

CUCUMBER

F1-Hybrid Cucumber

CODE: CU-1114

Characteristics

Vigorous growth and well branched and the fruit have cylindrical shaped uniform. Tolerance to disease, Good shelf life, good taste. The fruit is dark green color.

Fruit Size: 4x16.90 cm.
Fruit Weight: 180 gm.
Harvest time: 32-35 days after sowing.

CODE: CU-1116

Characteristics

Vigorous growth, high yield and well-branched and fruit have uniform cylindrical. Tolerance to disease, good shelf life, good taste. The fruit is dark green color.

Fruit Size: 3.5x16.70 cm.
Fruit Weight: 180 gm.
Harvest time: 35-38 days after sowing.

VIENG PING

Characteristics

Vigorous growth and well branched, high yield and well keep long distance shipping, disease tolerance. It has uniform cylindrical fruit with medium dark green skin.

Fruit size: 4x16.5 cm.

Fruit weight: 100-120 gm.

Harvest time: 32-35 days after sowing.

CODE: CU-1059

Characteristics

The cylindrical fruits, Vigorous growth, high yield and well-branched, diseases tolerance, good shelf-life. Suitable for winter season.

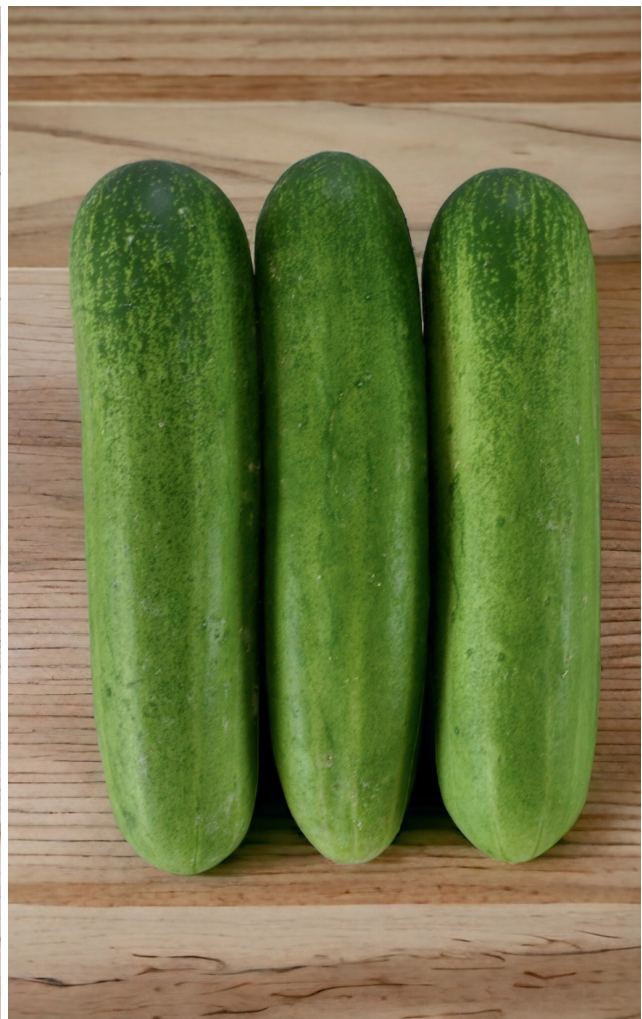

Fruit Size: 4.2x22 cm.
Fruit Weight: 230-250 gm.
Harvest time: 33-35 days after sowing.

CODE: CU-1068

Characteristics

High prolific growth, uniformity cylindrical fruit and well-branched with highly female flowers. The shouldered of fruit skin has gradient a deep dark green to light green color.

Fruit Size: 2.7x11.5 cm.
Fruit Weight: 90-100 gm.
Harvest time: 32-35 days after sowing.

CODE: CU-198

Characteristics

Vigorous growth and well-branched, good shelf-life, able to grow all year round, tolerance to disease. Dark green skin and uniformity cylindrical fruit.

Fruit size: 4x17.5 cm.

Fruit weight: 130-150 gm.

Harvest time: 33-35 days after sowing.

CODE: CU-1988

Characteristics

Vigorous growth, high-yield and well-branched. Diseases tolerance, good shelf-life and early harvesting. Cylindrical shaped fruit with dark green skin color.

Fruit Size: 3.5x15 cm.

Fruit Weight: 130-160 gm.

Harvest time: 27-30 days after sowing.

CODE: CU-1981

Characteristics

Vigorous growth, high-yield, well-branched, diseases tolerance and good shelf-life.

Cylindrical shaped fruit with dark green skin color.

Fruit Size: 3.5x14 cm.

Fruit Weight: 120-140 gm.

Harvest time: 35-38 days after sowing.

CODE: CU-2250

Characteristics

Vigorous growth, high-yield, well-branched, tolerance to diseases and good shelf-life. Cylindrical shaped fruit with dark green skin color.

Fruit Size: 2.6x13 cm.

Fruit Weight:65-70 gm.

Harvest time: 32-35 days after sowing.

CODE: CU-2263

Characteristics

Vigorous growth, high yield, well-branched, tolerance to diseases and good shelf-life.

Cylindrical shaped fruit with dark green skin color.

Fruit Size: 4.5x23 cm.

Fruit Weight: 270-280 gm.

Harvest time: 35-38 days after sowing.

CODE: CU-914

Characteristics

Vigorous growth, high-yield and well-branched. tolerance to diseases and good shelf-life. Cylindrical shaped fruit with gradient medium dark green skin color.

Fruit Size: 4.5x18.1 cm.

Fruit Weight: 130-150 gm.

Harvest time: 32-35 days after sowing.

CODE: CU-2184

Characteristics

Vigorous growth, high-yield and well-branched. tolerance to diseases and good shelf-life. Able to grow all year round. Cylindrical shaped fruit with gradient medium dark green skin color.

Fruit Size: 4.5x18.1 cm.

Fruit Weight: 130-150 gm.

Harvest time: 32-35 days after sowing.

CODE: CU-2234

Characteristics

Vigorous growth, high-yield, well-branched, tolerance to diseases and good shelf-life. Cylindrical shaped fruit with medium green skin color.

Fruit Size: 2.6x12 cm.

Fruit Weight: 55-60 gm.

Harvest time: 32-35 days after sowing.
