

VALQUA TEX Sheet Gasket : Model VALQUA N314

Product name: VALQUATEX Gasket

Feature 1 :

This type of gasket is made from a rubberized metal wire-reinforced ceramic fiber fabric finished to the required flat shape.

Feature 2 :

VALQUATEX are used for flanges of equipment manhole or exhaust gas ducts.

Feature 3 :

Upon request, products with surface treatment using graphite are available. (It facilitates peeling off gaskets when disassembling joints.)

Applicable fluids :

Air, Nitrogen gas, Inert gas, Exhaust gas.

Application :

VALQUATEX are used for flanges of equipment manhole or exhaust gas ducts. Because of insufficient sealing property, these gaskets should be used in locations where leakage to some extent is permitted
