

UX-TW LTE

Twin LNB with 2 universal outputs and LTE shielding

- UX LNB Serie guarantees an optimal signal reception and they fulfil every system requirement: from **single distribution** to **complex multiuser** or hospitality plants.
- Maximum reception quality for all high definition programs.
- A blocking **LTE filter** has been incorporated to avoid interference with signals intended for mobile telephony; thanks to the integrated LTE filter, the LNB is immune to any interference due to LTE satellite band transmissions.
- **Low noise figure** and high reliability.
- Small size.
- Low consumption.
- Some models are approved by Sky.

CODE	287338
Description	Twin LNB with 2 universal outputs and LTE shielding
Outputs	2
Gain	55
Consumption	130
LTE protection	-70
