

Nautronic scoreboard system

For 30 years Nautronic has provided the world with scoreboards, making the spectator experience even more exciting.

Nautronic designs and develops scoreboards for a wide range of sports. We offer standard solutions as well as custom-built scoreboards. Our scoreboards can be seen in arenas and stadiums - large and small - all over the world.

Nautronic scoreboards are designed to give spectators, players and sponsors the best possible experience of the game. Our worldwide partners advise you on the scoreboards best suited to your needs, see to it that they are installed correctly, that you receive a thorough user introduction and that any necessary support is delivered fast and efficiently.

ABOUT NAUTRONIC

Nautronic was founded in 1984, and our team consists of experienced and highly skilled designers and technicians, dedicated to the continuous improvement of the products we offer, constantly striving to give both spectators and athletes an even better sports experience.

Many of our staff at HQ have been with us for years and have been involved in the development of our products from the start. Wherever you are, we have a team of skilled partners ready to advise you on the choice of the right product for you.

From Denmark to King Abdullah Sports City in Saudi Arabia

Arab sports spectators informed by Danish scoreboards and LED screens in the King Abdullah Sports City.

To be chosen by the globally renowned **Saudi Aramco** as supplier for the King Abdullah Sports City, is an honour and the Nautronic team feels immensely proud.

The site 60 km north of Jeddah, Saudi Arabia, is one of the most prestigious stadiums in the arab world! The King Abdullah Sports City is more or less invaded by Nautronic equipment: A cube containing

three video screens on each side is now hanging in the indoor multisports arena, along 7 Nautronic scoreboards in other arenas. Two FIBA level 1 scoreboards are mounted in the basketball arena. Finally, a 57 m² outdoor video screen informs the spectators in the athletic stadium.

In total, more than 4 tons of sports equipment were delivered.

Visibility of Nautronic scoreboards

Nautronic digits are red and yellow and come in many different sizes to suit visibility at different distances. The digits contain a high number of LEDs and they have a 10 year warranty.

SIZES/ DIODES:	16 cm digit 77 diodes	21 cm digit 105 diodes	26 cm digit 169 diodes	33 cm digit 285 diodes	46 cm digit 338 diodes

The LEDs are very strong due to SMD technology applied. The scoreboard has a 170° viewing angle due to the bright LEDs and acrylic front plate ensuring no reflection even in direct sunlight.

Handheld remote controls

All Nautronic remote controls communicate via radio frequencies - 2,4 GHz - for high speed, noise communication. Radio frequencies also enable up to 8 systems to function in a single sports centre using different channels.
