Exceptional Handling Performances

Unblock Shoulders - Using circumferentially continuous single shoulder blocks without any gaps, rigidity at the tread is increased responsiveness and ensured a powering grip.

An Evolution in Wet Grip and Improved Dry Grip

Evolutions in tread pattern and tire compounding deliver improved wet performance under a wide variety of conditions.

Sequential Round Grooves - Forces from the surface are spread and dissipated by the round grooves to improve the mileage.

The positioning of the grooves is also effective in draining water on wet surfaces.

ENJOY THE ULTIMATE HANDLING AND GRIP
