PACKINGS

Static Seal Packings

ICP 907

Braided packing manufactured from acrylic fibre yarn added with special PTFE lubricant, silicone free.

ICP 910

Braided packing manufactured from PTFE filaments added with PTFE dispersion.

ICP 914

Braided hybrid packing manufactured from combination of PTFE fiber yarn and "Twaron" aramid fiber yarn in the corner.

ICP 924M

Braided hybrid packing manufactured from incorporated elastomer tube core, with a combination of ePTFE fiber yarn added with special lubricant based on graphite and GFO fiber with encapsulated “Twaron” aramid fiber yarn.

ICP TANK

Braided packing manufactured from hollow-centred elastomer core, over-braided with propylene fibers and PTFE tape, braided with PTFE filaments.

The successive PTFE coating provides gas and liquids moisture barrier. The hollow-centred elastomeric core, provides the packing elasticity and compressibility.
