

InfraSuite Manager

Have the entire data center at your fingertips!

- InfraSuite Manager integrates all facilities and IT equipment on one platform.
- InfraSuite Manager is Delta fully featured DCIM software solution that optimizes data center performance and life cycle management.

Precision Cooling

- Highly-efficient variable fan speed control saves 27% of power if fan speed reduced by 10%

Power Distribution System

- Power Distribution Unit (PDU): Modular and hot-swappable output breaker with transformer
- Remote Power Panel (RPP): PDU without transformer
- Rack-Mount Remote Power Panel (rRPP): An ideal power distribution solution to small datacenters
- Rack Power Distribution Unit (RPDU): Reliable branch circuit breaker protection

Rack and Accessories

- Modular server racks with high perforation rate over 70% which increases heat dissipation
- Avoids cold and hot air mixture to significantly improve PUE < 1.5

UPS System

- Fully modular design. Hot-scalable and hot-swappable.
- Ultra-integrated system with power supply, power distribution and runtime.
- Output PF = 1
- Leading power efficiency up to 96%

Management Philosophy for Data Center Optimization

- Measurement**
Measure and monitor the overall data center environment in real-time from a central dashboard
- Analytics**
Create a virtual model of the infrastructure to digitally map the relationships between all these components
- Plan**
Manage the data center better based on insightful historical information and trend analysis with well-grounded planning
- Action**
Define actionable solutions and configurations to execute
