ABOUT US

P.C. Products International Co., Ltd. is a leading manufacturer of wheel balancing weights in Asia. We have over 30 years experience in supplying to major automobile global clients like Ford, Toyota, Honda, Isuzu, Mitsubishi, Mazda, Kawasaki and Suzuki in OEM capacity.

Our products are exported worldwide to major automotive hubs and markets in Europe, South America, North America, South Africa Middle East and Asia. We are recipients of DIN EN ISO 14001:2018 and awards which attest to our dedication to quality and sustainable manufacturing issues.

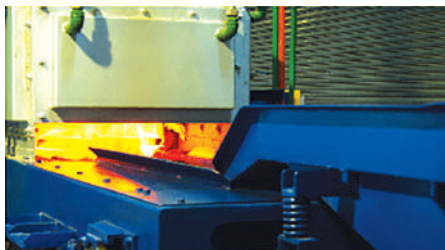

Aside from wheel balancing weights, we also manufacture other automotive parts like hose clamps, spring bands and clips.

MANUFACTURING PROCESS

Our newly installed fully automated plastic 100% coverage double-coating plant consists of a multi-nozzle spray section. This automated plant is designed and built by our own research and development team.

Our factory is run on a day/night shift basis. This enables effective scheduling of short and long runs to balance for tight delivery schedules and operational complexities. A key aspect of our manufacturing process in our in-house mould-making facility. It enables seamless production as any mould defects or problems spotted during runs are corrected in real-time. This reduction of production down time during runs means higher productivity and better management of cost base.
