FBC™ System Compatible Product Finder

The FBC™ System Compatible Program is the only known program of its kind designed to increase user confidence and help eliminate the guesswork about chemical compatibility. The Program is designed to test and monitor ancillary products on an ongoing basis to ensure chemical compatibility with FlowGuard®, BlazeMaster®, and Corzan® CPVC piping systems.

To find the products that are chemically compatible with FlowGuard, BlazeMaster®, and Corzan® piping systems, select **either**:

Category: to view products by product type (i.e., caulks, sealants, wraps). Once you select a category, you will be prompted for your geographic region. Not all products are available in all regions.

- OR -

Manufacturer: to view product manufacturers in the FBC System Compatible Program.

Category

Manufacturer

The following products meet the standards and are deemed to be FBC™ System Compatible.

Leak Detectors

Product	Americas	Europe/Middle East	Asia-Pacific
Better Bubble™	✔		

Thread Sealants

Note: Teflon® tape is recommended as the preferred thread sealant.

Product	Americas	Europe/Middle East	Asia-Pacific
Blue+	✔		
No. 100 Virgin™	✔		
Pure White	✔		
T Plus 2	✔		

The FBC™ System Compatible Program is a resource made available to manufacturers of ancillary products intended to be used with CPVC to help determine whether a product is chemically compatible with Lubrizol's FlowGuard®, BlazeMaster®, and Corzan® CPVC piping systems. Other manufacturers and/or brands of CPVC piping have not been tested as part of the FBC™ System Compatible Program. The FBC™ System Compatible program is, therefore, only applicable to the chemical compatibility of ancillary products with the Lubrizol brands of FlowGuard, BlazeMaster, and Corzan CPVC piping systems.
