## ***What is drop forged rivetless chain?***

*Drop Forged Rivetless Chains are available in a range of alloy materials to forge strength and head treated for increased wear resistance. Precise pitch control provides consistency and reliability, especially for automated systems. It transmits motive power through chain conveyors, overhead power & free, or inverted power & free, and flexes both vertically and horizontal to accommodate changes in direction. It was assembled using side links, center links and chain pins, Simple design permits quick assembly or dismantling without tools.*

The chain specifications concerning the strengths are related to monorail conveyors where the load is directly attached to the drop forged rivetless chain. Another is to power and free conveyors include part storage and production buffers, paint application, final assembly procedures, line side sequencing.

### ***Normally Rivetless Chain & Overhead Trolley Line-up***

RPM Number	X-348	X-458	X-678	P100	P160
Chain Pitch (mm)	76.6	102.4	153.2	100	160
Single Trolley Load Capacity (Kg)	100	200	600	200	750

# RPM Cement Plant Chain

# Cement making

*RPM* manufactures predictable wear life from cement industries elevator chain, and it will be high-performance chains to keep running at maximum capacity. High shock loads, dust and debris, hot materials, steep inclines, etc.

*RPM* Pins and bushings are made from alloy steel and deep casehardened for maximum wear life and toughness. Pins and plates are through hardened for superior strength and toughness. There are no stress risers in plate holes, so chain life is maximized.

*RPM* manufactured to the tightest tolerances for higher quality and designed to provide maximum fatigue life. Our in-house heat treatment allows us to better control the process and to deliver longer-lasting chains.

## 1.2.2 PALM OIL CHAIN

### SPROCKET

**RRPM**

**Flexible  
accessories**

## Flexible chain

- Application in food , medical and others conveying.
- Material of Chain:Pom.Color: White,Operating temperature range:  
-40°C~90°C
- Pin:Stainless steel
- Max speed:80/min V-luricant; 50/min V-dry
- Teasile force in carbon 2100N; Max conveyor length:carbon-12m
