CONVENTIONAL FIRE ALARM ANNUNCIATOR FIPN SERIES

DESCRIPTION

The FIPN series annunciators are auxiliary units of fire alarm panels that are installed in sub control rooms, guard rooms, etc., located remotely from the fire alarm control panel thus enabling careful fire management by fire surveillance at multiple points.

The annunciator has the functions of indicating fire zones and of giving an audible alarm of those functions possessed by the fire alarm control panel. Upon operation of the fire alarm control panel, the annunciator activates the indication lamps and audible alarm devices.

The FIPN series annunciator is equipped with a means of telephone communication with attendants at the fire alarm control panel.
