

SPVI No. 001/2026

Sustainable Procurement Policy

S P V I Public Company Limited

S P V I Public Company Limited (“the Company”) recognizes the importance of procurement processes as a key mechanism in supporting efficient, transparent, and socially responsible business operations with suppliers and business partners. In order to build confidence and trust among stakeholders throughout every stage of the procurement process, the Company has established this Sustainable Procurement Policy to ensure that procurement operations are conducted systematically, transparently, and in a manner that is auditable and aligned with good corporate governance principles, while also supporting the Company’s sustainability strategies and objectives.

Scope of Application

This Policy applies to directors, executives, and employees, and covers procurement activities at both the head office and branch offices, including products for sale, products for internal use, supporting services, as well as coordination with manufacturers, suppliers, business partners, and service providers throughout the supply chain. The key principles are as follows:

1. The Company conducts procurement by considering product and service quality, pricing, quantity, after-sales services, suitability for use, and the overall best interests of the Company.
2. The Company implements supplier selection and procurement processes in a systematic, transparent, and fair manner, in compliance with the Company's Anti-Corruption Policy and other supplier-related policies.
3. The Company treats suppliers and business partners in accordance with the Company's Business Code of Conduct and Supplier Code of Conduct, while also welcoming suggestions and feedback from suppliers to foster strong and sustainable business relationships.
4. The Company encourages suppliers to comply with the Supplier Code of Conduct as part of sustainable supply chain management practices.
5. The Company adheres to procurement principles that support and promote local employment while creating opportunities for vocational skill development to enhance the quality of life and capabilities of people within local communities.
6. The Company promotes and procures products and services from suppliers that prioritize energy conservation and environmental responsibility. The Company’s procurement processes emphasize the selection of environmentally friendly products and services in order to minimize environmental impacts and support sustainable development practices (Green Procurement), with the following guidelines:

- 6.1 Consider products that comply with manufacturing standards, environmental standards, or products certified under environmental standards or bearing a Green Label certification
- 6.2 Select packaging materials that reduce environmental impact, such as paper bags or reusable fabric bags instead of plastic bags.
- 6.3 Select products and services that are durable and have long service lives to reduce the frequency of replacement, waste generation, and pollution throughout the product lifecycle.
- 6.4 Engage electronic waste management service providers that comply with applicable standards and legal requirements to ensure proper recycling and environmentally responsible disposal of electronic equipment.
7. The Company monitors, supervises, and assesses suppliers' sustainability risks to ensure that suppliers conduct their operations in accordance with ESG principles and are able to deliver products and services in compliance with contractual agreements.

This Policy shall become effective from 4 February 2026 upon approval by the Managing Director.

Announced on 4 February 2026.
