### Features

- \* 4 Channel Microphone and 2 line input, treble and bass can be controlled separately .
- \* 6 Channel Partition output, and partition volume independent control.
- \* Built in chime, chime options: 4 tones and 2 tones (built-in), alarm generator.
- \* Mp3 decoding module supports usb/sd/bluetooth/fm radio playback function. With the MP3 remote control, support power off memory function, MIC recording function.
- \* When the alarm generator starts, background music will be closed and partition output will automatically open to maximum output volume.
- \* Built in 24V DC power input.
- \* Mic1-4 built-in 48V phantom power supply, and switch can be independently controlled.
- \* T-216 partition control microphone can remotely control partition output, and it can be cascaded up to 6 units.
- \* Audio input with independent control on tone control and total volume control.
- \* A variety of indicator lights (signal, the top of the roof, to protect the LED indicator)
- \* Using fan forced cooling structure, allowing the machine to work for a long time.
- \* There are 5 priority functions:  
The first level EMC priority: when input the EMC alarm signal, all the sound source will be turn off, and the 6 Channel partition output will automatically open.  
Second level: tel/rem mic override mic1-4, line1-2 and bell tone.  
Third level: built-in alarm generator override bell sound, mic1-4, line1-2, 6 partition output will automatically open.  
Fourth level: built-in bell tone override mic1-4, line1-2.  
Fifth level: built-in mic1 override mic2-4, line1-2.
- \* Constant voltage output: 70V, 100V, rated resistance output: 4-16 Ω.
