

Emergency Release

Break Glass Fire Alarm / Exit Switch
(ER-D301)

A premium emergency push-button switch designed for access control systems and fire safety. Manufactured from high-quality flame-retardant PC plastic, it ensures exceptional durability and security. Perfectly suited for hollow door frame installations, embedded electric boxes, and comprehensive security setups demanding immediate release in an emergency.

- ✓ **Perfectly integrates with various Access Control Products**
- ✓ **Can be used together with alarm and notification systems**
- ✓ **Easy installation, simple operation, and strong flexibility**

Technical Specifications

Dimensions (LxWxH)	86 x 86 x 50 mm	Operating Temperature	-10°C ~ 55°C
Standard Structure	Flame-retardant PC Material	Operating Humidity	0-95% (Relative humidity)
Current Rating	3A @ 36VDC Max.	Panel Material	Flame-retardant PC Plastics
Output Contact	NO / NC / COM	Terminal Type	Screw terminal, easy to install
Suitable for Door	Hollow Door / Embedded Box	Working Type	Break Glass (Resettable)
