DDHA – Air handling Unit with direct drive motor

AHU with direct drive fan motor specially designed for free blow or short duct application to meet market requirement with low noise and smooth operation. Easy control and operate the AHU without the need of AHU starter.

Unit Casing

Units casing is constructed of zinc coated, heavy gauge, galvanized steel. Exterior surface is cleaned, phosphatized and finished with a polyester powder painted and weather resistant baked enamel finish. Casing is complete insulated with fire-retardant, permanent, odorless polyethylene foam.

DDHA Unit

Direct Drive Motor

Fans

Fans are double width, double inlet, multiblades centrifugal type. All fans are statically and dynamically balanced and tested from factory.

Coils

Configured aluminum fin surface is mechanically bonded to internally enhanced copper tubing with factory pressure and leak tested at 380 psig. Coil is arranged for draw trough airflow and shall provide full condensate drain pan constructed of galvanized steel with enough insulation thickness to prevent condensation.

Fan Motor

3-speed fan motor with direct drive type is provided for ease of control and operation. Thermostat with

control desired fan speed at high, medium or low speed.

Trane Thermostat (Option)

Digital room thermostat with 3 speeds fan adjustment and ON/OFF switch. Temperature setting can be adjusted from 18-30 °C with 7-segment LED display and auto restart function.
