## **GOYEN** BULKHEAD CONNECTORS

PRODUCT LEAFLET

### DESCRIPTION

Goyen produces a range of aluminium diecast bulkhead connectors designed to ease the installation of cleaning systems onto dust collectors. These components eliminate the requirement for welding and allow easy removal of cleaning systems and blowtubes for maintenance purposes.

### **SUITABLE FOR**

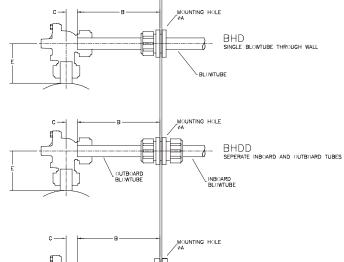

Most reverse pulse jet dust collector installations and their variations including bag filters, cartridge filters, envelope filters, ceramic filters, and sintered metal fibre filters.

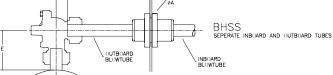

- 1. Dresser nut and slide seal assemblies are for sealing purposes only and are not intended for valve or blowtube restraint.
- 2. Blowtubes and valves must be independently restrained.
- 3. Do not pressurise system until all valves are fully secured.
- 4. Fully relieve pressure before conducting any work on the cleaning system components.

Note: We are engineering partner as a total system solution provider, GOYEN manufactures a range of components to ensure cost effective and reliable cleaning system design, installation and operation within a reverse pulse filter. Within a reverse pulse filter the overall cleaning efficiency and long term performance of the bags or cartridges are critically dependent upon to control of the cleaning air into the individual filter bag or cartride. GOYEN products are produced to exacting tolerances and quality standards to ensure their effectiveness within any reverse pulse filter. As a comprehensive solution provider, We have great quality control procedures. The calculate various system designs and can work together perfectly. Finally we are fully committed to maintaining environment quality together.
