AES Group Ltd.

Strictly Confidential, For Recipient Only

A Brief Story About Our Company

Founded in 1992 by just two passionate individuals, AES Group Ltd. has grown into one of Thailand's leading security systems integrators. Today, our team of nearly 100 professionals over half of whom are experienced engineers delivers cutting-edge security solutions across Thailand and have extended our trusted services to Cambodia, Myanmar, and Laos.

Services we provide include:

- System integration
- Commissioning
- Turn-key solutions
- Design consultation
- System installation
- Preventive & corrective maintenance

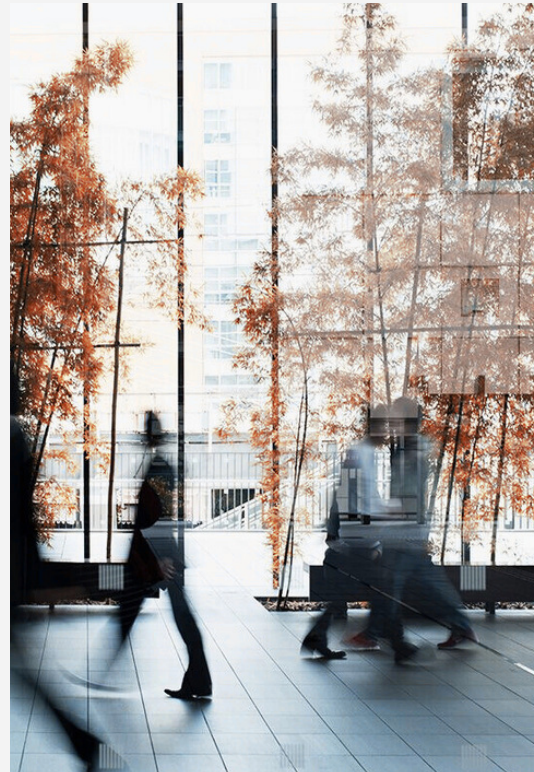

Our Turnkey Integration Solutions Include:

- Access control
- Perimeter control
- Intruder detection
- IP video surveillance
- X-Ray & Metal detection screening
- Visitor & Parking management
- Public address
- Audio visual / Conference rooms
- Tetra radio
- Seismic monitoring systems

The Gallagher Security Platform is a unified system for access control, intrusion, perimeter, and video surveillance, with broad third-party integration including CCTV, biometrics, and building systems delivering a flexible and scalable security solution.

GUNNEBO

Gunnebo is a global leader, specializing in entrance control (including speed gates, turnstiles, revolving doors) for sectors including retail, transport, commercial buildings, high-risk sites, and banking. Delivering integrated security products and services to more than 100 markets worldwide

Entrance Control

Whether your priorities are safety, robustness, functionality, aesthetics or ease of integration, **Gunnebo** has designed a product that meets your needs. To date, **Gunnebo** has provided their product for...

100,000+ Gunnebo gates worldwide
130+ million users daily
3,000+ airport gates in 150+ airports
150+ metro lanes
1 of 5 SpeedGates sold globally

SENSTAR™

Senstar is a global leader of physical security solutions, offering advanced perimeter intrusion detection (PIDS), video management, analytics, and access control systems. For over 40 years, Senstar has protected critical assets worldwide.

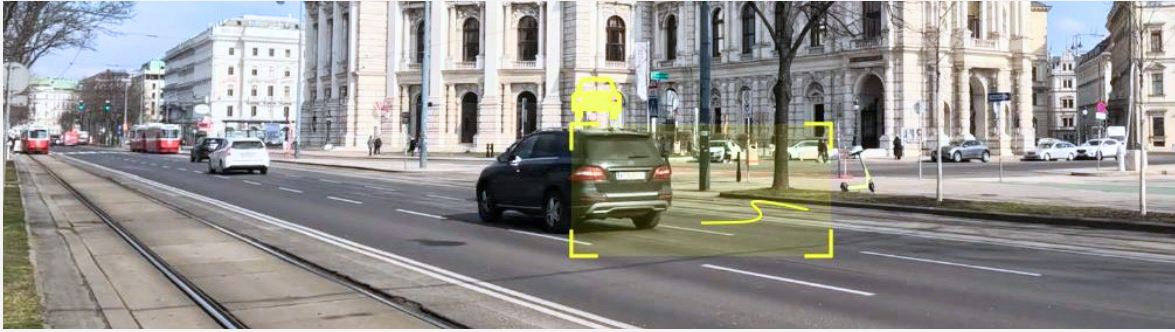

Senstar solutions can provide customized solutions for any type of facility integrated with other AES offered systems.

Senstar PIDS are advanced, highly versatile perimeter security solutions that detect intrusions via technologies including fiber optics, fence-mounted sensors, buried cable, and intelligent lighting. Built for scalability and accuracy, they provide early warning alerts while seamlessly integrating with Senstar Symphony and other third-party video and security management platforms.

Security and Video Management

- Unified security management
- Integrates video surveillance with analytics, access control, and PIDS
- Scalable architecture
- Advanced video analytics
- Built with failover and redundancy
- Health monitoring to ensure continuous operation.
- User-friendly interface

Video Analytics - AI

- Motion detection
- Object tracking
- License plate recognition
- Behavioral analytics
- Crowd Detection
- Facial Recognition
- PTZ Auto-Tracking

Integration

Senstar Symphony can provide full integration with other security systems including access control, perimeter, video management, BAS, fire alarm and many others.

Fence and Buried Sensors

- FiberPatrol
- Flexzone
- Senstar LM100
- Omni Tax

Above Ground Sensors

- Senstar MultiSensor™ Cascade Plus
- Smart 3D LiDAR
- UltraWave
- XField

A global leader in network-based security technologies. **Axis** offers innovative solutions across video surveillance, access control, intercom, and audio systems, all enhanced by intelligent analytics. Customers worldwide trust **Axis** solutions to keep people safe, protect assets, and drive smarter business performance.

Network Cameras

- Fixed Cameras
- Dome Cameras
- Bullet Cameras
- Panoramic Cameras
- PTZ Cameras
- Thermal Cameras
- Explosion-proof Cameras
- Body-Worn Cameras

Intercoms, Network Audio, Visual Alerts

- Video intercoms
- Network speakers
- Audio management
- Network Strobe Siren
- Network Strobe Speaker

System Devices & Accessories

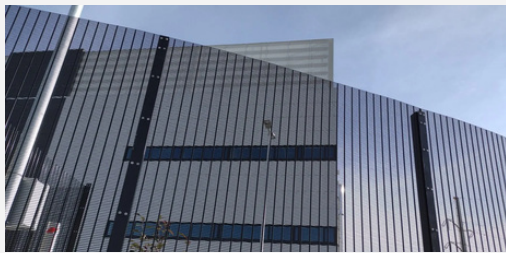

- Media converters
- PoE midspans
- Mounts
- Housings

With over 40 years of expertise, **Barkers Fencing** provides tailored, high security fencing solutions to safeguard your property, people, and reputation. Trusted worldwide, **Barkers fencing** systems meet the highest international standards, delivering robust protection for critical infrastructure, data centres, and other high-stake sites.

Providing a large range of only the highest quality perimeter products from basic demarcation to rigorously tested high-security solutions including anti-climb, anti-ram and deterrent rated fencing.

MORSE WATCHMANS

Morse Watchmans is a global leader in key control and asset management, trusted by organizations worldwide for over a century. Their advanced key cabinets, asset lockers, and management software ensure only authorized access to critical assets while delivering full accountability and efficiency. **Morse Watchmans** provides a unified, reliable approach to safeguarding people, property, and operations

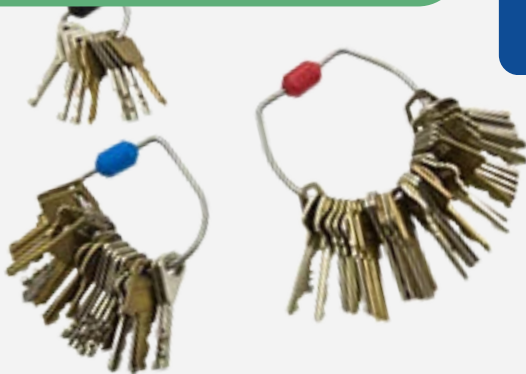

Key Control

- KeyWatcher Touch
- KeyWatcher® Illuminated
- KeyWatcher® Fleet
- KeyBank® Touch & KeyBank
- Emergency Key Grab (EKG) Kit

Asset Management

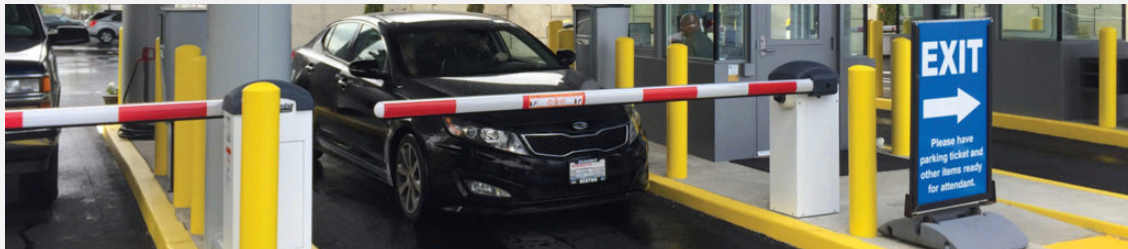

- SmartKey® Locker Touch
- SmartKey® Locker
- RFID-based AssetWatcher

HySecurity is a trusted industry leader for crash-rated Hostile Vehicle Mitigation barriers including the StrongArm® and HydraWedge®. Their advanced solutions used globally securely protect Data Centers, Critical Infrastructure, Industrial and Government facilities fortifying the perimeter access and protecting the facility.

Hostile Vehicle Mitigation

The HySecurity Hostile Vehicle Mitigation (HVM) line secures the world's critical infrastructure and key assets with crash-rated solutions for your entire perimeter.

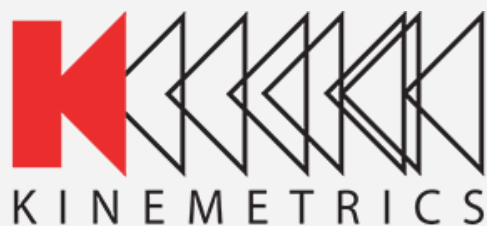

StrongArm®

- Secure uni-body welded chassis constructed with rigid 10 gauge sheet metal
- Industrial grade components ensure extremely low maintenance and exceptionally long life
- Contains only one gallon of high performance hydraulic fluid
- Configure gate with 70+ field adjustable settings on the Smart Touch Controller
- Side or center yoke mount and counterweights for long arms

HydraWedge SM50

- Zero-penetration, crash-rated wedge barrier
- Long-life, low-maintenance wedge with optional UPS backup providing hundreds of cycles after power loss
- Customized, configurable settings for site specific requirements
- Real time system security alerts with optional HyNet™ Gateway

Kinemetrics is a global leader in seismic and structural monitoring, providing advanced instrumentation and platforms, from earthquake early-warning to structural health monitoring protecting critical infrastructure and support business continuity with precision, resilience, and actionable insights.

Products and Software

- Digitizers and Recorders
- Accelerographs and Accelerometers
- Broadband Sensors
- Specialized Systems and Devices
- Antelope Real-Time Seismic Software
- Rockhound Data Collection Software
- Oasis Plus Structural Monitoring Software

Industries

- Bridges
- Dams
- LNG & Nuclear Power Plants
- Commercial Building
- Oil and Gas
- Geothermal
- Vibration Monitoring

Other Partners

In addition to our core strategic brands, **AES Group** collaborates with a wide network of trusted partners whose products are seamlessly integrated into our solutions. While not all are listed here, these partnerships are essential in delivering comprehensive and reliable security solutions.
