

TOMATO

F1-Hybrid Tomatoes Indeterminate type,
Semi-determinate processing type and
Indeterminate cherry type.

PHAYA CHOMPOO

Characteristics

Semi-determinate type, good fruit setting, firmness suitable for shipping, vigorous growth and well-branched. Tolerance to diseases, good shelf-life and able to grow all year round.

Fruit size: 4.2x5.3 cm.

Fruit weight: 30-41 gm.

Harvest time: 55-60 days after transplanting.

CODE: TM-262

Characteristics

Semi-determinate processing type, oblong shaped fruit. Vigorous plant, prolific heat and BW tolerance.

Fruit weight: 120-150 gm.

Fruit size: 6x7.8 cm.

Harvest time: 55-60 days

CODE: TM-152

Characteristics

Semi-determinate processing type. Bright red color with oblong shaped fruit. Vigorous plant, prolific heat and BW tolerance.

Fruit weight: 75-85 gm.

Fruit size: 4.9x6.2 cm.

Harvest time: 55-60 days after transplanting.

CODE: TM-497

Characteristics

Indeterminate type, vigorous plant, high-yield, tolerance to insects and disease. Oblong shaped fruit with red color.

Fruit size: 6.8x5.1 cm.

Fruit weight: 120-140 gm.

Harvest time: 70-75 days after transplanting.

CODE: TM-600

Characteristics

Indeterminate type, vigorous plant, high-yield and well-branched. Tolerance to insects and disease. Oblong shaped fruit with red color. Fruit size: 6.2x6.4 cm. Fruit weight: 120-150 gm. Harvest time: 70-75 days after transplanting.

CODE: TM-603

Characteristics

Indeterminate type, vigorous plant, high-yield and well-branched. Tolerance to insects and diseases. Oblong shaped fruit with red color. Fruit size: 6.6x6.4cm. Fruit weight: 140-180gm. Harvest time: 70-75 days after transplanting.

CODE: TM-616

Characteristics

Indeterminate type, vigorous plant, high-yield and well-branched.

Tolerance to insect and disease.

The fruit is red color with oblong shaped.

Fruit size: 6.3x6.4 cm.

Fruit weight: 130-150 gm.

Harvest time: 70-75 days after transplanting.

CODE: TM-647

Characteristics

Indeterminate type, vigorous plant, high-yield and well-branched.

Tolerance to insect and disease.

The fruit is red color with oblong shaped.

Fruit size: 6.9x6.6cm.

Fruit weight: 170-190 gm.

Harvest time: 70-75 days after transplanting.

CODE: TM-653

Characteristics

Semi-Indeterminate processing type, heat and disease tolerance.

The fruit has glossy skin with red color and oval shaped. Excellent fruit setting and firmed suitable for shipping.

Fruit size: 5.2x6.8 cm.

Fruit weight: 100-120 gm.

Harvest time: 55-60 days after transplanting.

CODE: TOC-301

Characteristics

Indeterminate cherry type, vigorous plant has many clusters and highly tolerant to BW and TMV. The fruit has green shouldered and red color with long oval shaped and sweet taste.

Fruit size: 2.9-3.8 cm.

Fruit weight: 16-18 gm.

Harvest time: 55-60 days after transplanting.

CODE: TOC-538

Characteristics

Indeterminate cherry type, A vigorous plant has many clusters. It has long oval shaped fruit. Also, the fruit has green shouldered and bright red color and sweet taste.

Fruit weight: 15-16 gm.

Fruit size: 2.7x3.6 cm.

Harvest time: 55-60 days after transplanting.
