

Lobe Pump-HL Series

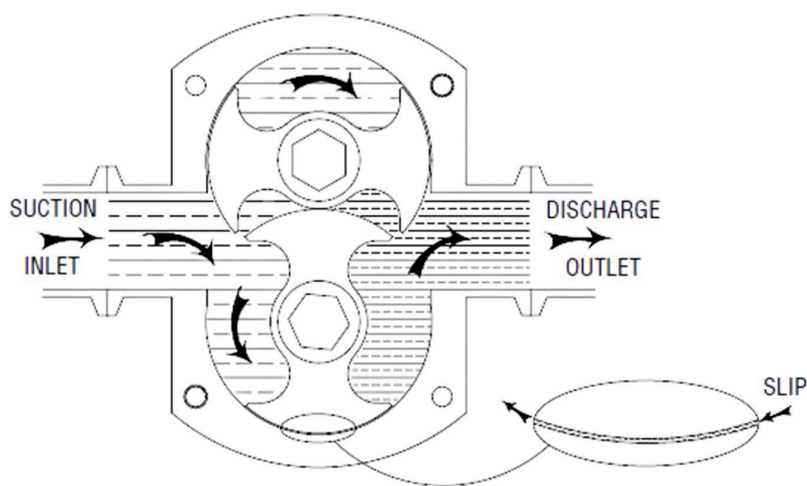

Application

" The HL Series Lobe Pump from HYPERFLOW is a high-performance, positive displacement pump designed for the gentle and efficient handling of a wide range of viscous, shear-sensitive, and hygienic fluids. This pump is ideal for industries such as food & beverage, pharmaceuticals, cosmetics, chemicals, and biotechnology. With its robust construction, sanitary-grade design, and modular build, the HL Series delivers exceptional durability, easy maintenance, and reliable operation in demanding environments.

Technical specifications

Flow Rate	0.1 ~ 50 m ³ /h
Pressure Range	Up to 1.2 MPa
Temperature Range	-20°C ~ 150°C
Viscosity Handling	Up to 1,000,000 cP
Material	SUS316L for wetted parts
Sealing Type	Mechanical seal / Lip seal
Motor Power	0.75 ~ 15 kW (customizable)
Inlet/Outlet Size	DN25 ~ DN100 (varies by model)
