

Coronavirus (3)

I am not an enemy of WHO. But I request you to fight against coronavirus by wearing a mask when you are outside your home because *we do not know who infected even yourself*. And many patients who got infected with coronavirus *do not show their symptoms but they can transmit the virus to others*. Coronavirus also is *in the air* especially in *cold weather*. *If human's immunity could protect humans from the virus, why the virus has spread so quickly, and why many people were killed by the virus*. So, *wearing a mask when you are outside your home is a vital way to prevent yourself and your society from pandemic*. If you are smart enough, you will know I request you to do the right.

Loss of lives because they did not wear a mask. *Is WHO a war criminal?*
