Noiseless heater

Model : QH-1

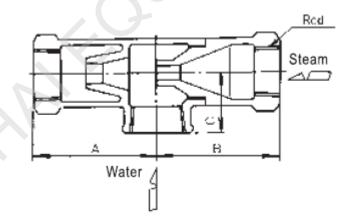

This product can be used to reduce noise and vibration that occur when steam is blown into water for making hot water. It can also be used for heating bathtub or other open type hot water tank (66°C or below).

Specifications

| Model name | QH-1 | | | | |
|------------------------------------|----------------|-----------------|--|--|--|
| Code name | QH1-F | QH1-D | | | |
| Applicable pressure | Max. 0.7 MPa | | | | |
| Warning sound temperature limit | 66°C | | | | |
| End connection | Screwed JIS Rc | | | | |
| Materials | Cast bronze | Stainless steel | | | |

Dimensions

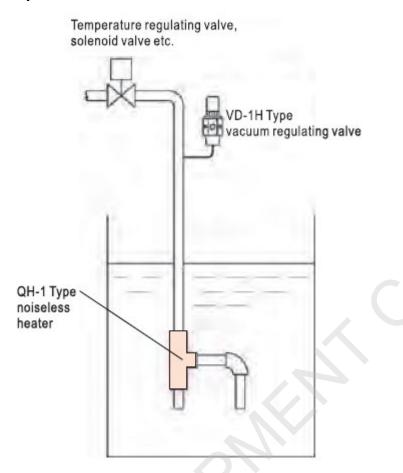

| Depending | on the size | and material c | of valve, the | e structure may vary |
|-----------|-------------|----------------|---------------|----------------------|
|-----------|-------------|----------------|---------------|----------------------|

| Mass (kg) | 0.36 | 0.55 | 0.86 | 1.8 | 2.4 | 4 | 11 | 14 |

Piping example

Note:

1. Submerge the Noiseless heaters into water. If this is not possible, place it as near as possible to the surface of water. 2. Install VD-1H Type vacuum breaker for preventing backflow of water that may occur when steam supply is stopped.

Capacity chart

HOW TO USE THE CHART

The dashed line (- - -) stands for steam consumption. The solid line (____) stands for average heat conduction.
