EAL

Screw-on, end mill, and shell mill cutters

One tool for all applications.

The Mill 4[™] series is specially engineered to achieve excellent surface quality and higher metal removal rates in shoulder milling applications. Its unique design allows you to apply the tool in multiple passes (stepping down) with outstanding results.

From roughing to finishing operations, the Mill 4 series is applicable in a wide range of workpiece materials: steel, cast iron, stainless steel, non-ferrous materials, and high-temp alloys.

State-of-the-art stepping down capabilities stepless solution.

Uneven Pocket Spacing

Features and Benefits

- Double-sided strong insert with 4 cutting edges.
- High positive geometry for lower cutting forces.
- Superior wall and surface finish capabilities.
- "Stepless" solution. No mismatch when machining walls in different steps.
- Comprehensive offering to cover all application in all material groups.

Returns not permitted on promotional transactions.
