

A close-up photograph of several watermelons. Some are whole, showing their characteristic dark green rinds with lighter green stripes. Others are sliced into wedges, revealing a vibrant red, juicy interior with scattered black seeds. The lighting is bright, highlighting the textures of the rind and the freshness of the fruit.

WATER MELON

F1-Hybrid Watermelon

WATERMELON

CODE: WM-130

Characteristics

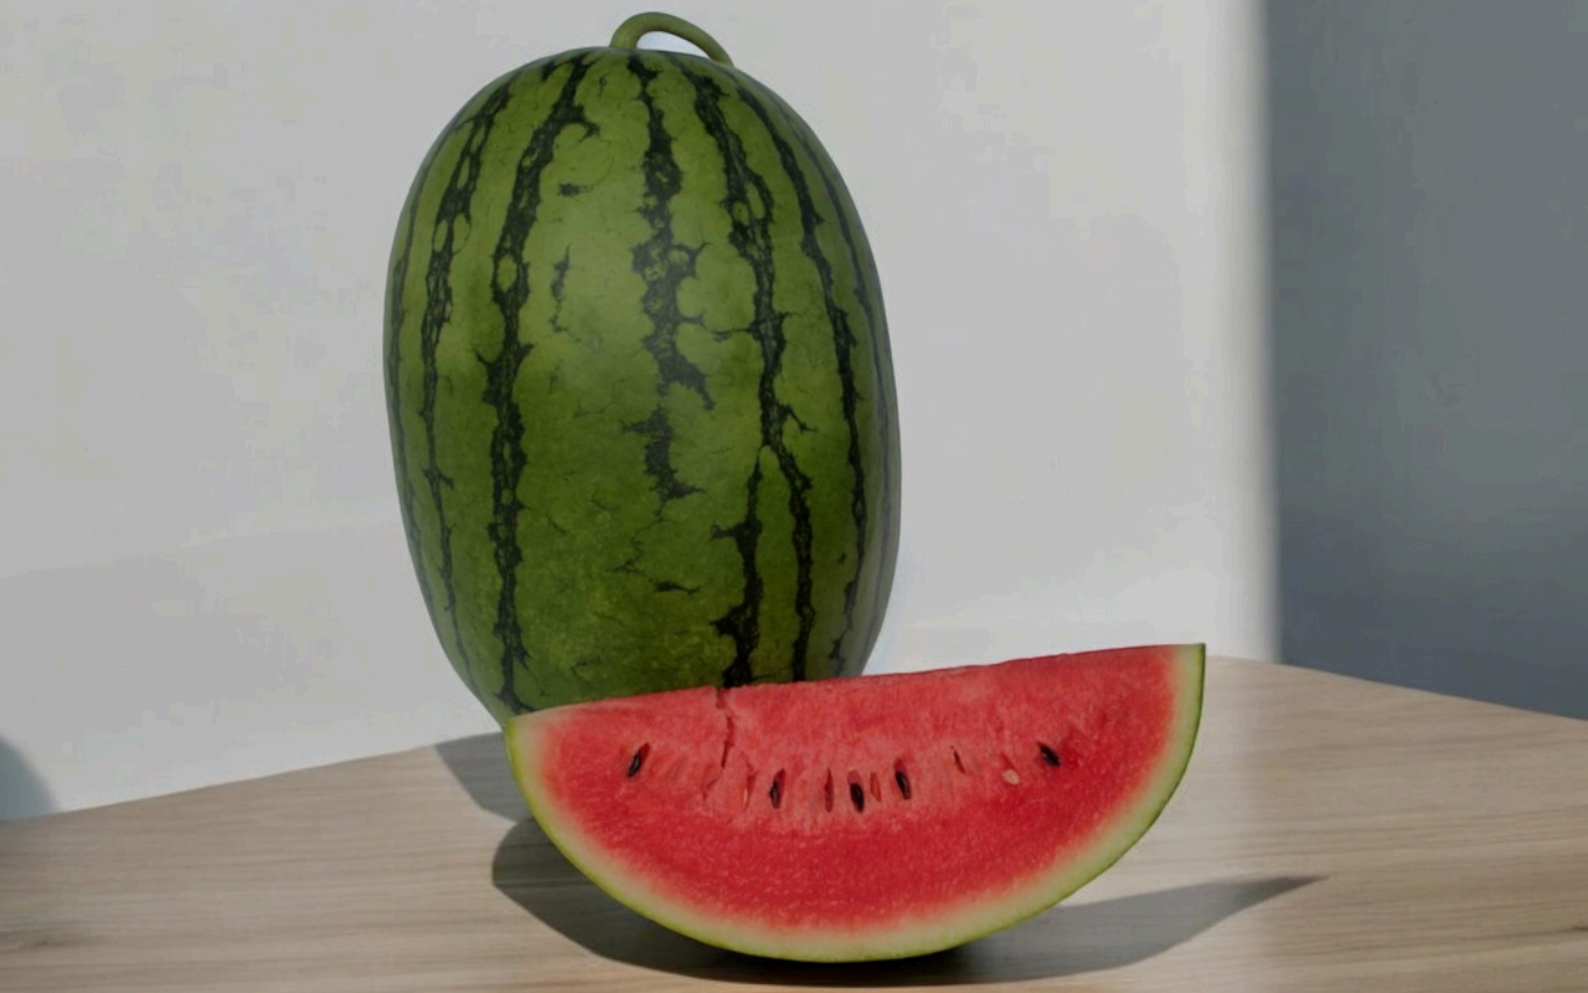

The plants are well able to adapt to any environment. Easy to set the fruit and high yield. The fruit has a short pillow shape and red flesh inside. The taste is very sweet and juicy. It's also grown favorably all year round.

Fruit size: 26.5-28 cm.

Fruit weight: 5.5-5.8 kg.

Harvest time: 50-55 days
