

# Enterprise Architecture Foundation

## Course Description

TOGAF® Standard, 10th Edition is a proven enterprise architecture methodology and framework used by the world's leading organizations to meet the increased demands for flexibility and efficiency. Enterprise architecture professionals equipped with TOGAF skill and competency acquired greater industry credibility, job effectiveness, and broaden career opportunities.

The TOGAF standard course is divided into two parts; TOGAF Enterprise Architecture Foundation and TOGAF Enterprise Architecture Practitioner. Foundation covers the fundamentals and Practitioner runs deep and more into the details of the framework and method of the TOGAF® Standard, 10th Edition. Candidates of Foundation course may choose to study further for Practitioner qualification as needed.

This foundation course provides a strong pathway for digital enterprise management career goals by achieving TOGAF Enterprise Architecture Foundation Certification. This course focuses on the fundamentals of the principles of TOGAF and how to apply TOGAF in realistic enterprise architecture scenarios and provides thorough coverage of the knowledge needed for the foundation level certification.

## Course Objectives

This course helps ensure that an individual has the overall knowledge and understanding of enterprise architecture using the TOGAF approach, sufficient to be able to contribute to an architecture project or work with the results.

It covers the key learning points required to take the TOGAF Enterprise Architecture Part 1 Exam (Foundation). During the course, attendees will get the opportunity to prepare for the exam with practice questions.

This course will enable attendees to understand all the key parts of the TOGAF Standard:

- TOGAF Certification portfolio, which is based on a body of knowledge drawn from the TOGAF Standard, 10th Edition
- TOGAF Enterprise Architecture Part 1 exam preparation
- The concepts of Enterprise Architecture and the TOGAF Standard
- The key terminology of the TOGAF Standard
- The Architecture Development Method (ADM) cycle and the objectives of each phase, and how to adapt and scope the ADM for use
- The techniques available to support application of the ADM
- Applying the ADM, including use of iteration, partitioning, and application in a Digital enterprise
- How Architecture Governance contributes to architecture development
- Architecture content – the outputs produced while executing the ADM

Upon completion of this course, the attendees should be able to meet these objectives:

- Understand Enterprise Architecture concept, standard and framework
- Understand how to develop and mature Enterprise Architecture for organization
- Capable of starting the Architecture Development Project for organization
- Confidence in taking TOGAF Enterprise Architecture Part 1 exam (Exam ID: OGEA-101)

## Course Outline
