

Enterprise Architecture Practitioner Bridge

Course Description

TOGAF® Standard, 10th Edition is a proven enterprise architecture methodology and framework used by the world's leading organizations to meet the increased demands for flexibility and efficiency. Enterprise architecture professionals equipped with TOGAF skill and competency acquired greater industry credibility, job effectiveness, and broaden career opportunities.

For those who are already certified in TOGAF 9, a special certification TOGAF Enterprise Architecture Practitioner Bridge has been created to update your knowledge and ensure your professional standing.

The purpose of this bridge learning path is to enable individuals who are TOGAF 9 Certified to obtain TOGAF Enterprise Architecture Practitioner certification. The bridge option exists to recognize the existing investment in TOGAF certification for individuals who have achieved the TOGAF 9 Certified qualification.

This course will update your TOGAF Enterprise Architecture skill through the changes of principles, frameworks and practices from TOGAF® 9.2 to TOGAF® Standard, 10th Edition as a comprehension to achieve TOGAF Enterprise Architecture Practitioner Bridge Certification and continuing to meet your digital enterprise management career goal.

Course Objectives

This course provide direct path to update and reinforce the critical concepts, framework, application and analysis of TOGAF Enterprise Architecture.

It covers the key learning points and scenarios required to take the TOGAF Enterprise Architecture Practitioner Bridge Exam. During the course, attendees will get the opportunity to prepare for the exam with practice questions.

This course will enable attendees to understand the changes on all the key parts of the TOGAF Standard:

- TOGAF Certification portfolio, which is based on a body of knowledge drawn from the TOGAF Standard, 10th Edition
- TOGAF Enterprise Architecture Practitioner Bridge exam preparation
- The key changes in the TOGAF Standard
- The context within which an Enterprise Architecture practitioner must operate
- How to apply the stakeholder management technique
- How to implement the Architecture Vision phase including its applicable techniques
- How to implement the Architecture Development Method (ADM) Phases B, C, and D to develop an architecture, together with the applicable techniques
- How to implement the ADM Phases E, F, and G to implement an architecture, together with the applicable techniques

Upon completion of this course, the attendees should be able to meet these objectives:

- Know how to apply the TOGAF approach to transform and manage change
- Know how to apply the TOGAF method
- Know how to apply TOGAF techniques
- The prerequisite knowledge for becoming a TOGAF Enterprise Architecture Practitioner
- Confidence in taking TOGAF Enterprise Architecture Practitioner Bridge exam (Exam ID: OGEEA-10B)
