TASMANIAN OAK

“Hardwood Flooring engineered for living,
designed to impress”

timbertop®

Our AFTER OAK COLLECTION offers a wide range of colours from very light in natural colour to very dark. This collection comes in either the Eucalyptus species known as Tasmanian Oak which is mainly from Australia, Ash from western Europe or Pecan from USA. All our wood is the highest quality as well as environmentally friendly, it's the best in engineered hardwood flooring.

SUPERIOR STABILITY & CONSISTENCY

HEVEA BRASILIENSIS (Rubberwood) is a plantation hardwood timber that has similar density to White Oak. It is well-known that Rubberwood core in 3 layered engineered floors is stronger and more reliable than other species used in the market due to its physical and mechanical strength.

RESPONSIBLY HARVESTED & MANUFACTURED

Our company employs sound environmental care policies by using renewable resources and VOC safe components. We take great pride in being able to offer everyone a totally safe, green product. Our 3 layered engineered flooring composition encompasses the use of legally compliant and renewable timber resources.

WORLD CLASS FINISHING

The strength of our technology and production processes allow us to distribute and install our timber flooring products worldwide with confidence, even in extreme climates. This ensures a look and feel to suit your design preference and needs that will last the lifetime of the floor.
