ENTERPRISE MILESTONE

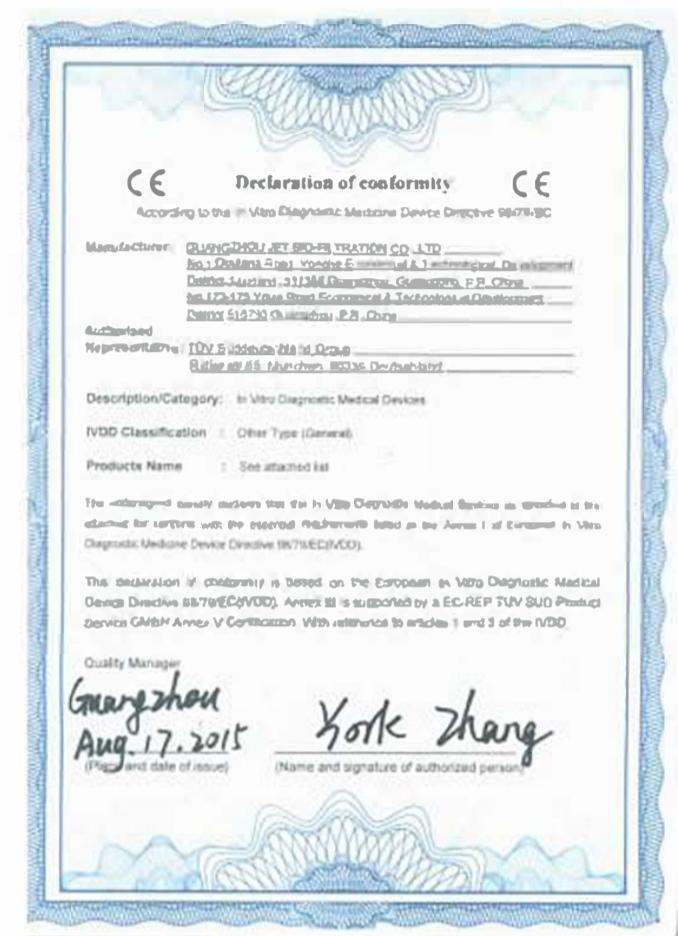

COMPANY INTRODUCTION

Guangzhou Jet Bio-Filtration Co; Ltd. was found in 2001 and is a well-known company in China involving R&D, manufacturing and sales of laboratory consumable products. It covers an area of 22,468m² in the scenic Science City. So far, the company has distributors in more than 50 countries all around the world, including America, Japan ,Canada, Germany, Australia and Korea. It has set up offices in several domestic cities like Shanghai, Beijing, Chengdu, Wuhan and Guangzhou. Its main products include laboratory consumables (pipettes, tissue culture products, centrifuge tubes, filtration products etc...), analyzer, lab equipment, reagent and culture medium, which have all been certified by ISO 9001/13485 and CE quality management system. Our goal is to provide innovative solutions and premier service and maximize customer value.

Tissue Culture Products

Cell and Tissue Culture Products series, including CellDETACH™ Temperature-Responsive Culture Surface Products, CellATTACH™ Surface Products, Cell and Tissue Culture Products, Roller Bottles, Bio-Reaction Tubes and so on, are all innovatively designed by JET engineers and manufactured in 100,000 grade clean room environment under the control of ISO 9001:2008 and ISO 13485 quality management system. All the JET BIOFIL Products are manufactured with 100% USP VI crystal class virgin polystyrene(GPPS) and equal high quality polyethylene(PE) to eliminate all extraneous materials and ensure the integrity cells. Furthermore, the high transparency of high class material ensures good observability. In addition, all the products are sterilized by gamma irradiation and certified DNase/RNase free and non-pyrogenic. Products are modified with vacuum-gas plasma causing the very hydrophobic polystyrene surface to become negatively charged and hydrophilic, allowing cells to attach evenly and consistently. And our own technological transformed vacuum-gas plasma machine has been applied to adherent and suspension cell lines.

JET CellFac™ Products

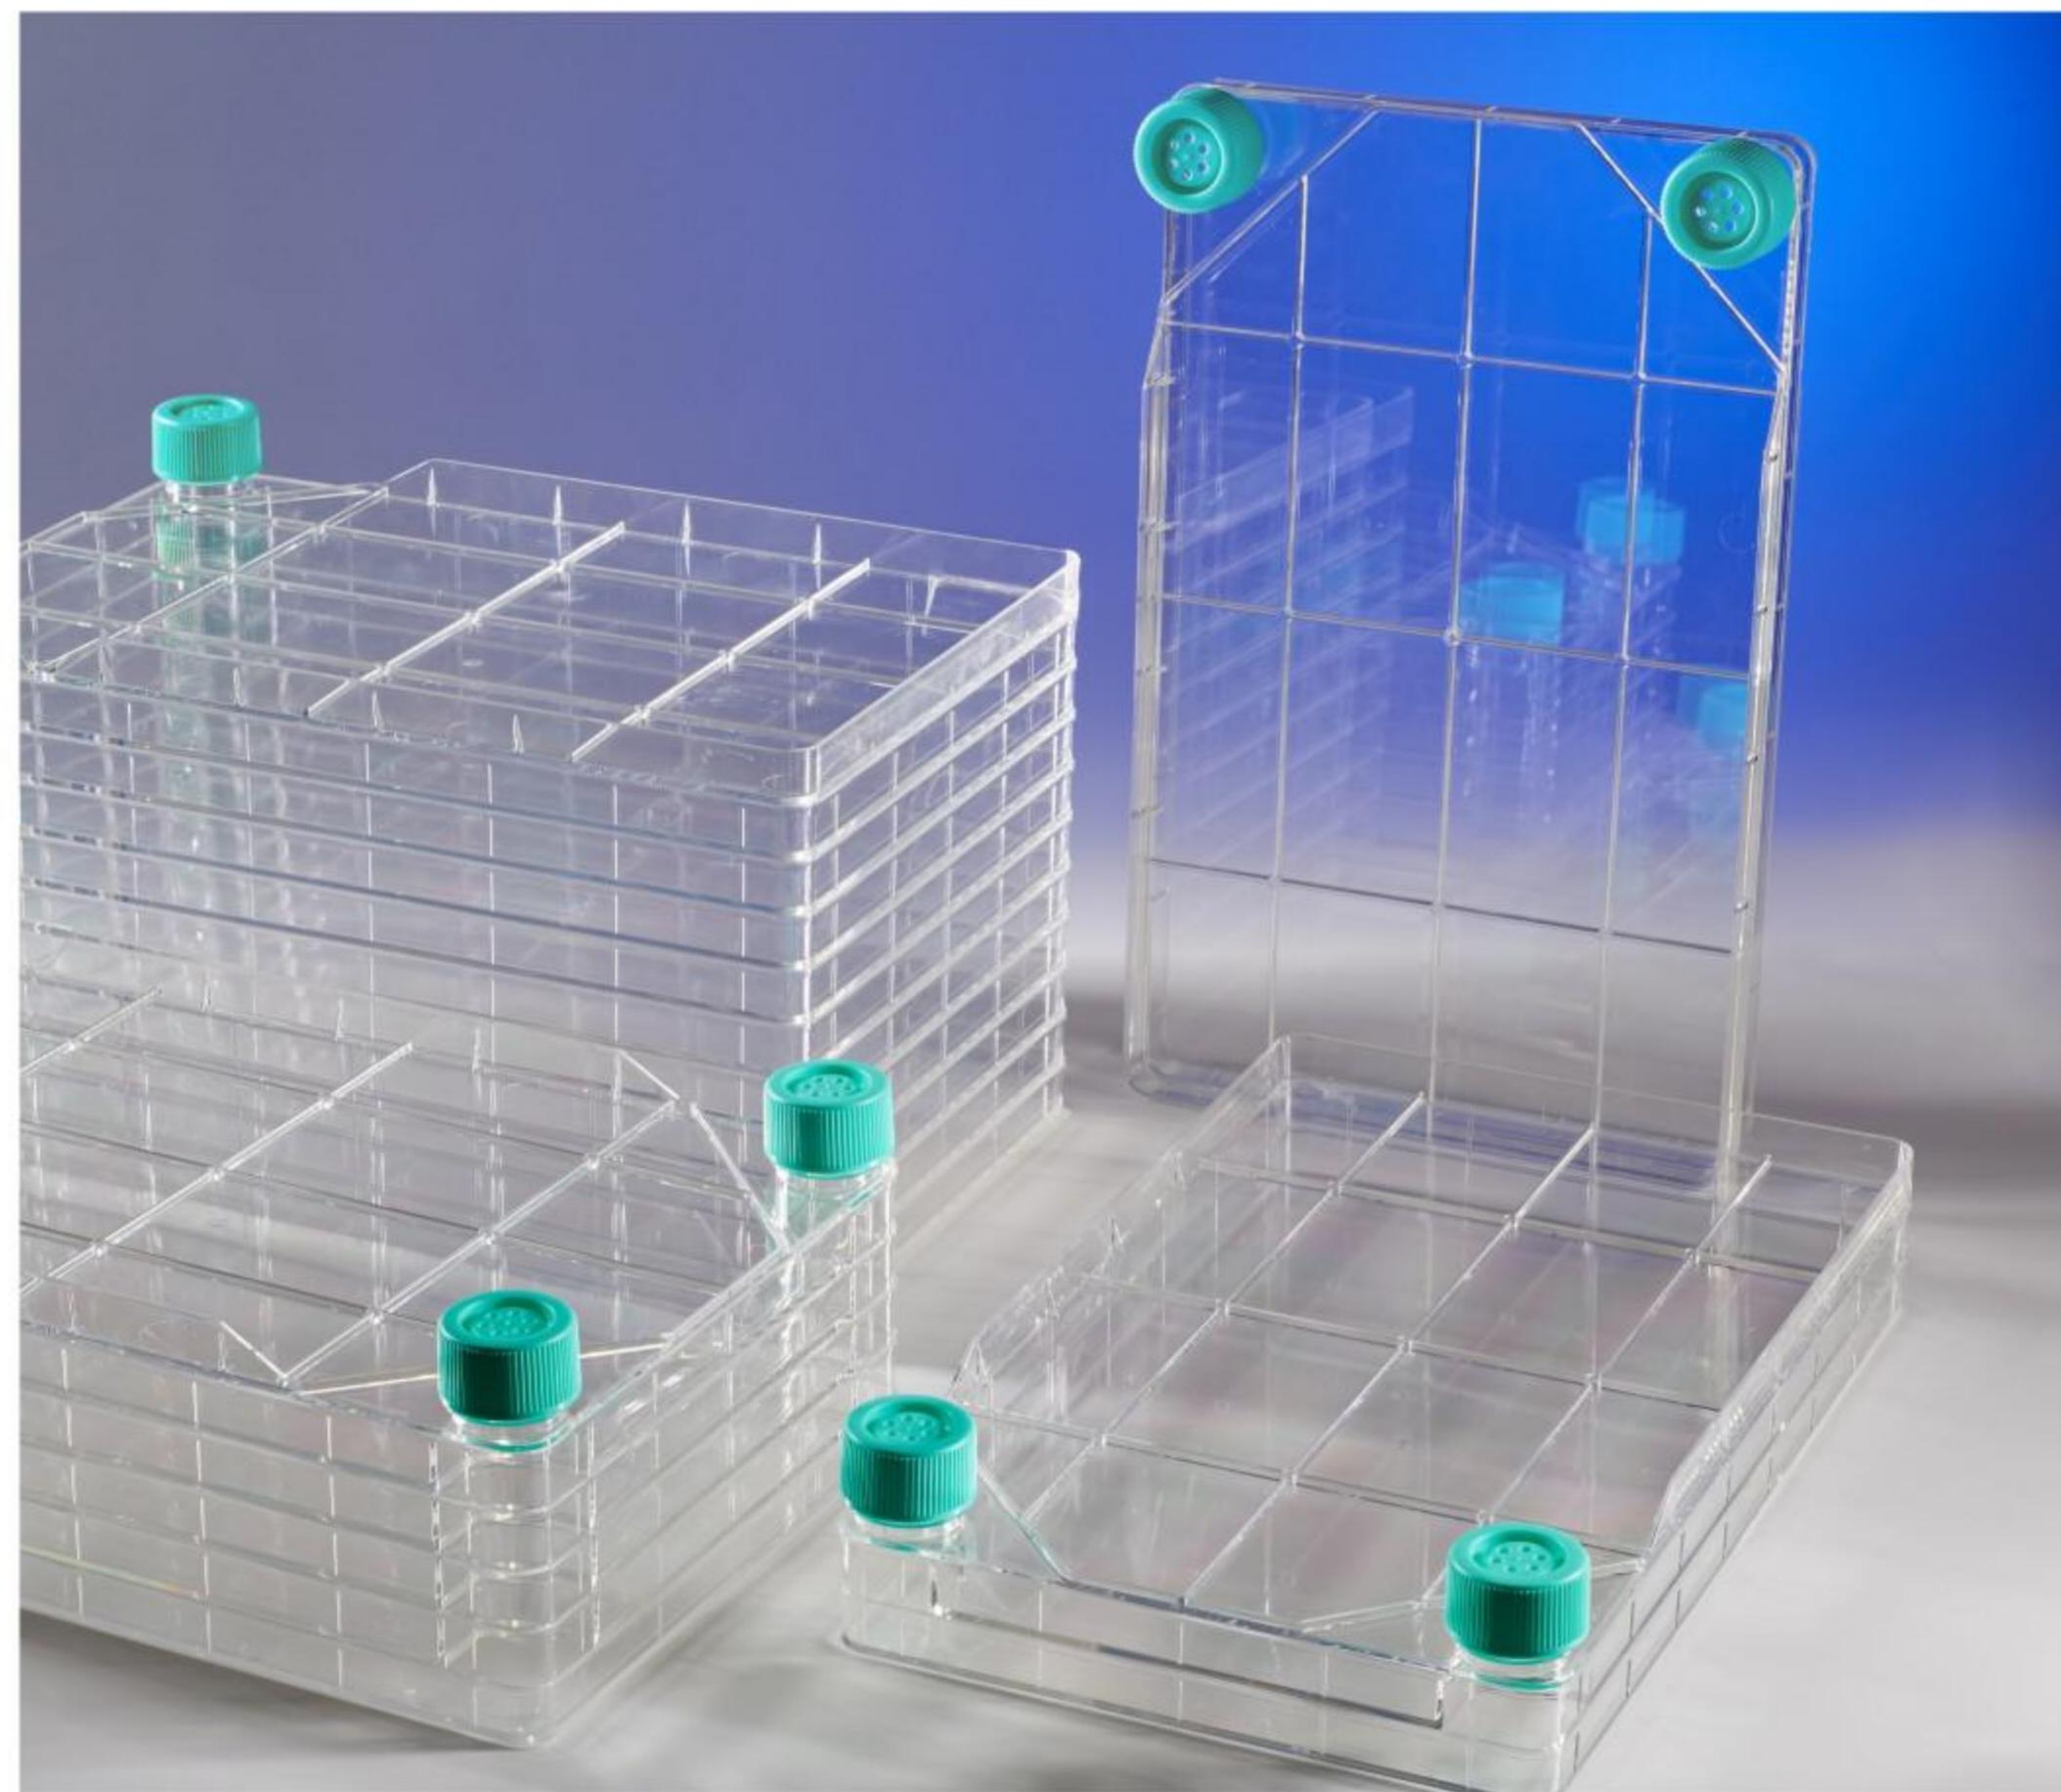

In the past ten years, due to the rapid development of biological products, the traditional method of obtaining biological products from animal tissues by biochemical technology has been far from meeting the needs of the market, and in vitro large-scale culture of animal cells which is applied to express specific proteins, monoclonal antibodies and interferon and product virus vaccine has become the most common technology currently.

At present, the common methods of cell culture include conventional cell culture dish, plate, flask, roller bottle, bioreactor, etc. The above cell culture devices have the following serious defects:

1) the unit volume of cell culture vessel and apparatus provides a surface area for cell growth, cell growth density is low, the number of harvested cells in a single culture is low, and a large amount of materials, labor and time are needed in repeated cultures.

2) conventional cell culture dish, plate and bottle are all open type, so contamination is prone to happen in the process of liquid adding, inoculation and cell harvesting.

JET CellFac™ Products developed by JET is made from medical-grade general purpose polystyrene (GPPS) that is a polymer (patent number:ZL201220167380.4ZL201220167162.0), and is an ideal tool for large-scale cell culture and the production of cellular drug.

- * The culture device with monolayer or up to 10 layers can realize large-scale cell culture by one time
- * Available in surface treated, or non-treated
- * The device is assembled by hydrophobic membranes with a aperture of 0.22μm to avoid potential contamination in gas exchange
- * The device does not absorb cytokines and growth factors, and conventional trypsin digestion method is applied in cell harvesting
- * Strict integrity tested
- * Sterilized by gamma irradiation
- * Non-pyrogenic & DNase/RNase-free

Ordering Information

- * Individually packaged in peel-to-open plastic blister pack
- * Every case has printed with lot No. for quality traceability

Guidelines For Use

Pour the media directly into the Cell Factory system

Equilibrate by placing the Cell Factory system on the side with the small port

Turn 90° so the filling inlet is in an upward position. The medium will be separated, with equal amounts in each chamber

Carefully tilt the Cell Factory system to a horizontal incubation position with the filling inlet up

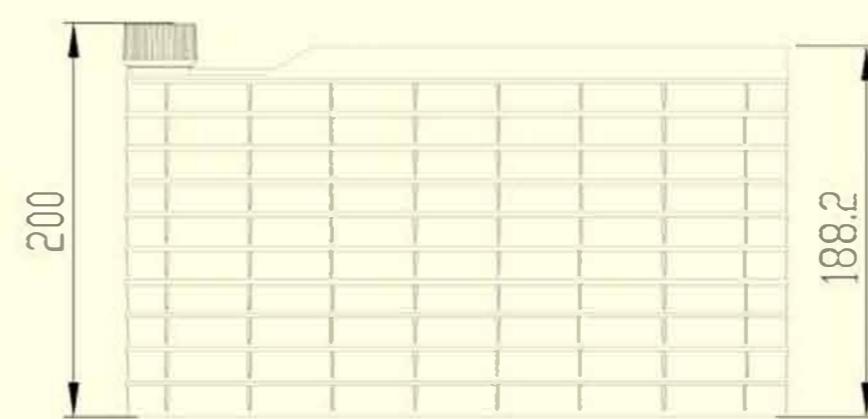

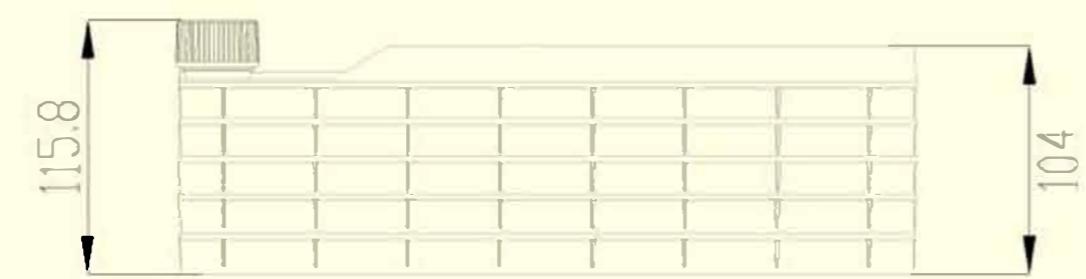

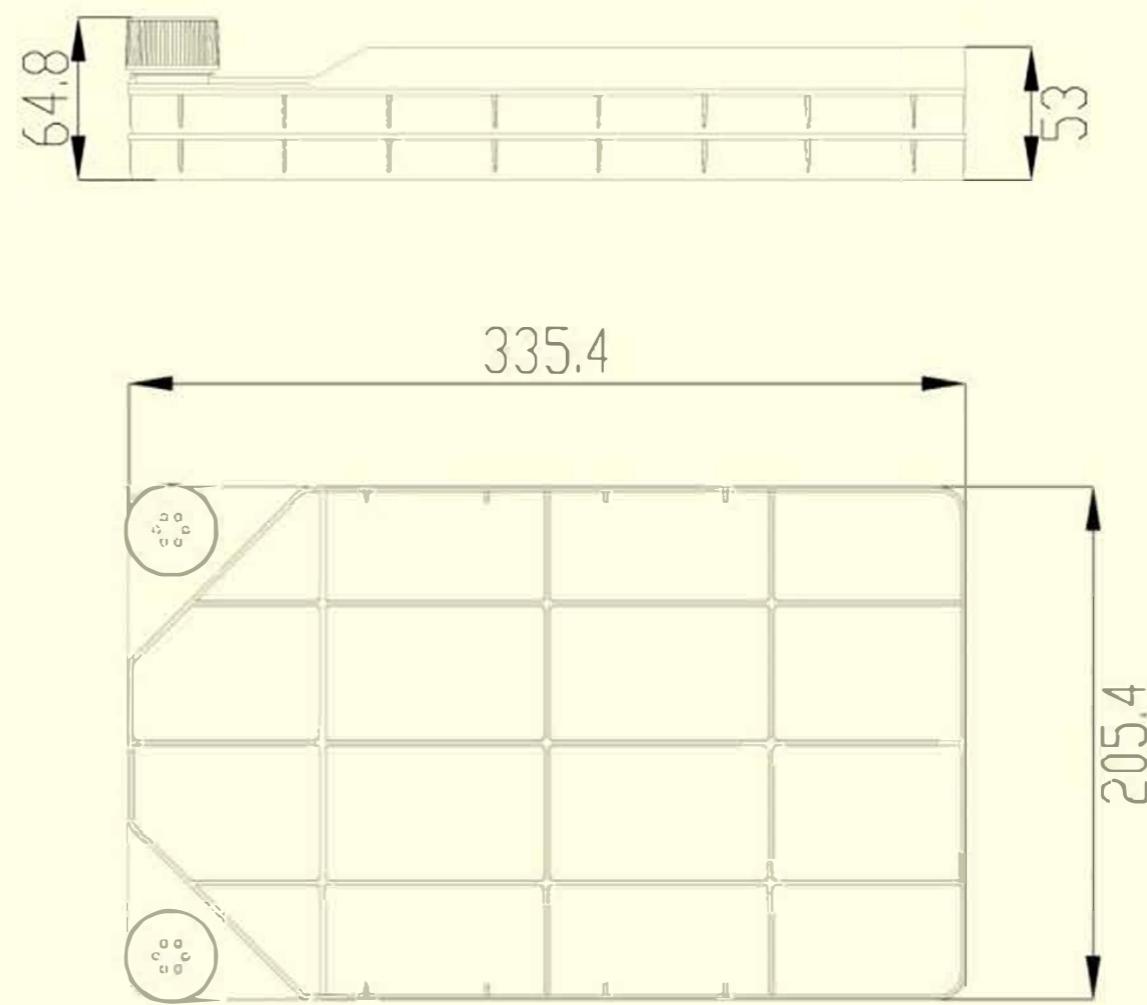

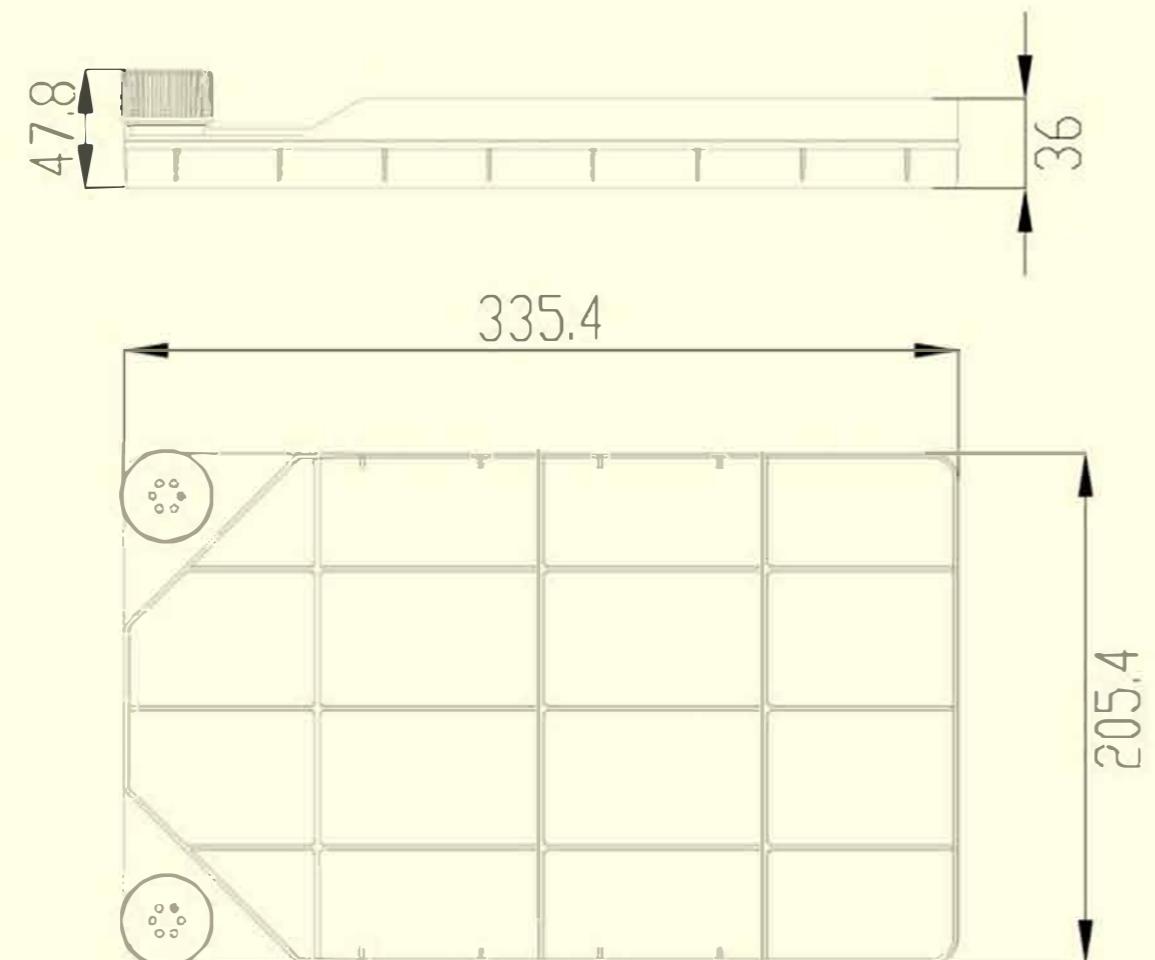

Incubate following appropriate protocol

Loosen the cap and empty directly into the reservoir

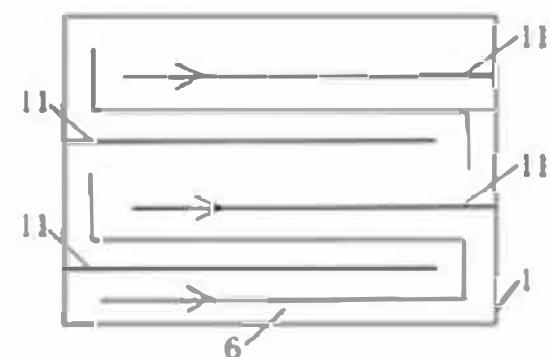

| Cat.No. | Layers Qty. | Appro. Cell Growth Area(cm ²) | Working Volume (ml) | Material | Description | Sterile | Qty.per bag/Case |

CellBOX™

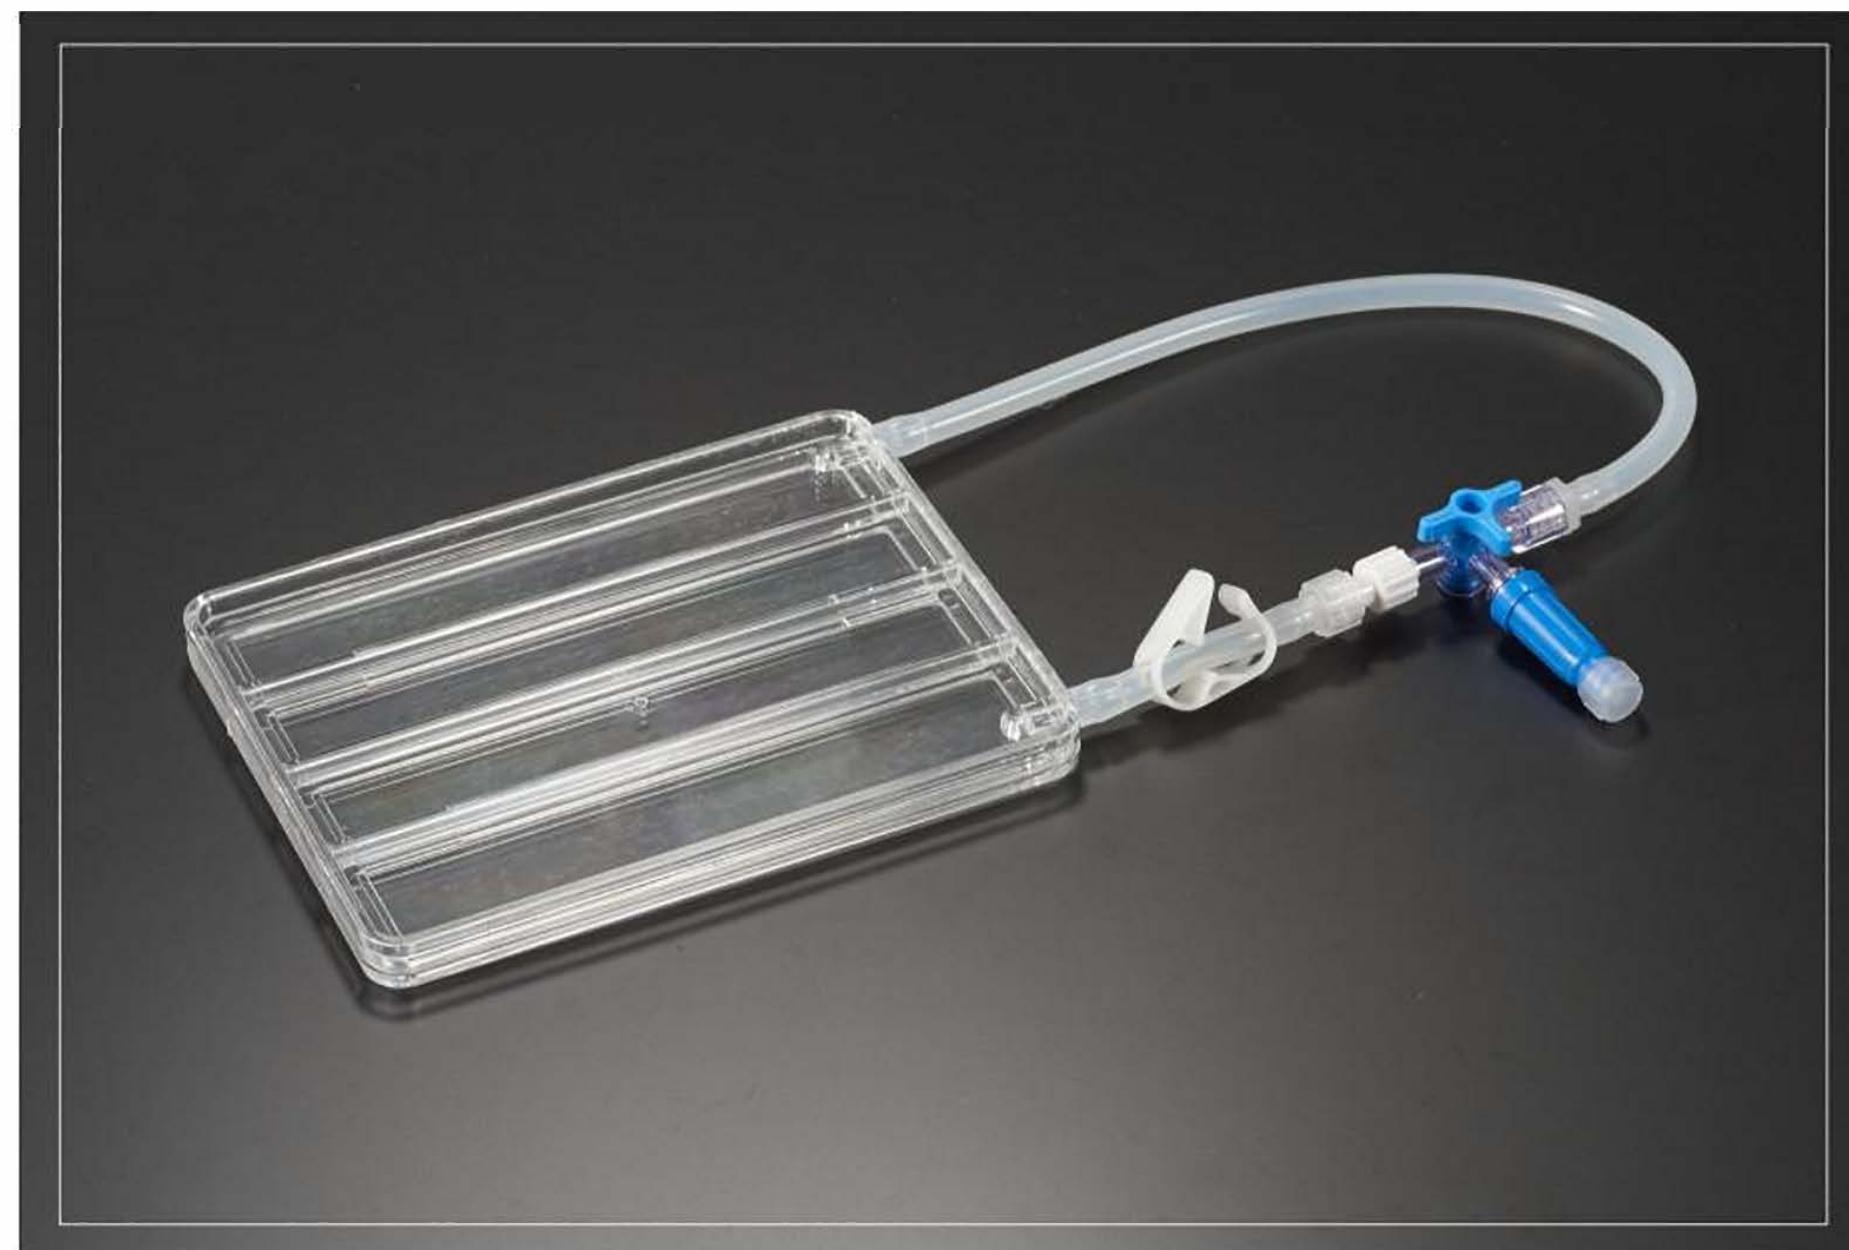

- * Made from high grade gamma resistance polystyrene
- * The culture device with monolayer or up to 10 layers can realize large-scale cell culture by one time
- * Easy to use and standardized operation ensures uniform cell growth
- * Suitable for most adherent cell lines
- * Linear amplification, easy to expand to the industrial scale
- * Transparent material can be observed directly under a microscope
- * Modular design can be multi-level series or parallel
- * It can be equipped with a variety of online monitoring instruments
- * Strict integrity tested
- * Sterilized by gamma irradiation
- * DNase/RNase-free & Non-pyrogenic

JET CellSCAFFOLD™ 3D Cell Culture Products

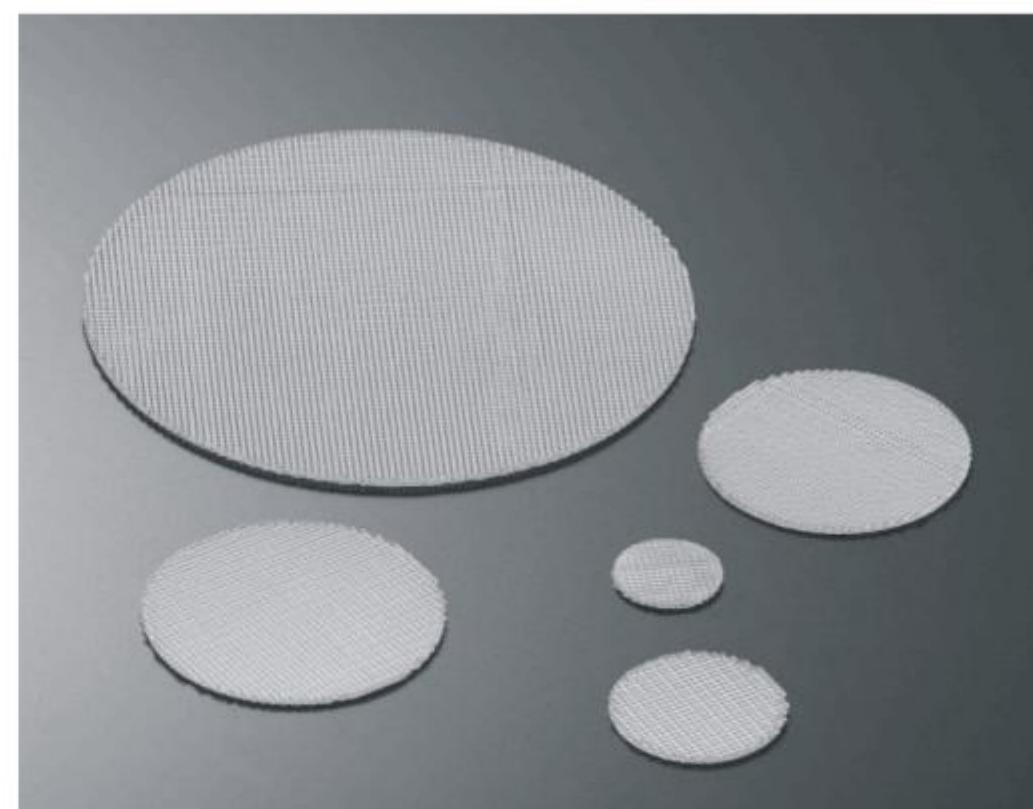

JET CellSCAFFOLD™ 3D cell culture series include culture plates with 6, 12 and 24 wells and culture dishes in sizes of 35mm, 60mm and 70mm. They are all made of polystyrene (GPPS), a high molecular material. 3D scaffold for cell culture is able to simulate the three-dimensional structure of the cells in animals and the human body to the maximum extent, to provide an ideal environment for the interaction between cells, to greatly improve culture area, and to extremely improve the yield of cell culture. JET 3D scaffold for cell culture which is a patented product (patent number: ZL201620728244.6, ZL201620728243.1, 201510783345.3) is an ideal tool for three-dimensional cell culture, cell-cell interaction mechanism, cell immunotherapy, stem cell therapy, drug screening and the production of cellular drug.

- * The whole 3D scaffold for cell culture is made from polystyrene that is a polymer, with a mean wire diameter of 500 μm , a mean wire spacing of 260 μm , and high regularity. The product is structured with 3-dimensional channels, and has extremely high connectivity, facilitating the transmission of nutrients, the consistency of metabolic activity and the accuracy of culture results in 3D cell culture
- * 3D cell culture is more likely to the expression of cell functions as compared with 2D, and simulates the three-dimensional structure of the cells in animals and the human body to the maximum extent, providing an ideal environment for the interaction between cells
- * Polystyrene-made, cytokine and growth factor resistant, easy cell secretion collection, time-saving and free from extra separating steps
- * Open pores with high connectivity, facilitating nutrient absorption and metabolism
- * 3D scaffold with larger surface area than regular cell culture products, material efficient
- * Strict integrity tested
- * Sterilized by gamma irradiation
- * Non-pyrogenic & DNase/RNase-free

**There are four layers in one scaffold . And 4 different colors corresponding that . From plan view and vertical view.
In accordance with both pictures, obviously showing this structure consisting of four layers of fibre, waved vertical to each other, and not overlapping.**

3D Cell Culture Plate

| Cat.No. | Well Qty. | Scaffold Inserts in Package | Size | | Description | Scaffold Dimension (mm) | Surface Area(cm ²) | Sterile | Qty.per bag/case |
|-----------|-----------|-----------------------------|--------------------|----------------|---------------------------|-------------------------|--------------------------------|---------|------------------|
| | | | Fiber Diameter(μm) | Pore Width(μm) | | | | | |
| TDP032006 | 6 | 3 | 500 | 260 | Standard, Surface treated | 33.5*1.6 | 143 | Y | 1/8 |

3D Cell Culture Dish

| Cat.No. | Diameter (cm) | Scaffold Inserts in Package | Size | | Description | Scaffold Dimension (mm) | Surface Area(cm ²) | Sterile | Qty.per bag/case |
|-----------|---------------|-----------------------------|--------------------|----------------|---------------------------|-------------------------|--------------------------------|---------|------------------|
| | | | Fiber Diameter(μm) | Pore Width(μm) | | | | | |
| TDD032035 | 3.5 | 1 | 500 | 260 | Standard, Surface treated | 32.0*1.6 | 43 | Y | 1/40 |
| TDD032060 | 6.0 | 1 | 500 | 260 | | 51.0*1.6 | 109 | Y | 1/30 |
| TDD032070 | 7.0 | 1 | 500 | 260 | | 67.5*1.6 | 191 | Y | 1/30 |

Easy to Use

1 Prepare the required volume of cell suspension

2 Add the cell suspension to the 3D Scaffold slowly.

3 Ensure that the 3D Scaffold is fully covered with cell suspension and avoid overflow.

4 Use tweezers to pick up the 3D scaffold and place it into the tissue culture dish.

5 After finishing vaccinal cell, put the dish into a 37 °C and 5% CO₂ incubator for culturing for three hours.

6 After three hours, slowly add the cell culture medium through the dish's internal wall.

7 Place the 3D Scaffold into the incubator once the cell culture medium covers the Scaffold completely.

JET CellSLIP™ Cell Slide

With the continuous updating and rapid development of life sciences research, technical indexes analyzed and observed by cell culture experiment are increasing, and their covered fields are expanding. Cell slide is a material of in vitro cell experiment achieved by adherent cells growing adherent to a certain solid surface (e.g., cover glass, slide glass) according to requirements for experimental research. HE staining and immunocytochemistry of a large number of cell slides are often required in many research projects with massive samples and numerous indicators to be measured. However, routine cell slides used currently have serious defects. For instance, cell slides are prone to be damaged because they are made of glass; cell slides are difficult to control due to no handle; cells can grow in any part of the cell slide and their container when culturing, etc. JET cell slide and culture dish which is a patented product (patent number: ZL201520113833.9, ZL201420594580.7, ZL201420594259, ZL200610047607.0) solves various defects of existing cell slides and contributes to simple and easy operation of above experimental studies and application.

- * The cell slide is made from PET, has high strength and is unbreakable
- * Only the surface of the cell slide undergoes high hydrophilic treatment, so cells are easy to grow adherent to the cell slide; while other parts receive hydrophobic treatment, thus cells are difficult to grow
- * There are 2 specifications with different diameters: 8 and 10mm; the number of cell slides with single dish : 12/18/32/45
- * Transparency and light transmittance of the cell slide are good; therefore, cells can be clearly observed under a light microscope and a fluorescence microscope
- * The specific set structure of the cell slide can realize the development of multi-factor, multi-index and multi-level in vitro study under the same conditions, resulting in accurate and reliable research results
- * Cell culture once can prepare multiple cell slides for different studies and objectives, increasing work efficiency;
- * The handle of the cell slide tilts with a certain angle, which is convenient for operators to directly clamp. The handle is engraved with numbers, facilitating identification;
- * The product and forceps for the cell slide are both sterilized with gamma ray, and should be used immediately after opening
- * DNase RNase-free & Non-pyrogenic

Ordering Information

- * The cell slide is made from medical-grade high-transparent PET/PETG, the culture surface undergoes high hydrophilic treatment
- * The integrated cell slides are fixed in the culture dish; if further test is necessary after cell culture, the cell slides can be taken out one by one and placed in a culture plate or other containers with a corresponding specifications
- * Each box of products is matched with individually packed sterile metal tweezers;
- * Individually packaged in peel-to-open plastic blister pack
- * Every case has printed with lot No. for quality traceability

Easy to use

| Cat.No. | Dish(cm) | Cell slide Qty. | Diameter(mm) | Desdcription | | Corresponding Plate | Qty.per bag/case |

Confocal Dish

- * Available with 2 different glass bottom sizes of 15mm and 20mm
- * Glass thickness: 0.12-0.16mm
- * Borosilicate glasses is with high homogeneity ,low bubble and inclusion content
- * Medical grade shadowless glue, highly transparent achromatic
- * Suitable for fluorescent microscope experiments , confocal microscopy and phase-contrast microscopic experiments , etc
- * Dish surface is smooth and free from striation to maximize usable area for growth
- * The rim on upper side of the lid mates with the dish brim for easy and secure stack
- * Lids with several little chimbs to shape vents are available for very effective gas exchange
- * Sterilized by gamma irradiation
- * Non-pyrogenic

CellDETA™ Temperature-Responsive Cell Culture Surface

Thank you for using a product with temperature-responsive culture surface. The temperature-sensitive polymer with thickness of 15-20 nanometer chemically covalently immobilized on the culture surface. Cells can be spontaneously intactly detached from temperature-responsive culture surface around 20-25°C without enzymatic processing which is well known for its dysfunction of cells. Keeping their activities is possible with temperature-responsive culture surface for cell culture.

Applications

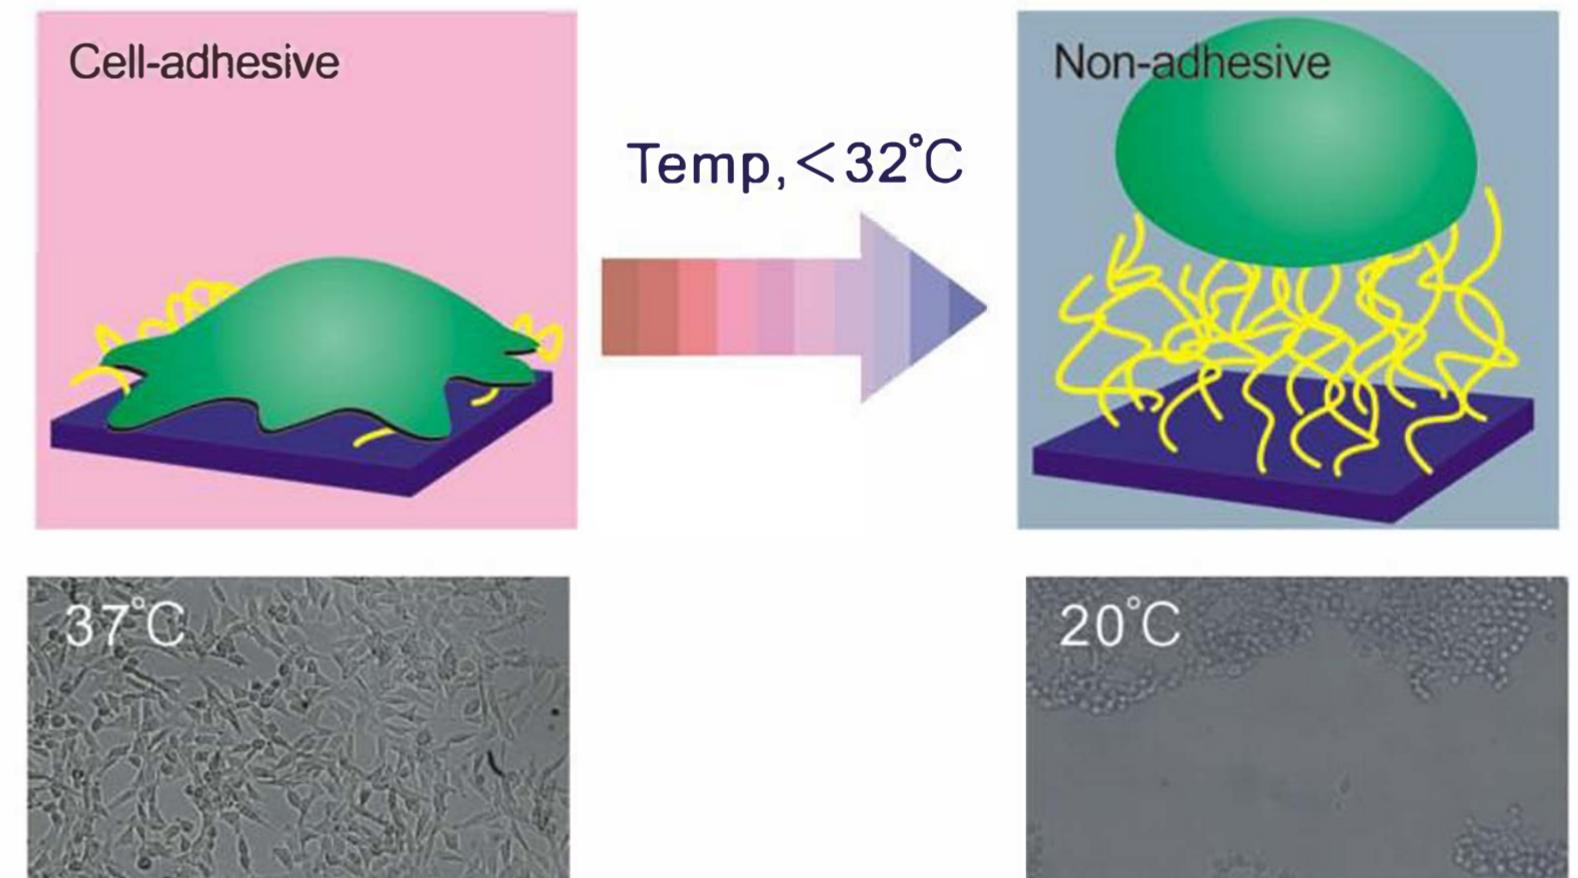

Ideal product for intactly harvesting cells, especially for fragile cells such as stem cells and neuron cells, and macrophage cells etc., and also for tissue culture, extra cellular matrix research, and so on.

Cautions

- * Please ensure that there is no damage to the package and read the following instructions carefully to ensure the maximum performance of this product .
- * The product is intended for research purposes only. Any other use is not warranted by Jet coporation. Do not use the product for clinical or diagnostic purposes. Products with temperature-responsive surface are intended for single-use only .
- * Do not re-use the product as cell secreted and medium-derived components may be adsorbed to the surface after cell harvest, compromising performance in repeated use.
- * Re-sterilization and scratching of the culture surface may compromise the temperature-responsive surface properties .

In vitro cell culture

- * The temperature-responsive polymer chemically covalently grafted to the culture surface area becomes slightly hydrophobic above 32°C, allowing cells to adhere. So it is recommended that cells are preferable incubated at 37°C .
- * The temperature-responsive surface becomes hydrophilic below 32°C, causing cell detachment from the surface .
- * To avoid undesired cell detachment during seeding cells and medium changes, pre-warming culture surface and culture medium (37°C) to facilitate cell attachment is suggested. Observations under a microscope should also be kept short in order to prevent cooling and undesired cell detachment. Seed cells evenly over the culture area to avoid uneven distribution of the cells in culture .
- * Attachment time for cells may vary with cell type .
- * Should you have difficulty in attaching cells, pre-coating of the culture surface with collagen, fibronectin, polylysine, laminin or the use of medium with serum may ease cell attachment .

Cells harvest

- * Culture cells on temperature-responsive surface to a density before confluence, that is cell-cell junctions are not established, cells harvest are readily conducted by slight agitation and pipetting
- * Place the product with temperature-responsive surface in an environment set at 20-25°C in order to detach the cells. Alternatively, the product may be placed at room temperature (20-25°C) under sterile conditions. For quicker cell detachment, the culture medium can be exchanged to 20-25°C culture medium prior to detachment .
- * Cells should detach spontaneously under pipetting with transfer pipettes or serological pipettes after keeping at 20-25°C within 15-30 minutes, some cells may not detach completely.

depending on the cell type. The product with temperature-responsive surface becomes more hydrophilic with decreasing the temperature of culture environment detaching of cells from temperature-responsive surface .

- Normally the longer time required to harvest cells by conventional enzymatic processing, the stronger the cell attaching ability. Cells with stronger attaching ability that fail to detach spontaneously from temperature-responsive surface by slight pipetting can be detached by stronger pipetting or gently flushing the surface with medium after culturing at much lower temperature for longer time (for example, at 4°C for 60 minutes) .

Storage

The product should be stored at room temperature (20–30°C) and out of direct sunlight.

Disposal

Ensure the used product without biological and chemical pollution to the environment and disposed as recyclable plastics.

The product is prepared and shipped under high quality control. However, should you have any claims or questions, please contact us for free.

CellDETA™ Cell and Tissue Culture Flasks

CellATTACH™ Surface Products

The CellATTACH™ surface treatment is a latest technology which invented by JET's R&D team. This super hydrophilic surface offers a significant advantage over traditional cell culture surface. CellATTACH™ surface treatment can improve cell spreading and attachment, is suitable for the cells that may adhere poorly due to cell phenotype, stressful culture conditions or those which normally require additional biological coatings for attachment.

CellATTACH™ Cell and Tissue Culture Flasks

- ★ Available with 5 different growth areas of 12.5cm², 25cm², 75cm², 182cm², 300cm²
- ★ CellATTACH™ Surface Treated
- ★ Flasks surface is flat and free from striation to maximize usable growth area
- ★ 2 different cap styles can be used in both open and closed systems
- ★ Innovative angled neck design offers good pipet and cell scraper access in
- ★ Upper triangular and wider base shape provides stability
- ★ Protrudent ridge on the back side of the flask makes it easy for stacking
- ★ Special area near the neck for easy mark writing
- ★ Both flask sides have engraved graduation
- ★ Strict integrity tested
- ★ Sterilized by gamma irradiation
- ★ DNase/ RNase-free & Non-pyrogenic

CellATTACH™ Cell and Tissue Culture Plates

- ★ Available with 6 different growth surface areas of 6, 12, 24, 48, 96 and 96U wells
- ★ CellATTACH™ Surface Treated
- ★ Uniform well volume ensures equal growth surface area
- ★ Flat well bottom and round bottom plate
- ★ Well surface is smooth and free from striation to maximize usable growth area
- ★ Raised rims on wells with the uniform rings on the lid to reduce evaporation
- ★ Single position lid reduces the risks of cross-contamination and the handling mistakes
- ★ Wells are labeled with alphanumeric code for easy identification
- ★ Suitable for all common instruments and automation
- ★ Sterilized by gamma irradiation
- ★ DNase/ RNase-free & Non-pyrogenic

Cell and Tissue Culture Products

Cell and Tissue Culture Plates

Cell and Tissue Culture Plates are ideal for cell growth and cell yields on multiple, compare and other analyse.

- ★ Available with 8 different growth surface areas of 4, 6, 12, 24, 48, 96, 96U, 384 wells
- ★ Available in surface-treated or non-treated
- ★ Uniform well volume ensures equal growth surface area
- ★ Flat well bottom and round bottom plate
- ★ Well surface is smooth and free from striation to maximize usable growth area
- ★ Raised rims on wells with the uniform rings on the lid to reduce evaporation
- ★ Single position lid reduces the risks of cross-contamination and the handling mistakes
- ★ Wells are labeled with alphanumeric code for easy identification
- ★ Suitable for all common instruments and automation
- ★ Sterilized by gamma irradiation
- ★ DNase/RNase-free & Non-pyrogenic

Order Information

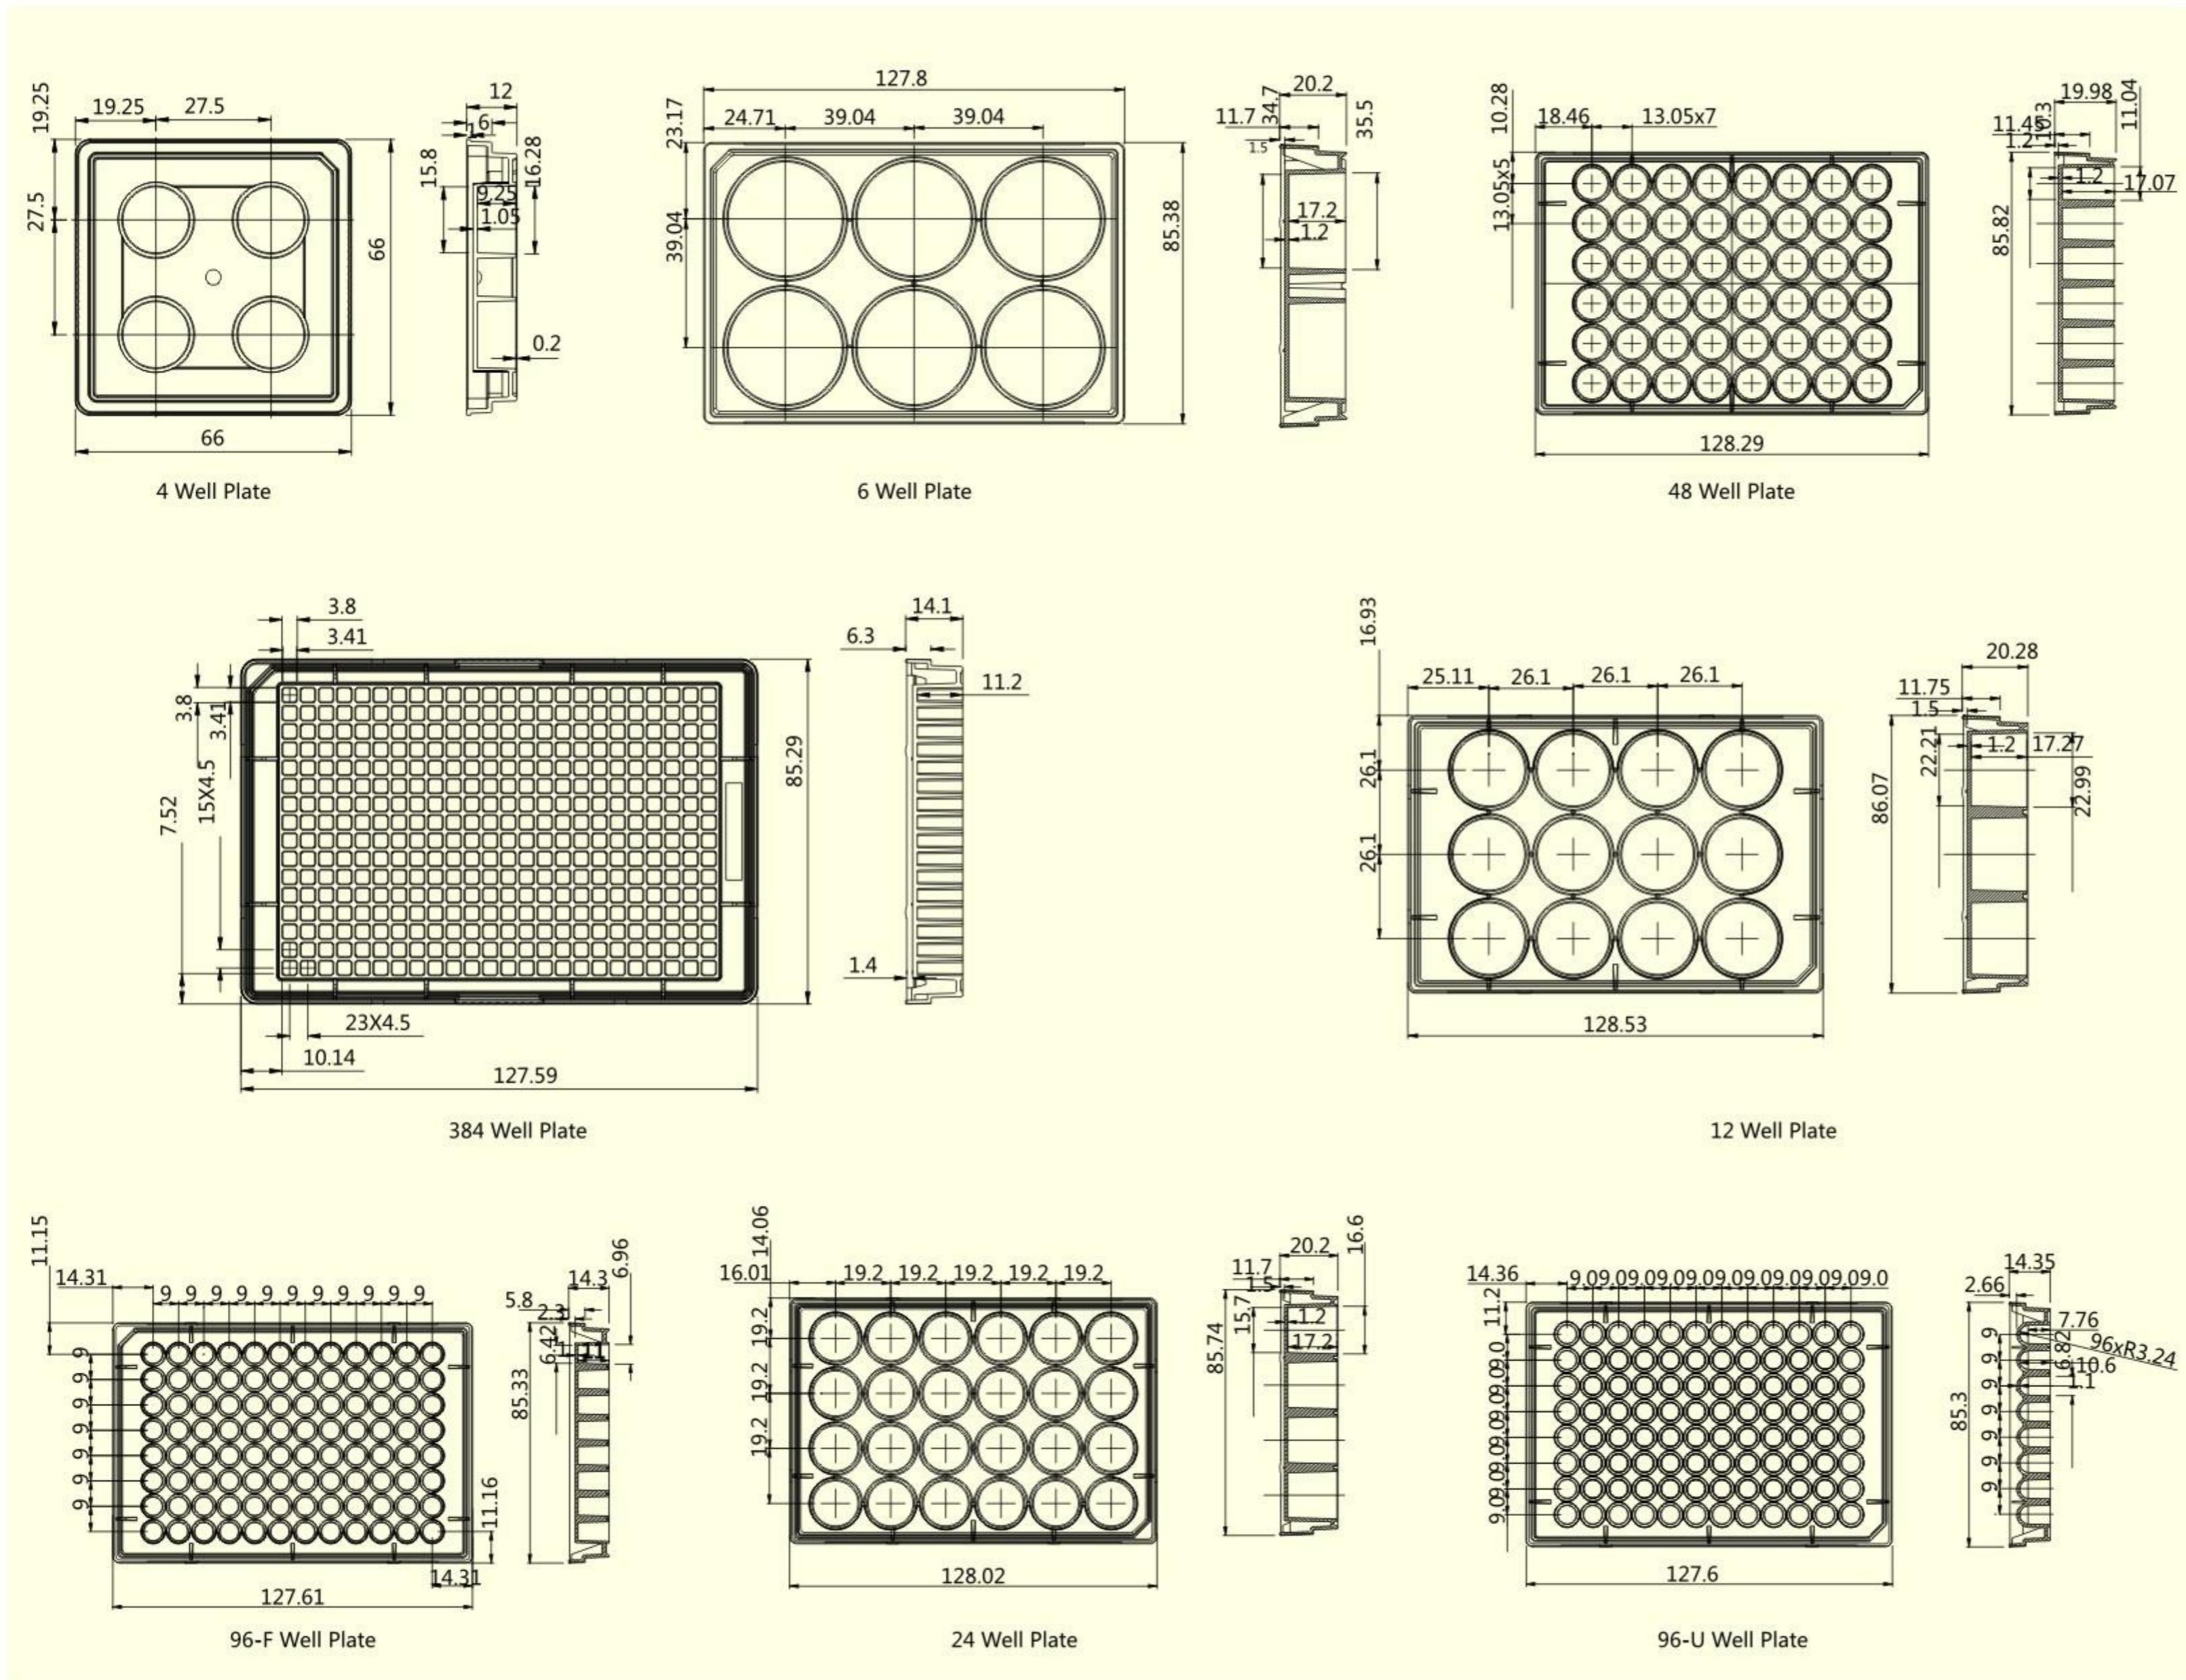

- * Individually packaged in peel-to-open paper/plastic blister pack
- * Every case has printed with lot No. for quality traceability

| Cat.No. | Well Qty | Surface Type | Max Well Volume(ml)(single well) | Lid | Sterile | Qty.per bag/case |
|-----------|----------|-------------------------|----------------------------------|-----|---------|------------------|

Polycarbonate [PC] Membrane Tissue Culture Plate Inserts

- The polycarbonate plate inserts feature a thin, semitransparent polycarbonate membrane that is available in six pore sizes from 0.1 μm to 12.0 μm . All inserts are treated for optimal cell attachment. The polycarbonate plate.
- Inserts are sterile and assembled with well plates and resist most fixing and staining agents. All plates come with lids.

Polyester [PET] Membrane Tissue Culture Plate Inserts

Tissue Culture Plate Inserts feature a thin, microscopically polyester membrane that is tissue culture treated for optimal cell attachment and growth. Tissue Culture Plate Inserts provide excellent cell visibility under phase contrast microscopy and allow assessment of cell viability and monolayer formation. Tissue Culture Plate Inserts are sterile and can be assembled with 6, 12 and 24 well plates. All plates come with lids.

| Cat.No. | Well | Pore Size(μm) | Growth area for insert membrane(cm^2) | Sterlize | Qty.per bag/case |

Cell Culture Inserts

The surface of the cell culture insert is super hydrophilic and placed in a 24-well culture plate for ease of cell culture without the need for a matrix coating and can be optimized for 3-d cell imaging.

Our cell culture inserts and plates meet ANSI standards and are equipped with alphanumeric well identification; all items are USP Class VI, sterile and include lids.

Application Examples

Transport studies

- ★ Molecules including hormones and growth factors
- ★ Drug transport across epithelial (Caca-2) and endothelial barriers
- ★ Drug transport across brain microvascular endothelial cells

Co-cultivation studies

- ★ Cell-cell interaction
- ★ Cell-matrix cell interaction
- ★ Cell-substrate interaction

Tissue engineering

- ★ Angiogenesis
- ★ Dermal/epidermal and epithelial tissue models

| Cat.No. | Pore Size (μm) | Culture Area (cm^2) | Suggested working Volume (ml) | No.insert/ multi- dishes | No. of multi-dishes/ case |
|-----------|--------------------------------|-----------------------------------|-------------------------------------|--------------------------------|---------------------------------|
| TCS021024 | 0.4 | 0.47 | 1.1 | 24 | 4 |
| TCS031024 | 3.0 | 0.47 | 1.1 | 24 | 4 |

Cell and Tissue Culture Flasks

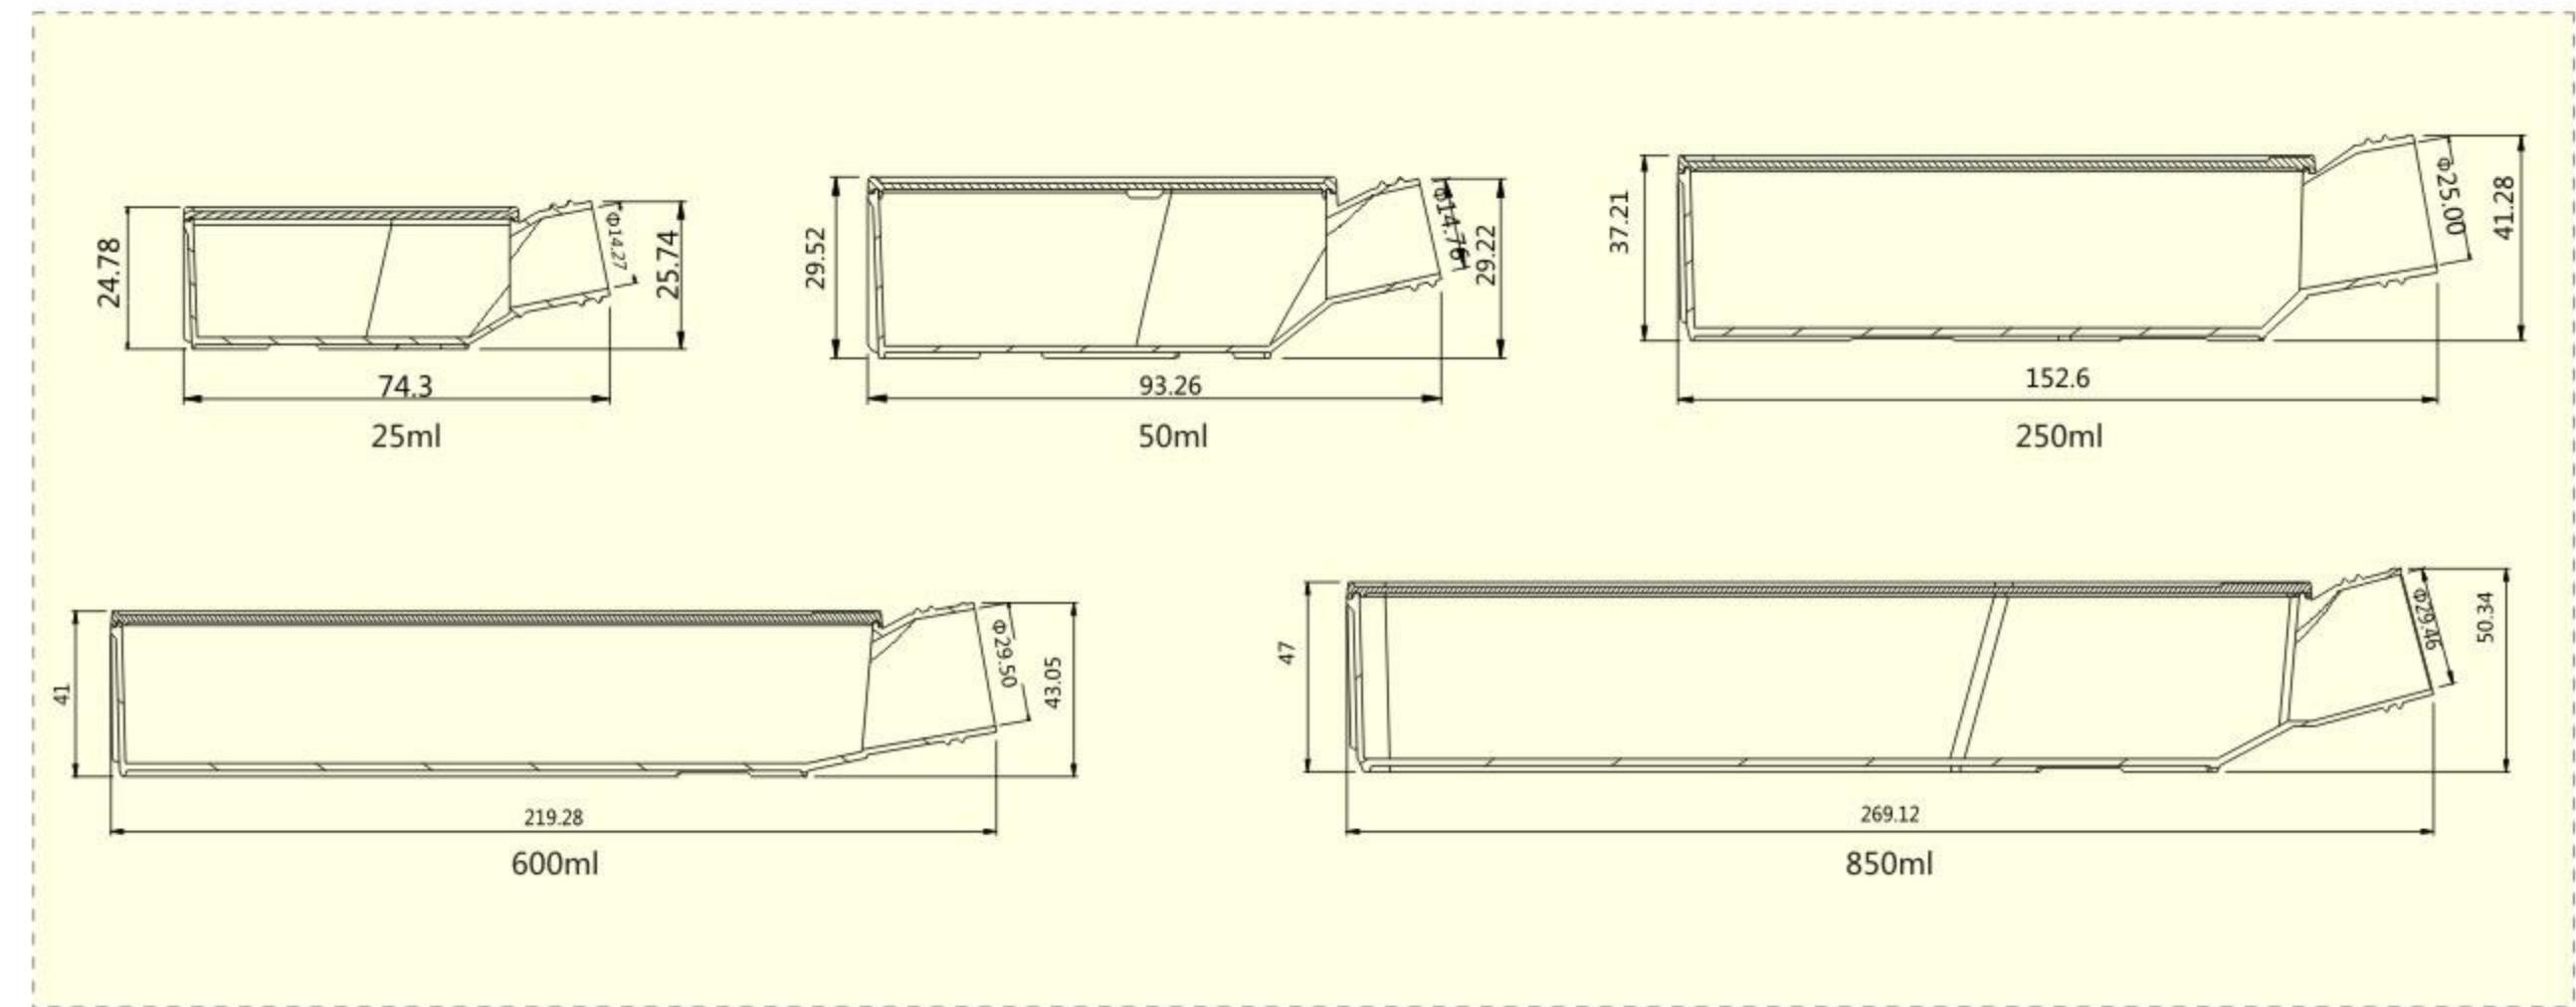

Cell and Tissue Culture Flasks are perfect for cell growth and cell yields aim on little and medium input volume

- * Available with 5 different growth areas of 12.5cm², 25cm², 75cm², 182cm², 300cm²
- * Available in surface-treated or Non-treated
- * Flasks surface is flat and free from striation to maximize usable growth area
- * 2 different cap styles can be used in both open and closed systems
- * Innovative angled neck design offers good pipet and cell scraper access in
- * Upper triangular and wider base shape provides stability
- * Protrudent ridge on the back side of the flask makes it easy for stacking
- * Special area near the neck for easy mark writing
- * Both flask sides have engraved graduation
- * Strict integrity tested
- * Sterilized by gamma irradiation
- * DNase/RNase-free and Non-pyrogenic

Ordering Information

- * Vacuum Package in durable zip resealable self-standing plastic bags that allow flasks to remain upright and reduce contamination
- * Every package bag is labeled with lot number for quality traceability

| TCF112600 | 600 | | 182.0 | Vent | Y | 5/40 |

Plug Sealing Caps:

Standard polyethylene caps can be used in closed systems, providing a liquid and gas sheer seal. But it can be simply unscrew the cap one quarter of a turn, this cap can also be used in open system.

Vented Caps:

Vented polyethylene caps contain a 0.22µm hydrophobic filter to allow gas exchange and minimize risk of cross-contamination.

Cell and Tissue Culture Dishes

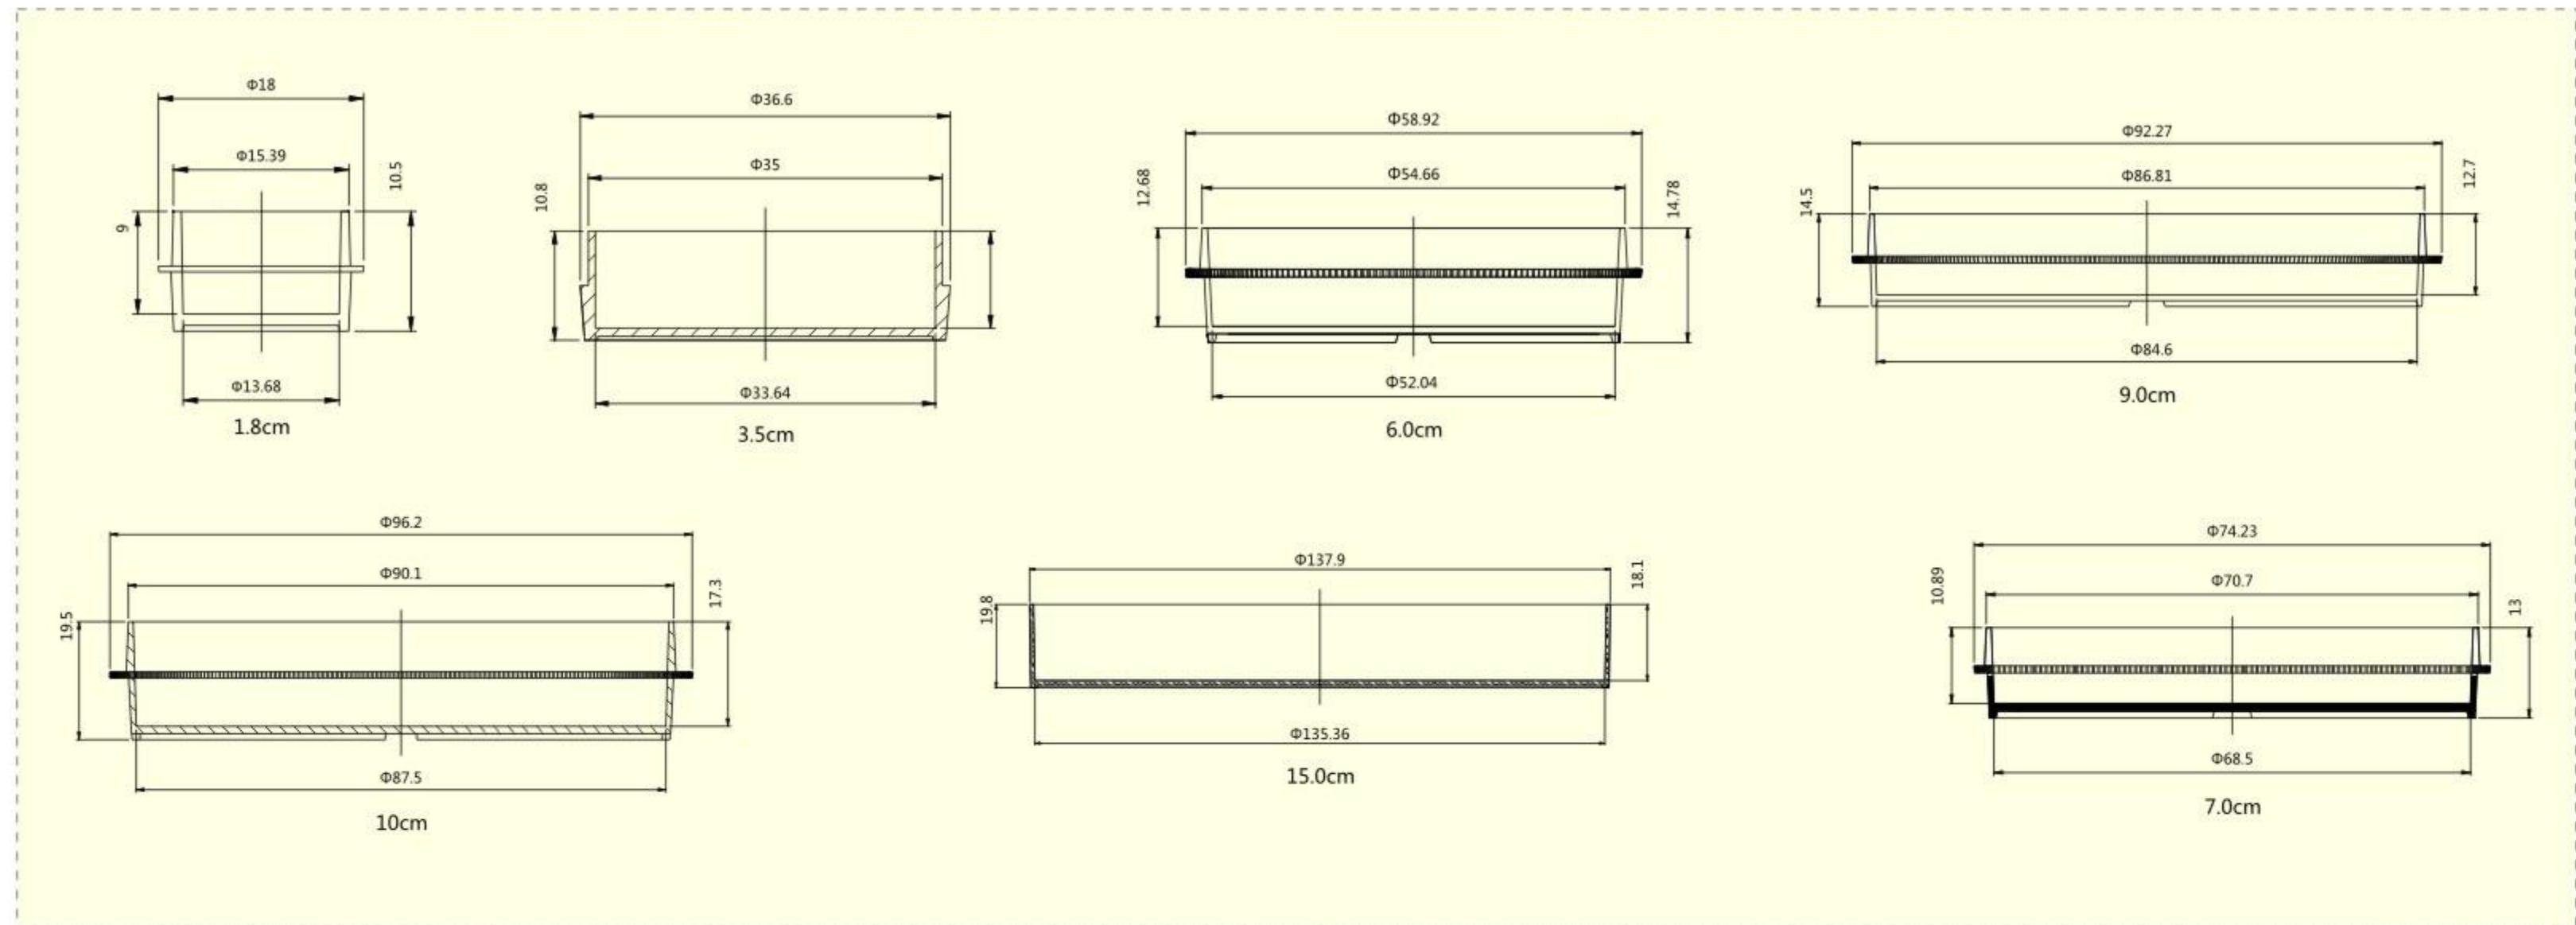

Cell and Tissue Culture Dishes are ideal containers for cell growth and yields aim on little and medium input volume, and also useful in sample separation, pre-treatment, storage and so on.

- ★ Available with 7 different diameters of 1.8, 3.5, 6.0, 7.0, 9.0, 10.0 and 15.0cm
- ★ Available in surface-treated or non-treated
- ★ Flat bottom uniform wall thickness ensures distortion-free bottom
- ★ Dish surface is smooth and free from striation to maximize usable area for growth
- ★ The rim on upper side of the lid mates with the dish brim for easy and secure stack
- ★ Lids with several little chimbs to shape vents are available for very effective gas exchange
- ★ Sterilized by gamma irradiation
- ★ Non-pyrogenic

Order Information

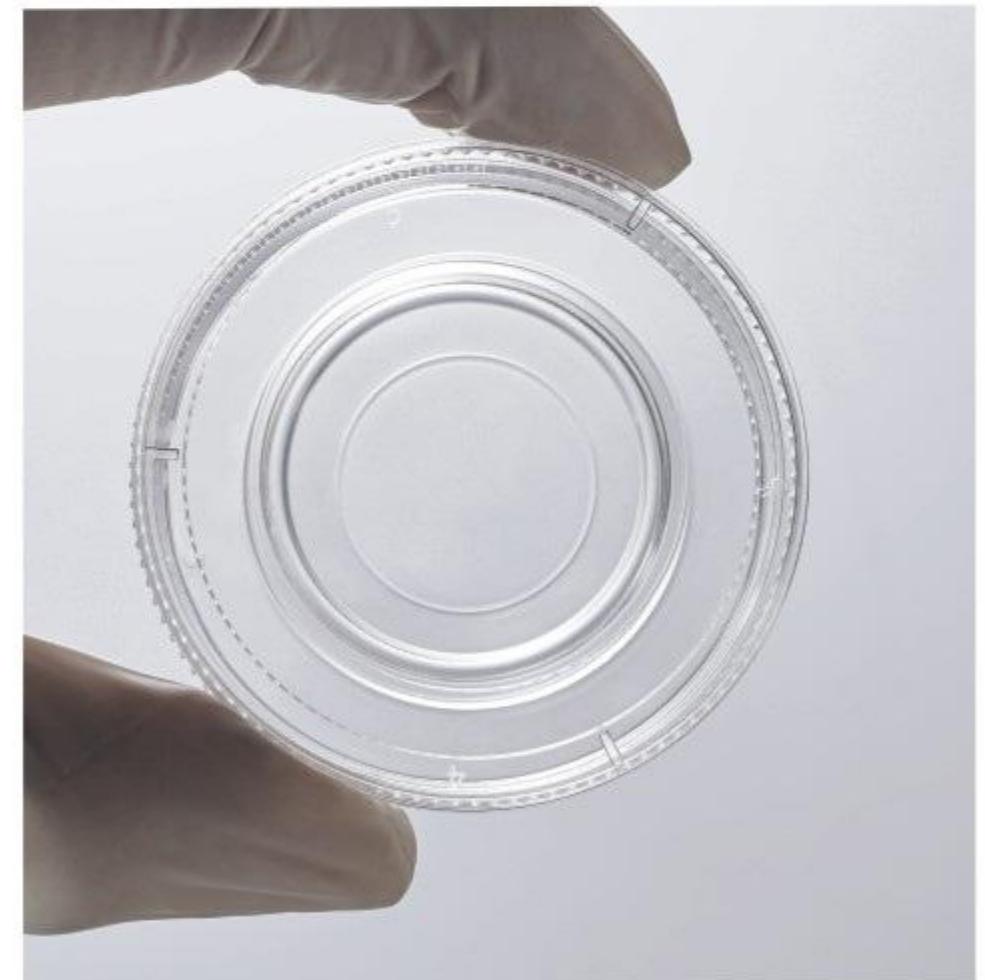

- ★ Package in durable zip resealable self-standing plastic bags that allow dishes to remain upright and reduce contamination
- ★ Every package bag is labeled with lot number for quality traceability

6cm Cell and Tissue Culture Center-well Dish

- * Available in surface treated or non-treated
- * Cell growth area of center well is 3.35cm²
- * Dish surface is smooth and free from striation to maximize usable area for growth
- * The rim on upper side of the lid mates with the dish brim for easy and secure stack
- * Lids with several little chimbs to shape vents are available for very effective gas exchange
- * Sterilized by gamma irradiation
- * Non-pyrogenic and DNase/RNase-free

| Cat.No. | Diameter(mm) | Surface Type | Dimension(mm) | Appro.Cell Growth Area (cm ²) | Lid | Sterile | Qty.per bag/case |

| TCD110060 | 54.7 | Standard, Surface Treated | 13.9*54.7 | 3.35 | Y | Y | 10/600 |

Solution Bottles

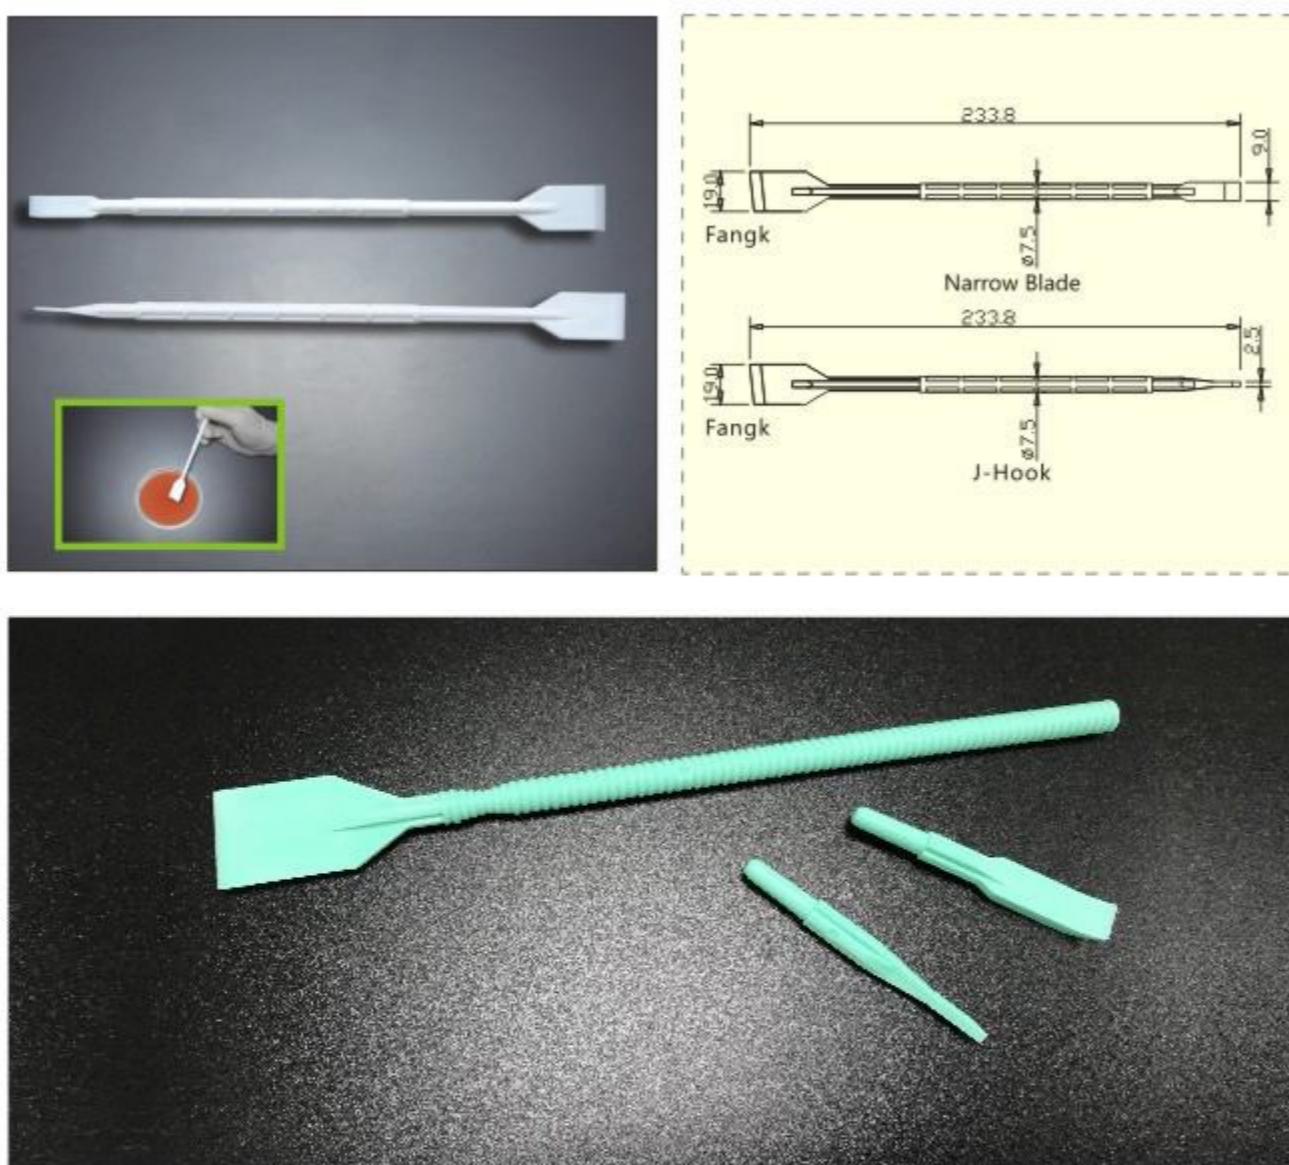

Solution Bottles are safe for solution storage. The material specialty ensures the bottles chemical-resistant.

- ★ Available with 5 different volumes of 150, 250, 500, 1000 and 2000ml
- ★ Light weight
- ★ Heavy wall construction and edge knurls on the cap for easy screw
- ★ Designed wide and easy access mouth for efficiently and stably pour out
- ★ Engraved or silk-printed graduation
- ★ Special concave for easy handling
- ★ Sterilized by gamma irradiation
- ★ DNase/RNase-free & Non-pyrogenic

Order Information

- ★ Single package in easy-open packs to assure contamination-free
- ★ Bottle cap is individually packed in package bag
- ★ Every package bag is labeled with lot number for quality traceability

| Cat.No. | Volume(ml) | Sterile | Qty.per bag/case |

Flat Blade Cell Lifter

Flat Blade Cell Lifter is manufactured with exclusively high-grade polyethylene(PE) which is tensile to make sure the manual harvesting of cells well.

- ★ Available with 2 different styles of 9.0mm Narrow Blade and 2.5mm J-Hook
- ★ Convenient operation, special blade design minimizes cell damage
- ★ Individually wrapped
- ★ Sterilized by gamma irradiation
- ★ DNase/RNase-free and Non-pyrogenic

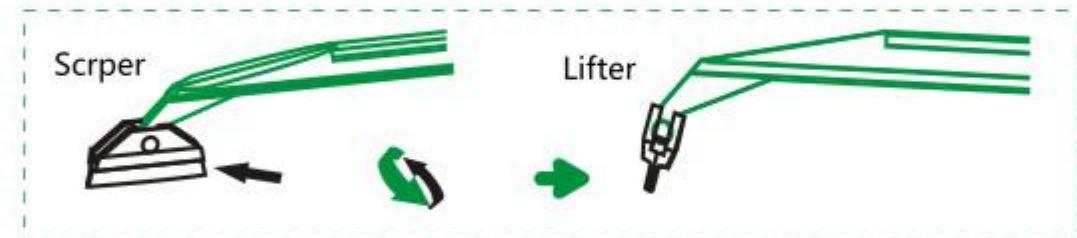

| Cat.No. | Total Length(cm) | Blade Length(mm) | Material | Blade Position | Sterile | Qty.per bag/case |
|-----------|------------------|------------------|----------|----------------|---------|------------------|
| CSC012023 | 23.4 | 9.0 | PE | J-Hook | Y | 1/100 |
| CSC011030 | 23.4 | 2.5 | PE | Narrow Blade | Y | 1/100 |

Exchangeable Cell Blade and Lifter

| Cat.No. | Description | Sterile | Qty. per bag/case |
|-----------|---------------------------------|---------|-------------------|
| CSC013001 | Light Green, 9.0 mm J-Hook | Y | 1/200 |
| CSC013002 | Light Green, 2.5mm Narrow Blade | Y | 1/200 |

Cell scrapers

- * Available with 2 different lengths of 25cm, 2.0cm blade; 39cm, 3.0cm blade
- * Two positions of blade: scraper and lifter
- * Material: Blades/TPE; Handle/ABS
- * Special developed to make the process of scraping off and collecting cells more easier and effective
- * These particularly thin, swiveling, flexible blades are easy to use, cells from any damage
- * Slender, tepid, easy to blow to them and collect cells
- * Sterilized by Gamma irradiation
- * Individually wrapped
- * DNase/RNase-free & Non-pyrogenic

| Cat.No. | Blade(cm) | Total Length(cm) | Material | Blade Position | Sterile | Qty.per bag/case |
|-----------|-----------|------------------|------------------------|----------------|---------|------------------|
| CSC011025 | 2.0 | 25 | Blades/TPE; Handle/ABS | Scraper | Y | 1/100 |
| CSC012025 | 2.0 | 25 | Blades/TPE; Handle/ABS | Lifter | Y | 1/100 |
| CSC011039 | 3.0 | 39 | Blades/TPE; Handle/ABS | Scraper | Y | 1/100 |
| CSC012039 | 3.0 | 39 | Blades/TPE; Handle/ABS | Lifter | Y | 1/100 |

Rotatable™ Cell Scrapers

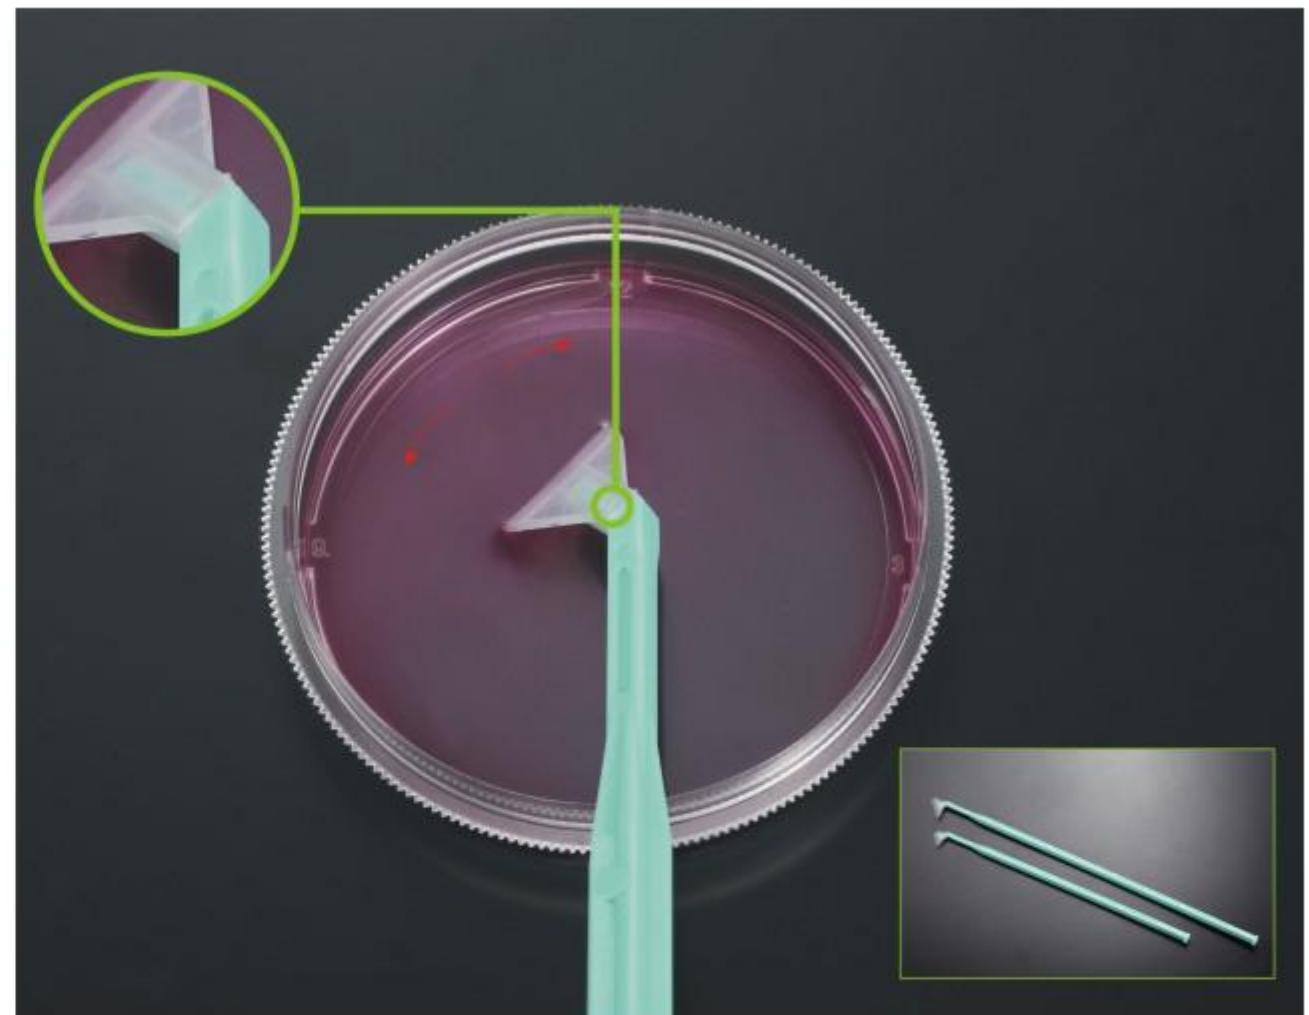

Changes of the blade angle of the Rotatable™ cell scraper require slight pressure on the handle using the forefinger, thus pushing the handle downward towards the floor of the container.

- * Available with 2 different lengths of 23cm, 30cm
- * Material: blades/PE, handle/ABS
- * Free rotating blade to twist to the desired direction
- * Total access to all corner
- * Small raised knobs on the handle
- * Individually wrapped
- * Sterilized by gamma irradiation
- * DNase/RNase-free & Non-pyrogenic

Order Information

- * Available with individually wrapped in easy-to-open bag
- * Every case has printed lot No. for quality traceability

| Cat.No. | Blade(cm) | Total Length(cm) | Material | Sterile | Qty.per bag/case |
|-----------|-----------|------------------|-----------------------|---------|------------------|
| CSC211023 | 1.25 | 23 | Blades/PE; Handle/ABS | Y | 1/150 |
| CSC211030 | 1.25 | 30 | Blades/PE; Handle/ABS | Y | 1/150 |
| CSC212023 | 1.95 | 23 | Blades/PE; Handle/ABS | Y | 1/150 |

Cell Strainers

Cell strainers are manufactured from a strong nylon mesh with evenly spaced mesh pores and gamma resistant. These cell strainers are sterile, rapid, easy-to-use devices for isolating primary cells to consistently obtain a uniform single-cell suspension from tissues. Protect your valuable flow cytometry and cell sorting instrumentation by reliably removing clumps and debris from cell suspensions and clinical samples prior to analysis.

- ★ Available in 3 mesh sizes, 40µm, 70µm, and 100µm
- ★ 3 different colors: blue, white, and yellow, for easy identification
- ★ Improved uniformity of single cell suspensions
- ★ Made of a strong nylon mesh with evenly spaced mesh pores
- ★ The extended lip on the strainer enables aseptic handling with forceps
- ★ Design to fit perfectly into a JET 50ml conical tube
- ★ Ready-to-use, sterilized by gamma irradiation
- ★ Individually packaged
- ★ DNase & RNase-free
- ★ Non-pyrogenic

Order Information

- ★ Single package in easy-to-open bag to assure contamination-free
- ★ Every case has printed lot No. for quality traceability

| Cat.No. | Capacity(µl) | Color | Sterile | Qty. per bag/case |
|-----------|--------------|---------|---------|-------------------|
| CSS010040 | 40 | Blue | Y | 1/50 |
| CSS010070 | 70 | Natural | Y | 1/50 |
| CSS010100 | 100 | Yellow | Y | 1/50 |

Pestles for Cell Strainer

- ★ Using PP materials, high hardness, wear resistance
- ★ A mesh bottom line, grinding better
- ★ Handle special process design, non-slip and easy grip
- ★ And supporting the use of cell strainer, reduce sample loss
- ★ Non-pyrogenic and certified DNase/RNase-free

Order Information

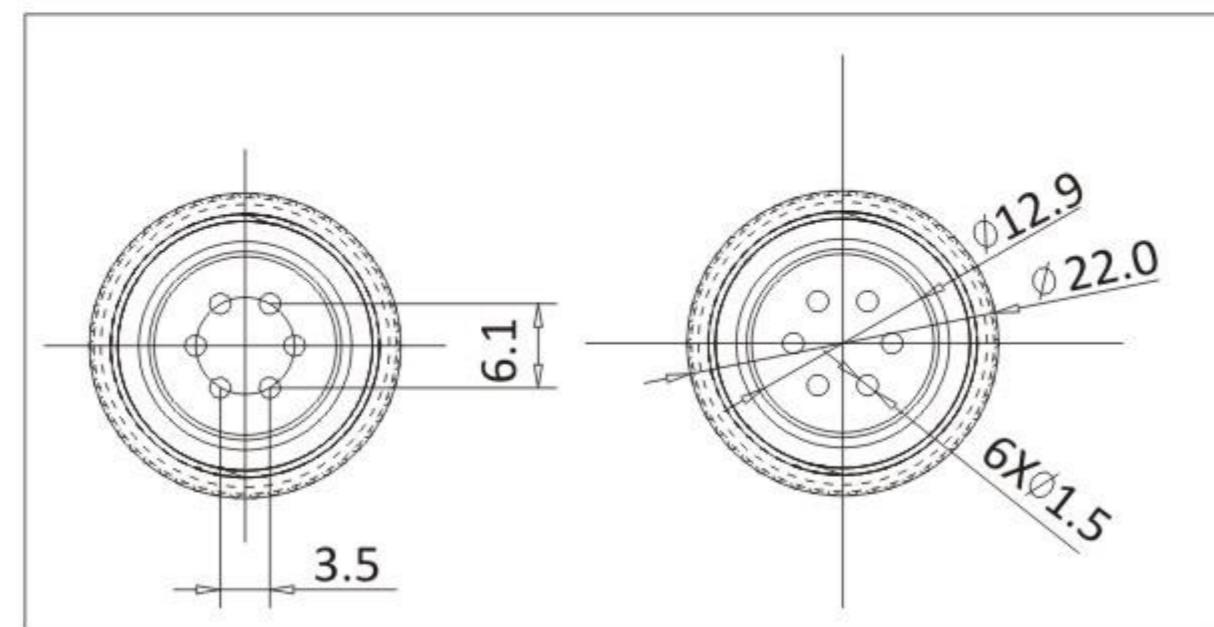

- ★ Easy to tear the paper and plastic individually packaged, easy to open use
- ★ Use with anti-press 200 pounds, high-quality packaging cartons, better protection of the product
- ★ Each package is printed with lot number, to facilitate quality tracking

| Cat.No. | Volume(ml) | Colour | Material | Sterile | Qty.per bag/case |
|-----------|------------|-------------------|----------|---------|------------------|
| CSP001001 | 13.5 | Fluorescent green | PP | Y | 1/100 |

Bio-Reaction Tubes

Bio-Reaction tubes are manufactured from high quality polypropylene, offer a convenient and economical option for small scale, high density suspension cell culture. Bio-reaction tubes consist of centrifuge tubes with a 0.22 μ m hydrophobic membrane in the vent cap. These tubes are perfect for biological reaction experiments that require aseptic conditions with free gas exchange.

- * Available with 2 volumes of 15 and 50ml
- * Conical bottom and self-standing bottom
- * Caps have an ultrasonically welded 0.22 μ m hydrophobic membrane to allow gas exchange
- * With a large unerasable frosting white printed writing area
- * Save money with the ability to culture and centrifuge in one tube
- * Maximum RCF is 12,000xg
- * Engraved graduation at the conical bottom of each tube
- * Leak proof
- * Sterilized by gamma irradiation
- * Non-pyrogenic

Order Information

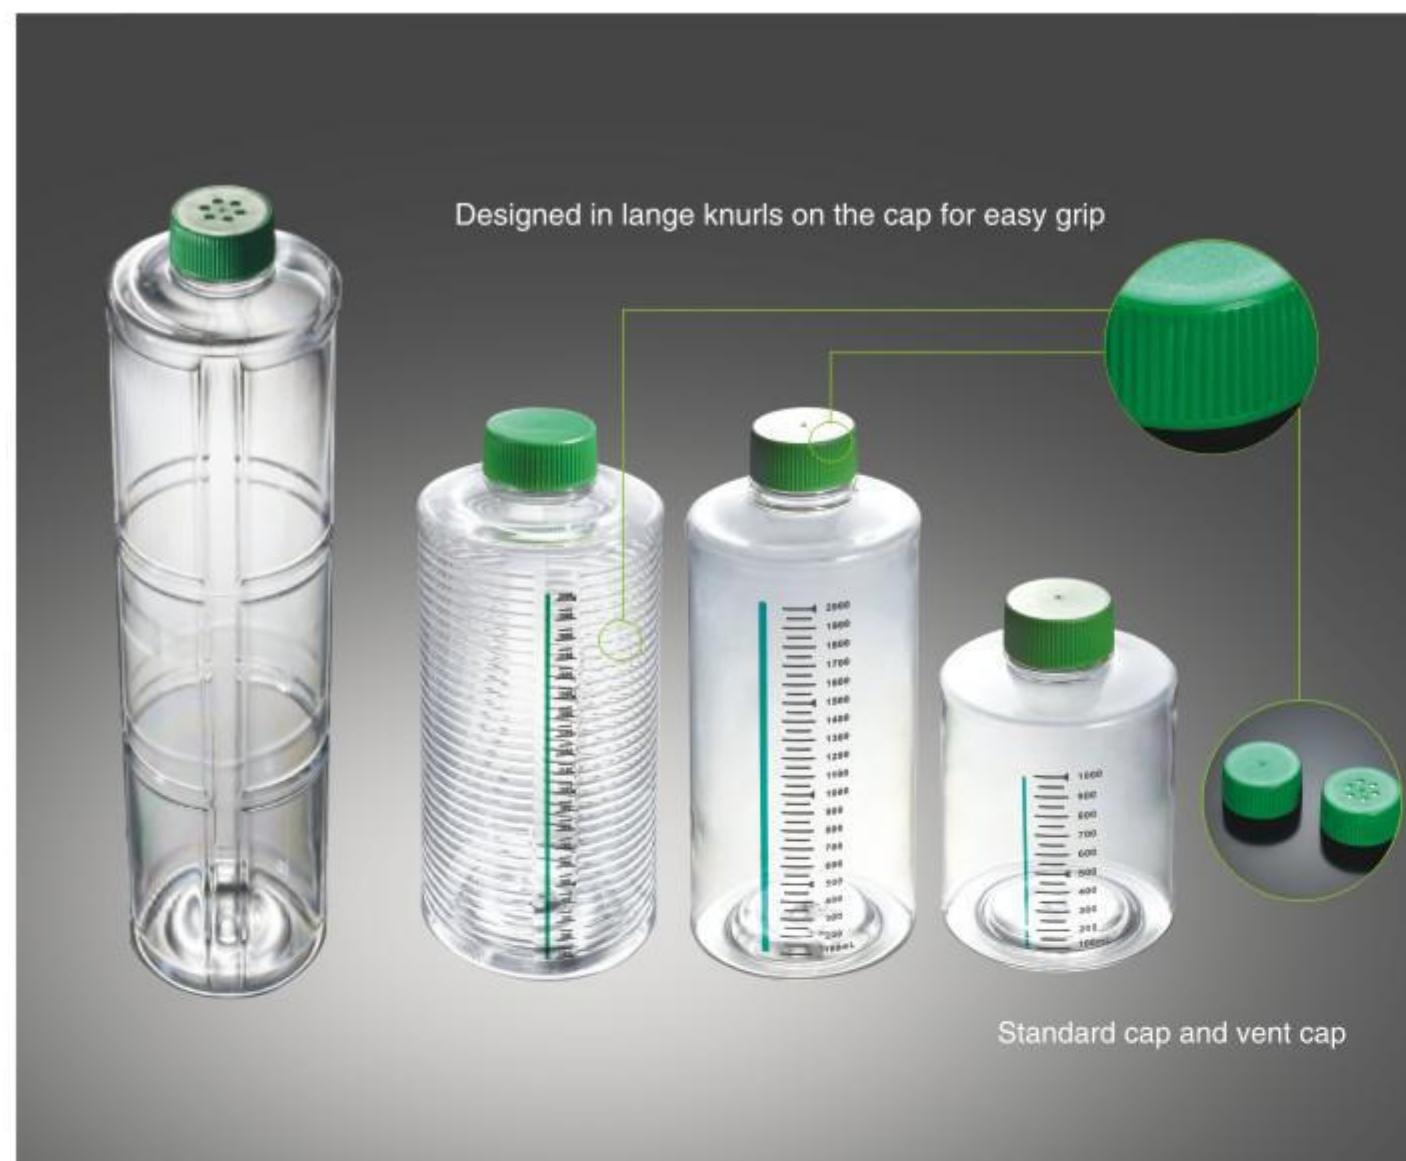

- * Tubes are packaged in durable and resealable(zip closure) bags
- * Every bag/case has printed lot No. for quality traceability

Roller Bottles for Cell and Tissue Culture

Roller Bottles are optimal applications for large yield of cell growth and multiplication, that can be used in both research and manufacturing, including the growing of mammalian cells for purposes of virus propagation and bio-product production.

- * Available with 3 bottle volumes of 1000ml, 2000ml, 5000ml
- * Wide cell growth area of 490cm², 850cm², 1700cm², 1900cm² for adhesions and huge growth volume for suspension
- * Available surface-treated or non-treated
- * Designed in large knurls on the cap for easy grip
- * 2 different cap styles can be used in both open and closed systems
- * Bottle surface is smooth and free from striation to maximize usable area for growth
- * Every bottle has silk-printed graduation
- * Suitable for all the common instruments and automation
- * Sterilized by gamma irradiation
- * Non-pyrogenic

Order Information

- * Single package in peel to open plastic bags to assure contamination free
- * Bottle cap is individually wrapped in package bag
- * Every package case has labeled lot Number

| Cat.No. | Volume(ml) | Surface Type | Appro.Cell Growth Area(cm ²) | Cap Style | Sterile | Qty.per bag/case |

Single well plates

- * Single well plates have increased in internal plating dimension, providing larger area for area cell growth
- * Plates have standard external footprint, making them compatible with other instruments that accept SBS-standard plates
- * For use in applications where cell attachment is not desired
- * Temperature range:-20°C to 50°C
- * Sterilized by gamma irradiation
- * Non-pyrogenic & DNase/RNase-free

Plastic Blister Packaged

| Cat.No. | Well Qty. | Surface Type | Working Volume (cm ³) | Lid | Sterile | Qty. per bag/case |
|-----------|-----------|---------------------------|-----------------------------------|-----|---------|-------------------|
| TCP011001 | 1 | Standard, surface treated | 93.5-94 | Y | Y | 1/100 |
| TCP001001 | 1 | General, Non-treated | 93.5-94 | Y | Y | 1/100 |

Tyvek Paper , Individually Packaged

| Cat.No. | Well Qty. | Surface Type | Working Volume (cm ³) | Lid | Sterile | Qty. per bag/case |
|-----------|-----------|---------------------------|-----------------------------------|-----|---------|-------------------|
| TCP010001 | 1 | Standard, surface treated | 93.5-94 | Y | Y | 1/200 |
| TCP000001 | 1 | General, Non-treated | 93.5-94 | Y | Y | 1/200 |

96 Well Detachable Flat Plate

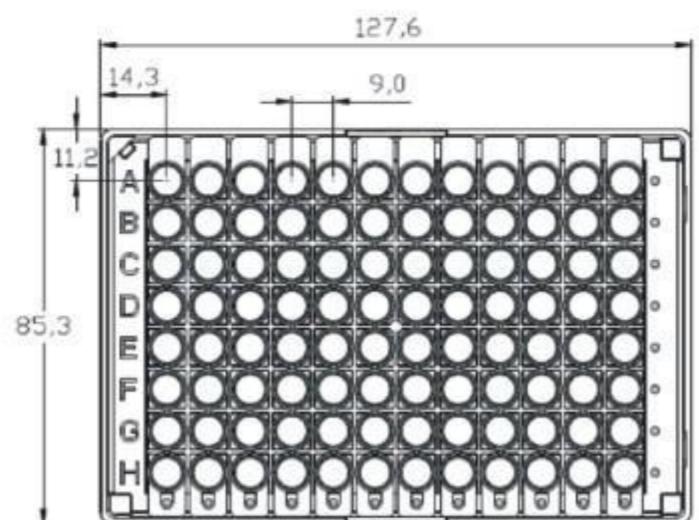

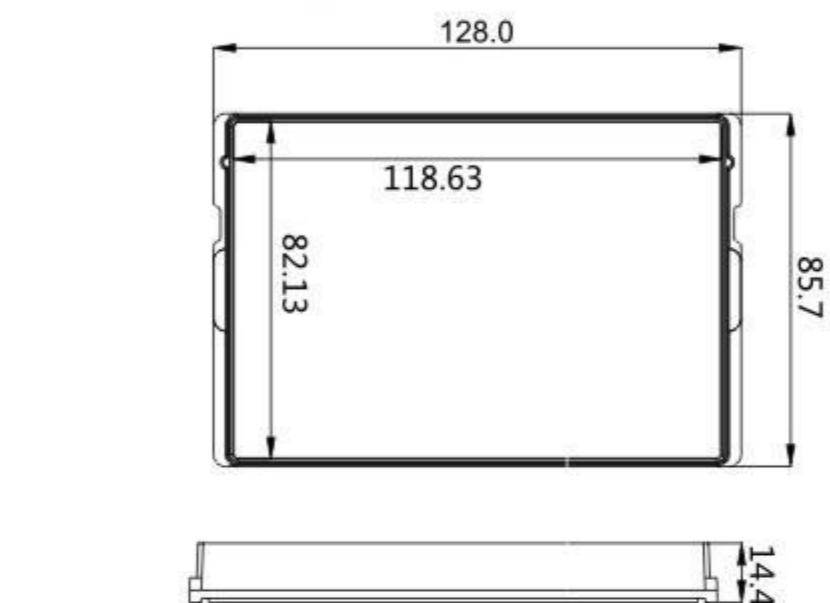

- * Uniform well volume ensures equal growth surface area
- * Flat well bottom with 96 well detachable frames
- * Well surface is smooth and free from striation to maximize usable growth area
- * Raised rims on wells with the uniform rings on the lid to reduce evaporation
- * Single position lid reduces the risks of cross-contamination and the handling mistakes
- * Wells are labeled with alphanumeric code for easy identification
- * Suitable for all common instruments and automation
- * 8 well strip is supplied in order to satisfy different sample quantity and economize cost
- * Sterilized by gamma irradiation
- * Non-pyrogenic

Order Information

- * Individually packaged in peel-to-open paper/plastic blister pack
- * Every case has printed with lot No. for quality traceability

| TCP011896 | Frame for 8w x 12 strips, Standard, Surface treated, Sterile | 1/100 |
| TCP001896 | Frame for 8w x 12 strips, General, Non-treated, Sterile | 1/100 |

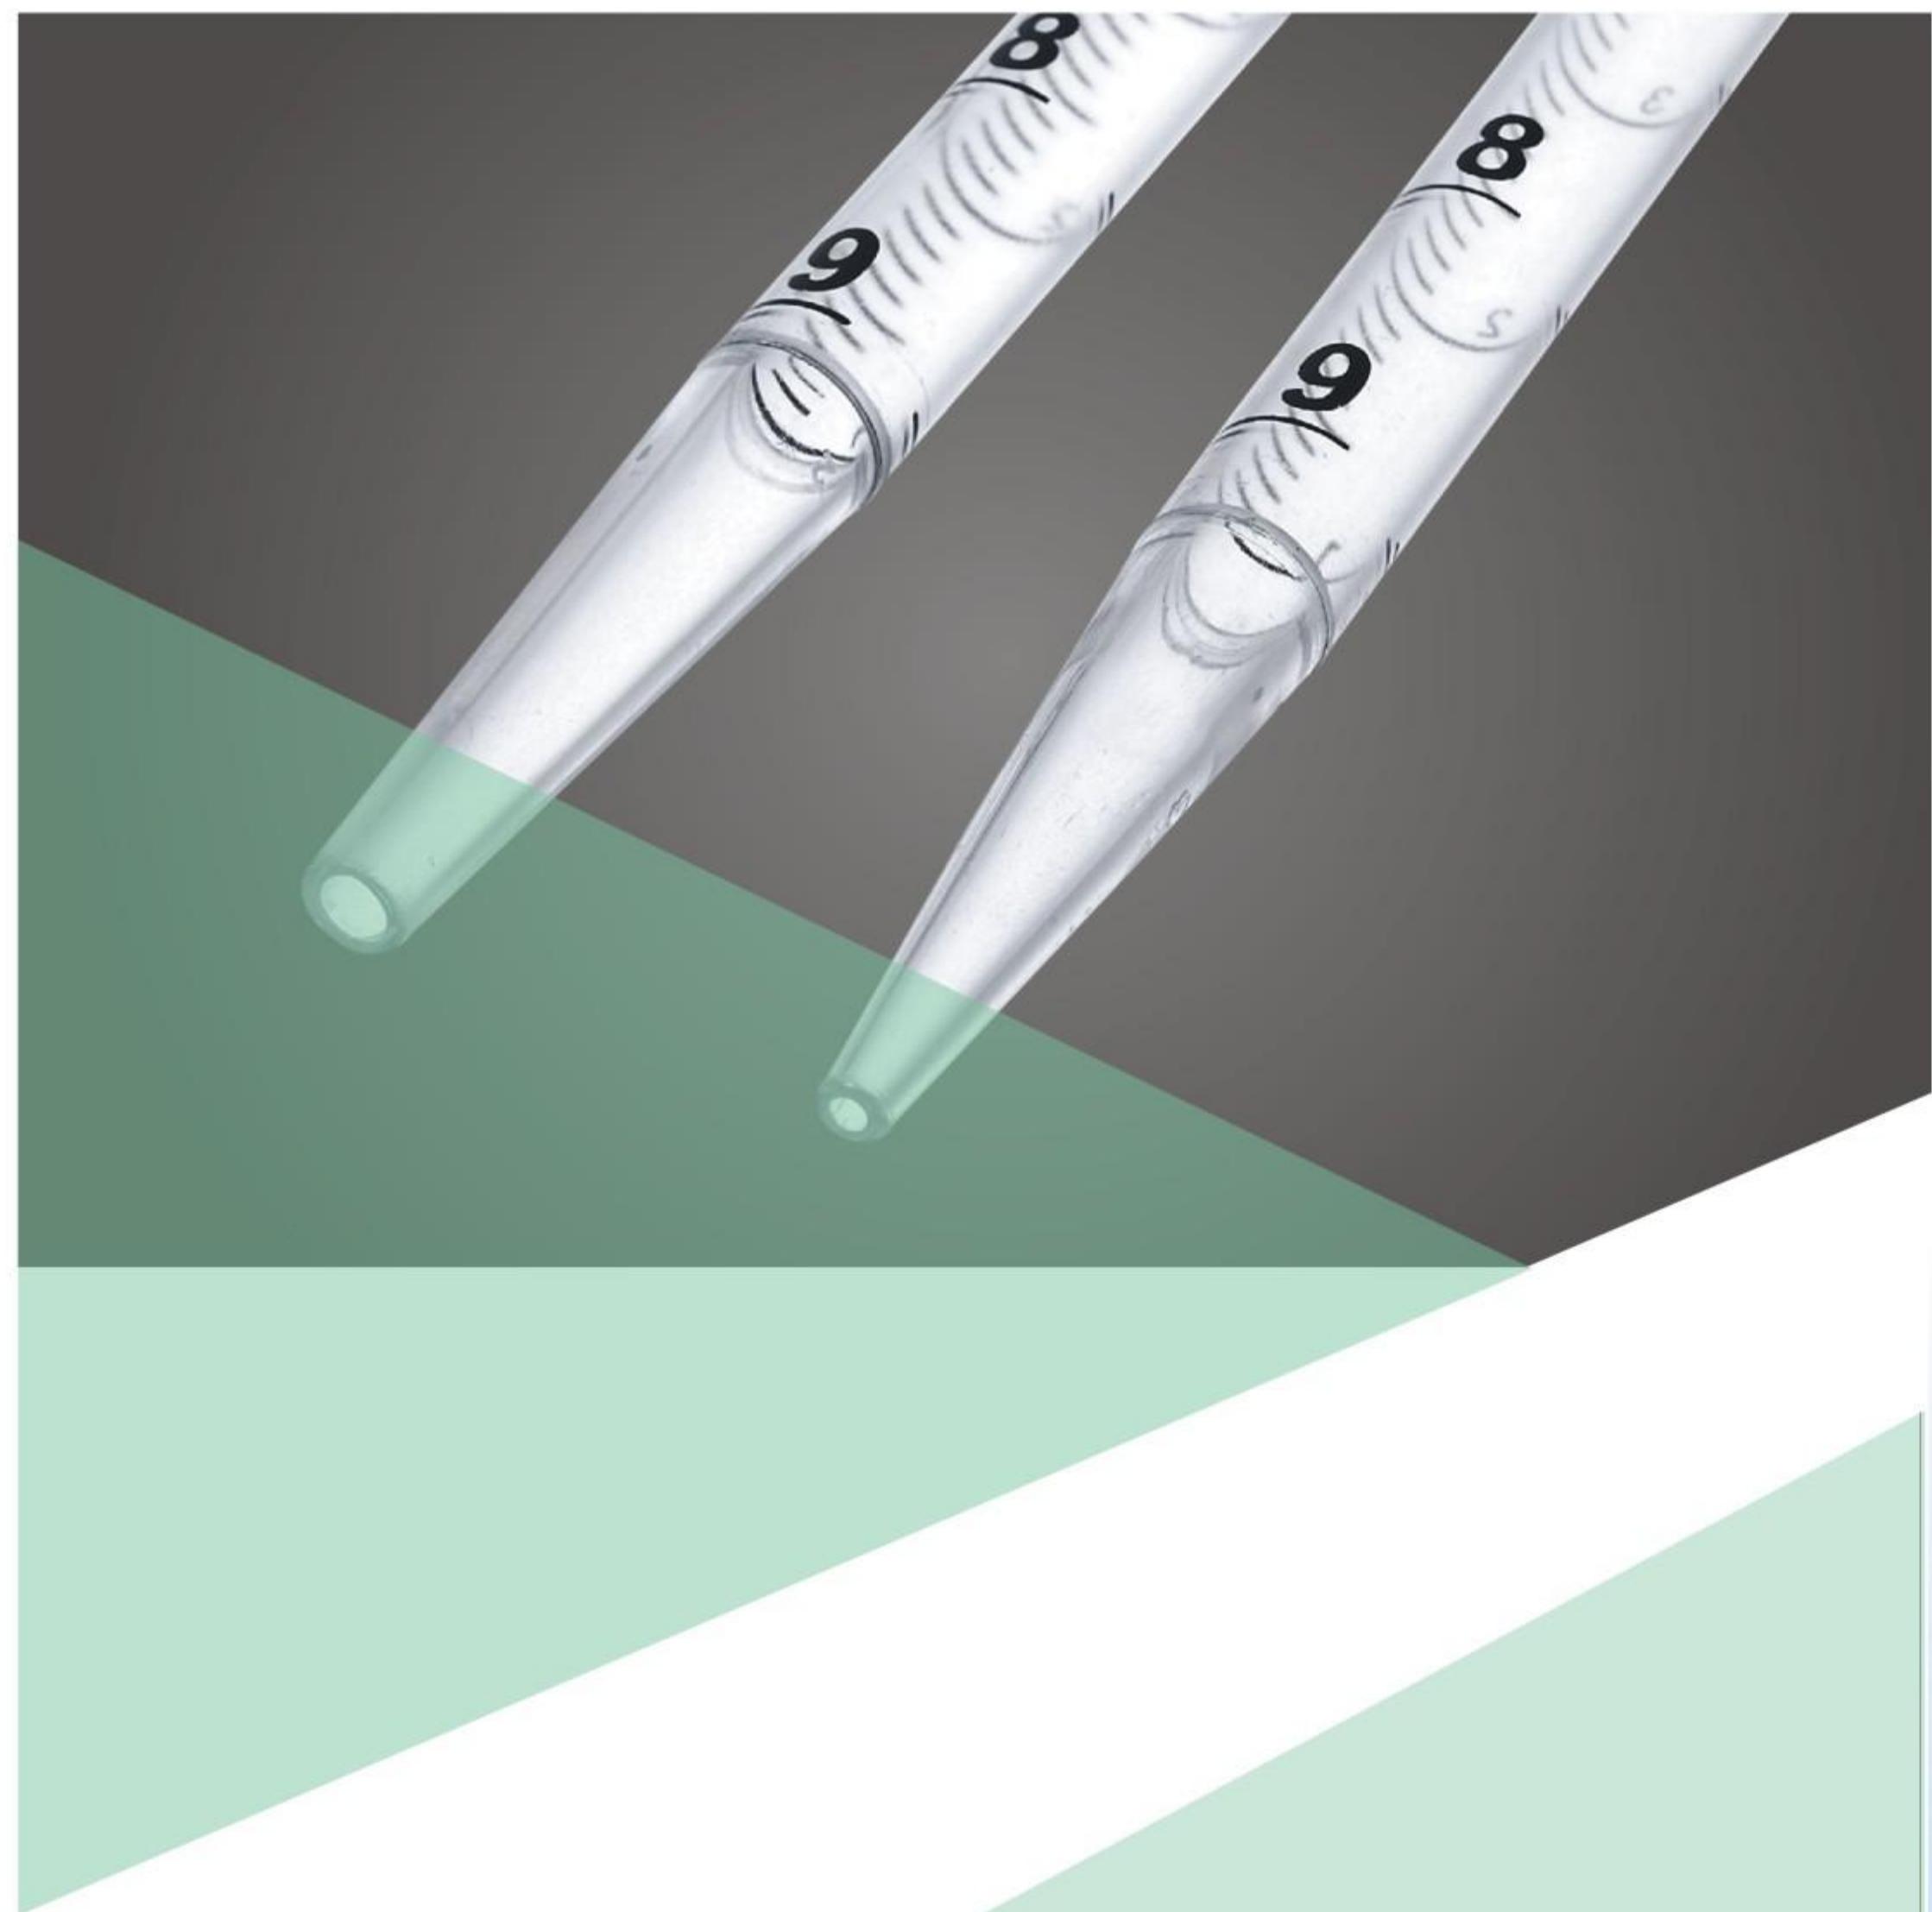

PIPETTE PRODUCTS

Pipets Products series, including serological pipets, aspirating pipets, transfer pipettes and rechargeable pipet aid.

All the pipets are manufactured with exclusively high-grade polystyrene(PS) or Polyethylene(PE) which are excellent for clear observation and reducing liquid attachment on the pipet surface to assure accurate delivery. The manufacturing environment is mastered by both ISO9001:2008, ISO13485 quality management and 100,000 grade clean-room cleanliness system.

Furthermore, the universal design makes the pipets suitable for most brands of pipet-aid. Additionally, gamma irradiation sterilized of non-sterilized products are available in order to meet the different research needs and enhance the practicability. All the features guarantee them can be safely used in cell and tissue culture, bacteriological and clinical research.

Serological Pipets

- ★ Available with 7 capacities of 1.0, 2.0, 5.0, 10.0, 25.0 , 50.0ml and 100.0ml
- ★ 1.0, 2.0, 5.0ml are stretched, while 25.0, 50.0ml and 100.0ml are ultrasonically welded at tip and mouth piece
- ★ Both stretched mouth and ultrasonically welded mouth are available for 10ml pipet
- ★ Graduations are calibrated for accurate dispensing to within $\pm 2\%$
- ★ Different color rings are for easy identification
- ★ Bidirectional graduations on the pipets provide added applicability
- ★ Negative graduation allows additional working volume
- ★ All pipets are supplied with a filter plug
- ★ Strict consistency tested
- ★ Non-pyrogenic

Ordering Information

- * Individually packed in peel-to-open wrap with lot. No. for quality traceability
- * Carton has been specifically designed for efficient bench top dispensing with a removable perforated front panel
- * Also available with bulk package in easy-to-open bag
- * Available with gamma irradiation sterilized or non-sterilized

Mini™ Serological Pipets

Mini pipets are specially designed for liquid handling operation in limited working space. These special designed pipets are significantly shorter than the normal pipet, only 9.25 inches. They come in three different volumes: 5.0ml, 10.0ml and 25.0ml.

Ordering Information

- * Available individually wrapped in an easy opening paper/plastic wrapped with lot number traceability
- * Inner boxes have been specially designed for efficient bench top dispensing with a removable perforated front panel
- * Also available with bulk package in easy to open bag

Transfer Pipets

Disposable transfer pipets are perfect products for quick, safe transfer of fluid.

- ★ Available with 3 different capacities of 0.2, 1.0 and 3.0ml
- ★ Long flexible stem can be bent to draw liquid from narrow or small volume tubes into the bulb
- ★ Can be used in liquid nitrogen
- ★ Uniform drop size

Ordering Information

- ★ Individually package in peel-to-open paper/plastic bag is available
- ★ Also available with bulk package in easy to open plastic bag
- ★ Every case has printed lot No. for quality traceability
- ★ Available in gamma irradiation sterilized or non-sterilized

Ordering Information

- * Available with bulk package or individually wrapped in easy-to-open bag
- * Every case has printed lot No. for quality traceability

Plastic Pasteur Pipets

- * Long flexible stem can be bent to draw liquid from narrow or small volume tubes into the bulb
- * Offer the aspirating precision of a glass pipet and the safety benefits of plastic
- * Available in two sizes: 145mm and 230 mm for easier handling and longer reach for working with larger vessels
- * Sterilized by gamma irradiation
- * Strict consistency tested

Pipette controller

Pipette controller is high technical and exact assistant device for 1 to 50ml plastic or glass pipets.

- * Light weight and cordless for convenient use. If handled correctly, the device itself won't get in touch with any liquid
- * The aspirating or dispensing speed of the pump can be controlled by the pump speed switch
- * Constructed with recyclable materials
- * Long life and environment-friendly with up to 8 hours rechargeable continuous electric power
- * The filter with hydrophobic membrane assembled in aid can provide contamination free liquid handling

Ordering Information

- * Standard package includes 1 pipette controller, 1 charger, 1 desktop stand, manual, 1 wall mount bracket, two spare membrane filters: 0.2um and 0.45um, 1 instruction manual, 1 warranty card
- * Changeable filter and charger are available
- * EPE is padded in the case for extra protection

Pipette controller

Micro Volume Pipettors

- ★ Suitable for left and right handed user with a relaxed grip and a good balance
- ★ Fully autoclavable
- ★ UV resistant
- ★ Resistance free click stop counter
- ★ Larger digits
- ★ Ergonomic design ensuring light weight & soft plunger movement
- ★ Easily accessible recalibration mechanism to avoid accidental change in calibration
- ★ Calibration conforms to DIN 12650 & EN-ISO 8655 standards ensuring high accuracy & precision

| Cat.No. | Name | Range(μl) | Increment(μl) | Accuracy(%) | Precision(%) | Package |

Multichannel Micro Pipettors

- ★ Soft smart finger-grip of TPE
- ★ Easily removable & fully autoclavable manifold
- ★ Manifold can rotate 360° for easy right or left hand operation
- ★ One hand tip ejection
- ★ Consistent sample loading
- ★ Soft force tip loading and ejection
- ★ Leak free sealing of tip
- ★ Attractive color coding
- ★ Compatible with most types of tips
- ★ Calibration report enclosed with every pipette

JET Dispenser

Introducing a perfect partner for your high volume liquid dispensing. Equipped with modern and easy to use features.

Re-circulation Valve

Eliminates sample loss For rapid priming

Spring-less Valve

A highly chemical resistant and smooth functioning springless valve

Unique Piston Mechanism

Convenient cleaning of piston without disturbing the calibration

Easy Re-calibration

A single tool re-calibration mechanism which comply with ISO 8655 standards

Dual Graduations

Precise volume setting Dual volume marking assures clear visibility

Fully Autoclavable

360° Dispensing

Rotating discharge tube enables bottle visibility Convenient dispensing without moving the dispenser

Universal Bottle Adapter

Comes with 4 additional adapters for most common bottle sizes

Conductive Handling

Ergonomic design for convenient sampling Low pressure dispensing even for larger volumes

Telescopic Filling Tube

Compatible with different sizes of reagent bottles ranging from 170mm to 300mm

Uncomplicated Mounting

Snap-fit mounting of discharge tube for chemical based

Centrifuge Tubes Products

Centrifuge Tubes Products series, includes centrifuge tubes and micro centrifuge tubes . Special selected highclarity polypropylene assures the good transparency, chemical resistibility and obdurability. And the dual quality security system of ISO9001:2008, ISO13485 quality management and 100,000 grade clean-room, control system insure the good quality. Futhermore, the universal design makes the tubes suitable for most brands of centrifuge. Additionally, either gamma irradiation sterilized or non-sterilized products are available in order to satisfy the different research requirements and enhance the practicability. All the features allow them to be widely used in chemical and life science research.

Centrifuge Tubes

Centrifuge tubes are popular in samples centrifuging or storage in many research areas.

- ★ Centrifuge tubes are popular in samples centrifuging or storage in many research areas
- ★ Available with 2 volumes of 15 and 50ml
- ★ 2 different cap styles: flat cap and plug seal cap
- ★ Conical bottom , self-standing bottom and u bottom
- ★ Longer length screw caps with sealing ring prevent any leakage
- ★ Easy to read black graduations are accurate to ±2%, 1ml increments (15ml) or 2.5ml increments (50ml)
- ★ With a large unerasable frosting white printed writing area
- ★ Both the graduations and writing areas are chloroform-resistant
- ★ Engraved graduation at the conical bottom of each tube
- ★ Max rotate speed up to 12,000xg for conical bottom tubes and u bottom tubes, while 6,000xg for self-standing tubes
- ★ Autoclavable at 121°C and freezable to -80°C

Ordering Information

- ★ Racked tubes are packaged in environmentally responsible (fully recyclable) chipboard racks
- ★ Bagged tubes are packaged in durable and re-sealed (zip closure) bags
- ★ Inner packaging is individually labelled for lot-to-lot traceability
- ★ All tubes are packaged with caps attached and are available in sterilized with gamma irradiation, RNase-free, DNase-free and Non-pyrogenic

Centrifugal Filters

Cap (HDPE/High-density Polyethylene); Filtration (ABS/Acrylonitrile-Butadiene-Styrene); Tube (PP/Polypropylene); Membrane: Polyethersulfone (PES); Sealing gasket (PE/Polyethylene).

Purpose

Processing of protein solutions containing biomolecules (albumin, mAbs, IgG, IgM, hormones, growth factors, etc.)

- * Protein Concentration, Nucleic Acid Concentraion, Buffer Exchange, Dialysis, Desalting
- * Dead stop: Avoids spinning to dryness, provides a predictable concentration factor and no need to calibrate for several samples to run in parallel
- Available in multiple pore sizes with the following defined Molecular Weight Cut-Offs (MWCO): 3,5,10,30,50 and 100KD
- * Vertical membranes: Aligned with filtrate rather than perpendicular for less clogging, less waste and faster filtration; capable of 25- to 80-fold concentration in a single step concentration in a single step
- * Broad chemical compatibility: Heat-sealed membrane eliminates adhesives and downstream extractables; compatible with pH 1 to 9
- * Reverse spin recovery: Enables maximum protein recovery without introducing pipetting errors; low binding membrane and polypropylene housing for > 90% sample recovery
- * Reliable: Spin precious samples with confidence in one robust, sleek unit that prevents leakage
- Ultrafiltration membrane is neutrally charged, rendering it low binding for enhanced flux and recovery. The membrane has excellent chemical resistance and very low extractables
- * Temperature range: -20°C to +50°C
- * Autoclavability: No
- * Maximum initial sample volume: Swinging bucket(15.0mL), Fixed angle rotor(12.0ml)
- * Typical final concentrate volume: 200µl
- * Maximum relative centrifugal force: Swinging bucket rotor(4,000g), Fixed angle rotor(5,000g)
- * Active membrane area: 5.48cm²

This membrane is not compatible with the following

- * Acetic Acid ($\geq 25\%$)
- * Acetonitrile ($\geq 30\%$)
- * Aliphatic & aromatic esters
- * Amines
- * Ammonium hydroxide ($\geq 5\%$)
- * Aromatic & chlorinated hydrocarbons
- * 6: This membrane is not compatible with the following
- * Butyl acetate ($\geq 40\%$)
- * Dimethyl acetamide (DMAC) ($\geq 30\%$)
- * Ethers
- * Hydrochloric acid ($\geq 0.5\text{ N}$ at 50°C)
- * Isopropyl Alcohol ($\geq 25\%$)
- * Ketone
- * Methylene chloride ($\geq 1\%$)
- * Methyl ethyl ketone ($\geq 1\%$)
- * Phosphoric acid ($\geq 1\text{ N}$)
- * Sodium deoxycholate ($\geq 5\%$)
- * Sodium hydroxide ($\geq 0.5\text{ N}$ at 50°C)
- * Sodium hypochlorite ($\geq 0.04\%$)
- * Tetrahydrofuran ($\geq 5\%$)
- * Toluene ($\geq 1\%$)

15ml PS Centrifuge Tubes

- ★ 15ml PS Centrifuge Tubes
- ★ Made with high-quality USP Classic VI polystyrene
- ★ Molded graduations stand out distinctly on these optically clear polystyrene tubes
- ★ Colorless and transparent are perfect for biological reaction experiments
- ★ Engraved graduation at the bottom of each tube
- ★ Max RCF up to 3000xg
- ★ Leak-proof
- ★ Non-pyrogenic
- ★ Available in sterilized or non-sterilized

Ordering Information

- * Racked tubes are packaged in environmentally responsible (fully recyclable) chipboard racks or plastic racks
- * Bagged tubes are packaged in durable and re-sealable (zip closure) bags
- * Inner packaging is individually labeled for lot-to-lot traceability

Plastic Centrifuge Tube Racks

PP racks are useful in corrosive environments where commonly used materials tend to crack or corrode. Perfect for supporting tubes during chemical reactions or when storing.

- ★ Available with 4 colors: light green, dark green, white and blue
- ★ For conical bottom tubes
- ★ Made of polypropylene
- ★ Marked with numbers for identification
- ★ Angular at one end to stack up easily
- ★ Autoclavable at 121°C and freezeable to -80°C
- ★ Can be washed and reused
- ★ Available in sterilized or non-sterilized

Ordering Information

- * Tubes are packaged in durable and resealable(zip closure) bags
- * Every bag/case has printed lot No. for quality traceability

Centrifuge Tube Stand

Centrifuge tube stand with 7 holes is available for 1.5ml, 2.0ml, 15ml, 50ml conical-bottomed centrifuge tube. Perfect for supporting tubes during chemical reactions or when storing.

- * 3 holes for 1.5ml, 2.0ml micro centrifuge tube, 3 holes for 15ml micro centrifuge tube, and 1 hole for 50 ml micro centrifuge tube
- * For conical bottom tube
- * Made of polypropylene
- * Autoclavable at 121°C and freezable to -80°C
- * Can be washed and reused
- * Available in sterilized or non-sterilized

Ordering Information

- * Centrifuge Table Stand is packaged in durable and resealable (zip closure) bags
- * Every bag/case has printed lot No, for quality traceability

Product Specifications And Details

| Cat.No. | Product Description | Sterile | Qty.per Bag/Case |
|-----------|---|---------|------------------|

Conical Centrifuge Bottles

Conical Centrifuge Bottles are popular in samples centrifuging or storage in many research area.

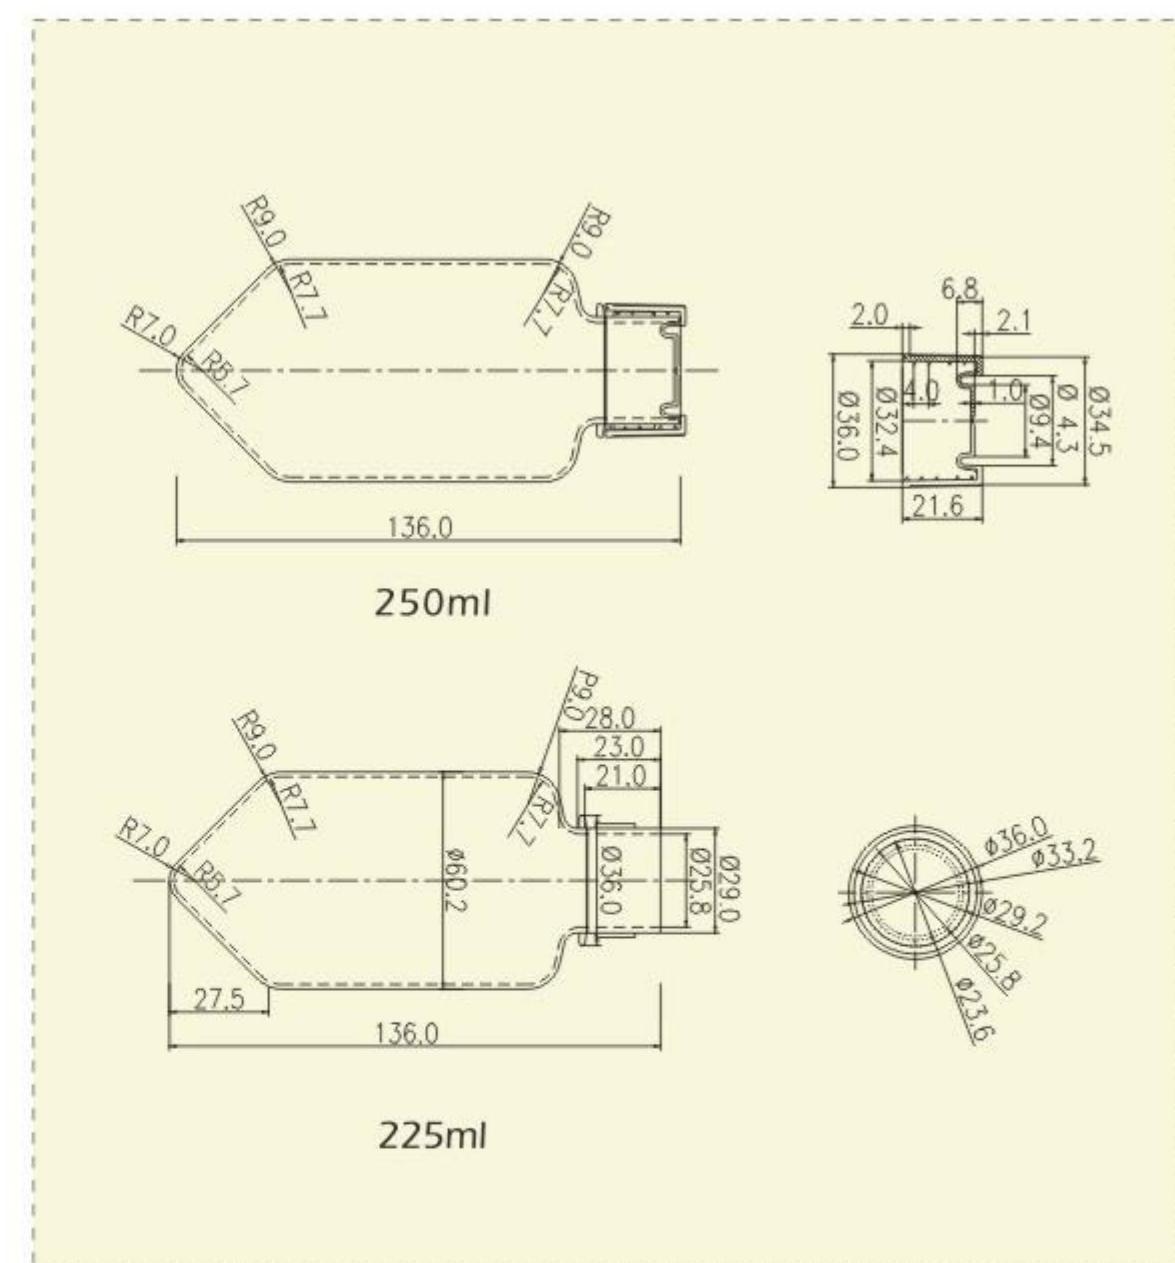

- * Available with 2 volumes of 225ml and 250ml
- * Made with high-quality gamma resistant polypropylene
- * Plug seal cap made with polyethylene
- * Engraved graduation
- * Max RCF up to 7,500xg
- * Autoclavable at 121°C and freezable to -196°C
- * Sterilized by Gamma irradiation
- * Certified DNase/RNase -free and Non-pyrogenic
- * Leak-proof

Ordering Information

- * Bottles are packaged in durable and re-sealed (zip closure) bags
- * Inner packaging is individually labelled for lot to lot traceability
- * All bottles are packaged with caps attached

| Cat.No. | Capacity(ml) | Size | Bottom | Sterile | Specialty | Qty. per bag/case |
|-----------|--------------|--------|---------|---------|--------------------------------------|-------------------|
| CFT012225 | 225 | 61x137 | Conical | Y | DNase & RNase-free and Non-pyrogenic | 6/48 |
| CFT012250 | 250 | 61x161 | Conical | Y | DNase & RNase-free and Non-pyrogenic | 6/48 |

Easy Flip™ Centrifuge Tubes

- * Made from high grade gamma resistance polypropylene
- * One hand easy flip to open the cap
- * Max. RCF: 9,400xg
- * Black printed graduations and white writing area can withstand chloroform
- * Autoclavable at 121°C and freezable to -80°C
- * Packaged in zip sealed bags or environmental friendly recyclable paper racks
- * Leak proof
- * Gamma irradiation sterilized

Ordering Information

- * Racked tubes are packaged in environmentally responsible (fully recyclable) chipboard racks
- * Bagged tubes are packaged durable and re-sealable (zip closure) bags
- * Inner packaging is individually labeled for lot-to-lot traceability
- * DNase/RNase free and non-pyrogenic

| Cat.No. | Volume(ml) | Description | Package | Qty. per bag/case |
|-----------|------------|----------------------------------|-----------------|-------------------|
| CFT211150 | 15 | Conical,Flip top cap, Sterilized | Re-sealable bag | 25/500 |
| CFT221150 | 15 | Conical,Flip top cap, Sterilized | Paper rack | 50/500 |
| CFT211500 | 50 | Conical,Flip top cap, Sterilized | Re-sealable bag | 25/500 |
| CFT221500 | 50 | Conical,Flip top cap, Sterilized | Paper rack | 25/500 |

Easy Flip™ 1.5ml Micro Centrifuge Tubes

- * Made from high clarity and high grade gamma resistance polypropylene
- * One hand easy flip to open the cap
- * Engraved graduation ensure accuracy
- * Frosted body surface provide easy and legible mark
- * DNase/RNase free and non-pyrogenic
- * Suitable for all standard racks and rotors
- * Boil proof
- * Maximum rotate speed up to 25,000xg
- * Autoclavable at 121°C and freezable to -80°C
- * Available in sterilized or non-sterilized

Ordering Information

- * Packaged in durable and re-sealed(zip closure)bags
- * Every bag has printed lot NO. for quality traceability

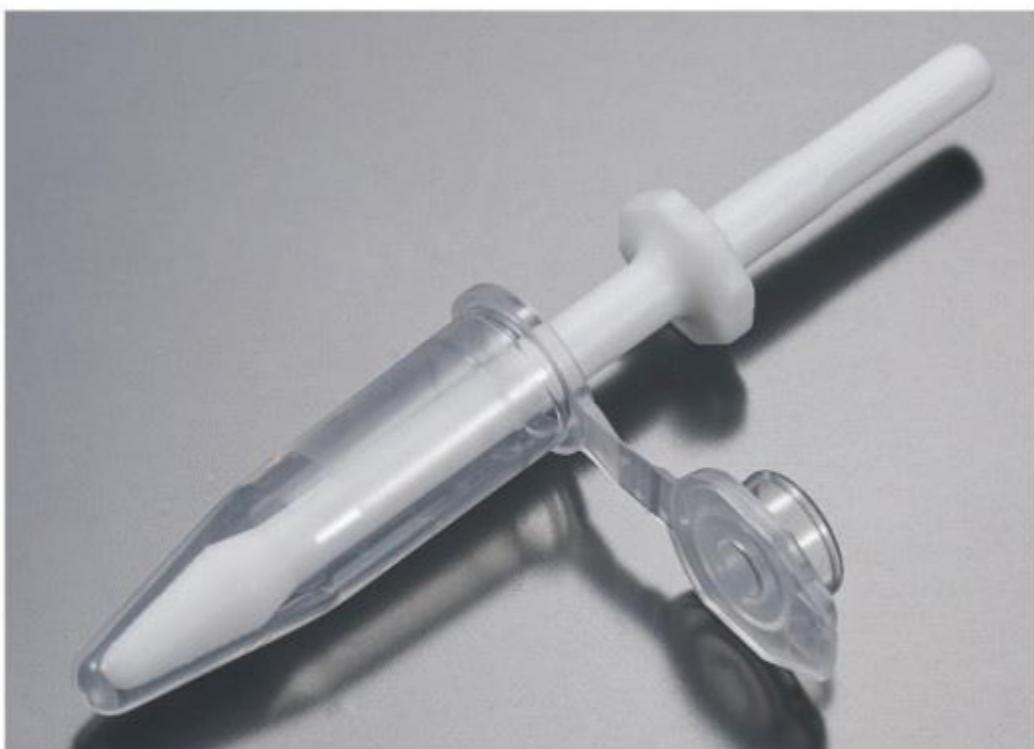

| Cat.No. | Capacity(ml) | Sterile | Oty.per bag/case |
|-----------|--------------|---------|------------------|
| CFT002015 | 1.5 | N | 500 |
| CFT003015 | 1.5 | Y | 500 |

Pestles for 1.5ML Micro Centrifuge Tube

Pestles for 1.5ML micro centrifuge tube are ideal for protein and DAN resuspension as well as grind of soft tissue.

- * Made of high quality plastic, high hardness, wear resistance
- * Handle special process design, ease grip
- * Sterilized by gamma irradiation
- * Individually wrapped
- * Non-pyrogenic and DNase/RNase-free

| Cat.No. | Length(mm) | Description | Sterile | Qty. per pag/case |
|-----------|------------|-----------------------------------|---------|-------------------|
| CSP001002 | 78 | white, individually package | Y | 1/100 |
| CSP002002 | 78 | white, bulk package | Y | 100/1000 |
| CSP003002 | 78 | white, pestle and microtube combo | Y | 1/100 |

Micro Centrifuge Tubes

Micro centrifuge tubes are quality products for small samples Centrifuging or storage.

- * Available with 4 volumes of 0.5ml, 1.5ml, 2.0ml and 5.0ml
- * Engraved graduation ensure accuracy
- * Flat and frost caps surface together with smooth anf frosted body surface
- * DNase/RNase free and non-pyrogenic
- * Maximum rotate speed up to 25,000xg
- * Autoclavable at 121°C and freezable to -80°C

Ordering Information

- * Packaged in easy opening plastic bags
- * Available in sterilized or non-sterilized
- * Every bag has printed lot No.quality traceability

Maximum rotate speed up to 14,000xg

Filtration Products

Syringe Driven Filters

Syringe driven filters are widely used in laboratory, which are easy to operate, safe and effective.

- * Syringe driven filters are widely used in laboratory, which are easy to operate, safe and effective
- * Available with 7 membrane types of CA, PVDF, PES, MCE, Nylon, PTFE and SFCA
- * 3 membrane areas of 0.88cm², 3.46cm² and 4.45cm²
- * 3 pore sizes: 0.10μm, 0.22μm and 0.45 μm
- * Quality tested for filter efficacy and housing integrity
- * Low hold-up volume
- * Gamma radiation sterilized
- * Non-pyrogenic

Ordering Information

- * Individually packed in peel to open paper/plastic blister pack
- * Designed recycle paper package box for easy open and close or place
- * Every package box is labeled with lot Number for quality traceability

Vacuum Filtration

Vacuum filters are very useful in large volume samples separation and purification.

- ★ Available with 5 membrane sorts of PVDF, PES, MCE .Nylon and CA
- ★ 3 membrane pore sizes of 0.10µm, 0.22µm and 0.45µm
- ★ 4 volumes size of 150, 250, 500 and 1000ml
- ★ Light weight and heavy wall construction
- ★ Large knurls on the reservoir bottle cap for easy screw
- ★ Designed wide and easy access bottle mouth for efficiently and stably pour out
- ★ Engraved graduation ensure veracity
- ★ Ergonomically designed sidewalls and collar can simplify tightening/loosening and adjustments
- ★ Designed hose connector can fit multiplicate hose diameters
- ★ Non-pyrogenic
- ★ Gamma irradiation sterilized

Ordering Information

- ★ Vacuum packaged in easy tear-to-open plastic bag and receiver bottle cap is individually wrapped
- ★ Each individual unit is lot-numbered for easy identification and tracking

Disposable Filtration Products

JET BIOFIL® Laboratory Filtration Products series, including syringe Driven Filters and Vacuum Filtration, are designed specifically for the filtration of culture media and organic solvents in research and industrial laboratories. They are purpose-built with features designed to bring the highest levels of performance and purity to your research. A variety of membrane types and membrane areas can be choosed that offer the wide applicability range for separation and purification of most liquid samples to meet different laboratory needs. The filtration products should be driven by syringes or vacuum pumps. All the produces are manufactured with high quality material (ABS, PP or GPPS) and by proficieted technique, which assure them can work under pressure and still hold integrity.

JET Tips on choosing membrane

MCE (Mixed Cellulose Ester)

By the mixture of nitrocellulose and cellulose acetate, hydrophilic, chemical compatibility, low protein adsorption.
The use temperature can not be higher than 40 °C, the optimum pH range is 3-6.
Particle analysis, particle removal, biochemical analysis, HPLC sample preparation for general media and aqueous solutions. Can not be used to filter ethanol and alkaline solution.

Nylon

Providing a broad range of chemical compatibility of the filtration of either aqueous or organic solvents; hydrophilic; can be used in a broad pH range.

PVDF (Polyvinylidene fluoride)

Extremely low protein-binding; for filtration of non-aggressive aqueous and mild organic solutions, or were maximizing protein recovery is important.

PES (Polyethersulfone)

Low-affinity for proteins and extractable with substantially faster flow rates than PVDF; suitable for pre-filtration and filtration of buffers and culture media.

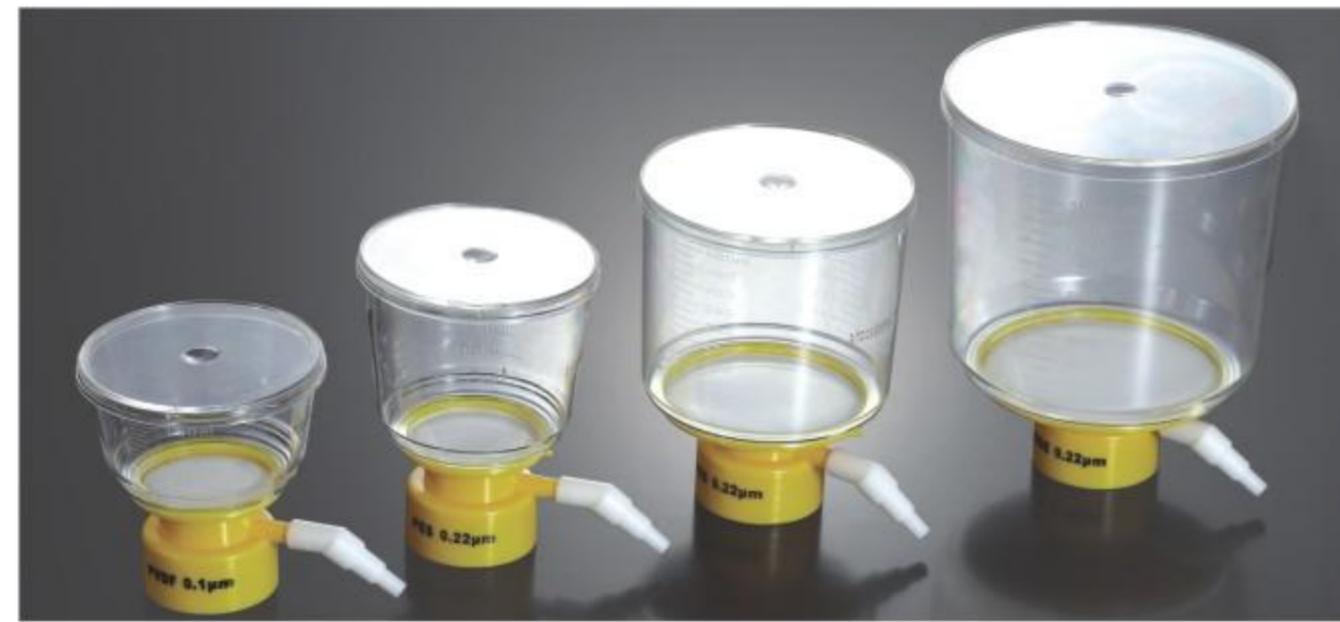

PTFE (Polytetrafluoroethylene)

Extremrly strong chemically resistant and is compatible with various sterilizing methods; ideal for gas and in organic or organic samples in aggressive environments.

CA

Lowest binding material available
Hydrophilic and high throughput
Strength and dimension stability
Uniform pore structure

Filter Upper Cup

Vacuum filters are very useful in large volume samples separation And purification.

- * Available with 5 membrane sorts of PVDF, PES, MCE ,CA and Nylon
- * 3 membrane pore sizes of 0.10µm, 0.22µm and 0.45µm
- * 4 volume sizes of 150, 250, 500 and 1000ml
- * Light weight and heavy wall construction
- * Designed wide and easy access bottle mouth for efficiently and stably
- * Non-pyrogenic
- * Gamma irradiation sterilized

Ordering Information

- * Packaged in easy peel-to-open plastic bag, and receiver bottle cap is individually wrapped
- * Each individual unit is lot-numbered for easy identification

Tube Top Vacuum Filters

- ★ 50mm diameter membrane
- ★ 2 pore sizes of 0.22µm, 0.45µm, 5 membrane types of CA, PES, MCE, PVDF and Nylon
- ★ Minimize unnecessary transfers by filtering directly into centrifuge tube
- ★ Each polypropylene centrifuge tube is supplied with an individually wrapped cap for storage
- ★ Gamma radiation sterilized
- ★ Non-pyrogenic

| Cat.No | Membrane Material | Pore Size(µm) | Funnel/Tube Size(ml) | Sterile | Qty. per bag/case |

Ordering Information

- * Packaged in resealable bag, and centrifuge tube cap is individually wrapped
- * Each individual unit is lot-numbered for easy identification and tracking

Pipette Micro Tips

ZEROTIP™

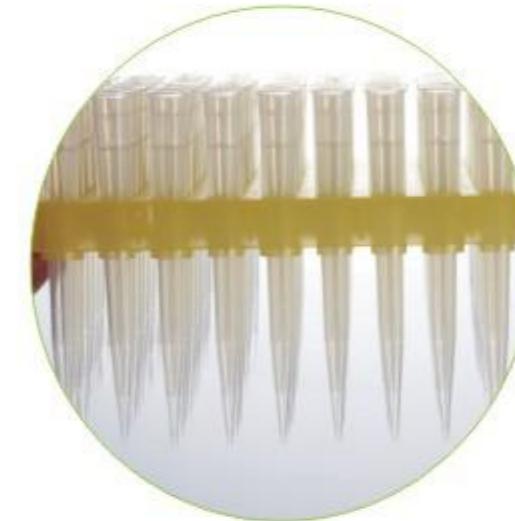

www.jetbiofil.com

ZEROTIP™ Pipette Micro Tips

JET ZEROTIP™ are manufactured from super clear high quality Polypropylene. The surfaces of the tips are produced through a special process. This process makes the tip inner surface become super hydrophobic, thus significantly reduces sample loss and provides substantially higher reproducibility when working with critical media.

- * Available with 6 transfer volumes of 10µl, 20µl, 100µl, 200µl, 300µl and 1000µl
- * Free of Nucleic Acids, Pyrogens/Endotoxins, PCR Inhibitors and Trace Metals
- * Ideal for biological samples that contain detergents such as SDS, Tween Triton 100 etc
- * Tips with PP filter are also available
- * Preferred accessories for most brand micropipettor
- * Fully autoclavable to 121°C
- * Non-Pyrogenic & DNase/RNase-free
- * Available in gamma irradiation sterilized or non-sterilized

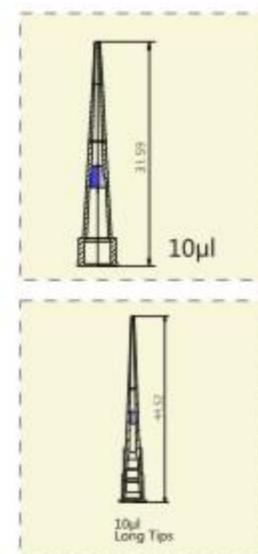

Ordering Information

- * Every rack or case is printed with lot No. for quality traceability
- * Packaged in economical re-sealable plastic bags or extra-rigid autoclavable racks

Pipette Micro Tips

Pipette Micro Tips are good quality consumable products for micropipettor.

- * Manufactured from specially high quality polypropylene
- * Tips with PP filter are also available
- * Preferred accessories for most brand micropipettor
- * Available with 6 transfer volumes of 0.1-10μl, 2-20μl, 10-100μl, 20-200μl, 10-300μl and 100-1000μl
- * Color coded for easy identification
- * Fully autoclavable to 121°C

Ordering Information

- * Every rack or case is printed with lot No. for quality traceability
- * Packaged in economical re-sealable plastic bags or extra-rigid autoclavable racks
- * Available in gamma irradiation sterilized or non-sterilized

Rack of Tips

Other Laboratory Products

ELISA Plates

ELISA Plates are optimal products for ELISA and provide reliable performance in binding assays when consistent coating of wells is required.

- * ELISA Plates are optimal products for ELISA and provide reliable performance in binding assays when consistent coating of wells is required
- * Available with 2 different protein binding capability well surface
- * 2 different bottom styles, fixed flat bottom and detachable flat bottom
- * 8 or 12 wells strip and 48 or 96 well detachable frames are supplied in order to satisfy different sample quantity and economize coat
- * Well surface is uniform, smooth and free from striation to eliminate error
- * CV of transmittance is less than 5.00%
- * Wells are labeled with alphanumeric code for easy identification
- * Sterilized by gamma irradiation

Ordering Information

- * Packaged in easy to open bag
- * Well strips and plate frames are packed respectively
- * Every case has printed lot No. for quality traceability

Product Specifications and Details

| Cat.No | Well Qty. | Binding Capacity | Description | Qty.per{bag/box}/case |
|-----------|-----------|------------------|-------------------|-----------------------|
| FEP100096 | | | Fixed Flat Bottom | 10/200 |
| FEP101896 | 96well | | Detachable, 8x12 | 10/200 |
| FEP101296 | | | Detachable, 12x8 | 10/200 |
| FEP101248 | 48well | High Binding | Detachable, Flat | 20/400 |
| FEP100012 | 12well | | Strip 12x8 | 40/1600 |
| FEP100008 | 8well | | Strip 8x12 | 60/2400 |
| FEP200096 | | | Fixed Flat Bottom | 10/200 |
| FEP201896 | 96well | | Detachable, 8x12 | 10/200 |
| FEP201296 | | Medium Binding | Detachable, 12x8 | 10/200 |
| FEP201248 | 48well | | Detachable, Flat | 20/400 |
| FEP200012 | 12well | | Strip 12x8 | 40/1600 |
| FEP200008 | 8well | | Strip 8x12 | 60/2400 |

ELISA Well Strips and Plate Frames

| Cat.No | Size | Description | Qty. per bag/case |
|-----------|--------|---|-------------------|
| FEP400096 | 96well | Frame for 12w × 8 or 8w × 12well strips | 10/200 |
| FEP400048 | 48well | Frame for 12w × 4well strips | 10/400 |

Medium Bottles

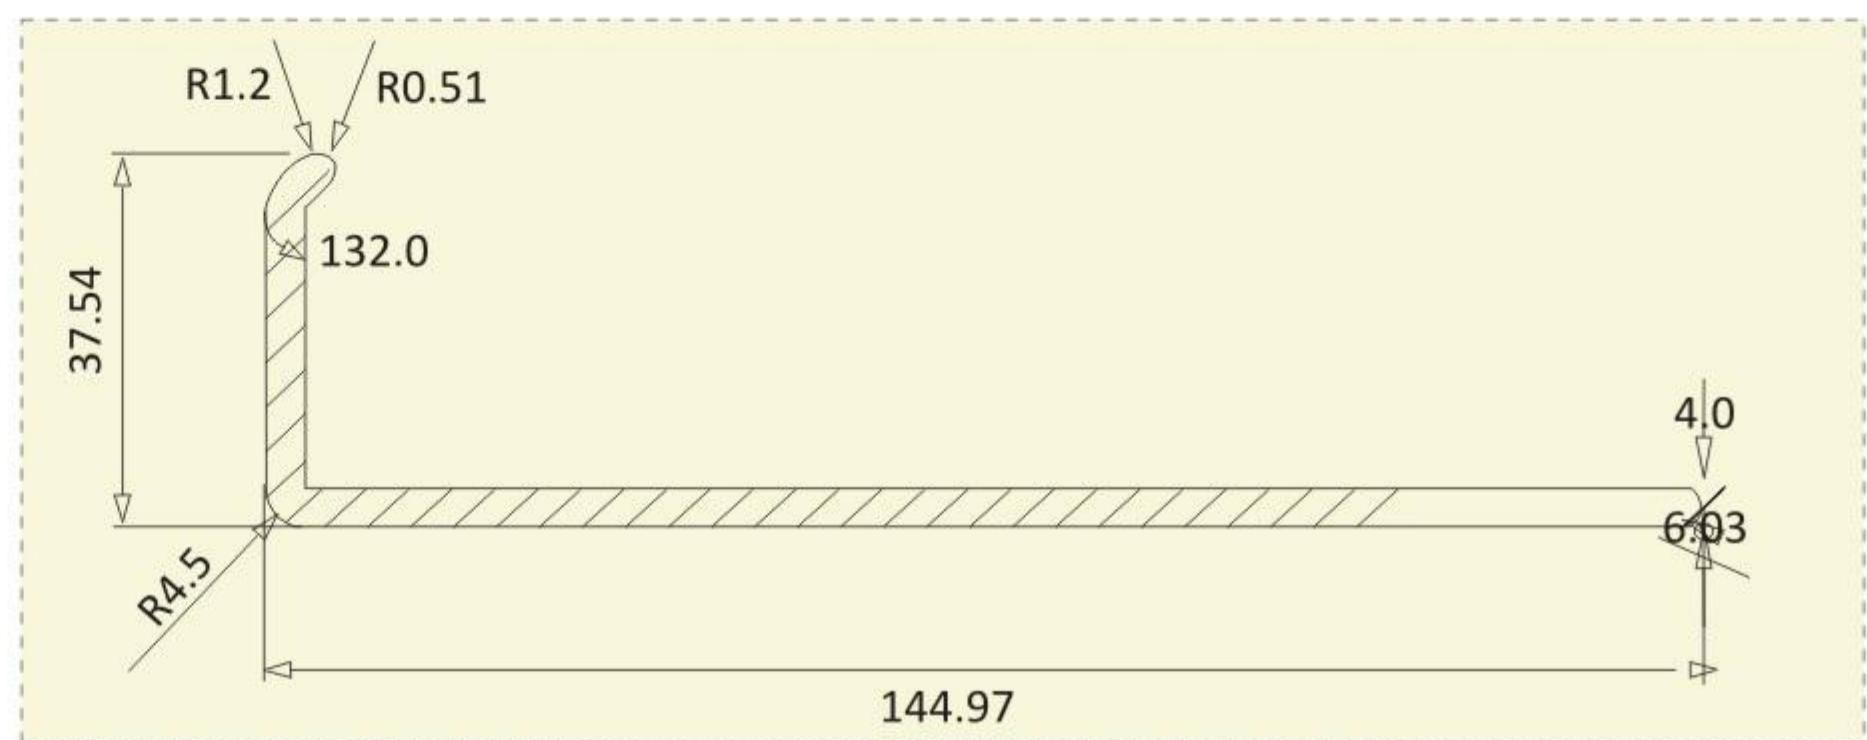

- * Bottle is used with PETG , free of heavy metal
- * Screw cap is used with HDPE (High Density Polyethylene), free of heavy metal
- * Bottle is embossed graduation two sided
- * Shelf life is three year after month of production
- * All used materials meet the legal requirements of FDA
- * Temperature range from -60°C to 60°C
- * Non-autoclavability
- * Free of detectable DNase/RNase, human DNA and pyrogens

| Cat.No | Volumes(ml) | Description | Sterile | Per Case |
|-----------|-------------|-------------|---------|----------|
| SSB030500 | 500 | Natural cap | Y | 24/48 |
| SSB040500 | 500 | Natural cap | N | 24/48 |
| SSB031500 | 500 | Without cap | Y | 24/48 |
| SSB041500 | 500 | Without cap | N | 24/48 |

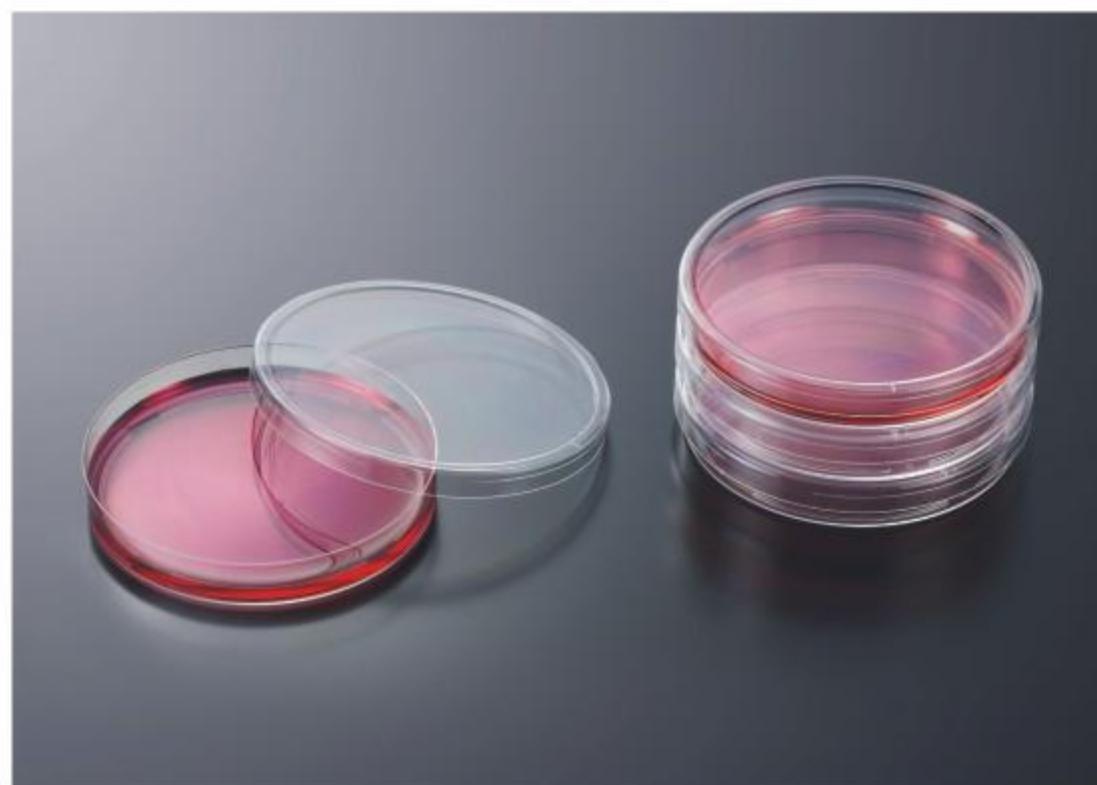

L-shaped Cell Spreader

- * Disposable green L-shaped cell spreaders are ideal for spreading cell or bacterial cultures evenly
- * The L-shaped allows application on the entire dish or plate surface
- * Smooth spreading surface with slight upward return reduces the risk of damaging agar sample
- * Spreaders are manufactured of polypropylene and pre-sterilized, eliminating the need for flaming or autoclaving
- * Sterilized by gamma irradiation
- * Individually wrapped and bulk packaging
- * Non-pyrogenic

| Cat.No | Description | Sterile | Qty./case |
|-----------|-------------|---------|-----------|
| CSP011014 | PP | Y | 1/100 |
| CSP012014 | PP | Y | 10/500 |

Petri dishes

Petri dishes are containers for bacterial culture and also useful in sample separation, pre-treatment, storage and so on.

- ★ Disposable Petri dish made of transparent polymer materials made of polystyrene (GPPS), for laboratory inoculation, scribing, bacterial operation
- ★ Uniform thickness, bottom without distortion, good transparency, is easy to observe
- ★ Can meet the training needs of gas exchange
- ★ Easy grip type flat plate, lateral teeth ring design, minimizing pollution
- ★ On the cover and the bottom annular protuberance closely, convenient storage and reduce the medium volatile
- ★ Gamma ray sterilization

Ordering Information

- * Packaged in durable and resealable (zip closure) to assure contamination-free
- * Every package case is printed with lot No. for quality traceability

Reagent Reservoir

- ★ Manufactured from high-quality polypropylene
- ★ Low profile design, suitable for small volume robotic tips used in high flux instrument.
- ★ In the automatic pipetting process, the reservoir can perfectly overcome the surface tension of the liquid and minimize residual liquid
- ★ Matched reservoir breaker (for 96 and 384) and the cover can avoid the liquid wastage in the process of operation
- ★ Minimum residual liquid; low heavy metal content
- ★ Microplates can be stored under subzero temperature from -40 to -80°C
- ★ DNase/RNase free and non-Pyrogenic

Ordering Information

- * Plate and film are individually packaged
- * Package in easy-to-open packs to assure contamination-free
- * Every pack case is printed with lot No. for quality traceability
- * Available in gamma irradiation sterilized or non-sterilized

Reagent Reservoirs

Reagent Reservoirs are designed for liquid transfer, also the first assistant container choice for repetitive pipettors.

- ★ Available with 3 sizes : 25, 50, 100ml
- ★ Engraved graduation ensure accuracy
- ★ Quiet handing and light weight
- ★ Corrosion proof
- ★ Tapped for nesting when stored
- ★ Available in sterilized or non-sterilized
- ★ Stability is strong, easy to operate, with scale

PCR Tubes

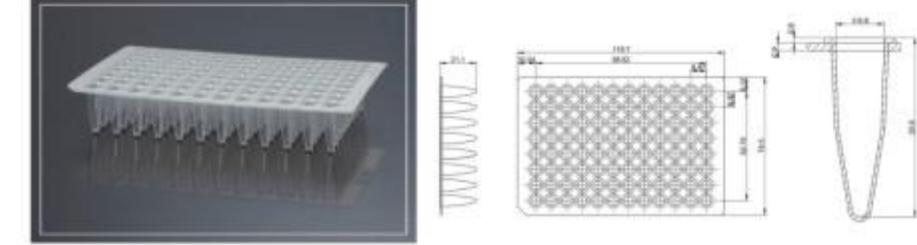

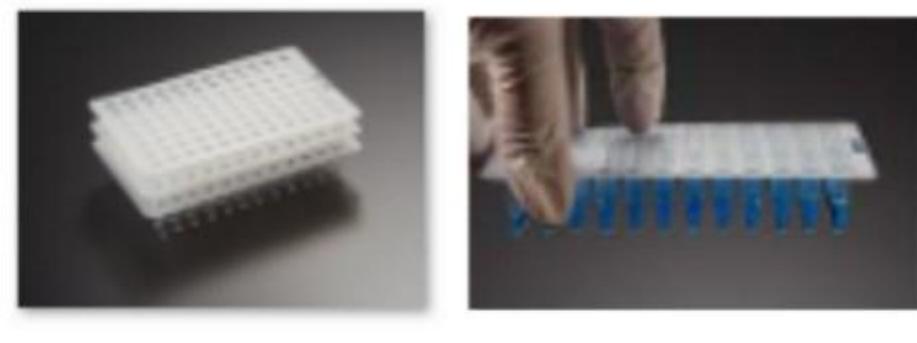

PCR products are manufactured from prime virgin polypropylenes. This result in tubes, strips and tips that exhibit a perfect balance between transparency, softness, robustness, antistatic characteristics and gas tightness.

- ★ 0.2ml thin wall PCR Tubes, Strip of 8 Tubes, Flat caps
- ★ Manufactured from prime virgin polypropylene
- ★ Ultra thin wall design for efficient heat transfer
- ★ Compatible with standard 96 well heat blocks
- ★ High light transmittance

Ordering Information

- ★ Package in easy opening plastic bag and white box
- ★ Every case has printed lot No. for quality traceability

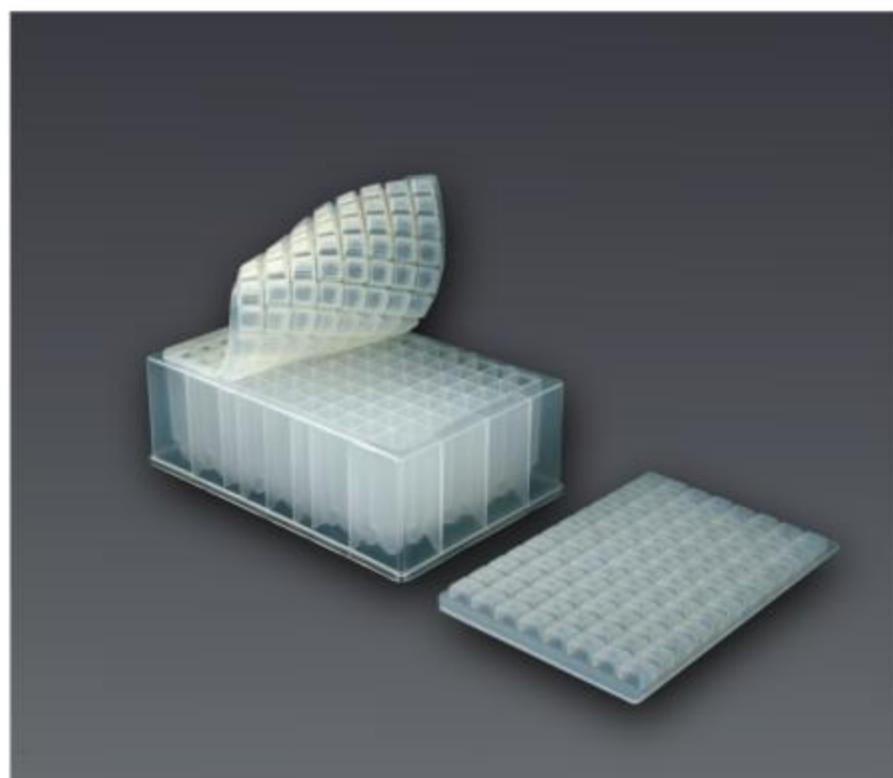

| Cat.No | Description | Sterile | Color | Qty. per bag/case |
|-----------|---|---------|---------|-------------------|
| PCR100200 | 0.2ml PCR Tubes with Flat Cap, 8 Strips | Y | Natural | 125/1250 |
| PCR000200 | 0.2ml PCR Tubes with Flat Cap, Single | Y | Natural | 1000/10000 |

96 Well PCR Plates

- ★ 0.3ml maximum well volume
- ★ Compatible with all popular 0.2ml thermal cyclers and ABI PRISM 3100, 3130 and 3700 capillary sequencers
- ★ Suitable for 0.2ml thermal cycler blocks
- ★ 100% Virgin Polypropylene construction for PCR application
- ★ Slightly raised well to provide sealing with mats, film, foil, heat seals, and flat and domed cap strips
- ★ Thin and uniform wall thickness for consistent thermal transfer
- ★ Non-sterilized
- ★ DNase/RNase-free & Non-Pyrogenic

| Cat.No | Description | Color | Qty. per bag/case |
|-----------|--|---------|-------------------|
| PCR000096 | 96-well PCR Plate,not skirted,Non-sterilized | Natural | 10/100 |

Deep-well Multiwell Plates

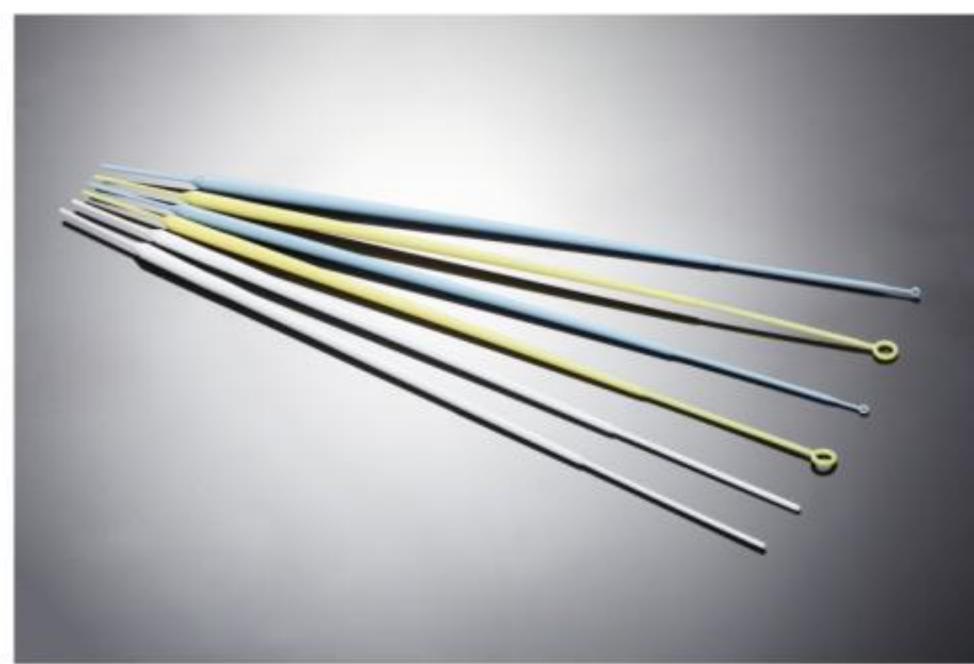

Deep-well Multiwell Plates are excellent container as mother plates in cell and tissue culture assays requiring, sample storage and more.

- ★ Manufactured from high-quality virgin polypropylene
- ★ Available with 2 different wells: 48 wells and 96 wells
- ★ Available with 6 different well volumes : 0.36ml, 0.4ml, 1.0ml, 1.6ml, 2.0ml, 2.2ml, 3.0ml and 4.6ml
- ★ Resistant to a wide variety of chemicals
- ★ Compatible with most robotic samplers and automated liquid handling systems
- ★ Designed notched corners to facilitate orientation
- ★ Stackable for easy storage
- ★ Can be used with flexible mat covers reduce sample evaporation and contamination
- ★ Evaporation and contamination
- ★ Adhesive sealing films and pad are also available

Ordering Information

- ★ Plate and film are individually packaged
- ★ Package in easy-to-open packs to assure contamination-free
- ★ Every pack case is printed with lot No. for quality traceability
- ★ Available in gamma irradiation sterilized or non-sterilized

Inoculating Loops and Needle

Inoculating loops and needle are really useful tools in inoculating experiment.

- ★ Made from high quality polypropylene or polystyrene
- ★ Available with 3 inoculating volumes of micro-quantity, 1 µl, 10µl and needle
- ★ Vacuum-gas plasma surface treated, allowing liquid or solid culture medium to attach
- ★ Color-coded for easy identification
- ★ Accurate sampling volume design ensure the uniform sample quantity
- ★ The combination of needle and loop is used in the dual function
- ★ Long flexible stem can be bent to come through narrow or small volume tubes and dishes
- ★ Available in gamma irradiation sterilized or non-sterilized

Ordering Information

- ★ Packaged in peel to open packs to assure contamination-free
- ★ Every package case is printed with lot No. for quality traceability

Serum & Sample Tubes

Serum & Sample tubes are ideal processing applications for small volume sample.

- ★ Excellent quality PP tube body and PE cap
- ★ Available with 6 volumes of 0.5, 1.5, 2.0, 5.0, 15.0 and 50ml
- ★ Screw cap with plug seal for one-handed operation
- ★ Easy to read graduations are accurate to ±2%
- ★ With a large unerasable frosting white writing area
- ★ Leak proof
- ★ Self standing
- ★ Endotoxin free
- ★ Non-sterilized tubes and gamma radiation sterilized tubes can be selected

| Cat.No | Volume(ml) | Speciality | Sterile | Qty. per bag/case |

- ★ Available in gamma irradiation sterilized or non-sterilized

Freezing Vials

Freezing Vials are manufactured from high quality polypropylene and gamma resistant.
Freezing Vials withstand low temperatures for safe storage and transportation of cells, blood, serum and other specimens.

- * Product information
- * Freezing Vials are your best choice for based on the high quality and special features.
- * Manufactured from durable PP and PE
- * Available with 4 volumes: 0.5ml, 1.5ml, 2.0ml, 5.0ml
- * Interlocking cap design ensure exact fit and will not absorb water or other contamination
- * Part of the tube has mold engraved scale experimental process of recording easy
- * Closures containing silicone gasket can avoid liquid leakage
- * Screw cap for one-handed operation
- * Temperature range: -196 °C -121 °C
- * Easy-to-read graduations are accurate to ±2%
- * Sterilized by gamma radiation

| MPC109001 | Y | Y | Including circle | Re-sealable bag | 1000/16000 |

Gel Tube

- * Made of polypropylene
- * Autocalvable at 121°C and freezable to -80°C
- * Max RCF up to 14000xg
- * Sterilized by ethylene oxide
- * Certified DNase/RNase Free and non-pyrogenic

| Cat.No | Sterilize | Lid | Speciality | Package | Qty.per bag/case |
|-----------|-----------|-----|------------------|-----------------|------------------|
| MGC004001 | Y | Y | Including circle | Re-sealable bag | 1000/20000 |

Cuvettes

Cuvettes are select disposable products for their optics speciality and chemically resistant.

- * Pure crystal clear virgin GPPS ensures the transparency
- * Available with 2 standard volume sizes of 1.5ml and 4.5ml, 10mm path length
- * CV of transmittance is less than 0.5%
- * Resistant with most polar organic solvents
- * Smooth sides make optical pathway no inflecting
- * Recessed sides prevent scratching and convenient for grip

Ordering Information

- * Packaged in styrofoam box for extra protection
- * Every package box is labeled with lot No for quality traceability
