3M

! WARNING on 3M/EAR™ Hearing Protection: These hearing protectors help reduce exposure to hazardous noise and other loud sounds. Misuse or failure to wear hearing protectors at all times you are exposed to noise may result in hearing loss or injury. For proper use, see supervisor, User Instructions, or call 3M in the USA at 1-800-243-4630. In Canada, call Technical Service at 1-800-267-4414. If there is any drainage from your ear or you have an ear infection, consult with your physician before wearing ear plugs. Failure to do so may result in hearing loss or injury. * Research suggests that many users will receive less noise reduction than indicated by the NRR due to variation in earplug fit and wearing time. It is recommended that the NRR be reduced by 50% for estimating the average amount of noise reduction provided.

CHOOSING A RESPIRATOR

Check the SDS for your substance to select the appropriate respirator, one must know the contaminants from which they need protection.

Details on various substances can usually be found on the SDS if the contaminant is a raw material used in production. If the contaminant is some type of by-product of a work process, more extensive investigation as to what the contaminant is composed of may be required. Once the contaminant has been identified, it is necessary to determine its concentration by performing air sampling in the work area.

Some other factors to take into account when choosing a respirator are the length of time the worker is exposed to the contaminants, specific conditions at the workplace, whether the workplace is indoors or outdoors, other types of personal protective equipment that is being used and whether chemical exposures may occur at the workplace.

Taking these findings into account, there are two types of respirators from which to choose, with many types of cartridges and filters that are used to block various gases and/or chemicals. These cartridges fit both half mask and full face piece type respirators. The half-mask respirator follows the contours of your face and fits over your nose and under your chin. It grants you a wider field of vision than a full face piece respirator and allows you to wear most types of eyewear along with the mask. Full face piece respirators fit under your chin and over your head and provide the same protection as a half-mask respirator. However, a full face piece respirator protects your eyes and face from airborne particles, chemicals and gases that could damage a worker's eyes.

RESISTANCE TO DEGRADATION		FILTER EFFICIENCY LEVELS		
		95%	99%	100%*
N	Non-Oil Solid particulates and non-oil aerosols that do not degrade filter performance.	N95	N99	N100

7000 Series Half Mask Respirator

Fewer parts, minimal maintenance and a wider field of vision.

- Ultra light-weight, durable and economical, so maximum comfort with extended use is built-in.
- Compact to easily fit under welding helmets.
- Features optional drop down/lock down strap modes.
- Contoured neck buckles for comfort and quick attachment.
- Attached exhale cover for easy inspection.
- NIOSH approved.

Drop down mode.

Contoured neck buckles for comfort and quick attachment.

Attached exhale cover for easy inspection.

Easy mount bayonet cartridge/filter attachment.

All Moldex products and packaging are 100% PVC-Free for a greener alternative.

ITEM NO.	PRODUCT	SIZE	EACH

2222 74001	B. Ammonia/Methylamine Cartridge, Green (1 Pair)		19.70

8000 Series Half Mask Respirator

Inhalation valve is replaced with every cartridge preventing bacteria build up.

- Soft, yet durable respirator is comfortable to wear and provides a wide field of vision.
- Snap-mount cartridge has no valves to clean, allowing for minimal cleaning and maintenance
- NIOSH approved.

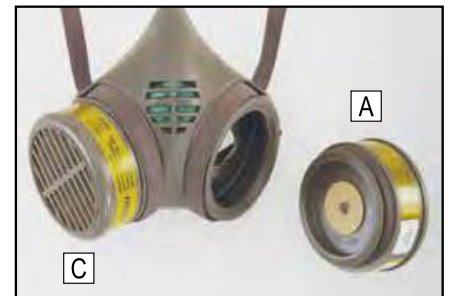

Adjustable straps don't fall into the field of vision.

Cartridges and Filters

- Olive Multi-Gas/Vapor Smart® Cartridge protects against Organic Vapors, Chlorine, Hydrogen Chloride, Sulfur Dioxide, Hydrogen Sulfide (for escape only), Hydrogen Fluoride, Chloride Dioxide, Ammonia, Methylamine and Formaldehyde. Can be combined with White N95 Particulate Filter for added protection.
- White N95 Filter protects against solid non-oil based particulates. Provides 95% minimum efficiency. With the use of the filter retainer
- This filter can be combined with the Smart® Cartridge for added protection.

All Moldex products and packaging are 100% PVC-Free for a greener alternative.

Inhalation valve is built into cartridge, not into the mask itself. No valves on the mask to clean — remove all bacteria with every cartridge change!

Comfortable foam face seal.

! WARNING on 3M Respiratory Protection: These respirators help reduce exposure to certain airborne contaminants. Before use, the wearer must read and understand the USER Instructions provided as a part of the product packaging. A written respiratory protection program must be implemented meeting all the requirements of OSHA 1910-134 including training, fit testing and medical evaluation. In Canada, CSA standards Z94.4 requirements must be met and/or requirements of the applicable jurisdiction, as appropriate. Misuse may result in sickness or death. For proper use, see packaging instructions, supervisor, or call 3M OH&ESD Technical Service in USA at 1-800-243-4630 and in Canada at 1-800-267-4414.

**WorkHorse[®] Cut
Resistant Gloves
can Save You Thousands
of \$\$\$ in Medical Costs.**

WorkHorse® Cut-Resistant Gloves

Constructed of spun threads with fully encapsulated glass fibers and stainless steel.

- FDA approved antimicrobial fibers meet USDA food handling requirements.
- Exceptional comfort that is 100% latex and silicone free.
- Resistant to acids, alkali and organic solvents.
- Extended cuff offers extra cut protection around the wrist.
- Machine washable. • Antimicrobial fiber. • Ambidextrous.
- Sold per glove, 6 gloves per case.

Cuff edge color indicates size.

ANSI CUT LEVEL Rating Chart	
ANSI ?	Higher the cut level = more cut protection
Cut Level	Weight* (grams)
	0 - 199
A1	200-499
A2	500-999
A3	1000-1499
A4	1500-2199
A5	2200-2999
2	3000-3999
A7	4000-4999
A8	5000-5999
A9	6000+

*Weight needed to cut through material with 25 mm of blade travel.

GAUGE LEVEL	
Gauge	indicates thickness of threads used in the glove.
Higher the gauge = thinner threads for more flexibility.	GAUGE ?

In the food processing industry 70% of workers who suffered hand injuries were NOT wearing protective gloves.

WorkHorse® Stainless Steel Metal Mesh Gloves with Strap Closure

The longest lasting, safest, most comfortable mesh glove — at the **LOWEST COST!**

Reversible design fits both left and right hand workers.

Permanently attached straps.

A

- Heavy-gauge stainless steel rings are machine welded to give the longest lasting protection against cuts and lacerations.
- Ergonomically designed to give the best fit and dexterity.
- Metal dome snap reduces donning and doffing time.
- Available in full hand style with permanently attached straps, and extended 2-3 inch cuff designs with field-replaceable straps.
- Color-coded adjustable strap denotes size.
- Easy to clean and sanitize.

Double reinforced rings at stress points to extend glove life and eliminate repairs.

WorkHorse® Stainless Steel Metal Mesh Gloves with Claw Hook Closure

Reversible design fits both left and right hand workers.

- The links on glove connect over and under to at least four adjacent rings, making them stronger, safer and more secure than other mesh gloves — even at the seams!
- Heavy-gauge stainless steel rings are machine welded to give the longest lasting protection against cuts and lacerations.
- Ergonomically designed to give the best fit and dexterity.
- Easy to clean and sanitize.

Claw hook style closure. No straps to replace.

WorkHorse® Stainless Steel Metal Mesh Gloves with Spring Closure

Durable stainless steel strap is bacteria-resistant and won't rust.

- Reversible design fits both left and right hand workers.
- Color coded tags and stiffeners for easy size identification.
- Reversible gloves are tapered to contour to the shape of the hand for a comfortable fit.
- Construction is four ring joined, even at the seams to prevent dangerous knife sticks.
- Constructed of high tensile stainless steel rings for the highest protection against cuts, slashes and lacerations.
- No clips or fasteners to snag or come loose, strap is sealed within the mesh for a clean, comfortable and secure fit.
