

Certified Data Privacy Solutions Engineer Preparation

Course Content

CDPSE is a great certification to level, set and build foundational knowledge around the concepts of privacy governance, data life cycle, and privacy architecture. It could help demonstrating to an employer that the certification holders are key asset to their organization.

With increasing data privacy laws and regulations in over 80 countries around the world, on how data is collected and managed, organizations need to enhance the value of data while maintaining customer trust. CDPSE is the first experience-based, technical certification of its kind. It assesses a technology professional's ability to implement privacy by design which results in privacy technology platforms and products that build trust and advance data privacy.

This CDPSE preparation course will provide in-depth coverage of all three domains (privacy governance, privacy architecture and data lifecycle) tested on the CDPSE exam.

In just to days, you'll learn the required technical skill-set of privacy-enhanced designs in order to build a common understanding of best practices throughout your organization. You'll also learn how to set a journey for your organization to comply with local (Thailand) Personal Data Protection Act.

Course Objectives

Upon completion of the course, the following objectives should be met:

- Understand the specific requirements for passing the CDPSE Exam and attaining your certification
- Review useful, proven information on study and exam time management
- Understand key concepts, tasks and knowledge related to the duties of a privacy practitioner
