

## VF BRAID Reinforced by metal wire : Model VALQUA No. VFX-15

**Product name :** VF BRAID reinforced by metal wire

**Feature 1 :**

This is an expanded graphite braided packing that can be used on its own under high temperatures and high pressures by reinforcing the expanded graphite yarn (thread) using a thin metallic wire to improve pressure resistance.

**Feature 2 :**

No.VFX-15 can be used individually as a stem seal.

**Feature 3 :**

Being highly excellent in heat resistance, chemicals resistance and radiation resistance, as well as having favorable sealing property and maintenance freeness, these are applied in various industrial fields.

**Feature 4 :**

These are used as valve shaft seals for water, steam, oil, acid, alkali, heat transfer oil, solvent and gases (excluding oxygen, oxidizing agent, strong oxidizing acid).

**Color / Print :**

Black

Valve	Recommended Application
Temperature limit (°C)	650<400>
Pressure limit (MPa)	25.9
pH	0~14
Rating: ANSI	Class 1500

Remark: Temperature limit <400°C> : Temperature limit in air.
