FORWARD, ALWAYS PROGRESSING

About us

Shenzhen Inovance Technology Co., Ltd. (stock code: SZ.300124) is founded in 2003 and has a current stock market value of about RMB 160 billion. Inovance is the key force in developing industrial automation and drive technologies in China and a provider of optical-mechatronicshydraulic-pneumatic integrated solutions covering drive, control, motor, and precision machineeries.

Inovance achieves an annual revenue of RMB 17.945 billion and an operating profit of RMB 3.573 billion in 2021, which grew by 56% and 70% respectively on yoy basis. Headquartered in Shenzhen, Inovance has established multiple production bases in Suzhou, Changzhou, Yueyang, and Nanjing, as well as subsidiaries, resident offices, and service centers in over 20 countries and regions worldwide. As of 2021, Inovance has obtained 2,186 patents and software copyrights. Through continuous investment in R&D, Inovance has enhanced its technical strength in such fields as motor and drive control, industrial control software, electric drive assembly for new energy vehicles, digitalization, and industrial robots.

Inovance is dedicated to the development of core technologies in motor drive and control, power electronics, and industrial Internet communication, with business covering industrial automation, elevator electrical assessories, new energy vehicles, industrial robots, and rail transit. Inovance aims to provide integrated solutions and industry-tailored products based on various industry needs, creating continuous values for customers. The core technologies of Inovance not only covers the information layer, control layer, drive layer, execution layer, and perception layer, but also covers such fields as industrial automation, elevator, new energy vehicle, and trail transit, including:

- ① high performance vector control technology, servo control technology, and high-power IGCT drive technology in the drive layer;
- ② small- to large-scale PLC technology, CNC control technology, robot control technology, and high-speed bus technology in the control layer;
- ③ high-performance servo motor technology, high-efficiency motor technology, high-speed motor and magnetic levitation bearing technology, high-precision encoder design and process technology, precision transmission machine design and process technology, and image recognition technology in the execution layer;
- ④ industrial Internet, edge computing, industrial AI technology in the information layer; and
- ⑤ process technologies in industries including new energy vehicle, elevator, air contioner, air compressor, 3C manufacturing, lithium battery, silicon, crane, injection molding machine, textile, metal product, printing, and packaging.

Inovance has been listed into "CCTV Top 10 Socially Responsible Corporate in Top 50 Listed Companies in China" in 2017, "National Enterprise Technology Center" in 2021, "First Batch of Postdoctoral Workstation in Shenzhen", "Top 100 Innovative Enterprise In Jiangsu", "First Batch of Key R&D Projects in Intelligent Robot in China", and "New Energy Vehicle Power Assembly Engineering Center in Jiangsu".

67 offices in China **400** authorized distributors **2500+** sales and service staff

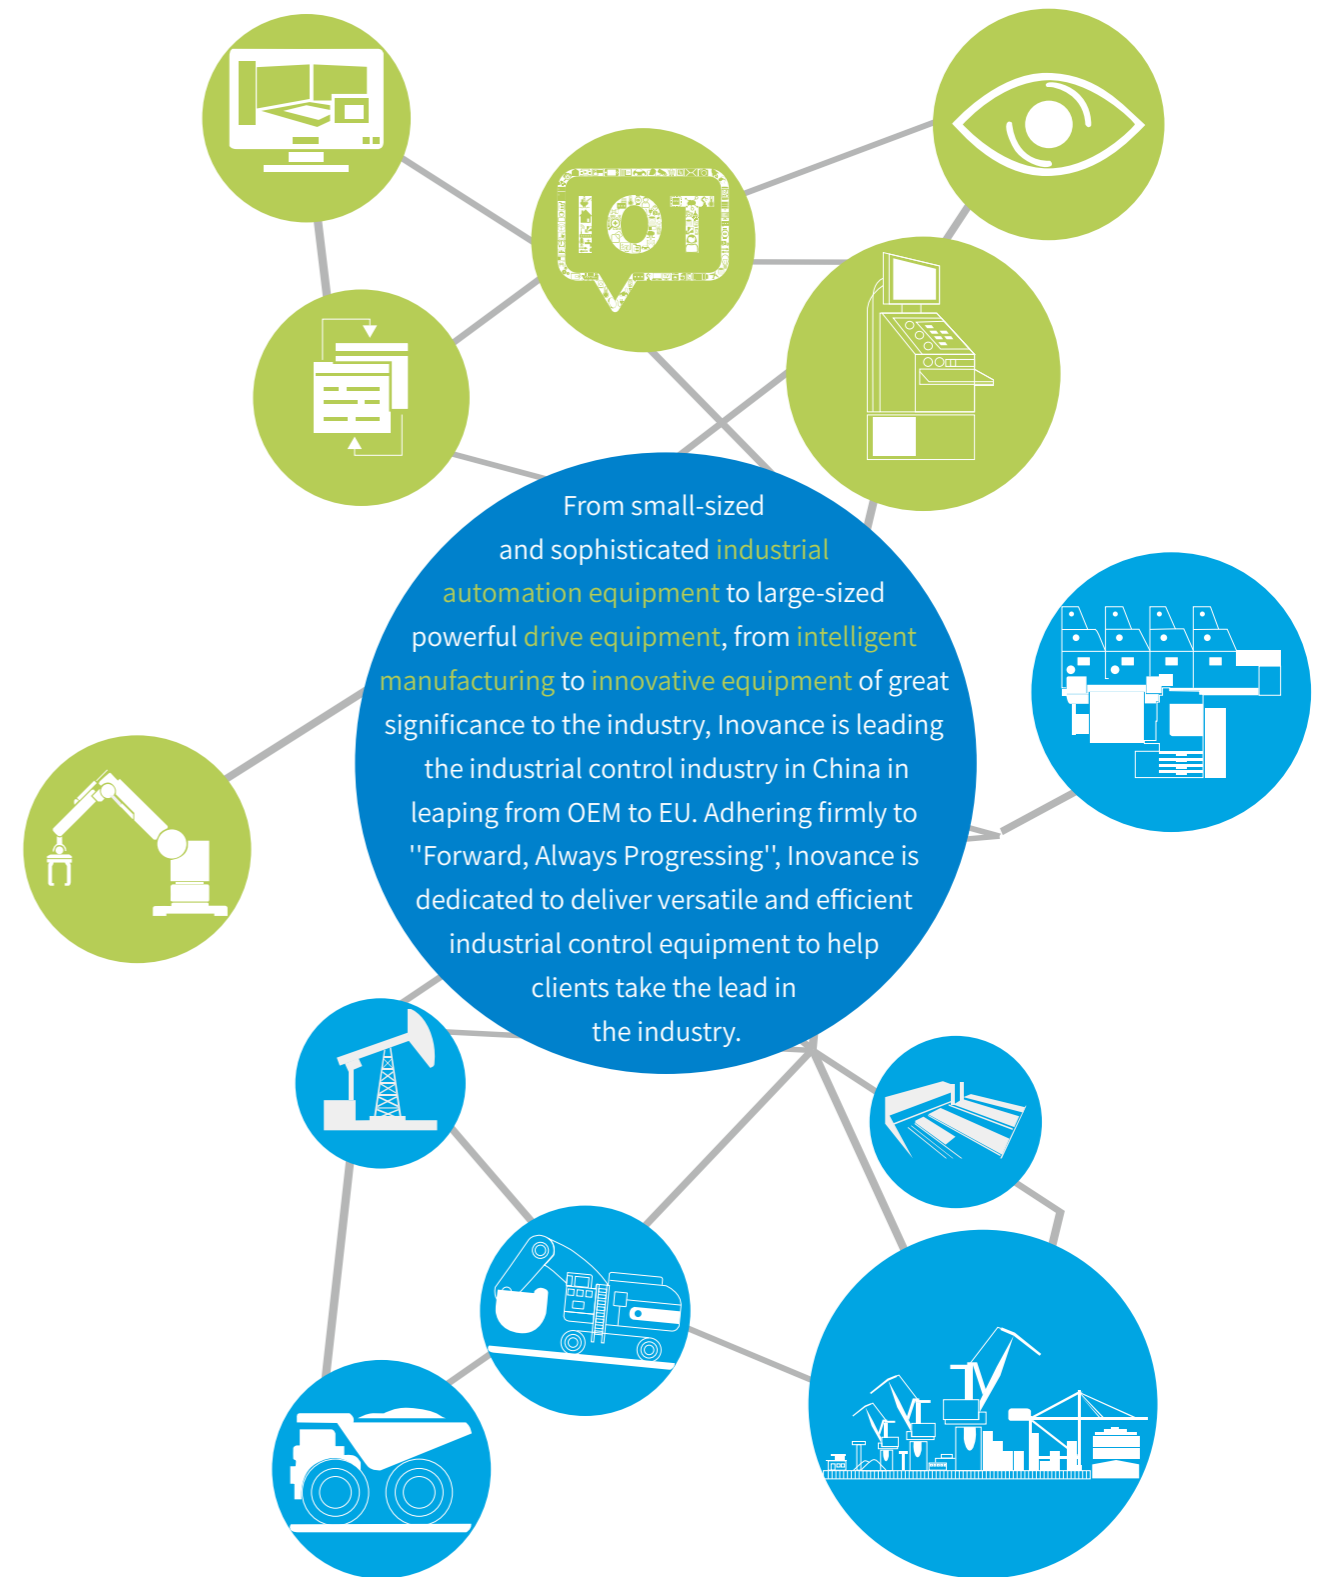

1020 service centers **6** inventory centers

A comprehensive service network to offer timely response to customer demands

←
Headquarters in Shenzhen
 Headquartered in Shenzhen, with multiple subsidiaries in major cities such as Suzhou and Hongkong

Inovance Be Everywhere

MD880 Series High-Performance Engineering AC Drive A New Benchmark for Engineering Drives Born for Process Automation

Product Overview

MD880 is developed based on high-end AC drive platform of Inovance, which is divided into single-drive system and multi-drive system. Targeting at high-end drive applications, MD880 features high-performance speed and torque control, high reliability, flexible integration, easy commissioning and maintenance, as well as high power density. It sets up a new benchmark for the industry in terms of modular structure, power density, responsiveness, accuracy, and scope of application.

Scope of application

■ Metallurgy

Including high-speed hot strip mills, wide and heavy plate devices, cold roll mills, pickling lines, annealed wires, galvanizing lines, color coating lines, non-ferrous metal alloy manufacturing equipment, non-ferrous rolling equipment, and large-sized metallurgical casting cranes

■ Petroleum

Including marine rig, marine modularized rig, land rig, top drive, mechanical rig retrofit, intelligent electric drive service rig/tractor hoist, electric drive sand blenders

■ Paper-making

Including paper manufacturing equipment, which covers headbox, wite part, press part, dryer part, sizing, hard calendering, coating, super calendering, and rewinder

■ Large-sized port cranes

Including bridge cranes for quayside containers, gantry cranes for RTG containers, grab ship unloaders, grab portal cranes, and large-sized ship-building gantry cranes

■ Vessels

Including electric propulsion, floating cranes, lift, deck machineries, variable-frequency shaft generators

■ Cables

Including large-sized rigid frame stranding machines, tubular stranding machines, and heavy-duty wire drawing machine

■ Test benches

Including test benches for electric vehicles, wind turbine converters, and battery packs

■ Tunnel boring machines

Including tunnel boring machine cutterhead drives, conveyor drives, slurry pump drives, and dredge pump drives

■ Others

Including wind turbine converters, assembling unit test benches, low-voltage power control, pipeline, and mine conveyor equipment

Flexible Modular Design

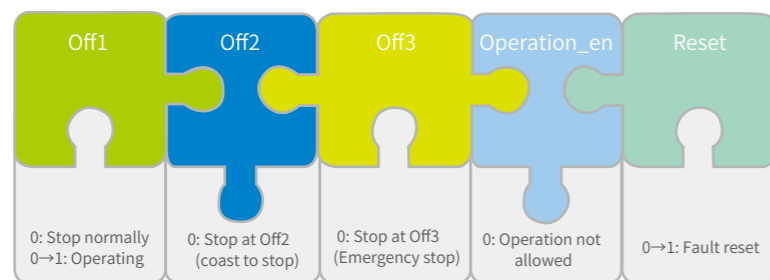

Flexible configuration of software/hardware modules to fulfill customized needs without changing codes

- ① Fun and free programming
- ② Open data flow graph for easy commissioning
- ③ Flexible configuration with extension cards

01 Fun and free programming

Flexible configuration of control words

Extension card input terminal status, control board input terminal status, drive status word, drive operating status

Definition of standard control word

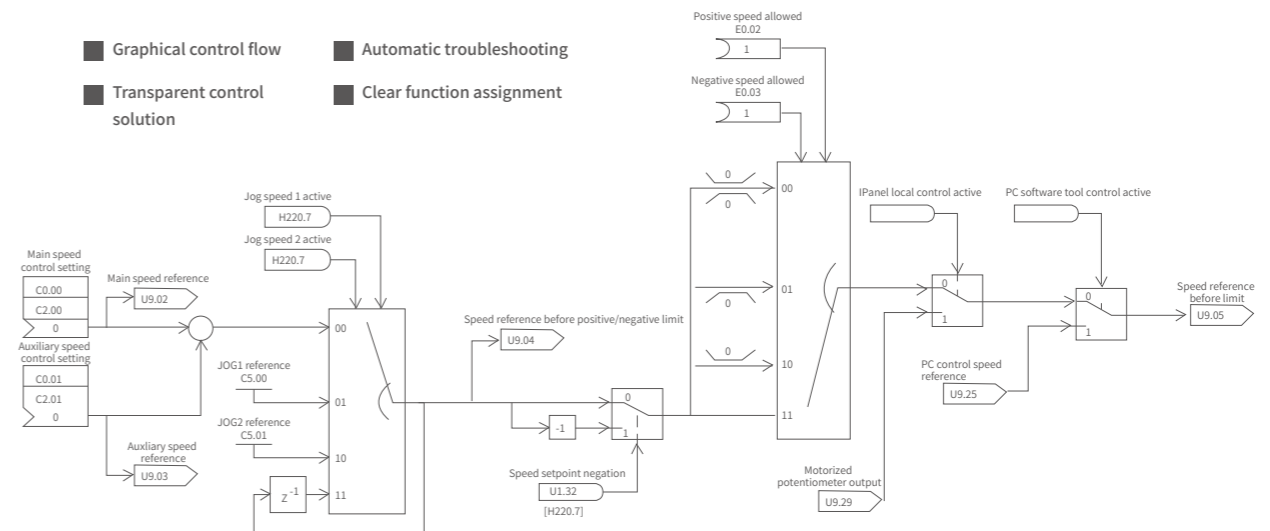

Modular configuration of software

Abundant resource pool that can be called as needed (variable data of each software block, bus process data, speed channel, torque channel, and ramp function generator)

02 Open data flow graph for easy commissioning

- Graphical control flow
- Automatic troubleshooting
- Transparent control solution
- Clear function assignment

03 Flexible configuration with extension cards

- HCU controller encapsulated separately, with three extension slots available
- Up to seven extension slots extendable
- Multiple types of extension modules supported

01 Quick troubleshooting on site

- Quick recovery from fault to reduce operation loss of production lines, without the need for replacing HCU controller or disconnecting communication cable, control cable, or encoder cable, or programming backup parameters or system software
- Pluggable SD card in the HCU controller for saving parameters and system software, allowing quick replacement of HCU
- Battery-powered system clock to ensure safe and reliable time stamp of HCU event recorder, without being affected by sudden power failure

03 Detailed fault log in the black box

- Saving waveform data of 50 monitored objects upon fault
- Saving 1000 groups of data cyclically through re-writing

02 Remote diagnostic service in real time

- Technicians can, after being authorized by the client, connect the remote server on site through VPN to check the fault log, system parameters, and operation data to locate faults quickly and optimize processes to improve efficiency.

04 Fault levels settable for failsafe operation

- Fault levels determined automatically and displayed in real time through the LCD, with fault analysis generated for guidance

Level 1	Coast to stop at fault
Level 2	Decelerate to stop at fault
Level 3	Derated operation continued at fault
Level 4	Operation continued, with frequency upper limit being limited
Level 5	Operation continued, with restart inhibited
Level 6	Operation continued, with restart allowed
Level 7	Fault/Alarm ignored

- ① Quick troubleshooting on site
- ② Remote diagnostic service in real time
- ③ Detailed fault log in the black box
- ④ Fault levels settable for failsafe operation

Stable operation and reliable performance

Industrial-level hardware configuration for stable long-term operation
Multiple troubleshooting mechanism for quick recovery on site

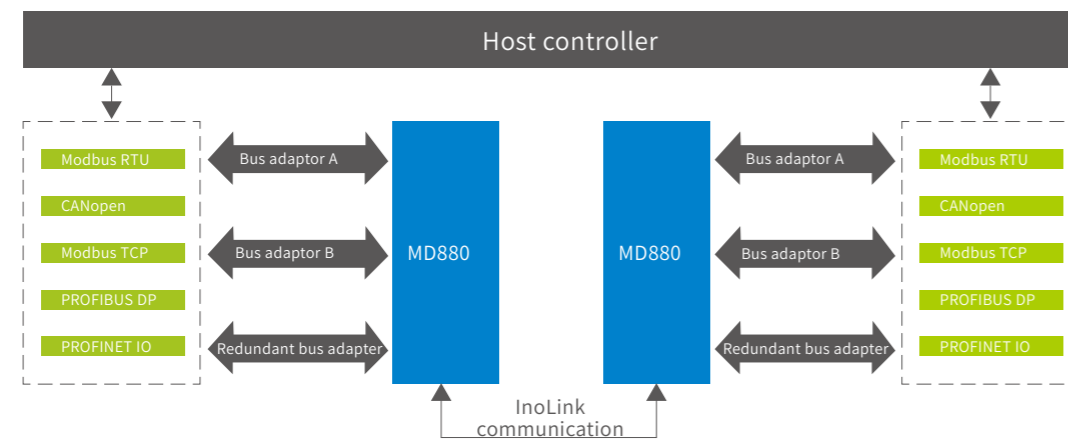

Outstanding Compatibility

Compatible with various host controllers without changing PLC programs

- ① Compatible with various host controllers
- ② Outstanding motor control performance
- ③ Mounting brackets available as options

01 Compatible with various host controllers

- Powerful digit conversion tool+Parameter interconnection+Bus adapter function to compatible with any bus type, without the need for changing the host controller programs or configuration files

02 Outstanding motor control performance

- Supporting asynchronous and synchronous motor control
- Supporting 150% torque output at 0 Hz without encoder

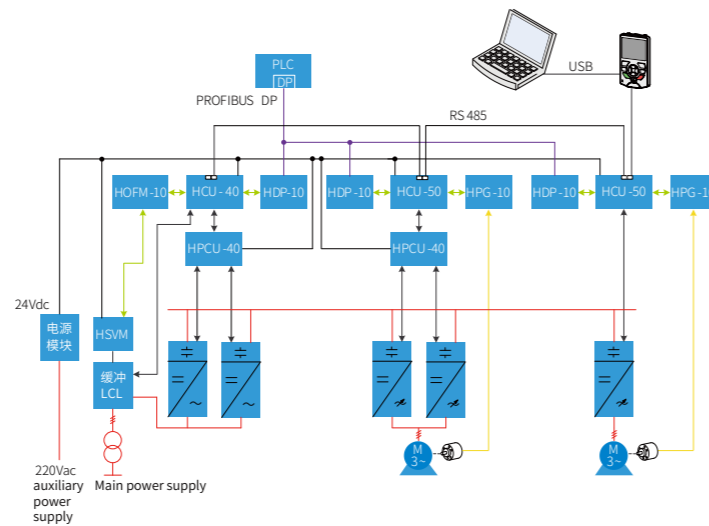

03 Mounting brackets available as options

- Supporting frame structures with similar interfaces to allow quick replacement on site

01 InoDriveStudio for easy commissioning

InoDriveStudio, a standard PC commissioning software developed for Inovance multi-drive products, features user-friendly interfaces and graphical menus to allow easy configuration, parameter setting, fault detection, system maintenance and service.

InoDriveStudio can deliver up to eight signal trend records, with fault diagnosis and parameter optimization simplified. It helps electrical engineers locate faults quickly through recovering the information of 50 monitored objects generated in the high-speed data recorder of HCU upon fault, optimizing process control of production lines.

02 SOP-20-880 operating panel for quick commissioning

- LCD
- 240 mm x 160 mm
- PC connected to the AC drive system through USB port in SOP-20-880
- Language: Chinese/English
- Display of eight rows of characters
- Parameter copy and recovery

Structure and Features of MD880 Multi-drive System

Common DC bus

- Reducing the power supply module and braking module current, as well as device capacity
- Supporting direct exchange of generating energy and motoring energy through common DC bus of drive modules during winding/unwinding applications under potential energy load
- Adopting book-sized power supply modules, drive modules, braking modules, and active power supply filter modules for flexible model selection, easy cabinet assembly, and quick maintenance, reducing the consumption of cabinets and saving the footprint by 30% to 60%
- Supporting in-cabinet installation of power modules and options to ensure overall quality of the drive system
- Fulfilling diversified demands from integrators and end users by providing assembly units or cabinets

Unified power modules

Unified incoming circuits

- Reducing the consumption of incoming lines and power distribution protection devices
- Improving reliability through ensuring the overall integrity and control functions

HCU control module, the master controller developed for MD880 series drives with single-drive or multi-drive systems, is mainly used to control basic power supply modules, regenerative power supply modules, active power supply modules, drive modules, and DCDC power modules. It features powerful functions, compact structure, high extendability, high reliability, flexible networking, and excellent control algorithm. For use with drive units, the HCU control module supports synchronous and asynchronous motor control, V/f control, sensorless vector control, and feedback vector control. For use with DCDC modules, the HCU control module supports voltage control, current control, power control, and switchover among different control modes.

High performance
High reliability

HCU Extension Module

Item	I/O Extension Module	Encoder Detection Module	Bus Adapter Module
Photo			
Type	1. I/O extension module (2xDIO+2xAI+2xAO+1RO)	1. HTL incremental encoder detection module 2. Resolver detection module 3. TTL incremental encoder detection module 4. Sin/Cos encoder detection module	Fieldbus adapter module 1. PROFIBUS-DP 2. CANopen 3. Modbus RTU industrial Ethernet module 1. PROFINET IO 2. Modbus TCP 3. EtherCAT Ethernet commissioning module 1. Ethernet commissioning module

Components of HCU Control Module

No.	Name	Description
1	User terminal	User I/O terminals are included as standard.
2	Communication optical fiber	Used as the optical fiber communication interface between HCU and power module.
3	STO terminal	Safe torque off (STO)
4	Slot 1	Extension module interface
5	Slot 2	Extension module interface
6	Slot 3	Extension module interface
7	Battery cover	RTC backup battery cover
8	Operating panel terminal	Two RJ45 terminals with the same assignment for easy cascading
9	SD card	Used as the standard memory of HCU, which can be inserted flexibly
10	Safety module slot	Used as the dedicated slot for functional safety module
11	Indicator	Indicates the state of the power supply, operation, and fault
12	Function module SIZE1	105 x 73 x 24 (mm)
13	Function module SIZE2	75 x 73 x 24 (mm)
14	Intelligent operating panel	SOP-20-880
15	Fixing hole	Three fixing holes for HCU

MD880 Series Products

Naming rules for single-drive products

MD880 - **01S** - **XXXX** - **4** - **L** - **SG**
 ① ② ③ ④ ⑤ ⑥

① MD880 AC drive series	② 01S: AC drive (single-drive system) 11S: AC drive cabinet (single-drive system) ¹	③ XXXX: Rated current
④ 4: 400 V 7: 690 V	⑤ L: With output reactor B: Built-in braking unit _: Without reactor or braking unit	⑥ SG: 2nd generation of controller

※1: For AC drive cabinets with single-drive system, only 690 V standard cabinets are available.

MD880 Series Products

Control system and function module options

No.	Name	Model	Description
1	Control module	HCU-20	Basic power supply control module
		HCU-30	Regenerative power supply control module
		HCU-40	Active power supply control module
		HCU-50S	2nd generation of drive control module
		HCU-60	Three-phase braking control module
		HCU-80	DC chopper control module
2	Paralleled-module control module	HPCU-40	2 to 4 paralleled modules supported
		HPCU-60	2 to 6 paralleled modules supported
		HPCU-A0	2 to 10 paralleled modules supported
3	Function extension module	HESD-10	Extension of 1 slot supported
4	Voltage/Current detection module	HSVM-10	Three-phase AC input voltage detection
		HSVM-20	Voltage/Current detection module (1-channel voltage and 2-channel current supported)
		HSVM-30	Voltage/Current detection module (2-channel voltage and 2-channel current supported)
5	Encoder detection module	HPG-10	HTL incremental differential, single-ended, OC or OE encoder detection, frequency-division output
		HPG-30	Sin/Cos encoder detection module
		HPG-40	Resolver detection
		HPG-50	TTL incremental OC or differential encoder detection, frequency-division output
6	Inobus optical fiber extension module	HOFM-10	1 pair of 50 M optical fiber extension module
		HOFM-30	3 pairs of 50 M optical fiber extension module
7	Intelligent operating panel	SOP-20-880	Operating panel for commissioning and monitoring
8	Fieldbus adapter module	HCAN-10	CANopen fieldbus adapter
		HMBA-10	Modbus RTU fieldbus adapter
		HDP-10	PROFIBUS-DP fieldbus adapter
9	Industrial Ethernet module	HPFN-10	PROFINET IO industrial Ethernet
		HMBT-10	Modbus TCP industrial Ethernet
		HETC-10	EtherCAT industrial Ethernet
10	Ethernet commissioning module	HETN-10	Ethernet commissioning module
11	Optical fiber router module	HOFR-50	Information exchange of 2 to 5 HCU controllers (master/slave communication achieved through optical fibers)
12	I/O extension module	HIO-10	2 AIs; 2 AO2; 2 DI0s; 1 relay output
13	Process data collection module	HIBA-10	PDA collection module
14	Remote service gateway	HGW-10	Centralized monitoring module

Comprehensive Technical Data for MD880

Item	Description	
Basic power supply module	Input voltage	4: 380–415 VAC, 7: 525–690 VAC; -10% to +10% (-15%, < 1 min)
	Input frequency range	47–63 Hz
	Output voltage	4: 540–590 VDC, 7: 740–975 VDC
	Overload capacity	Light overload: Continuous operation of 1 min allowed for 110% x rated load every 5 min; Heavy overload: Continuous operation of 1 min allowed for 150% x rated load every 5 min
	Operating efficiency	Higher than 98%
	Fundamental power factor	Higher than 0.95 (full load at rated values)
Regenerative power supply module	Input voltage	4: 380–415 VAC; 7: 525–690 VAC; -10% to +10% (-15%, < 1 min)
	Input frequency range	47–63 Hz
	Output voltage	4: 540–590 VDC; 7: 740–975 VDC
	Overload capacity	Light overload: Continuous operation of 1 min allowed for 110% x rated load every 5 min; Heavy overload: Continuous operation of 1 min allowed for 150% x rated load every 5 min
	Operating efficiency	Higher than 98%
	Fundamental power factor	Higher than 0.95 (full load at rated values)
Active power supply module	Input voltage	4: 380–415 VAC; 5: 380–500 VAC; 7: 525–690 VAC; -10% to +10% (-15%, < 1 min)
	Input frequency range	47–63 Hz
	Output voltage	4: 540–720 VDC; 5: 570–750 VDC; 7: 740–975 VDC
	Overload capacity	Light overload: Continuous operation of 1 min allowed for 110% x rated load every 5 min; Heavy overload: Continuous operation of 1 min allowed for 150% x rated load every 5 min
	Operating efficiency	Higher than 97%
	Fundamental power factor	Higher than 0.99 (full load at rated values)
	Input harmonic current	THDI < 5% (rated power); THDU < 5% (Rzc > 20)
Drive module/ Single-drive	Input voltage	Multi-drive: 4: 540–720 VDC; 5: 540–750 VDC; 7: 740–975 VDC Single-drive: 4: 380–480 VAC; 7: 525–690 VAC
	Output voltage	Multi-drive: 4: 0–415 VAC; 5: 0–500 VAC; 7: 0–690 VAC; Single-drive: 4: 0–480 VAC; 7: 0–690 VAC
	Output frequency	0–300 Hz (Contact Inovance for frequencies higher than 300 Hz.)
	Operating efficiency	Higher than 98%
	Motor control mode	V/f, SVC, FVC
	Speed regulation range	V/f: 1:50; SVC: 1:200; FVC: 1:1000
	Speed control precision	SVC: ±10%; Fs (slip rate); FVC: ±0.01%
	Torque response	Open-loop: 5 ms; closed-loop: 3 ms
	Torque control mode	Sensorless vector control; feedback vector control
	Starting torque	0.5 Hz/150% (SVC); 0 Hz/200% (FVC)
Overload capacity	Light overload: Continuous operation of 1 min allowed for 110% x rated load every 5 min; Heavy overload: Continuous operation of 1 min allowed for 150% x rated load every 5 min	

Item	Description	
DCDC	Voltage on high voltage side	4: 540–720 V; 5: 540–850 V; 7: 740–1050 V
	Voltage on the low voltage side	4: 24–670 V; 5: 24–800 V; 7: 24–1000 V
	Voltage accuracy	Low-voltage side ≤ 0.1% Fs; High-voltage side ≤ 1% Fs
	Current accuracy	≤ 1% Fs
	Response time	≤ 3 ms (response time for increasing from 10% to 90% of rated current)
	Switchover time	≤ 6 ms (response time for changing from +90% to -90% of rated current)
	Overall efficiency	≥ 97%
	Overload capacity	Quick overload: 200% I _{fast} 10s overload for every 60s Heavy-overload: a minute of operation at 150% of rated current (150%I _r) allowed every 5 minutes
Connection	Analog input	Two AIs: -10 V to +10 V or -20 mA to +20 mA (selected through jumper)
	Analog output	Two AOs: 0 V to 10 V or 0 mA to 20 mA (selected through jumper)
	Digital input	Seven DIs: NPN/PNP; "0" < 5; "1" > 15, Rin: 2 kΩ
	High-speed digital input	Two high-speed DIs: NPN/PNP; "0" < 5; "1" > 15; Rin: 2 kΩ 24 V logic level, input frequency < 100 kHz
	High-speed digital output	Two high-speed DOs: OC; max. input voltage: 30 VDC; 24 V logic level, output frequency < 100 kHz
	Relay output	Three relay outputs; NO or NC output; 250 VAC/30 VDC, 2 A
	Intelligent operating panel or PC	Interface mode: Dual-RJ45 interface; physical layer: EIA-485; master-slave mode; max. communication rate: 4 Mbps
Ambient condition	Safety function	Safe torque off (optional)
	Inolink communication	Physical layer: EIA-485; max. communication rate: 5 Mbps
	Ambient temperature	-10°C to +40°C (non-frosting); derating required for temperatures between 40°C and 50°C
	Ambient humidity	5% to 95% (without condensation)
Mechanical data	Mounting altitude	Derating is not required for altitudes not higher than 1000 m. For altitudes higher than 1000 m, derate 1% for every additional 100 m. The maximum altitude is 4000 m. An isolation transformer is needed on the input side for altitudes higher than 2000 m.
	Vibration resistance	Compliant with Class 3M4 in GB/T4798.3
	IP rating	Module: IP00; Cabinet: IP21 IP23 and IP43 are optional.
	Safety performance	Compliant with EN 61800-5-1
Cooling mode	Cooling mode	AF (forced air cooling) compliant with EN 60146

Structure and Features of MD880 Multi-drive System

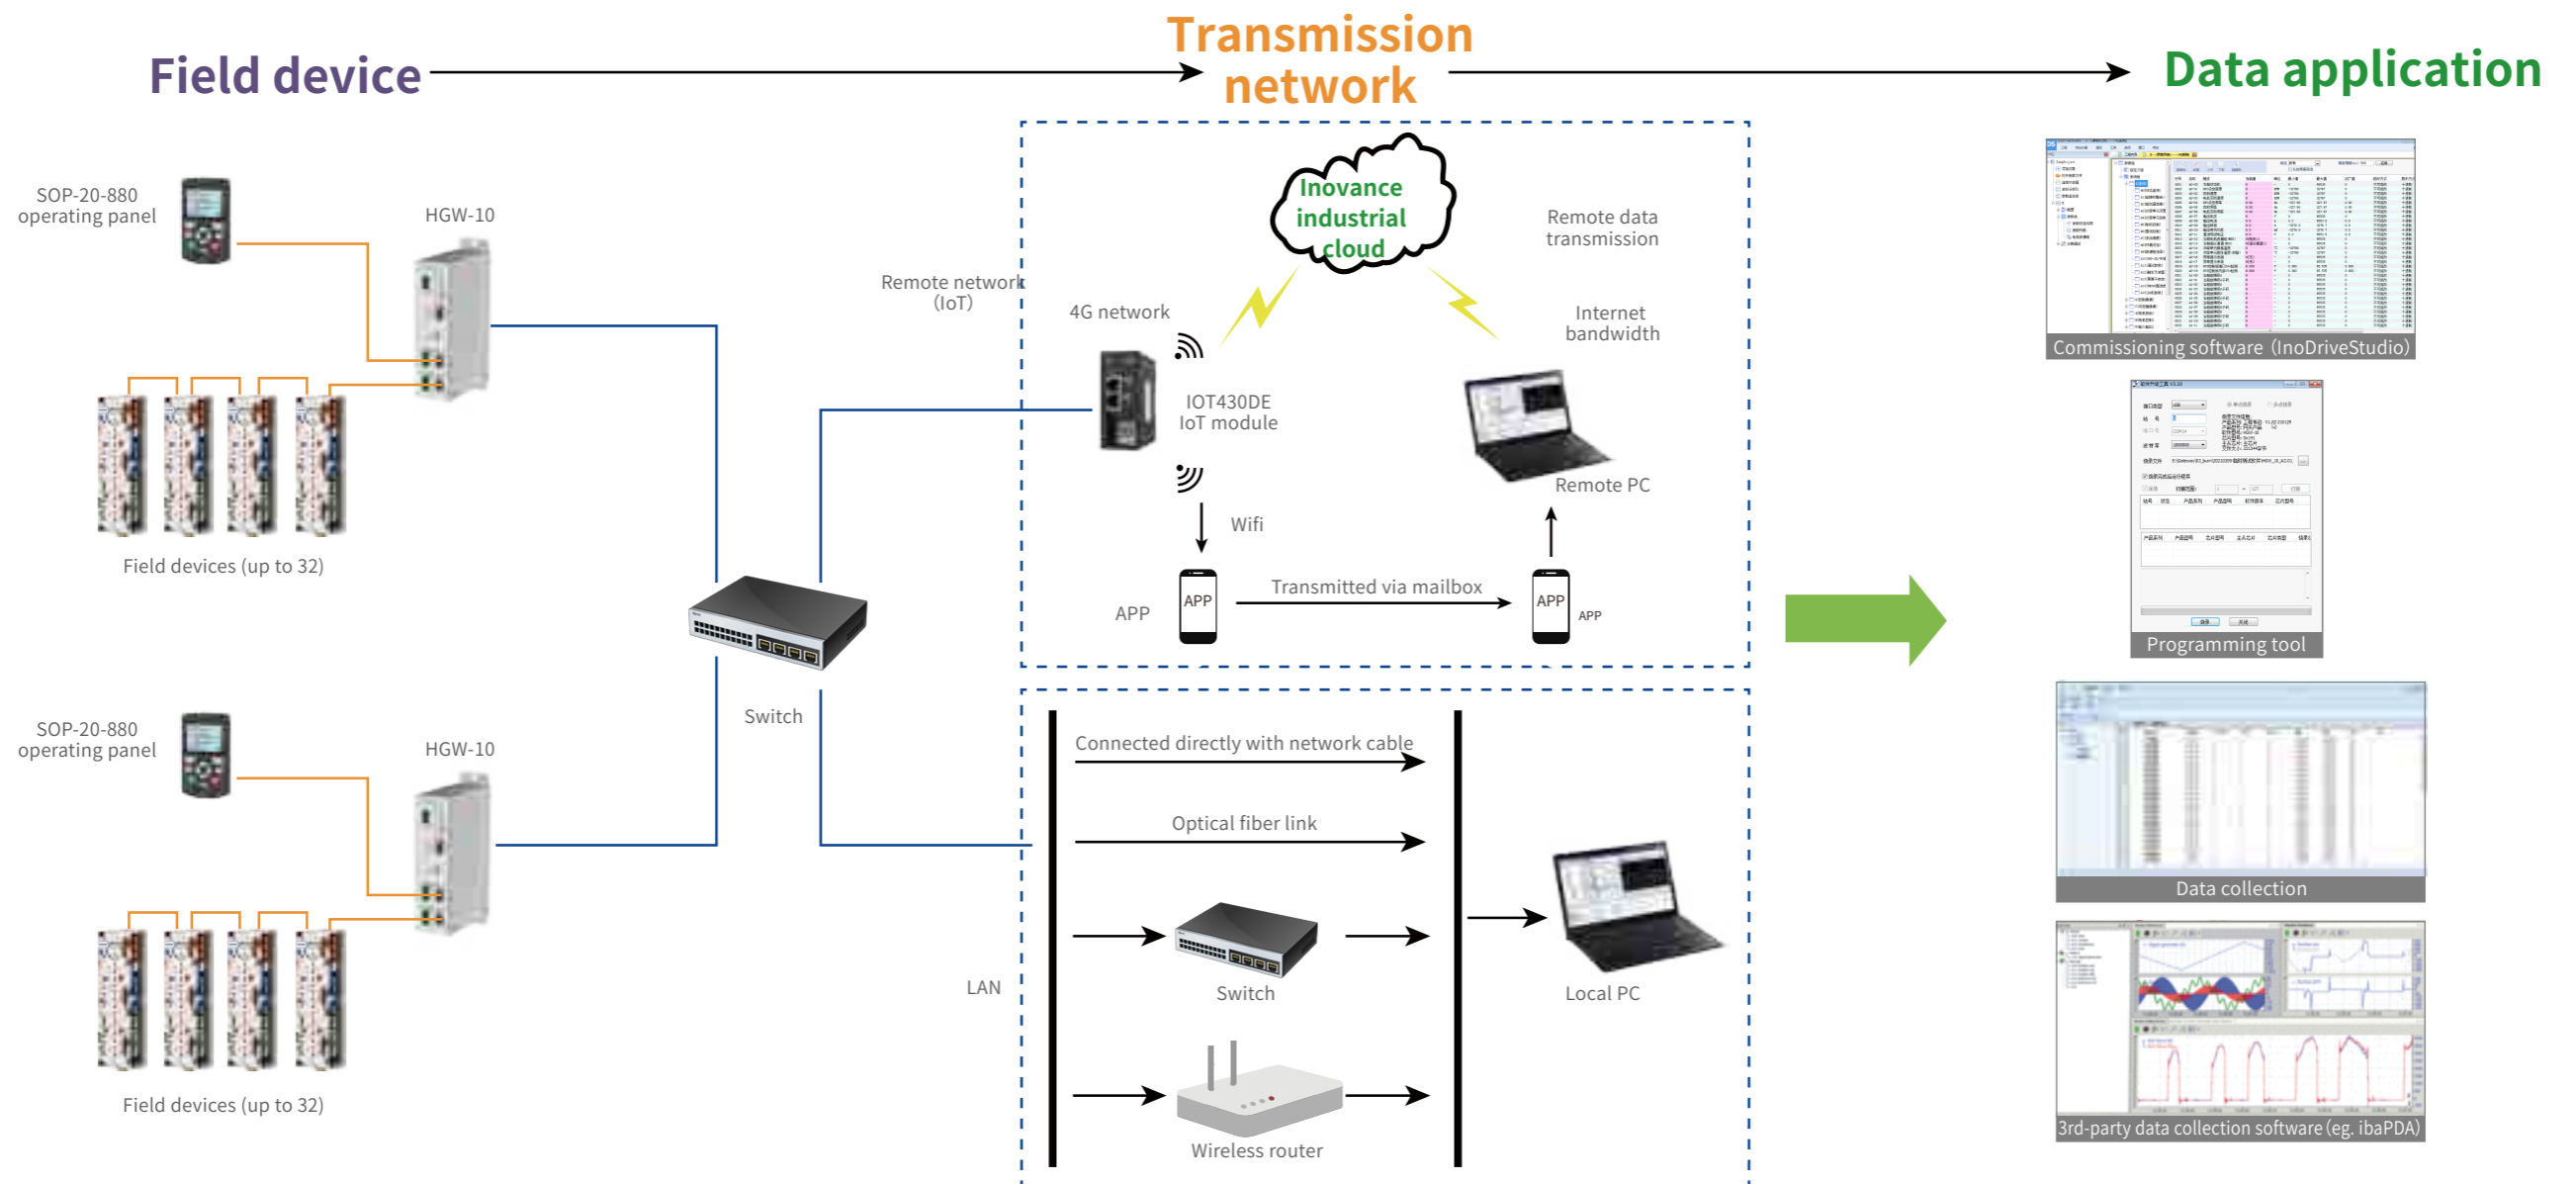

Note: We can provide well-assembled cabinets or standard power units as needed.

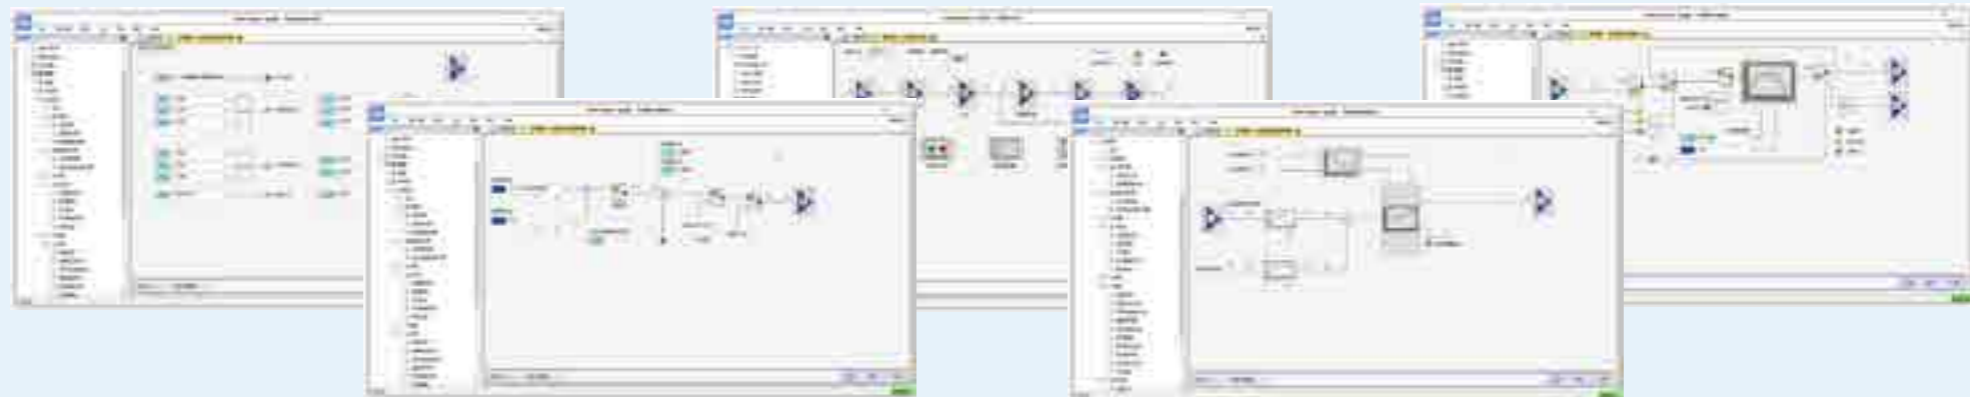

Topology of MD880 Multi-Drive System

5480-7-SG-N	8 x H8A	1. MD880-50M-0721-7-SG-N	8	Drive module
		2. HCU-50S	1	Drive control module
		3. HPCU-A0	1	Paralleled-module control module
		4. H8A-kit-L	8	H8A mounting base

※Note: Copper bars can be used as the adapter to connect power output cables in the absense of H8 quick installation kit (option). H8A-kit does not carry the output reactor base. H8A-kit-L carries the output reactor base.

Odering Guide for MD880 Multi-drive Products

MD880-60 series three-phase braking module

Model MD880-60...	Frame Size	Ordering No.	Qty	Remark
0500-4	H8	1. MD880-60M-0500-4	1	Three-phase braking module
		2. HCU-60	1	Three-phase braking module
		3. H8-quick-kit	1	H8 quick installation kit
0750-4	H8	1. MD880-60M-0750-4	1	Three-phase braking module
		2. HCU-60	1	Three-phase braking module
		3. H8-quick-kit	1	H8 quick installation kit
0870-7	H8	1. MD880-60M-0870-7	1	Three-phase braking module
		2. HCU-60	1	Three-phase braking module
		3. H8-quick-kit	1	H8 quick installation kit
1300-7	H8	1. MD880-60M-1300-7	1	Three-phase braking module
		2. HCU-60	1	Three-phase braking module
		3. H8-quick-kit	1	H8 quick installation kit

MD880-61 series single-phase braking module

Model MD880-61...	Ordering No.	Qty	Remark
0400-7	1. MD880-61M-0400-7	1	Single-phase braking module

MD880-80 series DC chopper unit

Model MD880-80...	Frame Size	Ordering No.	Qty	Remark
0100-4	H3+LC	MD880-80D-0100-4	1	DCDC units
0200-4	H4+LC	MD880-80D-0200-4	1	DCDC units
0300-4	H4+LC	MD880-80D-0300-4	1	DCDC units
0400-4	H6+LC	MD880-80D-0400-4	1	DCDC units
0500-4	H7+LC	MD880-80D-0500-4	1	DCDC units
0600-4	H7+LC	MD880-80D-0600-4	1	DCDC units
0800-4	H8A+LC	MD880-80D-0800-4	1	DCDC units
1000-4	H8A+LC	MD880-80D-1000-4	1	DCDC units
0600-5	H7+LC	MD880-80D-0600-5	1	DCDC units
0100-7	H6+LC	MD880-80D-0100-7	1	DCDC units
0200-7	H6+LC	MD880-80D-0200-7	1	DCDC units
0300-7	H8A+LC	MD880-80D-0300-7	1	DCDC units
0400-7	H8A+LC	MD880-80D-0400-7	1	DCDC units
