STATIC SEALING

CORE

GORE Universal Pipe Gasket

Unaffected by even the most aggressive chemicals, Style 800 gasket combines all the properties of expanded PTFE with exceptional sealability. Engineered to deliver superior bolt load retention, these gaskets exhibit outstanding creep resistance for reliable sealing of piping flange.

GORE GR Sheet Gasketing

GORE GR sheet gasketing has been developed for a secure flange connection offering an enduring seal for all pipeline and apparatus flange connections made of steel. It consists of pure, high quality expanded PTFE (ePTFE) that guarantees an almost unlimited chemical resistance of the seal.

GORE Gasket Tape Series 500

GORE Gasket Tape Series 500 represents the latest advancement in worry-free sealing performance and efficiencies for steel piping and equipment. Based on recently patented * technology, this cutting-edge product delivers dramatically improved creep resistance to maximize the operational reliability of large steel flanged applications.

GORE Joint Sealant DE

100% expanded PTFE (ePTFE) with monodirectionally oriented fibril structure.

PRODURA Joint Sealant

With greater strength than similarly priced joint sealants, PRODURA universal joint sealant provides outstanding sealing reliability. Mechanically altered to decrease creep relaxation, its fibrous structure is both strong and very conformable, which means it will fill areas of significant Compare the tensile strength pitting and corrosion.

PRODURA Sheet Gasketing

It consists of pure, high-quality expanded PTFE (ePTFE) that guarantees an almost unlimited chemical resistance of the seal.
