

A Letter

(www.angelkaybabygirl.com)

I would like to tell all upstanding Presidents, all upright Prime Ministers, all honourable leaders and all righteous soldiers in all countries that every place is vital for our world because each one is an element of our society. If some good state is lost, atlases will not be completed. I mean that all good countries are like a puzzle. They complete each other.

We were born to meet and love one another. We were not born to hate and fight in any war. Why do I say that we were born to meet and love one another, and we were born not to hate and fight in any war? Try thinking. If we are born to hate and fight in battle, what will happen for us and our world? Love makes us feel pleasant and happier than hate, right? Peace makes us feel calm and relaxed more than battle, right? As a result, if we love one another and get a peaceful world, we will have more time to giggle with someone that we love, right? Everyone has someone that he loves, right? Why do not we think about how to spend the rest of our lives happily with someone whom we love? Why do we think about hate and fighting in a war?

War is not the best solution. If we have problems, we should open our hearts and talk to each other. I said that we should open our hearts and talk to each other because I strongly believe that numerous foreigners all around the world are not evil. They just have their own best reason and their own characteristics. Therefore, just open your hearts and give yourselves a chance to make new friends. Abbreviations of the United States of America are “The US” and “USA”. I sincerely feel that the “US” is “us”, and “USA” is “us all”. How do you think about the word “your” and “our”? I seriously feel that the secret is if we cut the letter “y” from the word “your”, the word “your” becomes the word “our”, so I really think that the letter “y” in the word “your” is “yell”. Therefore, if we kindly and politely talk to each other, the world will belong to “us” ☺ ☺.

I would like to tell you that showing your military force is not wrong, but please think about how to make our world as one too. “Kind and polite” talking means “relationship”, but “All wars” including wars with many Muslims who have been called “terrorists” mean “loss”. If influential leaders declare war on others, in the end, who will really win on a large number of dead bodies? I do not know much about nuclear weapons, but if someone makes a mistake, that could be the end of our world.

I would like to tell all the people around our world that everyone has a voice. One person, only one voice, but one million people are one million voices, and one billion people are one billion voices. Just make your own actions by thinking of all the lives of all the people around our world. Do not just think about only you, your family, and your country. Just put your heart on others' hearts whose lands are in civil wars or other wars. Give your sympathy, your mercy, your benevolence, and your kindness to them. Then, you will know how all people, who are in wars, feel.

Money from selling arms is dirty money because it is from the death of others. "Arm" is a part of the human body. Why does "arm" plus "s" mean "dangerous weapons"? I genuinely think that it is because "s" is a symbol of the word "sin" or "sinners". The God really would like to suggest to all the people all around our world that "arms" means "arm of sinners".

Soldiers use their arms to control dangerous weapons to endanger or kill their enemies. Maybe their assignments make them forget that their opponents had someone, whom their opponents loved, the same as them. How do all soldiers feel, if their enemy has a wife, who is pregnant and still waiting for her husband, or if they have a baby girl or a baby boy, who is still waiting for their parent?

Arms seller's hands always touch money which they receive from the death of others. I would like to ask you how can all the people who spend money which they got from blood and death of others go to the Land of the God after they die? I truly believe that raising the hands of politicians in parliaments or at the UN to support wars means supporting the death of others. (Many countries want to sell arms. Many politicians encourage arms sellers.) Nobody is alive forever. How can people who spend their lives causing blood and death of others, survive from hell and the eternal flame?

Last, I would like you all to know. If I have a chance to talk to the President of the United States of America, I have 4 questions to ask him;

"1) America can have the nuclear project, why Iran and other countries cannot have?"

"2) If the most powerful country does to America and Hawaii the same as America has done to China and Hong Kong, how will the US. Government feel?"

"3) If the most powerful country does to America the same as America has done to many countries in the Muslim world, I mean that if the most powerful country support war causing blood and death to happen in America because the most powerful country want to sell their arms, how will the US. Government and all American citizens feel?" And

“4) Why did the United States of America resign from a state party of the International Criminal Court? What are you afraid of? Who advised you to resign from a state party of the International Criminal Court?” ☺ ☺
