THERMAL INSULATION

Textlies

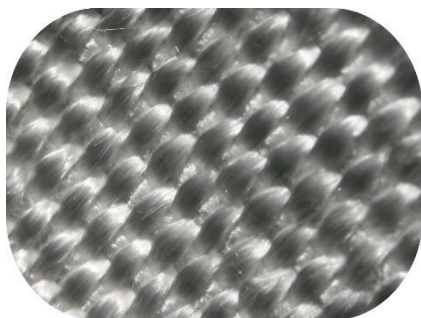

ICP 3000

High temperature textile manufactured from silica fiber yarns which are then processed accordingly to produce a range of textile products suitable for insulation, extreme heat protection or industrial sealing applications.

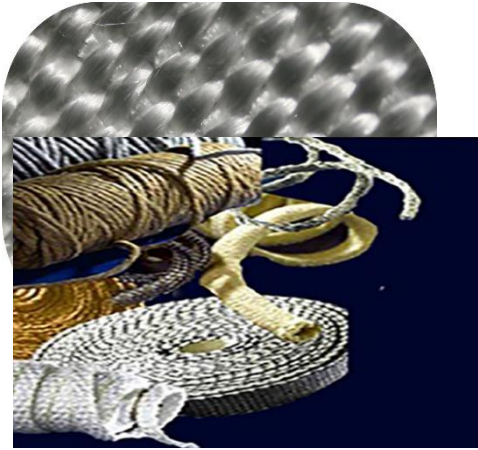

ICP 8400

Gaskets are made layer by layer from pre oxidized acrylic and aramid fiber fabric reinforced with brass wire, with synthetic rubber coating two sides.

ICP 5200

Insulation material manufactured from E type fiberglass with rubber in both faces.

ICP 5100

Insulation material manufactured from E type fiberglass with rubberin one face.

the gasket presents sensitivity to the minimal tightening during installation.
