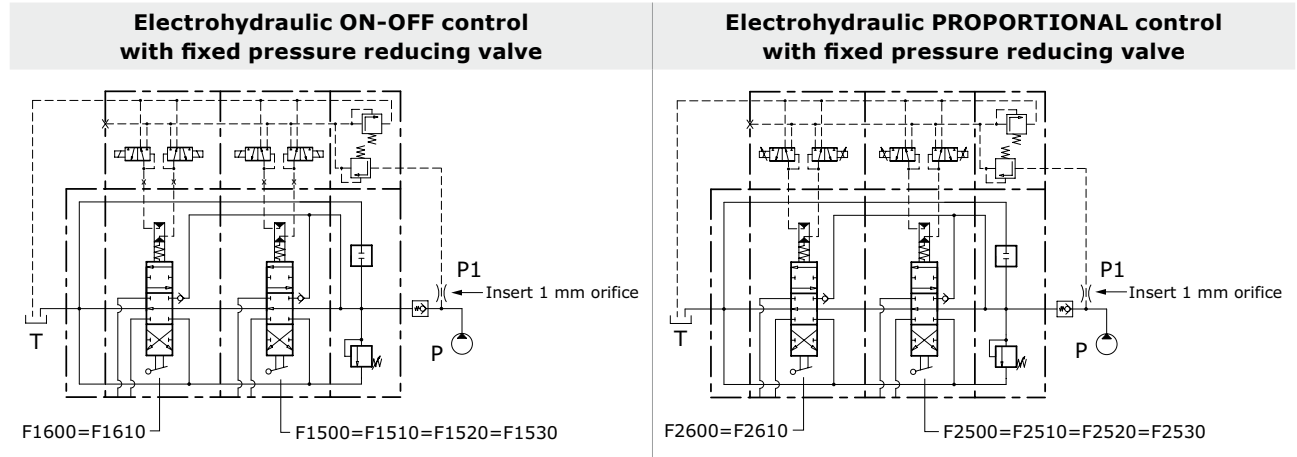

**NOTE:** a HIRSCHMANN female connector, type G4 W1F, is available on request (code 413000045, to be ordered separately).

**Electrohydraulic control specifications**

Operating temperature range	-20°C / +80°C
Max inlet pressure	350 bar
Reduced pressure	16 bar
Back pressure on (T)	3 bar
Filtering degree	25 μ assoluti
Racommended pilot pipe size	Ø 6 mm - G 1/4

Proportional control kit, mechanically retrooperated, allows the maximum precision of positioning, limiting the hysteresis. The control is operated with PWM control of the current. PWM frequency suggest: 60-80 Hz

regulation currents			
Nominal voltage (V)	Resistance R <sub>20</sub> (Ohm)	Current min (A)	Current max (A)
12 vdc	3,7	0,9	1,7
24 vdc	15,5	0,45	0,85

**Electrohydraulic control classification**

code	description	dimensions	configuration
F1600	3 positions electrohydraulic control ON - OFF 12 Vdc		
F1610	3 positions electrohydraulic control ON - OFF 24 Vdc		
F2600	3 positions electrohydraulic control PROPORTIONAL 12 Vdc		
F2610	3 positions electrohydraulic control PROPORTIONAL 24 Vdc		

Electrohydraulic ON-OFF control is stackable with electrohydraulic PROPORTIONAL control (F2600 = F2610). Control kit already includes orifice to make spool displacement more gradual.

**Electrohydraulic control with fixed pressure reducing valve classification**

code	description	configuration
<b>F1500</b>	Electrohydraulic control ON - OFF (fixed pressure reducing valve) P - T inlet side (12 vdc)	 <p>Port BSP (P - T) = G 1/4 Port UNF (P - T) = 9/16"18 UNF</p>
<b>F1510</b>	Electrohydraulic control ON - OFF (fixed pressure reducing valve) P - T inlet side (24 vdc)	
<b>F2500</b>	Electrohydraulic control PROPORTIONAL (fixed pressure reducing valve) P - T inlet side (12 vdc)	
<b>F2510</b>	Electrohydraulic control PROPORTIONAL (fixed pressure reducing valve) P - T inlet side (24 vdc)	
<b>F1520</b>	Electrohydraulic control ON - OFF (fixed pressure reducing valve) P inlet - T outlet (12 vdc)	 <p>Port BSP (P - T) = G 1/4 Port UNF (P - T) = 9/16"18 UNF</p>
<b>F1530</b>	Electrohydraulic control ON - OFF (fixed pressure reducing valve) P inlet - T outlet (24 vdc)	
<b>F2520</b>	Electrohydraulic control PROPORTIONAL (fixed pressure reducing valve) P inlet - T outlet (12 vdc)	
<b>F2530</b>	Electrohydraulic control PROPORTIONAL (fixed pressure reducing valve) P inlet - T outlet (24 vdc)	

**Control tie rod assembly**

The length of the control tie rod, will change depending on the section numbers; in this way it will be easy to install in the right way the sections and avoid any misassembly. Each kit is composed by 2 tie rods, 2 plugs, 2 connection ports and spacers according to the section number.

**NOTE:** the control tie rod kit has always to be ordered separately.

Reducing valve, combined with electrohydraulic control kit has to be calculated as a normal working section.

**ORDER EXAMPLE:**

Complete valves with 3 sections F1600 requires a complete tie-rod kit /3.

Complete valves with 2 sections F1600 and 1 section with F1500 (reducing valve) requires a complete tie-rod kit /4.

**Order code fixed pressure reducing valve:**

- 915000303** = reducing valve for BSP ports
- 915000312** = reducing valve for UNF ports

**Order code for control tie rod (BSP):**

- 320103001** = control tie rod /1
- 320104001** = control tie rod /2
- 320104002** = control tie rod /3
- 320104003** = control tie rod /4
- 320104004** = control tie rod /5
- 320104005** = control tie rod /6
- 320104006** = control tie rod /7
- 320104007** = control tie rod /8
- 320104008** = control tie rod /9

**Order code for control tie rod (UNF):**

- 320103026** = control tie rod /1
- 320104024** = control tie rod /2
- 320104025** = control tie rod /3
- 320104026** = control tie rod /4
- 320104027** = control tie rod /5
- 320104028** = control tie rod /6
- 320104029** = control tie rod /7
- 320104030** = control tie rod /8
- 320104031** = control tie rod /9

Work section identification

When the spool is operated it intercepts the by-pass gallery by diverting the flow of oil to service port A or B. If two or more spools are actuated at the same time, the oil will power the service port that has the lower load; by throttling the spools, the flow of oil can be divided between two or more service ports.

When the spool is operated it intercepts the switch gallery by diverting the flow of oil to service port A or B. The Tandem circuit is powered by the switch gallery thus permitting the use of just one work section at a time. The section downstream from the tandem section that has been actuated does not operate, the upstream section has priority.

When the spool is operated it intercepts the switch gallery by diverting the flow of oil to service port A or B. The oil that flows back from the actuator is carried to the switch gallery thus making it available to the service ports downstream from the series section. The pressure drop downstream is added to the pressure drop of the section itself.

**Auxiliary valve identification**

code	description	schema	sonfiguration	setting range (bar)			
				type	at full flow	type	at min. flow
<b>01 PA</b>	Antishock valve (port A)			<b>A</b>	20 / 70	<b>A</b>	-
				<b>B</b>	71 / 120	<b>B</b>	-
				<b>C</b>	121 / 150	<b>C</b>	25-A / 95-A
				<b>D</b>	151 / 250	<b>D</b>	96-A / 220-A
				<b>E</b>	251 / 350	<b>D</b>	221-A / 280-A
<b>02 PA</b>	Anticavitation valve (port A)						
<b>05 PA</b>	Prearrangement for auxiliary valve (port A)						

code	description	schema	sonfiguration	setting range (bar)			
				type	at full flow	type	at min. flow
<b>01 PB</b>	Antishock valve (port B)			<b>A</b>	20 / 70	<b>A</b>	-
				<b>B</b>	75 / 120	<b>B</b>	-
				<b>C</b>	125 / 150	<b>C</b>	25-A / 95-A
				<b>D</b>	155 / 250	<b>D</b>	96-A / 220-A
				<b>E</b>	255 / 350	<b>D</b>	221-A / 280-A
<b>02 PB</b>	Anticavitation valve (port B)						
<b>05 PB</b>	Prearrangement for auxiliary valve (port B)						

**Auxiliary valve - Setting range**

Sections designed to house auxiliary valve option require double choice on work ports A and B. Always indicate setting value when using antishock valve:

- 01 PA (120) = setting at full flow**
- 01 PA (120-A) = setting at min. flow**

INTERMEDIATE INLET SECTION

Order example

 \* = omit the code for inlet positioning and thread)

Intermediate inlet section classifications

**intermediate inlet type**

<b>BE</b>			Intermediate inlet section
-----------	--	--	----------------------------

The intermediate inlet section is driven by two pumps (P + P1). The downstream elements can be set to a lower pressure than the upstream ones by adjusting the pressure relief valve of the intermediate section in question.

<b>BV</b>			Intermediate inlet section with pressure relief valve
-----------	--	--	---

The intermediate inlet section and the elements are driven by a single pump (P). The downstream elements can be set to a lower pressure than the upstream ones by adjusting the pressure relief valve of the intermediate section in question.

Valve identification on intermediate inlet section

type	schema	layout	description	type	schema	configurazione	descrizione
<b>1</b>			Direct acting pressure relief valve	<b>4</b>			Externally piloted valve
<b>2</b>			Pilot operated pressure relief valve	<b>11</b>			Plug with pressure-gauge connection
<b>3</b>			Relief valve plugged				

Valve arrangement on intermediate inlet section

**Combination valve example: 009 = 2A - 3B**

- 009** Combination valve
- 2A** Pressure relief valve in port A
- 3B** Relief valve plugged in port B

**The code identifies:**  
with a number, the type of valve; with a letter its position on the inlet section.

- (A) = spool action side
- (B) = spool return action side

**NOTE:** when ordering a main relief valve it is necessary to specify setting

INTERMEDIATE FLOW DIVIDERS

Operating principle

The intermediate section of the flow divider allows sections of the divider itself to be powered, with a flow rate set by the user and independent of the downstream load. The excess flow may power another directional control valve or be returned directly to tank. The flow adjustment range (Q = l/min) change between:

- Minimum Q = 3 l/min
- Maximum Q = 40 l/min

**Carry-over connection (HPCO)**

This option, available on all HC-D4, allows the sectional valve to feed a second valve, by extending the free flow channel. In this configuration, the valve need a separated port for connection to tank.

It is possible to transform sectional valve from standard to HPCO version just by ordering the appropriate conic plug:

**INSTALLATION AND MAINTENANCE**

**Guidelines**

- Mount the control valve securely to a flat surface (recommended 3 point fixing); at the time do not use a hammer to positioning by hitting.
- When handling the control valve, be careful not hold the pilot cover or return spring cap of the spool or accessory valves such as main relief valves and anti-shock relief valves.
- Clean piping materials sufficiently before use.
- Make sure to prevent the port openings from being entered with dust or foreign matters.
- Tighten the port connectors surely with the recommended fastening torques.
- Do not direct the jet of a pressure washing unit directly to the valve.

**Fittings tightening torque (Nm)**

## GENERAL CONDITIONS AND PATENTS

### Product identification

All Hydrocontrol products have an identifying plate placed in specific position.

#### Serial number:

It univocally identifies the physical valve: this provides an easy way to find all sales and production details.

#### Product code:

It is a number univocally identifying the configuration and pressure settings of a valve.

### Introduction

These general conditions apply to all general supplies from Hydrocontrol s.p.a., after receiving orders from the Customer. Should commercial terms such as EXW, DDP, etc be mentioned, of course the Incoterms of the International Chamber of Commerce must be referred to, according to the test existing when the general supply conditions are agreed on.

### Management of orders

No Customer's order is binding to Hydrocontrol s.p.a. if Hydrocontrol s.p.a. has not confirmed the order in writing. Hydrocontrol s.p.a. commits to supplying the orders in compliance with the order confirmation that has been issued. Any disagreement with the content of the order confirmation must be communicated in writing to Hydrocontrol s.p.a. within and no later than 5 days from the delivery of the order confirmation. The Customer commits to paying for the goods supplied by Hydrocontrol s.p.a., according to the prices indicated on the order confirmation.

### Payment conditions

The Parties agree on the payment terms at the beginning of the supply. The terms will be indicated on the order confirmation. Should the Customer be late with the payments, Hydrocontrol S.p.a. will be entitled to require the payment of interests on arrears based on the exiting Prime Rate increased by 2%. Should there be any payment delay, Hydrocontrol s.p.a. will be entitled not to process the Customer's purchase order, even if it has already been confirmed.

### Delivery and shipment

The goods are always supplied Ex Works, even when Hydrocontrol s.p.a. agrees with the Customer that the shipment, or a part of it, will be arranged by Hydrocontrol s.p.a. It is agreed that the Customer will bear the risk of goods deterioration or damaging from the moment the goods are handed by Hydrocontrol s.p.a. to the first carrier.

### Product characteristics

Hydrocontrol s.p.a. commits to supplying good quality products, compliant with the technical specifications declared on the technical tables and on the catalogue. Hydrocontrol s.p.a, even without notice, at its own discretion, reserves the right to modify the products as necessary, without these changes altering the main characteristics of the products.

### Claims

Any claims about defects on delivered products (just as an example: claims about the packaging, the number, the quantity or the external product characteristics) will have to be notified to Hydrocontrol s.p.a. in writing, within and no later than 7 days from reception of the goods, otherwise the claims will be considered as null and void. Occult defects (the defects of the goods that cannot be spotted with a careful control of the goods received by the Customer), will have to be notified in writing to Hydrocontrol s.p.a. within 7 days from the discovery of the defect, and anyhow no later than 12 months from the delivery of the goods, otherwise the claim will be considered as null and void. Even in case of claim or objection, the Customer will never be entitled to suspend or delay the payments to Hydrocontrol s.p.a. for the products subject to claim or objection nor for any other supply.

## GENERAL CONDITIONS AND PATENTS

### Warranty

Should the products supplied by Hydrocontrol not be compliant or have the required quality and should this defect be due to Hydrocontrol, Hydrocontrol s.p.a. commits, at its choice, to replace or repair the faulty products, as long as the defect or lack of compliance is notified to Hydrocontrol s.p.a. in writing, as specified at point 6, within and no later than 18 months from product delivery. On the products that have been fixed or replaced in accordance with what specified above, the above-mentioned warranty applies. The 12 month duration starts from the date of repair or replacement. In case of defects, lack of quality or in case of lack of compliance for the supplied products, with the exception of fraud or serious offence, Hydrocontrol s.p.a. only commits to repairing or replacing the faulty products, according to what specified above. This warranty replaces any other Supplier's warranty or liability established by the law. This warranty excludes any other liability contractual or extra-contractual by Hydrocontrol s.p.a. on the products supplied by Hydrocontrol (as a mere example: damage refund, loss of profit, product recall campaign, etc). Hydrocontrol s.p.a. has signed a product civil liability police, with a suitable maximum coverage.

### Ownership retention

The products supplied by Hydrocontrol s.p.a. will be owned by the latter until Hydrocontrol receives the complete payment for the supplied goods.

### Obligation confidentiality

Hydrocontrol s.p.a. commits to not disclosing the technical and commercial information it receives from the Customer, unless this information has already been publicly disclosed.

### Patents

The Customer is not allowed to use the provided Products, or a part of them, their descriptions or drawings protected or not protected by Patent or registered trademark in order to design or make similar products, unless Hydrocontrol s.p.a. previously issues its written authorization. Should Hydrocontrol s.p.a. give its written authorization, all patents, trademarks, registered designs, copyrights and intellectual property rights related or connected to the Products provided by Hydrocontrol s.p.a. will stay Hydrocontrol's property. The Customer commits to respecting the highest confidentiality.

### Applicable law and court of jurisdiction

Hydrocontrol s.p.a.'s supplies are regulated by these General Supply Conditions and, for anything not defined here, by the Italian law. Any controversy related, generated or connected to the supply of Products by Hydrocontrol s.p.a., where Hydrocontrol s.p.a. is involved, will be exclusively dealt with by the Court of Bologna.
