

SPACE TWIN

Blum's idea for narrow cabinets

www.blum.com

 **blum**[®]

A practical solution for small storage spaces

Now even the smallest spaces in the kitchen can be used. Blum's SPACE TWIN, the idea for narrow cabinets, with diagonally offset runners creates additional storage space – without compromising stability or quality of motion.

 **blum**

Proven Blum quality of motion

Blum's proven quality of motion is prominent in the SPACE TWIN narrow cabinet. Minimal opening forces, a feather-light glide and the adaptive BLUMOTION damping system for silent and effortless closing guarantee top quality of motion and enhanced user ease. What's more, the cabinet can be fully extended, providing easy access to all contents.

Optimum stability and load bearing

Diagonally offset runners ensure improved lateral stability and a high load bearing capacity of up to 20 kg per base cabinet.

Uniform appearance

The implementation in combination with the box systems LEGRABOX and TANDEMBOX or with the runner systems MOVENTO and TANDEM enables a consistent look and a uniform appearance.

Familiar ease of assembly and adjustment

The use of Blum standard fittings enables the familiar simple and convenient adjustment and assembly.

Diverse implementation options

Thanks to the consistent use of Blum fittings, SPACE TWIN is covered by the existing product range. The solution cannot only be implemented with LEGRABOX and TANDEMBOX box systems but also with MOVENTO and TANDEM runner systems.

blum®

LEGRABOX

The narrow, linear design of LEGRABOX is also used to its full advantage in narrow cabinet solutions. For cabinet width of 200 mm.

TANDEMBOX

The solution for narrow cabinets is compatible with all TANDEMBOX programme lines. For cabinet width of 200 mm.

MOVENTO

MOVENTO's quality of motion is also prominent in SPACE TWIN. For cabinet widths of 200 mm.

TANDEM

With the runner system, narrow wooden cabinets can be implemented throughout the entire living area. For cabinet widths starting at 150 mm.
