HEALTH & CARE

MEDICAL GRADE

Duropal have properties that meet the strict medical and care sector requirements, from anti-bacterial and anti-slip coatings to low swell or fire resistant core materials and low-maintenance or food safe surfaces. With this product variety and our experienced partners for all trades, we offer you everything from a single source. For high-quality solutions in the following areas:

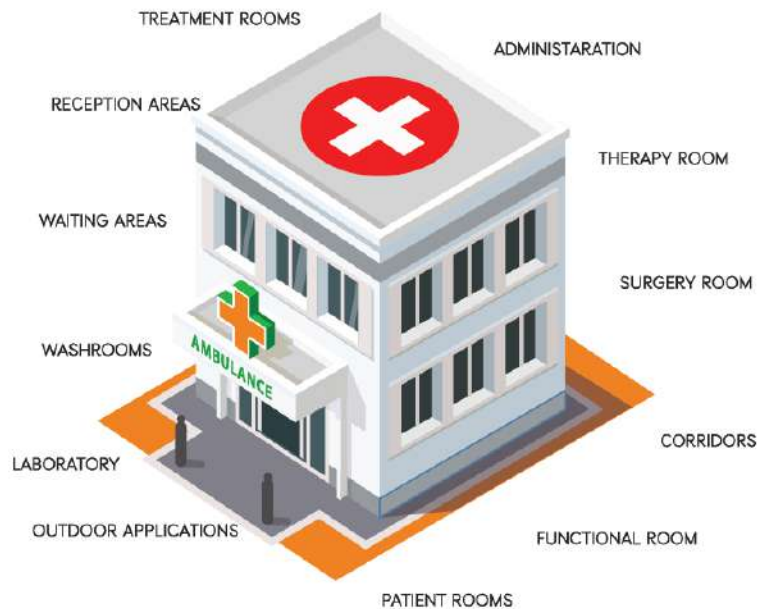

Hospitals , Wellness Center , Medical practices , Laboratories , Operating theatres
Patient rooms , Utility rooms , Office spaces , Treatment and therapy rooms
Care facilities , Sports halls , Fitness studios , Rehabilitation facilities etc.

MEDICAL GRADE

DUROPAL PRODUCTS ARE THE FIRST CHOICE FOR
HEALTHCARE ENVIRONMENTS

MADE IN GERMANY

“ Medical facilities must meet special requirements – this applies to the buildings themselves as well as their interiors. In the Health & Care area, Duropal offers the perfect wood-based materials that meet all design and functionality needs. ”

Health care industry interiors that are fit for purpose. Whether anti-bacterial, static dissipative, fire-retardant or non-flammable – we have the right "prescriptions" for high quality and robust interior fit-outs that also look great, from reception areas and public spaces to treatment and patient rooms as well as operating theatres and laboratories

Chemical Resistance

PRODUCT INFORMATION

The cleanability and good disinfectability is supported by the fact that laminates are made of duroplast resins which create a stable, resistant and reactivatable material. In addition, the surface is completely sealed, which means that it is free of pores. Dirt and germs cannot settle on it sustainably.

Free of pores

Food safe surfaces

Dirt and germs cannot settle on it sustainably

DESIGNED FOR A **FUTURE WORTH LIVING**

In concrete terms, this means that we certify our processes throughout the entire value chain – often far beyond what is legally required. We attach great importance to being as transparent as possible for our customers and partners. Our environment management systems at our locations are certified according to DIN ISO 14001 and ISO 50001. Also we belong to the Quality Association for Wood-based Panels and have certifications according to FSC® (License Code: FSC® C011773) and PEFC™ (License Code: PEFC/04-32-0828). And if you want to know more, just contact us. We will be happy to give you detailed information!

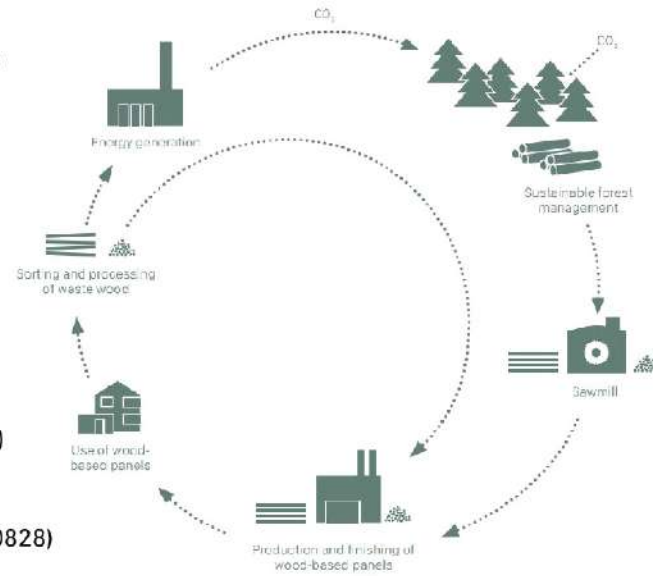

DIN ISO EN 14001 and ISO 50001

Synchrone pore

Innovative high quality laminates in standard grade which give the look of real wood, "Feelwood"

The particular feature of synchronous pores is not only their feel, but also their appearance which makes them perceptible – visible.

Synchrone pore surface represents the type of wood with a great naturalness or a scrap wood character which is imbued with particular naturalness.

This trend duality is also embodied by the new woodgrain decors. The synchronous pore is the authenticity that you can see and feel.

Post forming grade

Made in Germany

Post-forming Worktop with particleboard, surface bonded with highly resistant DUROPAL HPL to EN 438. Post-forming Worktop HPL is used for a variety of different purposes. It is most commonly used in cabinetry and serves as an effective method of wrapping edges on laminate countertops.

Worktops

Width: 600 mm. (Customer width available)
 Length: 4100 mm.
 Thickness: 18/18 mm.
 Postformed: 1 long edge

Breakfast Bars

Width: Customer width max 1100 mm.
 Length: 4100 mm.
 Thickness: 18/18 mm.
 Postformed: 2 long edge

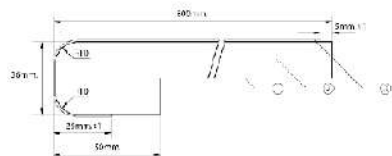

Area of Application

DUROPAL worktops can be used wherever very high demands are made on surface resistance and durability. Thanks to their hygienic advantages, the classic areas of application are in modern kitchens and bathrooms, canteens and restaurants, as well as doctors' surgeries, in laboratories and shop fitting, but also for industrial and commercial workplaces.

Magnet

DUROPAL

Perfect magnetic effect for walls, partitions and wall paneling. Duropal magnetic panels provide a high adhesive force which keeps documents etc. securely in a vertical position. Moreover, the panel can be used over large areas, even up to the height of the ceiling. They can be written on with chalk or suitable markers and are easy to clean.

Magnetic panels are ideal for design-oriented solutions in the offices, schools, nurseries, nursing homes, public institutions, or in shop fitting and trade fair stand constructions

The decorative surface and the core consists of paper layers that are impregnated with thermosetting resins. The resins harden completely during the manufacturing process by heat and high pressure. They form a stable, resistant and non-reactive material. We manufacture the panels without the use of halogens, heavy metals, preservatives, wood protectors or organic solvents.

Available in format 1300 x 2450 mm, 0.8 mm, thick.
Each décor is available in Top Velvet texture.
