GRAND PIONEERS

DL420A-7M

**Power to Break-Through Any Serious Work Outclass,
Outpace, Out-Tech - The Forerunner of Next Generation**

Mech. Engine

A frontier. A forerunner. Charging toward any undeveloped site. Sturdy. Rugged. Pushing through any limits with its assertive posture. DL420A-7M, the leader of bold new wheel loader generation. This avantgarde will pioneer new path for your business.

Knowledge, heritage and power all combined into progressive spirit. DL420A-7M's thrilling performance can break through any serious challenges posed by hard mining and rough terrains. This new wheel loader stays true to its root, outclass power and outstanding productivity, but advanced with out-tech intelligent features. Take first on this world built for performance, strength and sustainability.

It sure can be the choice of bespoke solution for your business. DL420A-7M, the power to trailblaze your own way.

OVERWHELMING PERFORMANCE

Impressive breakout force and high traction make penetration easy and allow you to handle the hardest materials. Power and athletic balance of powerful hydraulic system makes work quick and efficient.

BUILT FOR COMFORT AND LONG LASTING

Obsessive engineering and countless tests have proven DL420A-7M's superior quality and durability to cope with the most demanding works. Its functional and refined in-and-out design delivers you comfort and total control.

Photos may include optional equipment

WE ARE BACK WITH NEW FEATURES

**All the Nice Features of Previous Model
Bodily Succeeded, Even Nicer Things to Come.**

STRENGTH AND INTELLIGENCE

With tremendous lift height and capacity, along with enough torque to bite into the toughest materials, DEVELON wheel loaders go a step beyond scooping, carrying and loading. It's your ticket to making harder work easier, longer days more enjoyable, and every minute more productive and profitable.

LS HYDRAULIC SYSTEM

Load sensing hydraulic system produces flow and pressure for the implement system only when needed, improving machine productivity and resulting in lower fuel consumption.

INCREASED OPERATOR COMFORT

The new spacious cab offers an operator-friendly environment with top-class all-round visibility. It centers around a high comfortable seat.

LSD (LIMITED SLIP DIFFERENTIAL) / HD (HEAVY DUTY) AXLE OPTION

Various axle option available for different terrain conditions to meet your needs.

Photos may include optional equipment

CABIN VISIBILITY

Improved visibility to the left and right bottom section of the front windshield for easy positioning of front wheels.

ENHANCED COUNTERWEIGHT

Reinforced standard counterweight with additional counterweight option.

DEVELON FLEET MANAGEMENT (OPTIONAL)

Offering 'preventive maintenance service' based on machine operating data. Providing an expert level consultation to dealers. Functioning as fleet management tool for the customers.

NEW CLUSTER AND KEYPAD

Intuitive gauge panel and keypad enable easy access to machine settings and maintenance data. All switches and operating mechanism integrated to improve operational convenience.

ENHANCED LIS (LOAD ISOLATION SYSTEM) (OPTIONAL)

LIS Absorbs the impact on the lifting arm, cutting off the shock not to be transferred to cabin and body. Enhancing the balance, productivity and operator comfort.

NEW 8-INCH MONITOR FOR REAR-VIEW CAMERA (OPTIONAL)

Large and bright LCD monitor to view rear surroundings for safe operation. Wide angle Rear-view camera integrated into the radiator grill, offering seamless design and protection.

PERFORMANCE, SIMPLY OVERWHELMING

Irrepressible Power with Restrained Fuel Consumption.

You are looking for wheel loader which gives seamless power, smooth stability and supreme controllability in all site. Push the limit to the point you ever thought possible. DL420A-7M is featured with enhanced hydraulic system and upgraded exuberant engine power. Go a step beyond with superior lift height and capacity, along with powerful torque to bite into the toughest materials. Exceptional performance data of DL420A-7M was already confirmed by its leading position in the market.

Perfect integration of power and intelligence. DL420A-7M's intelligent automatic system is ready to help you achieve the performance you want with the fuel savings you need. Situation Awareness Technology monitors the machine's operation. SAT itself can count and analyze operative data to adjust engine's output. LS system allows efficient use of power by the hydraulic system. Both in order to attain maximum efficiency and productivity.

With DL420A-7M, you will be able to open possibilities up for new efficient workflows. Let's get the hard job done while saving big on fuel.

HYDRAULIC POWER STEERING

The hydraulic power steering ensures smooth steering even in the low engine speed ranges.

Z KINETICS

The Z lifting geometry is very robust and especially designed for heavy loads. Few moving parts, reduced loads, simplicity, everything contributes to good loader stability. This geometry enables very rapid bucket movements and ensures correct angle positioning in all situations. The rapid bucket dump capability makes it easier to unload adhesive materials.

EXUBERANT ENGINE POWER

DL420A-7M is powered by 'DEVELON DX12', which is a whole new mechanical engine built on DEVELON's continuously evolving engine technology. DEVELON DX12's greater engine outputs of 218 kw and impressive torque enables to precisely deliver the power for most demanding work. Reliable and robust mechanical engine provides high resistance to exterior contamination.

FULL AUTO TRANSMISSION

The electronic powershift transmission is particularly smooth. Gear ratios perfectly spaced to give optimal speed. Giving comfort and delivering excellent traction in every working condition. Built-in electronic controls enhanced productivity and durability. Transmission has three modes of operation, 'Manual', 'Automatic' and 'Semi-Automatic'. 'Automatic' mode provides self regulative shift for all gears and 'Semi-Automatic' mode provides automatic option after the first acceleration and gear shift.

BETTER WEIGHT DISTRIBUTION

Heavier standard counterweight structure stably controls the enlarged bucket. Excellent traction power offered by Optimum weight distribution. Additional counterweight supplied for options targeting the customers who need more tipping load.

LIMITED SLIP DIFFERENTIAL

The machines axles are fitted with limited slip differentials at the front and rear. This automatically ensures the maximum tractive effort and easy driving over soft and muddy ground. It also reduces the risk of skidding and, at the same time, prevents excessive tire wear.

LS HYDRAULIC SYSTEM

LS system helps controlling hydraulic components through the electronic sensor, regarding on changing working conditions and load capacity. Also act on steering controllability improvement in boom and an arm. Provides faster response and reduces fuel consumption.

IMPROVED LIS (LOAD ISOLATION SYSTEM)

In loaded traveling, the impact on the front could be transferred to the body, may give rise to equipment damage and driver uncomfortableness. LIS option absorbs tremor and minimizes swaying movement of lifting arm while the equipment carries the load. Ultimately enhancing the durability of front structure and operator's comfort.

CUSTOMIZED FOR YOUR PREFERENCE

Attachments tailored to you

DEVELON wheel loaders are all extraordinary even if you choose not to pick on specific options. However, take a second for a look at selection of thoughtfully curated option packages, if you want to do even further. We have constantly worked on thorough analysis of your needs. DEVELON is ready to tailor a complete solution that fits you perfectly.

Maximize productivity and profitability by combining the DL420A-7M with a range of durable attachments. Specialized in each of the needed option including rehandling, extraction, or any other application. Together as an integrated part of the wheel loader, all attachments effectively perform a variety of tasks and increase your productivity. Increase your versatility and perform a variety of tasks-all while experiencing faster cycle times and excellent control.

1

1. AGGREGATE BUCKET (OPTIONAL)

Fortified bucket options for handling aggregate material.

2

3. HIGH LIFT (OPTIONAL)

High Lift is equipped besides Standard Lift. Ideal for more lift height.

3

4. QUICK COUPLER PIPING (OPTIONAL)

Add piping, valve and switch for quick coupler. Useful in quick transition of further attachments. Designed intuitively to use a quick coupler easily.

4

5. SPARK ARRESTOR (OPTIONAL)

The optional spark arrestor prevents the exhaust from igniting in explosive atmospheres, such as forestry environment.

5

DURABILITY, WE LIVE UP TO OUR PROMISES

**Uptime Carved in Its Gene,
With Torsional Rigidity and Robust Frame Design.**

It wouldn't be DEVELON, when we bail our commitment with customers to make a reliable and durable machines. DL420A-7M is built on strong foundation with superior chassis concept to build on. Flexible and robust in operation, the D type frame which shaped to add solidity. X-chassis frame designed using reliable element and formed in optimal structural integrity. Obsessive engineering and countless tests proven DL420A-7M to cope with most demanding work environments. The most updated and proved single platform was applied, which has been proved and verified in diverse market.

With its suite of standard safety features, we keep operator in perkeeping the excellent performance with added durability and quality on structure components. Computer assisted design technique applied to remote possibilities in hydraulic components and frame structures. DEVELON is more than ready to provide an especially robust, resilient equipment that is optimally prepared for use for almost any construction challenge.

1

1. REINFORCED BUCKET

The lower and side panels of the bucket have been reinforced with additional plates (standard). Reinforcement applied at both sides and at lower panel.

2

2. SINTERED TYPE BRAKE DISC

Paper type brake disc changed to sintered type. Axle endurance figure enhanced with the compact sintered type disc. Besides using semipermanent material, replacement cycle of maintenance components extended. Cutting down the machine downtime and ensures long hours of operation.

3

3. RADIATOR GRILL WITH STEEL STRUCTURE

The radiator grill with its aerodynamic steel structure increases air flow which facilitates cooling and the maintenance process.

4

4. ENHANCED TRANSMISSION DAMPER

Enhanced performance of Transmission damper. Quality improvement in both equipment serves low noise and vibration level, during the drive.

5

5. PROPELLER SHAFT

A protective cover has been installed to protect the oil seal from dust, foreign objects and premature wear. Robust steel suspension provides excellent transmission of power and ensures reliable stability.

6

6. IMPROVE ENGINE DURABILITY BY TECHNOLOGICAL IMPLEMENT

Water separator in fuel to prevent engine damage. Large capacity forced air cleaner removes over 99% of airborne particles, reducing the risk of engine contamination and lengthen the cartridge change intervals.

7. APPLIED MORE RIGOROUS QUALITY STANDARD

All key components meet the increased new quality standard. Applying DEVELON single platform, which verified in advanced market.

8

8. ORFS-ALL PORTS

Fitted even in pilot line and pressure line.

9

9. REMOTE AXLE BREATHER

Increased the length of front axle breather for prevention of pollution from particle matter. Added additional remote type axle breather on rear axle.

10

10. LARGE CAPACITY TRANSMISSION OIL COOLER

The large capacity transmission oil cooler ensures durable and stable operation of transmission.

11

11. INCREASED AXLE DURABILITY

The brake discs have been repositioned to the rear part of the reduction gear, where rotation speed is lower. Discs are exposed to a lower RPM and heat generation, resulting in longer life span. Automatic disc clearance be maintained at the optimum level at all time. Prevents any lag in brake response.

FOR THE ENHANCEMENT OF YOUR WORK LIFE

Aesthetic Which Lies in Its Functionalism, Complexity Refined Into Simplicity

Time to focus on what you really need to see. Full package of technology and engineering distilled into simple and intuitive features to help you to center on important work.

Every feature is there for a reason. Nothing more to take out of, nothing less to be gained with. Formed to feel high technology natural and simple. With a broad range of functions and operating information minimized into a intuitive gauge panel installed right in front of operator. Operational ease guaranteed by integrated and adjusted switches. Main functions can be controlled conveniently and by multifunction steering column. Intelligent assist system and uncluttered design accentuates operator to concentrate on work without being distracted.

We also left beauty of space exclusively for you to fill with. In your own office feel free to take the rest in the way you want. Enjoy your enhanced personal space with completely re-designed cabin interior with climate control systems, air suspension seat and various convenient features. All elements provided to ensure the operator to work in safe and comfortable condition no matter the working environment is. The new state of the art workplace. Ready to treat you without reservation.

SPACIOUS CABIN COMFORT

Refined interior with enhanced legroom and storage space guarantees a serene ride to you. Equipped with high-class designed upholstery and thoroughly changed comfort accessories.

SMALL DETAILS ADD THE FEELING OF REFINEMENT

Ergonomically re-designed brake pedal and non-slip floor mat equipped. Heating and ventilation, Air conditioning system upgraded for pleasant environment. USB charger and sunglass case is also equipped for additional comfort. Rear sun visor is also equipped for UV protection.

EASY ENTRY AND EXIT

Grab handles and offset steps with slip-resistant surfaces provide safe and easy access to and exit from the cabin. The door opens 180° - and can be locked in the open position to provide a wide opening for moving in and out of the machine.

1. ALL AROUND VISIBILITY

Enlarged front windshield assures best possible all-around visibility. Panoramic cabin windows and adjustable seat position assists on safety and controllability promotion via enhanced lower part of visibility on side position. In crowded city streets or in hazardous construction workplace, operator can get better control and command of surroundings.

2. ERGONOMICALLY DESIGNED PEDAL

Ergonomically designed pedals placed at both ends. Pedal angle adjusted to relieve the pressure on ankle and joints, reducing fatigue and to lessen the load of operator.

3. CABIN BOOK LAMP

Book lamp placed near the cabin door to secure operator's visibility by preventing the shadow. This new book lamp contributes to enhanced safety through improved illumination of the way. Enhances driving comfort and safety.

4. CENTRAL GAUGE PANEL

A new gauge panel put essential information right in front of the driver. The compact central monitor panel allows the operator the perfect overview of the machine status and warning lights at a single glance.

5. THUMBWHEEL JOYSTICK

Joystick enables united and intuitive control of your wheel loader.

6. SWITCH PANEL / KEYPAD

The ergonomically laid out switch panel in line with the natural movements of the body allows for convenient operation.

7. REAR VIEW CAMERA

Rear-view camera keep watch in ways beyond operator's sight. LED lights attached on each side for the clear identification.

8. CENTRAL MONITOR PANEL

The compact central monitor panel is ergonomically designed and allows the operator to monitor the status and warning lights at a single glance.

9. AIR-SUSPENSION SEAT (OPTIONAL)

Air-suspension seats provide more comfort and support for the operator.

- 1. All Around Visibility
- 2. Ergonomically Designed Pedal
- 3. Cabin Book Lamp
- 4. Central Gauge Panel
- 5. Thumbwheel Joystick
- 6. Switch Panel
- 7. Rear View Monitor (Optional)
- 8. Central Monitor Panel
- 9. Air-Suspension Seat (Optional)

NO MORE WASTE ON MAINTAINCE

Free of Problem, Long Term Gain

A workhorse which never stops. DL420A-7M facilitates features for machine to operate in best condition at long intervals by ensuring short and easy maintenance procedure.

You can get out of a laborious duty maintaining the equipment, hand your position over to machine. DL420A-7M is intelligent enough to take care of itself. Optional AGS (Auto Greasing System) automatically lubricate the main pin points while the machine is still working. Get back to work fast. We are there for you, always connected. To cut short on machine downtime, familiar and intuitive DEVELON Fleet Management provides you the operational data in an hourly cycle. You can carry out preparatory checks at anytime and anywhere. You can check most of the functions outside the equipment.

Thoroughly concentrate on your main work. DEVELON helps you to turn a profit in long term.

1. CENTRAL JOINTS

Easy access on articulation joints, essential for the AGS (Auto Greasing System, Optional).

2. TRIPLE-ELEMENT AIR FILTER

The forced-air cleaner removes 99% of particles and is backed up by a turbo pre-filter. Cleaning and cartridge replacement are only needed at long intervals.

3. SINGLE LAYER COOLING MODULE RADIATOR

Applied Single layer cooling module structure. Simple structure made easy for cleaning.

4. TRANSMISSION FILTER

Transmission filters located in easy reach. Like the rest of the machine's service components, can be checked from ground level.

5. REMOTE GREASING LUBRICATION PORTS

Front pins can be lubricated from the outside of the machine. Enable to skip the unnecessary procedure of struggling to reach the unapproachable lubrication ports, including crawling under the machine.

6. AGS, AUTO GREASING SYSTEM (OPTIONAL)

Automatic lubrication system controls greasing when the machine is in operation. Grease flows from pump to be proportionally supplied in needed points. Grease can be injected in any event, no matter the circumstances or environment. Resulting in more machine uptime and reduced stress for maintenance.

7. OIL BATH CLEANER (OPTIONAL)

Wet-type pre-cleaner provides better filtering in dusty environments. Also increase maintenance interval resulting in more uptime.

8. WATER SEPARATOR

Water separator comes standard to allow the engine to perform at its' top condition regardless of fuel quality.

9. ENGINE OIL/COOLANT DRAIN PORT

Remote type drain ports makes it easier to replace engine oil/coolant.

10. HVAC FILTER ACCESS

Heating, Ventilation and Air Conditioning system is positioned on the outside of the cabin for easier maintenance. Allowing quick replacement on filters and enhancing daily maintenance check easier.

11. DEVELON FLEET MANAGEMENT

Upgraded DEVELON Fleet Management fuel consumption data, error code, parts replacement interval information. Via DEVELON Fleet service, you can always monitor the operating data, anytime or anywhere. Optimized for routinely check to prevent machine troubles and down time.

12. SIGHT GAUGES

Well-located, yet easily visible sight gauges for the hydraulic oil and radiator coolant allow easy daily checks while reducing the risk of contaminants entering the systems.

DEVELON FLEET MANAGEMENT

Telematics Service (OPTIONAL)

TELECOMMUNICATIONS Data flow from machine to web

TELEMATICS TERMINAL

Terminal device is installed and connected to a machine to get machine data.

TELECOMMUNICATION

DEVELON provides Dual mode (Cellular, Satellite) communication to maximize communication coverage

DEVELON FM WEB

User can monitor machine status from DEVELON FM Web

TELEMATICS SERVICE BENEFITS Develon and dealer support customers to improve work efficiency with timely and responsive services

CUSTOMER

Improve work efficiency

- Timely and preventive service
- Improve operator's skills by comparing work pattern
- Manage fleet more effectively

DEALER

Better service for customers

- Provide better quality of service
- Maintain machine value
- Better understanding of market needs

DEVELON

Responsive to customer's voice

- Utilize quality-related field data
- Apply customer's usage profile to developing new machine

FUNCTIONS (WEB/APP) Develon Telematics Service provides various functions to support your great performance

GLOBAL PARTS NETWORK

QUALITY-PROVEN MAIN COMPONENTS

Develon provides fast and precise worldwide delivery of genuine Develon parts through its global PDC (parts distribution center) network.

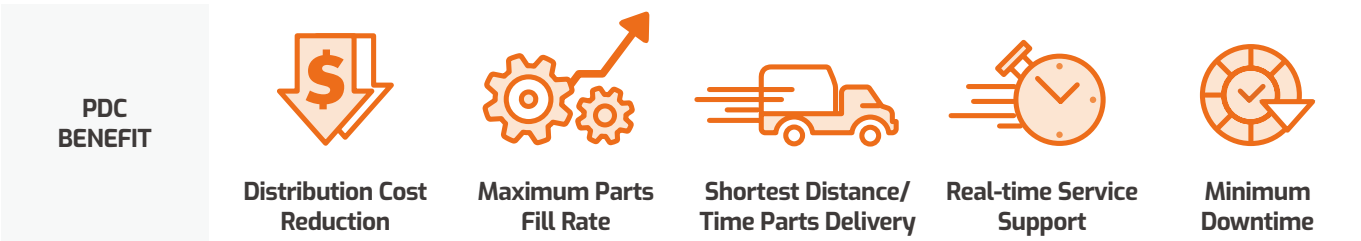

GLOBAL NETWORK

The global network of the GPDC (Global Parts Distribution Center) maximizes its fill rate by making sure that each center is stockpiled with all the critical parts required for businesses in its area. The network also minimizes the time and costs required for parts delivery by positioning PDCs close to major markets around the world. Develon PDCs communicate with customers in their time zone, informing them that they are open for operation, and deliver parts to them as early as possible.

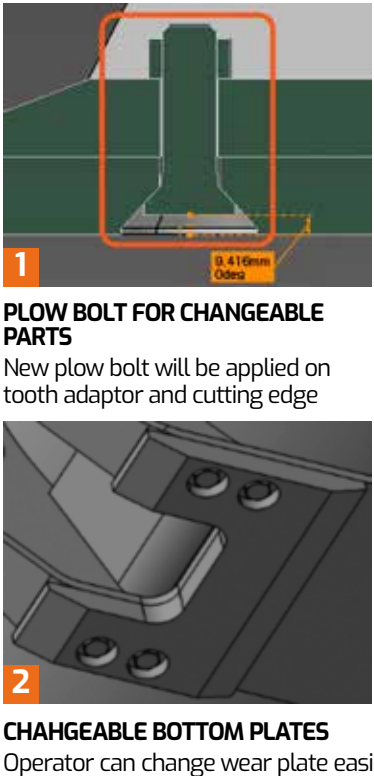

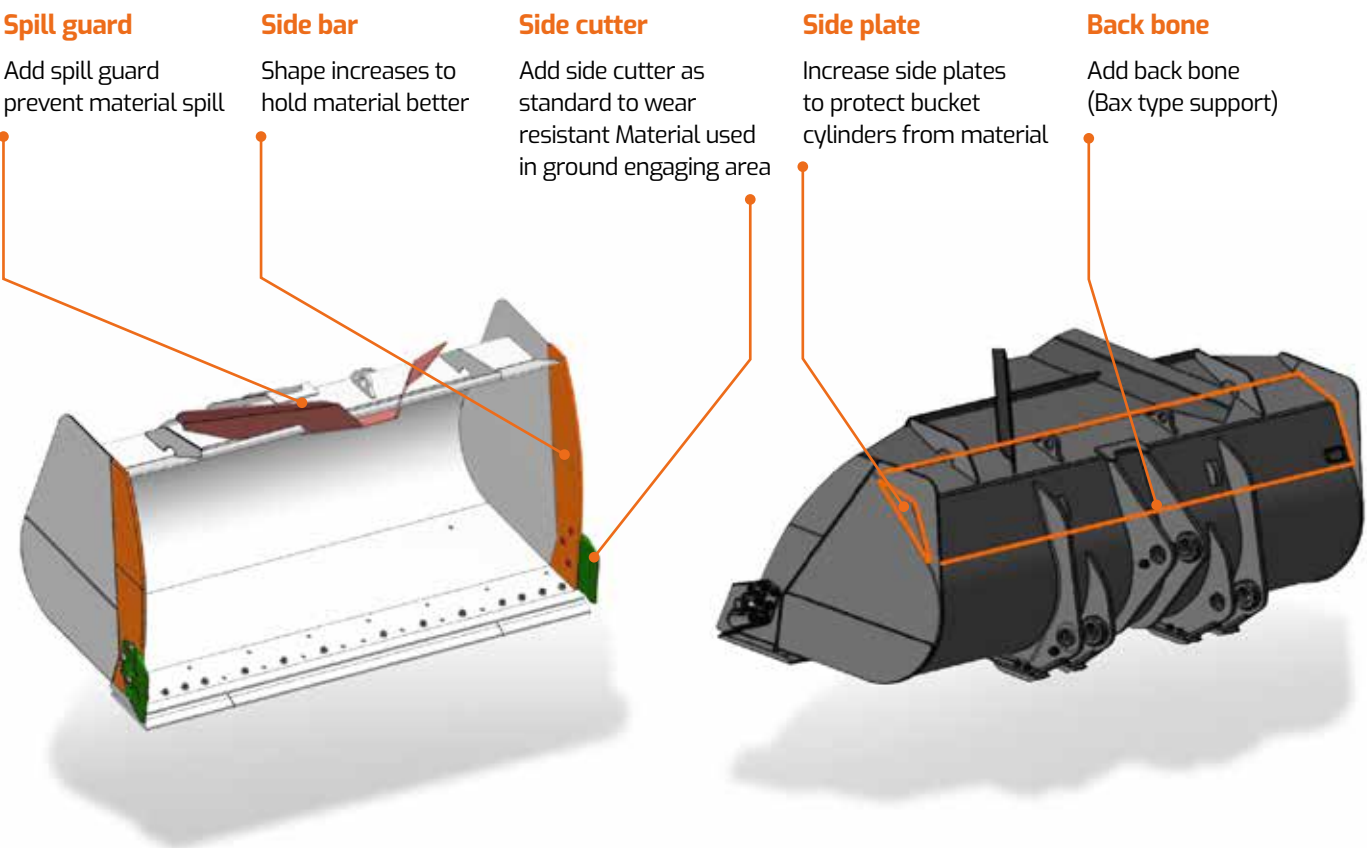

THE GLOBAL PARTS DISTRIBUTION CENTER NETWORK

PDCs had been set up as shown below, including Mother PDC in Ansan, Korea. The nine other PDCs include one in China (Yantai), three in USA (Atlanta, Seattle and Miami), two in Europe (Germany and the UK), one in the Middle East (Dubai) and two in Asia (Singapore and Indonesia).

ATTACHMENTS

Aggregate bucket is the most commonly used bucket in the construction equipment market and is designed mainly for use in heavy construction but also used in low density mining and quarry application.

	DLGP42	DLLM42	DLVR42
WEIGHT (kg)	2,080	2,760	2,720

LOG DIA. Ø (mm)	400	1,100	1,400

TECHNICAL SPECIFICATION

ENGINE

The high performance Develon DX12 engine offers low fuel consumption and low exhaust emissions, which are well below the requirements of the Tier 2 regulation.

-GROSS SAE J1995

Rated Power
302 HP @2,000 rpm
Max Torque
1,300 N.m @ 1,200 rpm
Displacement
11,051 cc
Bore x stroke
ø 123 x 155 mm
Battery
System voltage : 24 V Quantity : 12 V x 2 Capacity (AMP) : 200 Ah
Starter power
24 V / 7.0 kW
Alternator output
28 V / 100 A

AXLES

The front and rear axles with planetary hub reductions are built on the base of very reputed components. Fitted as standard, the front and rear limited slip differentials, ensure the traction is optimal in all circumstances.

Type
Fully floating planetary-type
Limited slip Differential (front and rear)
30 %
Oscillation angle
+/- 12°
Brake
Dual circuit multi-plate wet discs. Hydraulic actuation with pump and accumulator. The sintered metal brake discs extended discs service intervals : increased three times A spring applied and hydraulically released parking brake is mounted on the transmission shaft.

TRANSMISSION

"Full Power Shift" transmission. It can be used in manual or automatic modes. This transmission is based on components having excellent worldwide reputations. It is equipped with a modulation system allowing soft gear shifting and inversion of travel direction. Safety devices also protect the transmission of bad operations. The gear and direction shifting is operated by a single lever to the left of the steering wheel. A travel direction control is also mounted on the hydraulic joystick. (Optional) The transmission can be de-clutched by the operation of brake pedal to increase the power available to the hydraulic pumps. A safety device prevents the starting of the engine when not in neutral.

Torque converter
Type : Single stage, one phase Stall ratio : 3.089
Travel speed (km/h)
Forward : 7.5 · 12.6 · 26.9 · 38.8 (1/ 2 / 3 / 4) Reverse : 7.5 · 12.6 · 26.9 (1 / 2 / 3)

HYDRAULIC SYSTEM

The hydraulic system uses axial piston pumps. Pilot actuation with standard single lever. Automatic arm kick-out is standard. All of hydraulic lines are equipped with special seals (ORFS)

Max flow main
280 / 210 / 66.8 ℓ/min
Working Pressure
320 bars
Pressure of the pilot circuit
35 bars
Filtration capacity on the return line
10 microns
Loading cycles time
Lifting speed (loaded) : 6.0 seconds Dumping speed (loaded) : 1.7 seconds Lowering speed (empty) : 2.8 seconds

OPERATOR'S CABIN

The modular cab allows excellent visibility in all directions. The optimal ventilation is obtained by numerous ventilation outlets. Touch buttons control the air re-circulation air conditioning and heating systems. The air of the cabin is filtered.

All necessary information for the operator are centralized in front of operator.

The main functions are actuated via switches located on a console at the right of the operator.

Generous storage places are well located. The cabin, mounted on viscous element and equipped with an air suspended seat, offers a better comfort for the operator.

Access door : 1

Emergency exits : 2

The cab conforms ROPS ISO 3471 and FOPS : ISO 3449

Guaranteed external noise level Lwa
(following ISO 6395) 112 dB(A)

Guaranteed Inside of cabin noise level Lpa
(following ISO 6396) 78 dB(A)

STEERING

The steering system is a load sensing type with a flow amplifier and a priority valve.

Steering angle
40°
Oil flow
210 ℓ/min @ 2,000 rpm, high
Working pressure
205 bars
Steering cylinders (2)
bore x stroke : 100 x 450 mm Emergency steering system with hydraulic pump driven by electric motor. (Optional)

LIFTING SYSTEM

The lifting system with two cylinders and Z configuration is designed for the toughest jobs. The breakout force is very important and the bucket movements are fast. The bucket angles are well kept in good positions on all the range of bucket movement.

Lifting cylinders (2)
bore x stroke : 150 x 795 mm
Bucket cylinders (1)
bore x stroke : 160 x 615 mm

MAINTENANCE

Maintenance is easy due to excellent access. The radiator fan swivels to aid cleaning. The transmission is electronically controlled. An error coding system allows easy diagnosis of the systems and proper intervention.

Engine (oil) - 28 ℓ
Radiator (cooling liquid) - 57 ℓ
Fuel - 318 ℓ
Hydraulic oil - 223 ℓ
Gear box and torque converter - 54 ℓ
Front axle - 42 ℓ
Rear axle - 40 ℓ
