Bluestone Co.,Ltd

was founded in 1997 and has grown significantly notwithstanding the Asian economic crisis in its early years.Today Bluestone is the distributor for many famous electricity system brands from Europe such as Phoenix Contact (Terminal block and surge arrester), SIBA(medium and low voltage fuse), tele (Monitoring relay), and Berker (Switches and home automation system). With high experience of engineering team and high quality products from best manufacturers of Europe, Bluestone confidents to serve its customers with high quality standard as its slogan

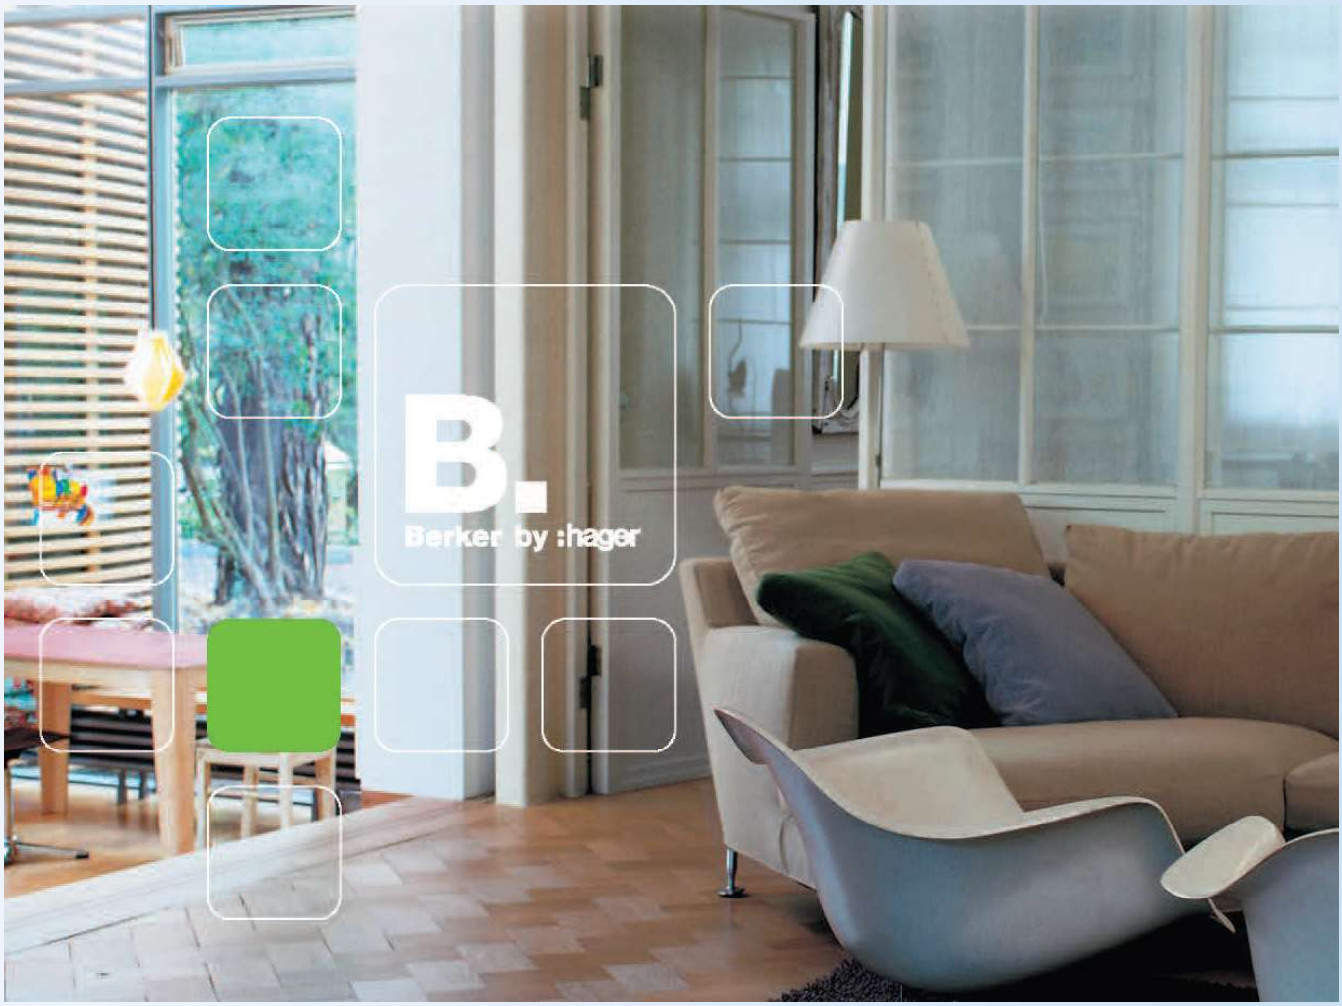
" Quality you can trust "

Company image

Berker switches & systems

Berker is a design leader from German switch manufacturers which offers a high-quality portfolio of switch series and intelligent building technology

Berker switches and systems are in use all over the world, making life more beautiful, easier and more comfortable. We place the utmost emphasis on quality, design and innovation. This is confirmed by the numerous awards we have received both at home and abroad.



Berker is a leading supplier of high-quality electrical installations – from timelessly classic switch design through to intelligent building management systems. All new developments are created with just one thing in mind : our customer. After all, we want our products to make them feel good for decades to come.

With Berker, you not only offer your customers products to suit every taste, you also offer your customers the latest state of the art.

BERKER- The right way.

Product Switch Ranges

Berker S.1

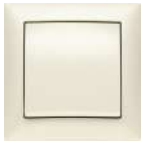
Anthracite, matt

Plastic Polar White



White glossy

STYLISH STANDARD Berker S.1 stands for "Standard" in two different aspects: on the one hand, because this switch range has set real standards in the fields of elegance, functionality and timelessness. On the other hand, because these qualities have made it a popular standard in offices and homes.

Berker Q.1

Anthracite velvety

Polar white velvety

PERCEPTIBLE DIFFERENCE You notice the difference the first time you touch it: thanks to its innovative surface, this likable all-rounder has an unmistakable velvety feel – and in elegant anthracite now in an additional attractive colour variant.. With its smooth profile, flat switching angle and soft, rounded edges, it is very pleasant to look at.

Berker Q.3

Polar white velvety

Anthracite velvety

ROBUST COMPANION robust. Hardly any term describes the Berker Q.3 better. On one hand, there is its clear contour, on another its scratch-resistant and friendly surface. It is equipped with the same centre plates as its sister programme Berker Q.1. Its functional benefits are also noteworthy: the Berker Q.3 is ideally suited to installations in wall ducts.

AN ALL-ROUND SUCCESS It stands unmistakably in the tradition of great switch ranges. And still, the Berker R.1 interprets the round radius anew in its own way. With its soft frame contour and a variety of functional versions, the soft round switch is an accompaniment for all residential and furnishing projects.

Berker R.3

Stainless Steel

Aluminium

Plastic Polar Black

Plastic Polar White

Glass Polar White

Glass Black

CLEAR CONTRAST The Berker R.3 celebrates the power of contrast: we combine round centre plates with a continuously angular frame. Superb side-effect: The Berker R.3 is ideally suited for installation in wall ducts.

Product Switch Ranges

Berker K.1

Anthracite matt

Polar white glossy

SIMPLY PERFECT No other switch is more contoured, shaped or more cultivated. Thus the Berker K.1 is the logical choice for any classic interior - and an investment which will pay dividends for years. And, with its IP44 equipment, even the moisture of bathrooms, cellars or outside rooms has no effect.

Berker K.5

Aluminium

Stainless steel

COOL CLASSIC Profiled, contoured, sleek: the Berker K.5 and its sister programme, Berker K.1, are perfect examples for straight designs. It gets better: the Berker K.5 is now also available in fully-anodised aluminium, as well as in its classic stainless steel variant.

Berker Arsys

Copper med

Versatile aesthetics No two properties are the same. Every interior is different. And therefore the switch concept must be unique as well. Available in a wide selection of materials and surfaces, Berker Arsys range fits well into almost any ambience. But it always remains true to itself.

Product Switch Ranges

Berker B.3

Black Anodised Aluminium

PERFECT COMBINATION Contrasts enrich life, and, with B.3, contrasts are essentially built in. Highly-individual combinations can be created from a wide range of frame variants with polar white and anthracite rockers and central inserts. An absolute innovation are the B.3 frames, made of black, brown, gold or red anodised aluminium.

Berker B.7

Glass Aluminium

Glass Polar White

Glass Black

TIMELESS TRANSPARENCY Gives every switch the right frame: In addition to glass frame varieties, the Berker B.7 is now available with plastic, stainless steel and aluminium frames. This version is a harmonious addition to the switches of the Berker TS Sensor and Berker B.IQ ranges.

Product Switch Ranges

Berker SERIE 1930

Plastic black glossy

Plastic polar white glossy

Pure functionality Berker and Bauhaus are not only the same age (both were founded in 1919), but they also share the same passion for pure shapes and functionality. Even today, clients and planners love both qualities. And, because of this, the unique, Bauhaus-inspired Berker Serie 1930 can be found not only in timeless, classic buildings, but also in trendy properties, such as the "Casa Camper" in Berlin.

Berker SERIE 1930 Porzellan made by Rosenthal

Rosenthal Polar white glossy

Rosenthal black glossy

Fine porcelain Together with the porcelain manufacturer Rosenthal, we have returned to the original material for high-quality switches. The Berker Serie 1930 edition, made with real Rosenthal porcelain, is a homage to craftsmanship, perfect shape and a fine material.

Aluminium/polar white

Aluminium/black

CAN A SWITCH AWAKEN FEELINGS? Can a switch awaken feelings? Scarcely any other switch has answered this question as emotionally as the Berker R.classic series. With its attractive round shape, four high-quality material variants and sleekly elegant rotary knob, it ensures a great feeling: enthusiasm.

Product KNX Push Button

Berker B.IQ

Glass polar Black

Stainless steel

Aluminium

Glass polar white

Plastic polar white

CREATIVE ALL-ROUNDER To the convenient KNX functions of the Berker B.IQ is now added a wide array of alternative materials. For example, the surface variants and colours in black glass and aluminium are completely new. They correspond exactly to the surfaces of the Berker B.7, which, with its switches and socket outlets, is an ideal partner for the Berker B.IQ.

Berker TS Sensor

INTELLIGENTE UNDERSTATEMENT Understatement is an art, and the Berker TS Sensor makes it perfect. Up to eight functions are concealed under a pure surface that is practically flush with the wall, and can be custom-labelled on request. A single touch is all it takes to control lights, heating or blinds. Thus the Berker TS Sensor can offer an exciting range of options - yet still remains as calm as possible.

Berker Touch Sensor R.1/R.3

INTELLIGENTE UNDERSTATEMENT Just right for the switch programmes in the R.-Design are the Berker Touch and push-buttons- now in a soft (R.1) and cornered (R.3) contour as well as in the glass surfaces black and polar white. The Touch Sensor KNX has the same assembly height as the switches in the R.-Design. With its integrated bus coupling unit, a variety of building functions can be read and controlled through it.

Product KNX Push Button

Berker TS

NOBLE GESTURE Behind its elegantly purist exterior, there is an unexpected wealth of technical options: the Berker TS allows operation, not only of multiple light sources, but, if so desired, also of intelligent building control systems, such as Berker KNX or Berker Radio Bus.

Berker TS Crystal

A REAL EYECATCHER The Berker TS Crystal is the crystaline version of the Berker TS with glas platform and knobs made of CRYSTALLIZED© - Swarovski elements. The colouring can be specified individually for each switch

Berker Crystal Ball

A REAL EYECATCHER The heart of the Berker TS Crystal Ball is a large multifaceted cut crystal made of CRYSTALLIZED© - Swarovski elements concealing a sensitive optical reflex detector underneath. A gentle touch is enough to make the Berker TS Crystal Ball to activate lights, blinds, roller shutters, etc. At the same time, it serves as a dazzling attention-getter in any refined ambience.
