

# Forged Steel Valves

Gate, Globe & Check

# 30 YEARS OF INNOVATIONS

**OMB Group** is a family owned and managed business founded by Mr Roberto Brevi in 1973. The group is specialized in forged steel valves from small size gate valves to large diameter Trunnion mounted ball valves. The company now operates 5 plants in 3 countries and is present worldwide directly and with a well established network of agents and distributors.

The content of this catalog is copyrighted by OMB Valves s.p.a. (C) 2006  
Nothing included in this catalog can be reproduced in any form without obtaining prior written consent by OMB Valves s.p.a.  
All photos and images published are copyrighted: the use of images, even if digitally modified to take away the OMB logo will be prosecuted to the maximum extend of the law.

## NEW on this version

This is the 17<sup>th</sup> version of the general API602/ISO 15761 Forged steel valves catalog. In this version we revise the bore dimension of few globe valves to exactly meet the metric conversions set by the ISO standards.

C16 the previous version

# THE GROUP

The **Brevi** family is active in the management of the operations.  
Roberto Brevi, Founder and Chairman, with Simone and Fabio, Managing Directors.

All OMB valves are identified by the OMB Logo embossed on the body forging in the traditional diamond shape.

At OMB we have developed a comprehensive range of engineered valves products installed globally across a wide range of industries:

- Oil & Gas Production
- Refining
- Petrochemical
- Chemical
- Pulp & Paper
- Power Generation
- Steam and Heat Transfer Fluid applications
- Desalination

In these past 30 years millions of valves have been supplied to major oil and gas companies worldwide and the OMB name became synonymous of absolute reliability, superior quality and competitive pricing.

In the early '80 we were the first to introduce robotics in the manufacturing process along with specialized equipment designed to reduce machining time and increase quality of the components.

Today we are more than ever committed to innovation and continuous improvement: we remain focused in expanding our capacity at home, opening new plants near the users and extending our distribution network.

We invite you to visit our plants where you will see an young and at the same time experienced team working with state of the art equipment to provide the best value money can buy in valves.

This is our promise !

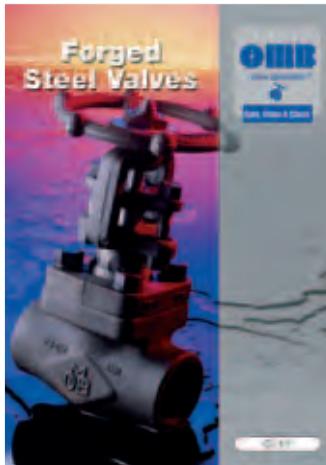

*Roberto, Simone and Fabio Brevi*

OMB is based in **Bergamo**, a town 45 Km from Milan with easy access to airports, highways and seaports. Bergamo is the world center for the forged steel valves production with a large valve parts subcontracting base.

OMB manufacture a wide range of forged steel valves. In the following catalogs we present most of the products we make and which are usually available from our distribution network.

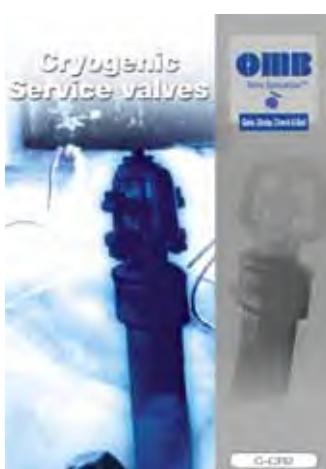

All catalogs are downloadable from our web site [www.ombvalves.com](http://www.ombvalves.com)

### ISO15761 - API602 FORGED STEEL VALVES

Catalog C-17 present the Forged steel Gate, Globe and Check valves for general oil, gas and petrochemical use.

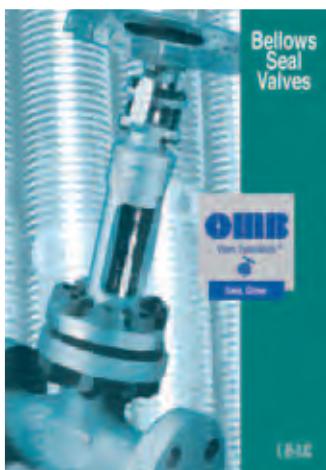

Includes valves with flanges according to ASME, DIN and JIS standards

### ISO15761 - API602 CRYOGENIC SERVICE FORGED STEEL VALVES

Catalog C-CR2 present the Forged steel Gate, Globe and Check valves for cryogenic and low temperature service

Includes valves with Extended bonnet and cryogenic and low temperature ball valves.

### ISO15761 - API602 BELLOWS SEAL FORGED & CAST STEEL VALVES

Catalog C-BS present the Forged & Cast steel range of Bellows Sealed Gate, Straight pattern Globe and "Y" pattern Globe valves.

Valves are offered in pressure class from 150 to 2500, with bellows in 321, Alloy 625, Hastelloy® C276.

Includes Cast steel valves in accordance to API600 from 2" to 16".

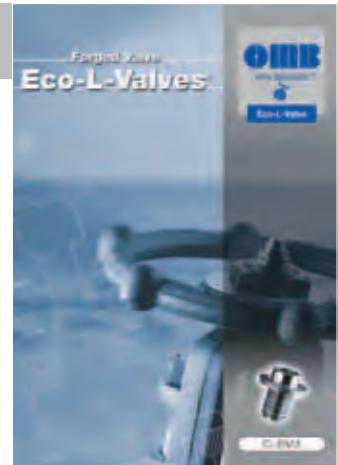

The range of forged steel valves we make is not limited to the oil and gas industries. We have special product lines for the steam, thermal transfer fluids, power and upstream fields.

Special products announcements are published regularly at [www.ombvalves.com](http://www.ombvalves.com)

## ECO-L-VALVES®

Catalog C-EV3 present the Forged steel Eco-L-Valves® an exclusive product developed by OMB for steam and thermal transfer fluids designed around a revolutionary bellows seal concept.

The catalog includes bolted and welded bonnet versions, flanged and butt-welds designs and the new Y Pattern designed in classes 150, 300 and 600.

## HIGH TEMPERATURE - HIGH PRESSURE VALVES

Catalog C-YV2 introduce OMB range of valves for the power and energy industries.

Y pattern globe valves up to 4500 class.  
Welded bonnet and Pressure Seal construction gate, globe and check valves.  
Parallel Slide Gate valves for steam service.

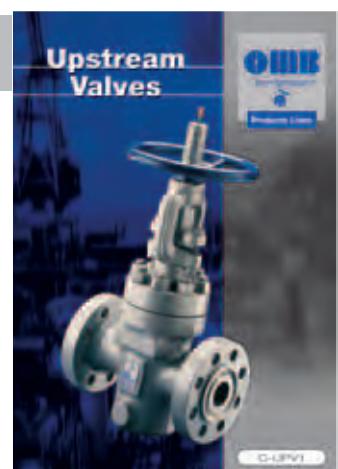

The catalog include information on temperature-pressure rating of all alloyed materials used for high temperature services.

## API6A AND API6D VALVES FOR UPSTREAM APPLICATIONS

Catalog C-UPV1 introduces the latest developments in the API6A and API6D gate, globe and check valves for the upstream oil and gas applications.

The catalog includes the complete range of Thru Conduit gate valves, with expanding and solid (slab) gates, Globe valves and Piston and Swing check valves from class 5000 upward.

What makes you choose a valve for your plant? Quality, price, delivery, availability of product at distributors, approvals by end-users, aftermarket service?

At OMB we try hard to give you the best in every area.

## QUALITY & HSE

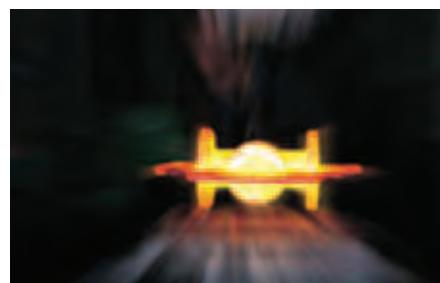

OMB quality system is certified in accordance to ISO9000-vision 2000. Our comprehensive quality programmes cover the full scope of our activities and have been certified since 1990.  
OMB products are certified to meet the European Union Pressure Equipment Directive (PED, CE mark) since its introduction in 1994.  
All our products are as well certified to meet ATEX requirements.  
OMB has been accepted as an approved supplier by the major energy companies in the world: a complete list of references, inclusive of projects supplied and product details is available on our web site.

## MATERIAL SOURCES AND TRACEABILITY

OMB use forgings made in Italy only for all its products: we have an extensive investment in dyes covering all size and pressure classes in every material from common carbon steels to the most exotic alloys. All our suppliers are ISO9000 certified.

Our valves are always supplied with the forging plant issued 3.1 certificate. We keep on our online database, searchable via our web site, all the certificates issued in the past 15 years.

## MATERIAL & VALVE TESTING FACILITIES

Non-destructive examination by ultrasonics, magnetic particles and liquid penetrant can be held at our site. Chemical analysis by computer controlled direct reading emission spectrometer and ferrite content analyzer equipment are available.

All valves are hydraulically tested, seat leakage tested and functionally tested. In addition packing emission in accordance to the latest ISO requirement, helium gas, cryogenic, vacuum and other functional testing can be arranged in our laboratories.

ISO 15761 has been recently published as part of an international effort to standardize the products for the Petroleum and Natural Gas industries. At printing time the list of ISO standards in our industry can be summarized in the following table.

We list as well the major API ad ASME standards covering our industry to which we refer in some of our following pages.

On OMB web site we maintain for the registered users a updated list of the main international standards covering valves and related field, with the date of publication and link to the relevant organizations.

DESIGN AND MANUFACTURING STANDARDS		
ISO	API/ASME	DESCRIPTION
ISO 5208:1993		Industrial valves – Pressure testing of valves
ISO 5209:1977		General purpose industrial valves – Marking
ISO 5752:1982		Metal valves for use in flanged pipe systems – Face-to-face and centre-to-face dimensions
ISO 5996:1984		Cast iron gate valves
ISO 6002:1992		Bolted bonnet steel gate valves
ISO 7121:1986		Flanged steel ball valves
ISO 7259:1988		Predominantly key-operated cast iron gate valves for underground use
ISO 10423:2003	API 6A	Specification for Wellhead and Christmas Tree Equipment
ISO 10434:2004	API600	Bolted bonnet steel gate valves for the petroleum, petrochemical and allied industries
ISO 10497:2004	API607	Testing of valves - Fire type-testing requirements (Fire Test for Soft-Seated Quarter-Turn Valves)
ISO 10631:1994		Metallic butterfly valves for general purposes
ISO 12149:1999		Bolted bonnet steel globe valves for general-purpose applications
ISO 14313	API 6D	Specification for Pipeline Valves
ISO 15156	NACE MR0175	NACE MR0175, Petroleum and natural gas industries—Materials for use in H <sub>2</sub> S-containing environments in oil and gas production
ISO 15761:2002	API602 - (including former BS5352)	Steel gate, globe and check valves for sizes DN 100 and smaller,for the petroleum and natural gas industries
ISO 15848-1:2006		Industrial valves — Measurement, test and qualification procedures for fugitive emission Part 1: Classification system and qualification procedures for type testing of valves
ISO 17292:2004		Metal ball valves for petroleum, petrochemical and allied industries
	API 591	User Acceptance of Refinery Valves
	API 598	Valve Inspection and Testing
	API 600	Steel Gate Valves
	API 602	Compact Carbon Steel Gate Valves
	API 603	Cast, Corrosion Resistant Gate Valves
	API608	Metal Ball Valves—Flanged, Threaded and Butt-Welding Ends (150&300)
	API 17D	Specification for Subsea Wellhead and Christmas Tree Equipment
	API 6FA	Specification for Fire Test for Valves
	API622	Type Testing of Process Valve Packing for Fugitive Emissions
	ASME B16.34	Valves 2 Flanged, Threaded, and Butt welded End
	ASME B16.10	Face-to-Face and End-to-End Dimensions of Valves
	ASME B16.5	Pipe Flanges and Flanged Fittings
	ASME B16.25	Buttwelded Ends
	ASME B16.11	Forged Fittings, Socket Welding and Threaded

## SPECIAL DESIGN

On top of the complete range of valves covered by ISO15761/API602, we manufacture as well special gate, globe and check valves to meet specific requirements in various service and process conditions:

- Bellows Seal Valves
- Cryogenic and Low Temperature Valves
- High Temperature /High Pressure service valves
- Pressure Seal valves form 1/2" upwards
- Y pattern globe and check valves
- Alkylation Service
- Extended Bonnet/ Lantern Ring Vacuum service valves
- Chlorine Sersice valves
- Urea service valves
- Instrumentation – Needle valves
- Valves with Soft seat inserts
- Self Closing (Spring operated) Globe valves
- Angle Valves

## SPECIAL SERVICE

ISO15761/API602 valves are designed for general use in Petroleum and Natural gas industries. In the event of special application valves design, material selection, manufacturing and inspection procedure may vary to address specific requirement of the process.

OMB publish a set of guidelines for Special service which are based on its experience and industry standard identifying the particular requirements for each activity.

SPECIAL SERVICE APPLICATIONS		
Service	Note	OMB procedures
Bellows Seal	Bellows seal valves have been developed and tested according the EPA-API ANSI and BS specifications.	SV - 001
Hydrogen	Special heat treatment and gas testing procedures.	SV - 002
Oxygen	Special procedures guarantee a perfect cleanliness of the valve and protection during shipping.	SV - 003
Vacuum	Close manufacturing tollerances and special extended packingbox and lantern ring assure tight sealing. Test performed at 10 (-4) bar.	SV - 004
Actuator	Pneumatic, Hydraulic and Electric actuators are available upon customer request.	SV - 005
Chlorine	Special degreasing procedure, dry-air testing, packing in moisture absorbing materials, as suggested by the Chlorine Institute.	SV - 006
Steam	Special procedures cover all the applications for steam service	SV - 007
Cryogenic	Complete range of special designs and testing procedures for service down to -521F/-196C.	SV - 008
Sour Oil and Gas	Valves are manufactured strictly in accordance with NACE specifications MR-01-75.	SV - 009
High Temperature	Special grade of steel for use up to 1500F/800C.	SV - 010
Alkylation	Special procedures to select materials and assure a perfect cleanliness of valves.	SV - 011

Without prior notice OMB reserves the right to make modifications or changes to its production.

## BODY AND BONNET MATERIALS

OMB valves are manufactured in a wide range of materials, supplied by the best available steel mills, forged by well known forgery with outstanding equipment and experience. All the material can be certified in the chemical composition and the mechanical characteristic.

Material Group	Common Name	Nominal Type	UNS	Forging Spec.	Casting Spec. Equivalent	DIN	DIN W. No	Application Notes
Carbon Steel	CS	C-Mn-Fe	K03504	A105N	A216-WCB	C22.8 DIN 17243	1.0460	General non-corrosive service from -20F(-29C) to 800F(427C)

**Asbestos-free packing** is composed by a series of rings of pure graphite. The sets is closed with two rings, top and bottom, anti-extrusion, manufactured in braided graphite. Both internal and external rings are treated with corrosion inhibitor.

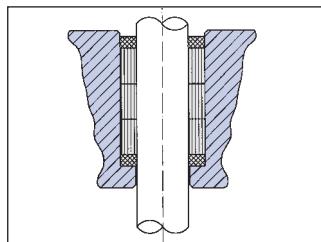

**Asbestos-free gaskets** used on bolted bonnet valves are of the spiral-wound type in Stainless Steel 316 and pure graphite. On class 1500 valves, ring-joint gaskets in accordance with ANSI B16.20 - API 6A can be used.

**Spare Parts:** OMB mantains an extensive inventory of packing and gaskets spares. To individuate the require one please refer to the information shown on OMB's data sheets (assembly drawings), indicating code and composition of the sets.

A comprehensive updated list of packing and gaskte for each design/figure is available online at [www.ombvalves.com](http://www.ombvalves.com)

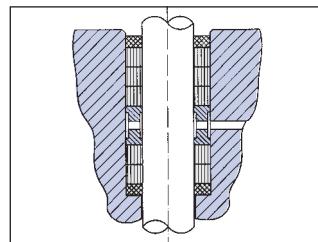

## EMISSION CONTROL OPTIONS

OMB offers a wide range of solutions to control fugitive emissions in **packed valves**.

### GRAFITE PACKING

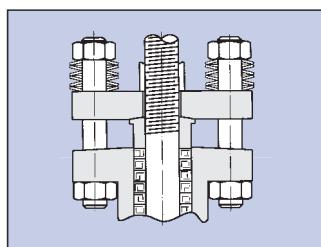

Tight control on stem and packing chamber walls finishing and material purity and density in the packing guarantee a leak-proof sealing to EPA requisitions.

### LANTERN PACKING

(on request)

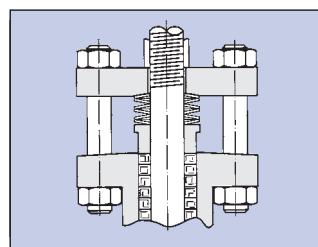

The lantern ring solution provide a way to verify the packing operation and a grease injector option to increase packing seal.

### LIVE LOADING BOLTS LOADED TYPE

(on request)

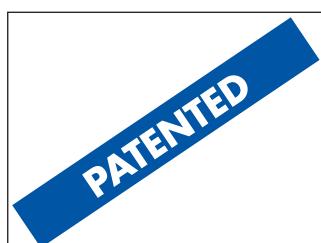

Two sets of Belleville springs keep gland flange pressure on packing for long periods of time without maintenance.

### LIVE LOADING GLAND LOADED TYPE

(on request)

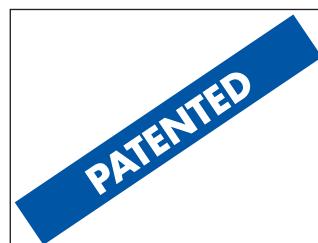

Sets of belleville springs keep gland pressure on packing for long periods of time without maintenance.

### GARLOCK® EVSP 9000 FVP

(on request)

OMB offers this superior designed chevron-style graphite packing.  
ISA testing qualification for BP.

### ARMA-SEAL 312™

(on request)

OMB valves qualified to ISO15848 testing using this special designed packing.  
Shell 77/312 qualification.

## EMISSION CONTROL TESTING & QUALIFICATION

OMB has been involved in extensive testing of various packing solutions which lead to major improvements in the standard design and qualification by the main relevant specifications.

### ISO TESTING

Valve cycle tester using a mass spectrometer in sniffer mode to measure helium leakage from the valve gland.

### API 622 TESTING

Valve temperature and pressure cycle with methane.

### ISO 15848 TESTING

Emission test with Temperature and Pressure cycles combined. Detection by mass spectrometer in open ambient.

## SUBSTITUTE BODY-TO-BONNET BOLTING MATERIALS

## THERMAL EXPANSION OF BOLTS ON FORGED STEEL VALVES

In this table we will analyze the Thermal Expansion of bolting in B7 and B8 material used in Forged steel valves made according to ISO 15761/API 602.

The following table gives the mechanical properties of the most common bolt materials used in the Forged Steel valves

Identification Grnde Mark	Specification	Material	Nominal Size Range (in.)	Linear Thermal Expansion Coefficient ( $^{\circ}\text{C}^{-1}$ )	Mechanical Properties		
					Proof Load (psi)	Yield Strength Min (psi)	Tensile Strength Min (psi)
B7	ASTM A193 Grande B7	4140, 4142, OR 4105	1/4 thru 2-1/2 Over 2-1/2 thru 4 Over 4 thru	12* $10^{-6}$	-- -- --	105,000 95,000 75,00	125,000 115,000 100,000
B16	ASTM A193 Grande B16	CrMoVa Alloy Steel	1/4 and larger	11* $10^{-6}$	--	105,000 95,000 85,000	125,000 115,000 100,000
B8	ASTM A193 Grade B8	AISI 304	1/4 thru 3/4 Over 3/4 to 1-1/2	11* $10^{-6}$	55,000 33,000	30,000	75,000
B8M	ASTM A193 Grade B8M	AISI 316	1/4 thru 2-1/2 Over 2-1/2 thru 4 Over 4 thru 7	11* $10^{-6}$	-- -- --	105,000 95,000 75,000	125,000 115,000 100,000

**A** = Substantial resistance - Preferred material of construction.

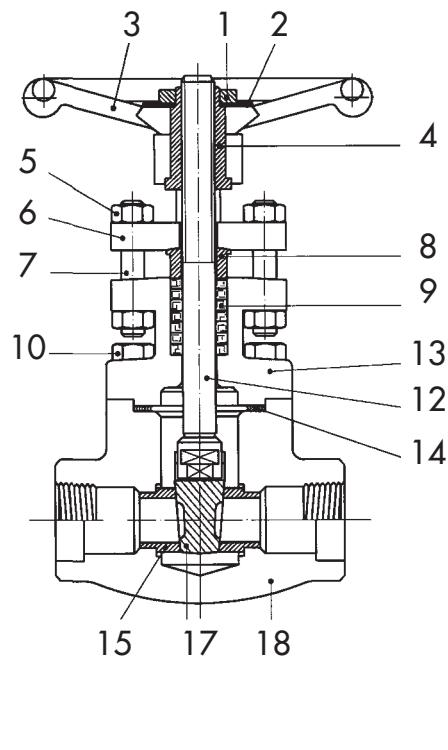

**B** = Moderate resistance - Satisfactory for use under most conditions.

**C** = Questionable resistance - Use with caution.

**D** = Inadequate resistance - Not recommended.

OMB doesn't assume any responsibility from the use of a.m. data which are purely theoretical.  
The user must verify the best conditions of use.

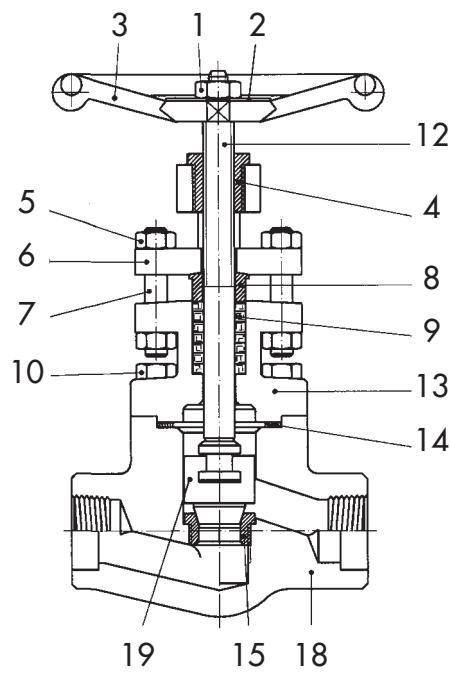

1 WHEELNUT	Austenitic ductile iron, 13Cr steel, or copper alloy having a melting point above 955°
2 NAMEPLATE	A corrosion resistant metal
3 HANDWHEEL	Malleable iron, carbon steel, or ductile iron
4 YOKE NUT	Carbon steel or similar material composition as the bonnet
5 GLAND NUT	Bolting materials of a type 300 or type 400 series stainless steel. Also, material at least equal to either ASTM A307-Grade B or EN 10269-C35E (1.1181) may be used for yoke bolting
6 GLAND FLANGE	Steel
7 GLAND STUD	-
8 GLAND	Material with a melting point above 955° C
9 PACKING	Non-asbestos material suitable for steam and petroleum fluids over a temerature range of - 29°C to 540°C and containing a corrosion inhibitor
10 BOLTS	Unless other materials are agreed between the purchaser and manufacturer the bolting material shall be according with annex F
12 STEM	-
13 BONNET	A forging or casting material as selected from ASME B 16.34, group 1 and Group 2
14 GASKET	See 5.5.3
15 SEAT	As in Table 11, except that when weld deposited facings are used, the base material shall have a corrosion resistance equal to or greater than that of the body material
17 WEDGE	Steel or base material compatible with the pressure/temerature rating and least equal in corrosion resistance as the body material
18 BODY	A forging or casting material as selected from ASME B 16.34, group 1 and Group 2

## ISO 15848 PART I - FUGITIVE EMISSION TEST MATRIX

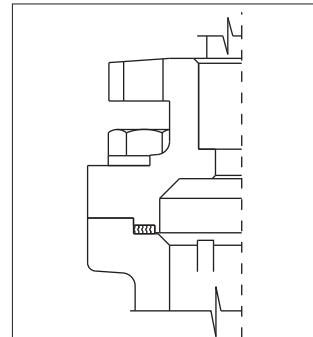

OMB valves completed the following test to qualify the complete product range with a major end user

	Design	Temp. Range	TEST PROTOCOL NUMBER		
			150-600	1500	2500
Gate Valves ISO 15761/ API602, Wedge Type, Metal Seated, Rising Stem valves, Cryogenic	ext bonnet	-196 to 300c	1	2	3
Gate Valves ISO 15761/ API602, Wedge Type, Metal Seated, Rising Stem valves	std	-50 to 400C	4	5	6
Gate Valves ISO 15761/ API602, Wedge Type, Metal Seated, Rising Stem valves, High Temp	std	0-650C	7	8	9
Globe Valves ISO 15761/ API602 (BS5352), Flanged, Plug/ball type, Cryogenic	straight ext bonnet	-196 to 300c	10	11	12
Globe Valves ISO 15761/ API602 (BS5352), Flanged, Plug/ball type	straight	-50 to 400C	13	14	15
Globe Valves ISO 15761/ API602 (BS5352), Flanged, Plug/ball type, High Temp	straight	0-650C	16	17	18
Globe Valves ISO 15761/ API602 (BS5352), Flanged, Plug/ball type	Y pattern	-50 to 400C	19	20	21
Globe Valves ISO 15761/ API602 (BS5352), Flanged, Plug/ball type, High Temp	Y pattern	0-650C	22	23	24
Check Valves ISO 15761/ API602 (BS5352), Piston Type, Bolted cover, cryogenic	straight	-196 to 300c	25	26	27
Check Valves ISO 15761/ API602 (BS5352), Piston Type, Bolted cover	straight	-50 to 400C	28	29	30
Check Valves ISO 15761/ API602 (BS5352), Piston Type, Welded cover, high temperature	straight	0-650C	31	30	33

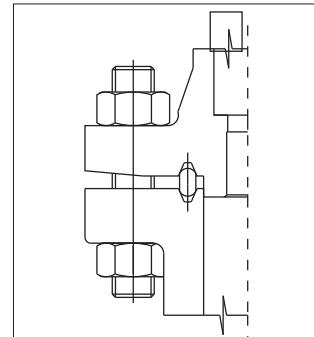

## BODY- BONNET CONNECTIONS: BOLTED BONNET

OMB standard construction of body-bonnet connection is bolted, with a spiral wound gasket to seal the connection.

On request we offer as well Ring Joint connection. Ring Joint is standard feature on class 2500 bolted bonnet, on request on all other pressure class.

Gasket Joint

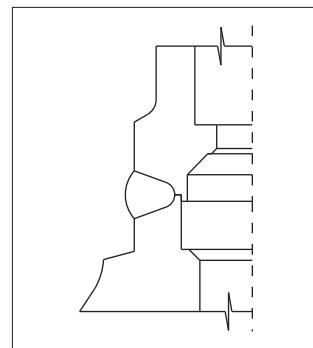

Ring Joint

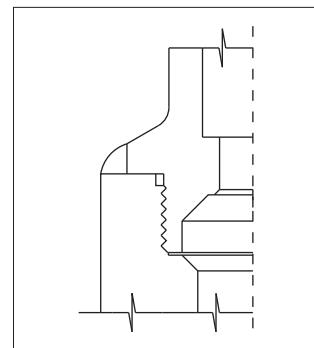

## BODY- BONNET CONNECTIONS: WELDED BONNET

All OMB welding procedures are performed by operators qualified according to ASME IX.

OMB Welded Bonnet Valves are supplied in the standard type threaded in and fillet welded bonnet as per "L" version. On request Full Penetration Welding as per "WP" version can be supplied.

Full Penetration Weld "WP"

Screwed and Seal Weld 'L'

## INTEGRAL FLANGED ENDS

All OMB valves with flanges are provided with flanged integral with the body forgings. We do not weld on flanges in any class or materials so you can have a complete guarantee of integrity, mechanical strength and material compatibility. All our flanged (and butt weld) valves have dimension in accordance to ASME B16.5 (ends) and ASME B16.10 (end to end). Valves to DIN and JIS standards as well are made with integral flanged forgings.

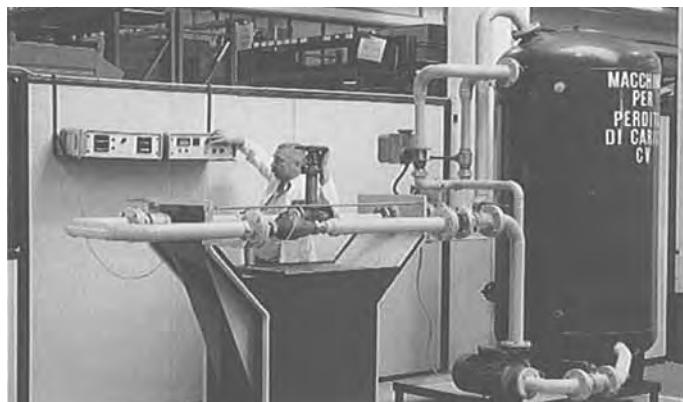

## FLOW COEFFICIENT Cv

The Cv's a valve property and is defined as follows: "The Flow Coefficient Cv states the flow capacity of a valve in U.S. gallons per minute of water at a standard temperature of 60°F (15,6° C) that will flow through the valve with a pressure loss of one pound per square inch at a specific opening position". For the metric sistem the analog value is Kv where measure unit are Bar, Kg and meters. The Cv show the quality and accuracy of a valve in terms of pressure loss, the highest values of Cv indicate the highest quality of a valve.

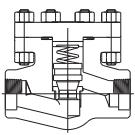

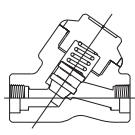

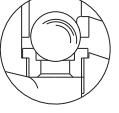

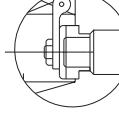

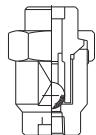

The values shown

VALVE SIZE	GATE		GLOBE			PISTON		
	Regular Port	Full Port	Regular Port	Full Port	Y-Pattern	Regular Port	Full Port	Y-Pattern
<b>1/4</b>	-	2.5	-	1.1	2.9	-	0.9	2.3
<b>3/8</b>	-	4.3	-	1.4	3.8	-	1.1	3.5
<b>1/2</b>	5.5	11.6	1.5	3.6	4.5	1	2.1	4.8
<b>3/4</b>	12	26.6	3.8	6.6	10.1	2.8	5.8	7.8
<b>1</b>	27	54.6	6.8	10.9	16.0	6	7	11.2
<b>1 1/4</b>	55	79.8	11	14	23.1	9.5	9.2	18.0
<b>1 1/2</b>	80	87	14.3	24.3	47.1	11	15.4	37.8
<b>2</b>	105.0	108	25	39.7	80.2	18	32	69.2

To measure the properly value of Cv there is not a standard method. OMB R & D team has used two different methods: 1-Using Cv definition, through the means of a specifically built test rig, it has been obtained 1Bar of pressure loss and the flow has been verified with specific equipment. Calculation is possible to convert the measure to Cv. 2-In the same machine the flow has been changed and different measure of pressure loss has been obtained: a table has been defined and an average value per each valve has been calculated.

Type Scheme								

Disclaimer. All above data have been calculated experimentally on production lost based on a standard combination of materials tested with air. Data may vary with fluid of higher or with spring/parts in special steel grades. In case of specific need we suggest you contact OMB center at the Bergamo plants.

## NAMEPLATE

Each valve is identified by proper marking on the name plate according to MSS SP25 and ISO15761 specifications.

Nameplate contains information regarding valve type, body-bonnet material, seat-wedge and stem composition, class and diameter. On the nameplate the relevant mark is incorporated.

Each valve when tested is stamped on the nameplate with the QC operator code for reference.

## BODY MARKING

Material designation and heat codes are forged on both body and bonnet.

Bodies are marked with the OMB logo, pressure class designation, nominal size (using NPS number) and an arrow on check and globe valves (unidirectional).

Upon customer request further marking can be applied.

## ADDITIONAL TAGS

On request valve can be supplied with tags made on customer specification to provide easier identification of products.

## PHOSPHATIZING OF CS VALVES

<b>PHOSPHATIZING SPECIFICATION (zinc base) FOR CARBON STEEL PROTECTION</b>			
<b>Bath</b>	<b>Type of operation Product used</b>	<b>Min. time</b>	<b>Temp. °C</b>
1	Alkaline degreasing - Italbonder 011	8'	95°
2	Cold washing - Water air (current)	1'-3'	20°
3	Bonderizing - Bonder A2 - PS	8'-10'	80°
4	Cold washing - Water air (current)	1'-3'	20°
5	Oiling - Emulsifiable protoil RE	3'	50°
6	Drying	5'	20°

Phosphatization is carried out on all forged bodies and bonnets in carbon and alloy steel.

All OMB carbon and alloy steel bodies and bonnets undergo a photosphatization process according to the table.

## PICKLING OF SS VALVES

All OMB stainless steel valves undergo a pickling process in a concentrated acid solution which cleans perfectly the surface of the components and allows a visual inspection of each piece.

## RUST PREVENTION AND SHIPPING

All valves are shipped in wooden crates seaworthy with end protection cups in plastic and a rust prevention fluid applied in the valves internal parts.

In case of special applications valves can be prepared for transportation in accordance to customer specifications

## SPARE PARTS

OMB supply on request spare parts in the form of kits inclusive of packing and gaskets. Valves need to be identified with the data provided on the Nameplate (model type, material and size as a minimum).  
OMB policy is to maintain for at least 10 years parts in stock for every design even discontinued.

## INSTALLATION, OPERATION AND MAINTENANCE MANUALS

### MANUAL REQUEST

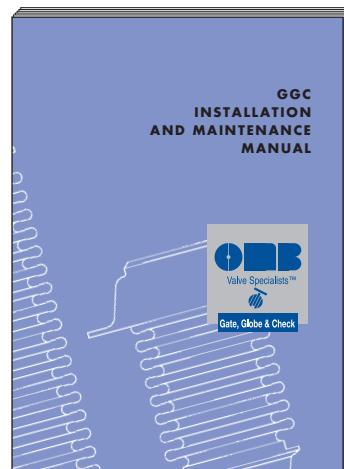

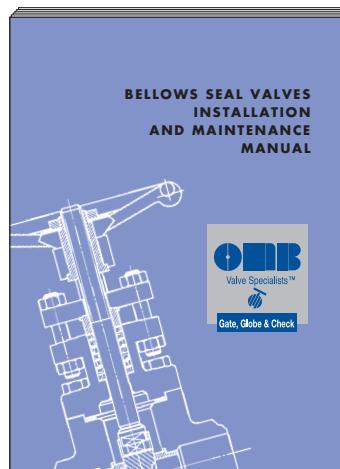

(send a copy of this page with your request to +39.035.942638)

**OMB GGC**

Install and Maintenance

**OMB Bellows Seal Valve**

Install and Maintenance

Gate valves are bi-directional valves ideally suited for on-off duties. OMB produces various types both with parallel face gates or with wedge gates. These valves have a very low resistance to flow, which in the case of parallel gate valves approaches that of a straight pipe. They are used for duties with high pressure fluids due to the fact that upstream pressure helps the sealing between gate and seat.

OMB takes great care to study finish of seating surfaces to guarantee their minimum wear under high pressures. Gate valves are supplied in various models to cover the most different and delicate services. The main characteristics of each type are described on pages 16 to 23.

**Figure # is identified in each table as:**

Globe valves are closing-down valves in which the closure member is moved squarely on and off the seat. In this way the opening of the port is directly proportional to the travel of the disc. This proportional relationship is ideally suited for duties requiring regulation of flow rate. To have a further precision in regulation the disc element can be available in the parabolic, needle, vee-port types. Furthermore the short travel of the disc between the open and closed position makes these valves ideally suited for on-off duties when they must be opened and closed frequently. Globe valves are unidirectional valves and are installed so that fluid pressure is under the disc. They are supplied in various models to cover the different services. Among these valves the Eco-L-Valve® combines the characteristics of total safety against leakages to the easy substitution of the most delicate components such as the bellows. The main characteristics of each type are described on pages 24 to 31.

#### Eco-L-Valves

OMB introduced an innovative solution to the Fugitive Emission issue: Eco-L-Valves. Special patented Short Pattern Bellows Seal valves, with dimension equal to standard non-bellows valves and able to meet the severe service conditions of standard bellows seal with a lower dimensional height and reduced cost impact.

ECO-L-VALVES please see C-BS Bellows Seal Valve Catalog

# CHECK VALVES SECTION

Check valves are uni-directional valves which automatically open with forward flow and close against reverse flow. They are supplied to meet a wide variety of applications with the closing element in the piston, ball or swing type. Piston check valves are normally supplied by OMB with the addition of a spring which allows both the vertical and horizontal installation.

Great care is given by OMB employees in the design and in manufacturing to prevent noisy operation and unsatisfactory wear of closure components.

The full range of OMB production is reported on pages 32 to 37.

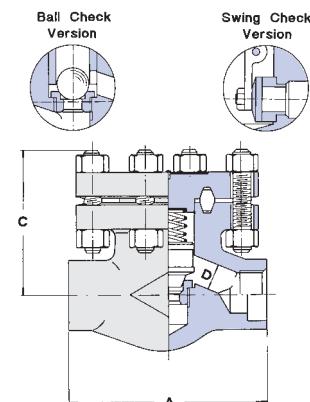

**Figure # is identified in each table as:**

# STANDARDS VALVES SPARE PARTS

Suggested spares for OMB valves are packing and gaskets: We provide here below a list, inclusive of the bonnet capscrew specification, which can be used to source spare parts for the most common valves.  
All other valves' spares can be requested directly at OMB or at any of the OMB approved distributors worldwide.

Desc	Class	Base Figure No	NPS	Packing Code	Gasket Code	Bonnet Capscrew	Gland Stud
RB Gate	150-800#	810	0.50"	T2	40x30	M10x25	M8x42
RB Gate	150-800#	810	0.75"	T2	40x30	M10x25	M8x42
RB Gate	150-800#	810	1"	T4	48x38	M12x30	M8x48
