CERTIFICATE
AgilePM®
Agile Project Management
Practitioner

EXAM BODY
APMG International

COURSE DESCRIPTION

The **AgilePM® Agile Project Management Practitioner** (also known as AgilePM® v3 or AgilePM3) certification course builds upon the Foundation level by preparing participants to apply Agile Project Management (AgilePM) principles in real-world project scenarios.

Designed for professionals tasked with managing agile projects in dynamic environments, this course provides advanced guidance on tailoring AgilePM for complex project requirements. Participants will learn to apply AgilePM concepts to project phases, governance, team structures, and risk management, enabling them to effectively lead agile teams and ensure quality, integrity, and compliance within projects.

COURSE & LEARNING OBJECTIVES

Following the completion of the course, participants will be able to:

- **Apply AgilePM Frameworks**: Implement AgilePM v3 concepts to structure and manage project workflows.

- **Optimize Agile Team Dynamics**: Adapt leadership styles and team structures for collaboration and effective communication.

- **Manage Agile Project Risks**: Apply tailored risk management and governance strategies for agile projects.

- **Oversee Project Planning and Compliance**: Ensure agile projects meet regulatory standards while maintaining flexibility and control.

AgilePM® Agile Project Management Practitioner

EMPOWERING PROFESSIONALS

As MindMagine, we have trained more than 65,000 professionals over Asia and Oceania since 2001.

Our focus in our training is to empower our participants by balancing practical experience and the theoretical background. The participants walk away with knowledge to apply the learnings and the theoretical background to successfully pass the exam requirements.

Our education portfolio ranges from courses in business services and processes to IT services and processes. This portfolio has enabled us to support our clients end to end in their organizations and enable synergy throughout corporate value chains.

COURSE APPROACH

This AgilePM® v3 Practitioner course emphasizes applied learning, using:

- **Scenario-Based Exercises**: Hands-on scenarios that simulate real project environments.

- **Case Studies**: Examples of agile implementation across varied project stages.

- **Guided Analysis**: Practice in analyzing project risks, team roles, and compliance requirements.

COURSE STUDENT MATERIAL

Participants will receive an AgilePM® v3 Practitioner classroom workbook containing all of the presentation materials, course notes, case study and sample exams.

CONCEPTS COVERED

The AgilePM® v3 Practitioner focuses on putting theory into practice. The Practitioner course covers very limited new knowledge from the Foundation course and is focused on applying AgilePM® v3 knowledge in real-world case study exercises that will be carried out in class.

The AgilePM3 Practitioner course will include a deeper look at:

- Team structure and Way of Working

- Risk Management and the AgilePM Approach

- Defining and Estimating the Work

- Responding to change over following a plan

- Delivery Planning

- The multi-team dimension

- Regulatory Compliance

- Demonstrate Control
