

PRESA M/T

Durable Large Blocks

Large blocks for rough appearances, provide more contact point with the road surface for better handling while minimizing noise.

Unique Shoulder Tread Layout

Aggressive shoulder to sidewall blocks for better traction.

Wide and functional shoulder layout provides exceptional off-road capability while maintaining great on-road performance.

Ply Reinforced Sidewall & Stone Ejectors

Optimized 3-ply construction ensures excellent steering stability and side-cut resistance.

Protect the grooves from stone drilling while maintaining traction.

GO-ANYWHERE PERFORMANCE WITH AMAZING TRACTION
