

Line coupler, KNX

TYF130

Architecture

Bus system	EIB
Fixing mode	Din-Rail

Functions

- can be used as line amplifier

Controls and indicators

- with programming button and red programming LED

Connectivity

Bus system LON	no
----------------	----

Voltage

Operating voltage over bus	21 32 V DC
System supply voltage	30V DC via bus

Power

Total power loss under IN	0,5 W
---------------------------	-------

Dimensions

Width of rail mounted device (RMD)	2 modules
------------------------------------	-----------

LED control

- with 2 yellow data traffic LEDs for higher and lower ranking line
- With green operation LED, red programming LED and red diagnosis LED

Connection

Type of connection to the bus	TG008 connector
-------------------------------	-----------------

- with integral bus coupling unit
- line connection via connecting terminal
- bus connection via connecting terminal

Settings

Supported configuration modes	system , easy
-------------------------------	---------------

Use conditions

Operating temperature	-5 45 °C
-----------------------	----------

Identification

Main design line	KNX
------------------	-----
