

FR4-TLM510(CT)

Excellent tracking resistance Laminate and Prepreg

TLM-510(CT) products are Halogen free materials manufactured with a unique high performance epoxy resin reinforced with electrical grade (E-glass) glass fabric.

TLM-510(CT) offers enhanced thermal resistance due to a high Tg value, Tg 170°C with lower z-CTE Value and designed to eliminate the use of halogenated resins due to the potential hazardous effects from the environmental concerns. These materials are compatible with the AOI process and exhibit the UV block characteristic.

TLM-510(CT) also exhibit superior chemical resistance, thermal stability and CAF-resistance.

Performance and Processing Advantages

- High Comparative Tracking Index, CTI \geq 600 V
