Template Kit

Simplifies the process of cutting bulk roll material into individual door strips.

- Fabricated of non-slip 1/4-inch acrylic.
- Dimensions are permanently etched directly on the template.
- Special drill bit bores a perfectly round hole into material to prevent tearing.
- Kit includes template, drill bit and marker.

F.O.B. FACTORY EACH

ITEM NO.	PRODUCT	F.O.B. FACTORY EACH
G368 2700	Quickmount™ Template Kit	\$51.95

How to figure the AMOUNT OF STRIP NEEDED

We recommend mounting these doors 1 foot above door opening to eliminate tearing strips with tall loads.

- 1. Measure** the opening width and height in feet.
- 2. Add** 1 foot to the door height and width, depending on space available.
- 3. Calculate** using the following formula in feet:
 - 6" Strips — (width x height) x (1-1/2) x (2)
 - 8" Strips — (width x height) x (1-1/2) x (1-7/10)
 - 12" Strips — (width x height) x (1-1/2)

All strip doors are designed to mount on either the inside or outside wall above the door opening with a minimum of 5" overlap on each side.

8-inch PVC Strips 50% overlap.

8-inch PVC Strips 100% overlap.

Clear Antibacterial Door Strips

Antibacterial properties are blended into the compound to inhibit the growth of bacteria — will not wash out!

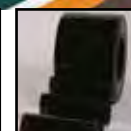

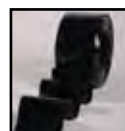

- Proven to kill 99.9% of bacteria like e-coli, staph and pneumonia on the surface of the PVC strip.
- Made of clear, high-quality durable vinyl, resists scratching and remains pliable in cold.
- Effective airflow, dirt and moisture block. • Can be used in walk-ins and food storage areas.

WHY REPLACE DOOR STRIPS?

- Old strips harbor bacteria in the cuts and cracks that form as a result of impact.
- Worn and scratched strips cut down on visibility and safety.
- Maintain Temperature Integrity — Worn out strips have holes and cracks which allows cold air to escape and warm air to infiltrate.
- To reduce the transfer of contaminants between work areas.

PRICES ARE SUBJECT TO CHANGE • MINIMUMS MAY APPLY • VISIT OUR WEBSITE FOR CURRENT PRICING.

STRIP DOORS AND MOUNTING HARDWARE

Vinyl and Mesh Roll-Up Doors

Complete kit ready to install!

Benefits:

- Significantly reduces heat loss while allowing light into work areas.
- Keeps out unwanted pests, birds and intruders.
- Controls airborne contaminants and improves building appearance.
- Mesh allows fresh air to flow through for comfort and productivity and helps meet FDA and AIB requirements.
- Three year warranty — one year warranty on motor drive mechanism.

Features:

- High speed: up to 36 inches per second.
- Low maintenance: no cables, wheels, springs or sewn construction.
- Wind load rated: 45 mph wind load*.
- Durable: fiberglass windbars won't bend or break. Automatically resets after impact.
- Quick and easy installation: upper box completely assembled in factory.
- Multi-season: exchangeable panels available in mesh, clear and solid vinyl.
- Fire resistant: meets NFPA-701 and CSFM standards for flame retardancy.
- Resistant to all ultraviolet rays and is rot, tear and mildew resistant.

* Wind load tested on a 10-inch x 12-inch solid vinyl roll-up door per ANSI/DASMA 108-2002.

Available Options:

- Vinyl Door color options: gray, black, blue, beige, green, red, yellow, orange and white.
- Mesh Door color options: gray, black, almond, royal blue, spruce green, yellow and red.
- Operations include: manual chain hoist, 18 inches per second (in tube motor), 28 inches per second and 36 inches per second (external mounted motor).
- Various Control Options: hardwired and RF available to meet your specific application.
- Outside face mount or inside projection mount available.

Bug and bird mesh door.

High-speed vinyl roll-up door.

Also available:
vinyl roll-up doors for extreme conditions.

Spring assist.

Side seal.

Flexible Airguard® Doors

Series 100 Doors

Models Numbers 100E and 100CE

- Meets USDA requirements.
- 45-ounce, heavy-duty, abrasion-resistant vinyl coated nylon.
- Large 30 x 14-inch vision panel made from shatterproof polycarbonate.
- Top mounted gravity actuated hinge provides completely automatic operation. Opens instantly upon contact and closes automatically by gravity.
- 48-inch heavy-duty, 1/8-inch thick Kydex® impact plates mounted front and back of each door.
- Available in green only.

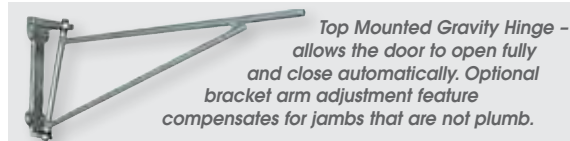

Model 100E (photo) Model 100CE

UNIFLEX 240 PVC Door

Models Number 240PVC

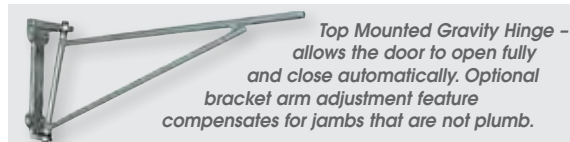

- Constructed of two layers of 0.12-inch PVC heat welded together to a thickness of 0.24 inches and textured embossed finish.
- 15 x 14-inch clear vinyl window centered in each panel.
- Meets USDA requirements.
- Top mounted gravity actuated hinge provides completely automatic operation. Opens instantly upon contact, then closes automatically by gravity.
- Colors: navy, royal blue, chocolate brown, medium brown, forest green, red, metallic gray and black.

300 Belted Door

Models Number 300 Belted

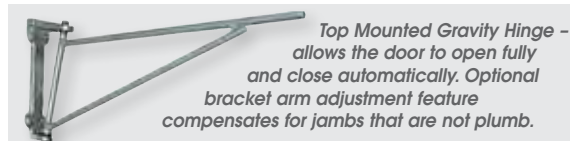

- For heavy use forklift and/or freezer applications down to -30 °F.
- Wiper seals are provided at bottom and top.
- Balloon seals provided at jamb edge of each door.
- Window centered in each panel 15 inches x 14 inches.
- Constructed of two layers of abrasion-resistant, two-ply "belting" material bonded together.
- Top mounted gravity actuated hinge provides completely automatic operation. Opens instantly upon contact, then closes automatically by gravity.
- Available in green only.

973 Standard Forklift Doors

Models Number 973

- NOT for freezer applications.
- Constructed of 0.16-inch thick, PVC door body with a two-ply, vinyl coated nylon bracket pocket.
- Top mounted gravity actuated hinge provides completely automatic operation. Opens instantly upon contact, then closes automatically by gravity.
- Extra-large viewing area allows clear visibility and maximum safety.
- Balloon seals provided at jamb edge of each door, top and bottom wipers.
- Textured vinyl impact plates on both sides increases strength and durability of door.
- Colors: navy, royal blue, chocolate brown, medium brown, forest green, red, metallic gray and black.

ABS 5000 Light-Duty Traffic Door

Aluminum Sheet Door Alternative – Constructed of 1/4-inch thick stress relieved high-density polyethylene, textured to hide normal dents and scratches. For use with cart, pallet jacks and people traffic.

- Includes 14 x 16-inch scratch resistant polycarbonate window set in vacuum formed frames for a clean, low profile and centered 60 inches from the floor.
- Constructed of light-weight durable 1/4-inch ABS plastic and resists dents, gouges and abrasions.
- Hinge system mounts to the jamb with offset cam system and hardened rollers.
- The entire length of the panel is reinforced at the back with 3 layers of 6-inch wide x 3/4-inch thick ABS material, allowing for superior impact resistance and virtually eliminating broken spines.
- Can be custom designed to fit any plant, store or restaurant application.
- Not recommended for forklifts. • Not gasketed.
- Doors can be mounted on either wood or metal jambs, frames not included.
- Optional kickplates, jamb guards and locking devices.
- Colors: beige, cloud grey, white, medium brown, red and black.

SRP 5000 Medium-Duty Traffic Door

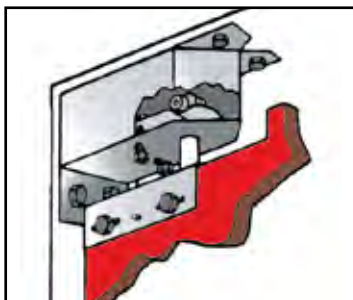

Constructed of 1/2-inch thick stress relieved high-density polyethylene, textured to hide normal dents and scratches. For use with carts, pallet jacks and people.

- Includes 9 x 14-inch acrylic windows set in rubber molding.
- Can be custom designed to fit any plant, store or restaurant application.
- Doors can be mounted on either wood or metal jambs, frames not included.
- Back edge spine is a one-piece, continuous extruded 1/4 inch x 2-inch diameter anodized aluminum tube with flanges that radius the door panel for added strength and durability.
- Not gasketed.
- Colors: chocolate brown, red, metallic gray, black, beige, white and cloud gray.

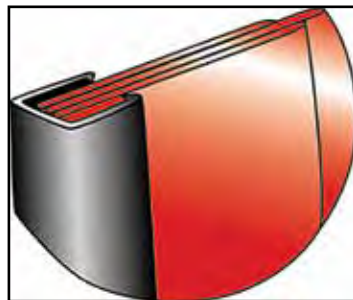

Structural Steel Door Frames Available

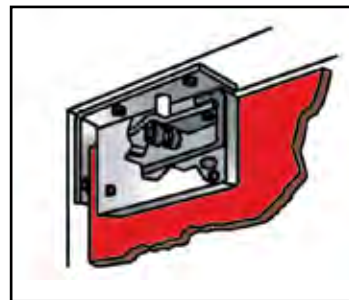

Manufactured of tubular steel to fit your particular door opening. They are shipped knocked-down in three easy to assemble pieces.

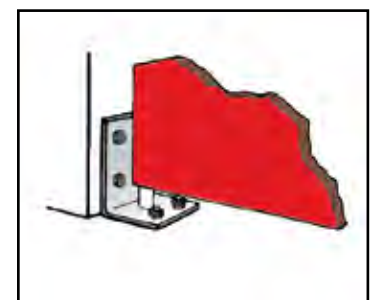

Classic "C" Hinge — can easily be adjusted after removing the cover and screws.

Back Spine — Heavy-duty "U" shaped fiberglass pultrusion further stiffens the spine for added strength and stability.

Classic "E" Hinge — gravity close hinge system mounts to the jamb with offset hardened steel cam and rollers.

Heavy-duty bottom hinge pin stabilizes the panel in the frame.

Manufactured to withstand the most corrosive environments from saltwater, chemicals, detergents, chlorine, acid, to humidity and more.

- Superior 25 mil molded gel coat door finish is equal to 50 – 60 coats of paint.
- 0.125 inch thick and weighing 1.0 pound/square foot, Chem-Pruf door plates are by far the strongest in the industry.
- The interior cavity of the FRP door is completely filled with a corrosion-resistant material.
- Proprietary bonding resin system to fuse the plates to the collar and core. There will be no separation or delamination.
- Available options: polyurethane foam or mineral cores, various window options, fiber reinforced accessories and high quality stainless steel hardware.

Every Chem-Pruf Fiberglass Door is
CUSTOM MANUFACTURED
to Your Exact Requirements.

Shat-R-Shield® Incoplas™ LED Hybrid

Functional as an area light, flood light or wall pack. Tailored to your custom specification.

- Available in three mounting options, adjustable, surface or wall.
- One person installation with built-in self-leveling kit.
- Choose from 45 or 90 Watts.
- Lumen Output: Up to 5,000 (45 W); Up to 10,000 (90 W)
- Voltage: 120-277 V
- Operating Temperature: -22 °F to 113 °F (-30°C to 45°C)
- Up to 122 °F (50 °C) in 5,000 lumen package.
- Dimming: 0-10 V
- Weight: 7-1/2 pounds.
- Dimensions: 13 inches L x 10-1/4 inches W x 5-3/5 inches H.

Choose From 3 Mounting Options:

Adjustable Mount

Surface Mount

Wall Mount*

At 7-1/2 pounds, this fixture is extremely light-weight.

Thumb screw makes junction box easily accessible and can be loosened or tightened without using any tools; allows for a simple one-person installation.

Stainless steel screws are corrosion-resistant and can withstand the harshest environments.

Tapered fins allow for water runoff so the fixture can be washed down with high-pressure as often as needed.

Frosted polycarbonate lens (shown) is 1 of 5 lens options. This particular lens is optically engineered to eliminate hotspots and create uniform, glare-free illumination.

Tongue and Groove 1/2-Inch PVC Ceiling and Wall Covering

NOTE: Not for use in freezer applications.

Stain-resistant, low-maintenance, waterproof panels are also easy to clean and ideal for high moisture areas. Materials are totally recyclable. Never needs painting and will not rot or rust.

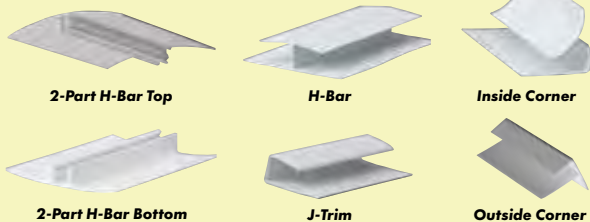

- Panels are 100% recyclable and do not support mold or mildew per ASTM D3273 and D3274.
- Panels meet ASTM E-84-05 and CAN/ULC S102.2-3 Class A fire rating.
- Can easily be cut using fine tooth blade, table saw or utility knife.
- Custom cut lengths up to 20 feet long.
- No exposed fasteners.
- Panels are extruded from exterior-grade PVC.
- Easy to install using the tongue and groove system.
- Cleans with pressure washers or soap and water.
- Can be attached directly to walls and ceilings.
- Limited 10 year warranty.

Panels slide together with tongue and groove design leaving no exposed fasteners to rust or promote mold or bacteria growth. Use stainless steel screws to connect nailing fin to wall or stud.

White Nylon Rivets

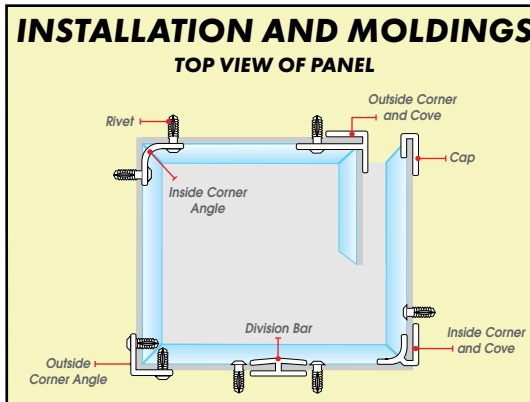

• Non-corroding, white nylon rivets will fasten panels to wood, metal, drywall and concrete.
• Rivets will expand into either solid substrates behind sheet material or metal studs.

NOTE: Recommended 1 per square foot.

▶ 100 PER BAG.

ITEM NO.	SIZE	BAG
3149 12801	3/4"	\$15.95

Dura-Seal 400 Industrial Light-Duty Concrete Floor Coatings

Very hard, very chemically resistant. Good in a water environment once hardened. Has odor during applications, but not after curing (6 hours).

- One, 2-gallon container applies two coats over 325-350 sq. ft.
- By mixing 50/50, coating penetrates pores and forms a solid surface plate recognized by the USDA as a contaminant barrier.
- Apply by roller, brush or spray — leaves an easy-to-clean, hard, glossy surface suitable for incidental food contact.
- Mix with optional Satin Texture for non-skid durability.
- Meets all USDA and EPA standards.
- Quick-drying coating hardens to a 6-8 mil thickness.

Dura-Poxy Industrial Heavy-Duty Concrete Floor Coatings

A heavier-bodied "100% solids" catalyzed epoxy laminate. Very hard and highly chemically resistant. No odor. Hardens even in a water environment. Accepted by the USDA for incidental food contact use. For use on floors with major irregularities.

- 8-hour curing time.
- 1 gallon covers 125 square feet. at 8-10 mil.
- For use on floors with major irregularities in the surface and floors that require maximum resistance to damage from falling tools, forklifts and similar causes of harm.
- Quick drying coating hardens to a 20 mil thickness with 2 coats.
- Mix with quartz chips for high skid areas (such as wet or frosty environments) and to form a coating that is resistant to the passing of steel wheels or other heavy machinery.

NOTE: Require temperatures of at least 55 °F during application.

LeakSeal® Self Fusing Silicone Tape

Rust-Oleum® LeakSeal® Self Fusing Silicone Tape conforms to any surface while providing a water-tight seal.

- Creates a chemical- and moisture-resistant barrier that fixes leaky pipes and hoses, and covers frayed electrical wires.
- Easy to remove, leaves no sticky residue and protects from corrosion.
- Withstands temperatures -85 °F to 500 °F.
- Superior strength 700 psi.
- Corrosion and chemical resistant.

Using tension, stretch tape around the object, overlapping each layer by 1/2 inch and wrap over itself to fuse.
Wrap completely over problem area and cut the tape once finished.

Sahara Pro X3 TurboDryer

Incredibly powerful static pressure and huge CFM volumes!

- Daisy-chain capability with built-in power outlet and circuit breaker.
- Low amp draw – 4 amps max!
- Excellent versatility with 3 speeds and 3 operating positions – 0°, 45° and 90°.
- Underside drying vent for drying under the airmover.
- Quick disassembly for cleaning.
- Rated airflow: 2700 CFM (4587 CMH).
- CFM/amp: 235.
- Static pressure: 1.28 inches (3.25 cm).
- CFM per 15 amp circuit: 2817 CFM, tested.
- Airflow velocity: 2,071 feet/minute (631 m/minute), tested.

CFM stands for "cubic feet per minute" and is a measure of air flow capability.

Example: a 1000 CFM blower or fan can move air from an area 10 feet x 10 feet x 10 feet in one minute.

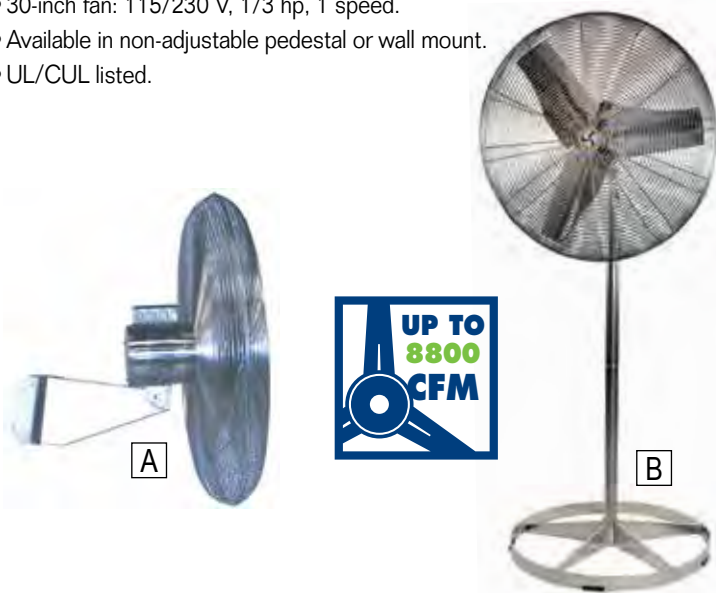

3-Position air flow allows air to be directed where you need it.

Magna-Plate Food Grade Grease

For use on machinery where grease may come into contact with edible product.

- White grease has excellent water-resistance and lubrication qualities.
- Good oil bleed characteristics at low ambient temperatures make it ideal for small, high-speed bearings.
- Choose from standard or high-temp grease. Standard grease is for temperatures under 250 °F (121 °C). High-Temp grease is for temperatures 500 °F (260 °C).
- Fits standard hand-operated grease gun.

▶ 10 PER PACK. EACH

5484 20521	14.5 oz., High-Temp	13.20	11.80

Clear-Guard Food Grade Grease

For use on machinery where grease may come into contact with edible product.

- Clear grease compounded with a high-temperature polymer will cling to metal surfaces under the most severe conditions.
- Water, salts, heat and chemicals will not affect performance.
- Resists sling and channeling under high-speed or high-temperature conditions.
- Fits standard hand-operated grease gun.

3523 6543	Ergo2000 2' x 4' Stand (includes grating)	\$898.95

Fiberglass, Square Grid Floor Grating

- Weighs about one-quarter as much as steel grating.
- Available with a grit top or a concave, plain meniscus top.
- Integral grit top surface provides outstanding anti-slip protection for workers.
- Unlike metal grating, GatorGrate does not rust, never needs painting and is corrosion-resistant.
- Easy-to-clean. Smooth, tapered bars allows debris that enters the top to come out of the bottom.
- Can be easily cut with ordinary hand tools, using a masonry, carbide tip blade or diamond edge.
