

LED MIRRORS

LED MIRRORS VALUES

Innovation

Patented, latest generation lighting systems that provide:

- + LIGHT
- + SAVINGS
- + DURABILITY

APPLIED TO
OUR LIGHTING
SYSTEMS

High Quality

- ✓ **Lighting systems that ensure the functional reliability of the mirrors.**
 - UV Test -> anti-crack, antiyellowing.
 - 100.000 on/off cycles Test.
 - Thermal shrinkage Test.
 - Thermal Management Test.
- ✓ **We reduce returns.**
- ✓ **We reduce consumption of electricity while increasing functionality.**
- ✓ **Own Manufacturing and Quality Controls.**

Maximum Functionality

- + QUALITY OF LIGHT
- + QUANTITY OF LIGHT
- + UNIFORMITY OF LIGHT

Competitive

- ✓ **We make products with SUPERIOR MANUFACTURING VALUES** affordable for users.
- ✓ **MAXIMUM SAVINGS** for users.

Maximum Safety

- Safe in spaces with high humidity.
- 100% TESTED PRODUCT.
- SAFE AND EASY INSTALLATION.

Warranty

- Tested for **SALT SPRAY**.
- **Long Durability: 25,000 h.**
- **TRANSPORT SHOCK** testing.
- **EASY TO HANDLE** packaging.

DIRECT LIGHTING

Mirrors with direct or task lighting are those which collect and project all the light frontally towards the user thanks to specifically designed systems.

This type of mirrors provides greater functional luminosity -lumens focused to the user- and can light up the entire bathroom without any additional lighting.

It is ideal for precision tasks such as applying make up or shaving, providing effective lighting on the face to get a better view of details.

This kind of lighting also helps create a stimulating and active environment.

AMBIENT LIGHTING

Mirrors with ambient lighting project light indirectly: on these mirrors light is not redirected by a screening system but diffused around the LED source, being visible on the front (functional light on sandblasted mirrors) and the rear (decorative light on the wall).

Mirrors with ambient light provide pleasant soft light and a wall-glow effect that give the room a warm atmosphere that help relaxation and to relieve tension.

PANEL
TECHNOLOGY

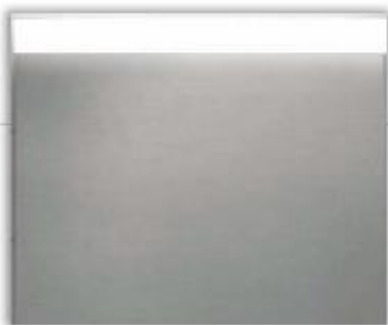

LESS COMPLAINTS
LED Driver not required.
Incorporate an AC-LED
module tested for durability.

SUPERIOR TECHNOLOGY
Maximum luminosity.
High visual comfort.
Uniform light.

MUCH MORE than just mirrors

At Focco not only do we fit the best lighting to our products, we also integrate functions and add values that improve the user experience and the quality of their day-to-day activities.

Defogger function
Guarantee perfect
visibility

Defogger System
fitted on the back of
the mirror.

With
defogger

Without
defogger

Anti-corrosion
protection avoids
glass oxidation

Mirror without anti-corrosion
protection with oxidized edges

Listen to your
favorite music
while you get ready

Connect your device to the
bluetooth speaker integrated
behind the mirror.

Touch sensor

Easily control lighting and defogger function directly from the mirror.

Charge your devices in the mirror

Useful USB ports integrated in the side of the mirror will allow you to charge your devices while you get ready.

LINA

Illuminated mirror

M0002

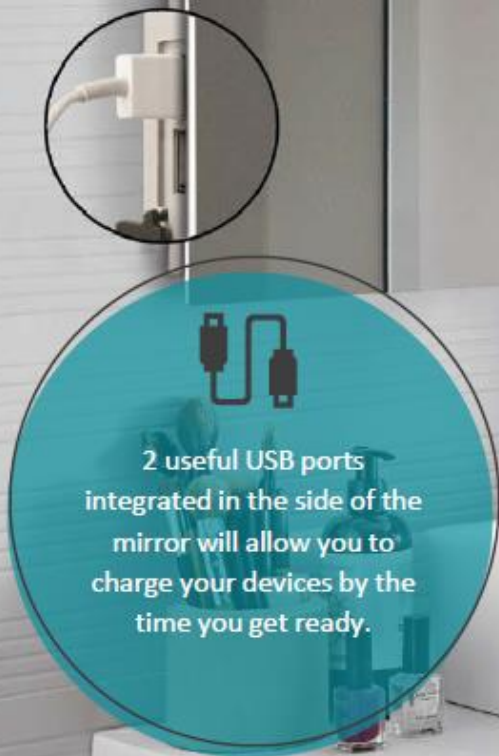

- It provides HIGH luminosity and NO glare.
- Corrosion protection treatment that avoid glass oxidation.
- Includes defogger system that guarantee perfect visibility without steam.
- 2 USB chargers.
- On/Off and defogger individual touch switch.
- Mobile phone support included.
- No visible LED dots.
- Safe packaging:
- Fall and impact tested.
