Shine A Motorized

Motor in roller design – Special motor in roller design maintains quiet and smooth operation.
 Silent operation – All Seemax motorized screens use a special rubber antinoise and antivibration mechanism on the roller. This mechanism greatly absorbs and reduces the impact and ensures a quiet and smooth operation. Even after extensive testing of the high quality core of over ten thousand revolutions, the motor remains durable and efficient.
 Equipped with quiet motor – Equipped with a quiet motor for quiet operation.
 Unique roller design ensures the flattest screen surface – Large diameter rollers ensure long-term screen integrity providing a consistent flat projection surface.
 Custom size – A black border is all around the screen fabric. Standard large upper black drop for format at 16:9 and 2.35:1.
 Customer-required format or black border is acceptable.
 Equipped with standard 3 button in-line switch – All Seemax control systems are available for this model screen. For detailed information please refer to pages "Control Options".
 Screen selection – Matte White/Matte Grey/Matte White 280/Matte Grey 180
