“Expertise, service and quality at a fair price

Expertise

Globally positioned with extensive experience in manufacturing one of the most comprehensive portfolios in the light machinery equipment industry.

Service

Focus on designing personalized, effective, and technically advanced solutions that are tailored to customer needs.

Quality

Providing customers with innovative, efficient, durable, safe and ergonomic products at the best value-price relationship.

UNE-EN ISO 9001

At ENAR, we combine our extensive experience with exceptional customer service and high quality products, all at the best value-price relationship. We focus on personalized, effective and technically advanced solutions, ensuring the satisfaction and exceeding the expectations of our professional clients.

Since 1964 we have been committed to safety, which is why our products are resistant, sustainable and reliable, ensuring optimal performance on each job.

ENAR's quality is manifested in each product. All our products are developed with the most advanced technology to meet the challenges of modern construction, and maximize efficiency and effectiveness in each work.

Our specialization in light construction equipment is key to guaranteeing robust structures. We vibrate concrete with the widest product range on the market.

ENAR, Leading Vibration to build a better world.
